THREE LETTERS

IN ANSWER

PREFACE.

I HOPE that those who do me the honour of perusing these Letters will not take them for more than they are worth,—a simple, and, I trust, faithful record of impressions as they arose, and incidents as they occurred, such as I conceived would be read with interest *at home*. In preparing them for the press, I have divested them of much that could possess no general interest. If certain allusions to members of my family circle have been allowed to stand, it is only because they arose so naturally out of the circumstances, that they serve to illustrate them, or that, in one or

two instances, I could not find it in my heart to cut them out.

I may be permitted to allude to the subject of many reflections in these volumes—the literal accomplishment of prophecy, as displayed in the actual condition of Egypt, Edom, and Syria. Others have borne their testimony; it is but adding a stone to the cairn, yet I cannot, and ought not, to withhold mine.

I embrace with pleasure this opportunity of expressing my sincere acknowledgments for the uniform courtesy and kindness I experienced during my recent tour. To —— Tibaldi, Esq., of Alexandria, and his amiable lady;—to Colonel Campbell, her Majesty's Consul-General in Egypt, — to M. Piozin, Vice-Consul, — to Dr. Walne, John Hannay, Esq., and the Rev. Theophilus Lieder, at Cairo;—to the Reverend the American Missionaries, and —— Moore, Esq., at Jerusalem;—and to Nathanael Moore, Esq., British Consul at Beyrout, (whose courtesies I regret having been prevented from personally acknow-

ledging,)—my peculiar thanks are due. On my obligations to Mr. Farren, Consul-General in Syria, I will not dwell in this place.

I cannot conclude without adverting to the lamented decease of my friend and near relation, Mr. William Wardlaw Ramsay, the companion of the greater part of my tour.

If excellent abilities and sound judgment, expanding and maturing every day,—if singular genius for music and drawing, and a general love for the fine arts, balanced by an enlightened taste for science and natural philosophy,—if sweetness of temper, a warm, kind heart, and sincere but unostentatious religious principle—be qualities to render a character attractive and estimable, and to enhance the sorrow of surviving friends for the loss of one who, if spared by an all-wise Providence, would have been a blessing to his family, and an ornament to society—such a character, such qualities, were Mr. Ramsay's.

I have extracted from his private journal, and appended to the present work, in the shape of

notes, many passages which, I think, will be read with interest by every one into whose hands these volumes may fall.

Haigh, Feb. 1838.

Since writing the above, I have been favoured, by the kindness of Mr. Farren, with a most interesting communication on the present state and prospects of Syria. If I have myself refrained from adding to the few general observations which forced themselves upon me, while resident in that unhappy country, it has been only in consequence of the strong conviction that, while the casual visiter has the right, and, at certain periods, almost incurs the obligation, of recording *what he sees*, the springs of evil, the sources from which the tides of misery flow, are remote and inaccessible to him without the assistance of a guide, conversant with all the tortuous and gloomy avenues that lead to them. To Mr. Farren, therefore, as to one whom many years' residence in the country,

and many years' study, under peculiar advantages, of the character and prejudices of the natives, pointed out as the man of all others most able to give me the information I desired—I applied; and the letter, which closes the text of these volumes, was his answer to my request.

To invite the attention of the Public to a document emanating from such authority, and at such a moment—when Mohammed Ali is said to be on the point of openly renouncing his allegiance to the Porte, and England, it is said, actually hesitates which party to espouse! would be superfluous.

LETTER III.

Voyage to Cairo—Sais—Introduction to the Pasha—
Tombs of the Mamaluke Sultans—Cairo at sunset—
Bazars—Courtesy to Franks—Garden of Roda—Old
Cairo—Cemetery of the Mamaluke Beys—School at
Boulac—Printing-press—Egyptian Christians—Jews
—Magicians, Jugglers, &c. . . . 31

LETTER IV.

Visit to the Pyramids—Pyramid of Cheops—Evening
with Caviglia—Pyramids of Cephrenes and Mycerinus
—Arab traditions respecting the Pyramids—The

Sphinx, a talisman — Heliopolis — The Pyramids probably built by the Pali, or Shepherd-Kings of Egypt, afterwards the Philistines, in the time of Abraham 63

LETTER V.

Our Dahabieh — Night-Scenes on the Nile — Pyramids of Saccara, Dashour, &c.—The False Pyramid—Minieh—Story of Ebn Khasib — Siout — Tombs of Lycopolis — Stabl Antar—Traditions of the Copts—Ruins of Abydos —Palace of Sesostris—Kenneh . . . 99

LETTER VI.

Thebes. Temples —Sculptures — Tombs — Fulfilment of the Prophecies.

Esneh — Edfou — Essouan — Ascent of the Cataracts — Nubia — Wellee Kiashef — Wady Halfa — Descent of the Cataracts—Wreck, and detention at Essouan.

Temples of Herment—Dendera—Ombos—Tombs of Benihassan—Memphis—Pyramids of Saccara and Dashour —Cairo . . . 126

EDOM AND THE HOLY LAND.

LETTER VII.

Journey to Mount Sinai. Desert of Suez — Mara — Route of the Israelites — Wady Shellal — Wady Mokatteb — Wady Feiran — Ascent to the Sinaite Mountains — Ascent of Mount St. Catherine—Of Gebel Mousa — Of Gebel Minnegia, possibly the real Sinai . 249

LETTERS ON EGYPT.

“All were but Babel vanities! Time sadly overcometh all things, and is now dominant, and sitteth on a Sphinx, and looketh upon Memphis and old Thebes, while his sister, Oblivion, reclineth demi-somnous on a pyramid, gloriously triumphing, making puzzles of Titanian erections, and turning old glories into dreams. History sinketh beneath her cloud. The traveller, as he paceth amazedly through those deserts, asketh of her, Who builded them? and she mumbleth something, but what it is he heareth not.

“Egypt itself is now become the land of obliviousness and doteth. Her ancient civility is gone, and her glory hath vanished as a phantasma. Her youthful days are over, and her face hath become wrinkled and tetrick. She poreth not upon the heavens; Astronomy is dead unto her, and Knowledge maketh other cycles. Canopus is afar off, Memnon resoundeth not to the Sun, and Nilus heareth strange voices. Her monuments are but hieroglyphically sempiternal. Osiris and Anubis, her averuncous deities, have departed, while Orus yet remains, dimly shadowing the principle of vicissitude and the effluxion of things, but receiveth little oblation.”

SIR THOMAS BROWNE.

LETTERS ON EGYPT

"All were but labels vanished! Time's empty overgrowth
All things and is now dominant, and reigns on a plain,
and stands upon Memphis' ruins, and looks down on his
sister, Oblivion, reeking her garments in a pyre,
gloriously triumphing, making pyres of Thian's ever-
lasting, and turning old glories into smoke. History
sinks beneath her wheel. The traveller, who gazes
amazedly through those deserts, asks of her, Who
budded them? and she mumbleth something, but what it
is he heareth not."
"Egypt itself is now becoming the land of oblivion
and desolation. Her ancient civility is gone, and her glory
bath vanished in a phantasma. Her golden days are
over, and her face hath become wrinkled and tawny. She
poeth not upon the heavens; Astronomy is dead unto
her, and Knowledge maketh other eyes. Canopus is
star off; Almon's resonance not to the Sun, and Nub
hearth strange voices. Her monuments are but mere
physically sentimental. Giza and Abusir, her great
ruined cities, have departed, while Giza's ruins remain,
their showing the principle of existence and the
duration of things, and revealing their station."
— Sir Thomas Brainerd

LETTERS ON EGYPT.

LETTER I.

Cadiz—Gibraltar—The Cork Wood—Carteia.

TO LIEUTENANT COLONEL LINDSAY.

Gibraltar, November 10, 1836.

How I longed for you yesterday, dear James, at Cadiz ! and here, too, at Gibraltar, happy should I have been this morning to have had your company during the glorious scramble I have had over every ridge of the old Rock ! But of Cadiz first :—I thought as we sailed away yestreen, (a delicious autumnal evening,) I had never seen a lovelier sight,—her long serrated ridge of white

buildings sharply defined against a glowing sunset sky—Rota glittering, like a town of King Salem's sprung up from Ocean, at the further extremity of the bay, tipping its horn, as it were, with a diamond crown—the lateen sails scudding around us like gigantic nautiluses, stooping over the green waters like the beautiful sea-birds that were sporting in every direction—oh ! it was lovely, very lovely !

We had but four hours allowed us to visit Cadiz ; I threw my shyness to the winds, and used my eyes, stared into every nook and corner, and at every one, man and woman, we met. But you cannot have forgotten the scene, though long familiarity with its details may have effaced the remembrance of your first general impressions ; to me it was all “ fresh and fresh, new and new,” —a living, breathing, moving *tableau*, a waking dream rather, for whether I was in or out of the body I can scarce tell, now that I reflect on the vision, so many ideas familiar to my fancy were then presented to my eyes in the warmest glow of reality ; all, too, intensely Spanish :—the long black cloaks of the sleepy hidalgos, long as their names, threadbare many of them as the mantle of chi-

valry their ancestors wore so gracefully—the Moorish faces, conical hats, and sashes of the lower, and, as they seemed to me, far nobler order—the cigarillos, common to all—the fans, mantillas, the black eyes, beautiful feet, and graceful gliding gait of the *Señoritas*—but oh! what frights the old women are! and then the painted balconies above, that give such a character to the straight narrow stradas—flowers in most of them, but alas! the “fairer flowers,” Eve’s daughters, were few or none visible upon them—and the dazzling whiteness of the houses; everything, too, as clean as if the *Gaditanos* were Dutchmen,—it was like a scene of enchantment; to say nothing of the exquisite delight of being on Spanish ground, and hearing the language of Calderon and Cervantes on every lip that passed me.

I saw but two or three priests, not idly sauntering about, as in the palmy days of Rome, but walking, it seemed to me, with an object,—slowly, however, as if their ponderous shells of hats were too heavy for them, and crest-fallen; in this respect your Spanish recollections must vary from existing circumstances; the convents,

too, were all shut up, and the bells over the gates looked as if conscious of having tolled their last. We knocked loud and long at one of the conventual buildings, in hopes of seeing some pictures once shown there; but no porter hurried to the gate, the street was silent, only one boy to be seen in it, and he could not tell us who had the keys.

The cathedral, however, is still building—a most superb edifice, of the richest Corinthian architecture, but overloaded in many places, I thought, with ornament; the choir, however, is truly beautiful, all marble—indeed the whole is so, and exquisitely finished. Yet I do not like the Corinthian; the “airy pillar” and the “decent matron grace” of the Ionic are far lovelier, far purer, far holier; the Doric and Ionic remind one of Adam and Eve as they walked in naked innocence, and in all their original brightness, through the bowers of Paradise; but the spirit of the Corinthian is meretricious, too like that of the Laises and Co. of old Corinth herself: this is fanciful, perhaps, but oh! there is a deep poetry, a hidden melody, in architecture, “frozen music,” as it has been

called, but it thaws now and then, when the fancy warms, and discourses most eloquently to her ear and eye.

How beautiful, by the way, are Schlegel's criticisms on the Gothic architecture ! Did A—— tell you I have him with me ? Shakspeare has been my chief reading since I left Old England ; this she will be glad to hear. I have read over again several of his plays, but exquisitely beautiful as they are whenever he is *himself*, the pure poet, I cannot away with his clowns and vile puns, *grossièretés*, and *double entendres*, bad enough even among men, but which he allows even his heroines to hear, ay, and understand, ay, and reply to. But Desdemona is perfect throughout ; I was trying her the other evening, as I lay in my cabin, by the severest ordeal, St. Paul's exquisite delineation of Charity, or, as it should be translated, Love ; Shakspeare must have had it in his thoughts ; it fits her in every point, especially in her unsuspecting purity, " thinking no evil ;" observe her wonder in what manner her husband could think her false, and oh ! what a contrast between her mind and Emilia's at the end of the fourth act, and, again, between her

and Juliet, the poetical, passionate Juliet ; I remember no one simile or metaphor that Desdemona utters, and Juliet's fancy is rich as the orange groves of Mola di Gaeta, and sparkling as the waves that ripple to their feet, but she is "of the earth, earthy," in comparison with the pure azure heaven of Desdemona's mind, which one can gaze up into as into infinite space, unarrested by a cloud, unless of tears and sorrow ! How beautiful, though, and how natural is the moonlight scene between Juliet and Romeo ! When I think on it, I almost fear I have judged her harshly—and yet, no.

It has just struck twelve ; I am sitting with my window open, a brilliant starlight night, the air balm ; I could almost expect a visit from the Diable Boiteux, and should not be sorry to have the houses of Gibraltar unroofed for my inspection : and this reminds me of one of the things that most interested me at Cadiz—a visit to the terraced roof of M. Campan's house—a kind old French merchant, our fellow-passenger, who entertained our party most hospitably. It was the best possible commentary on many a passage, not only in Spanish but Eastern romance ; with a

short rope-ladder one might travel over half the town. The house itself seemed but just finished, yet, in character, was quite Moorish; a court in the centre—balconied galleries opening upon it at each story—mats, &c. &c.—everything calculated to promote coolness.

I kept a sharp look-out for traces of the Moors, and they are very visible. I thought of riding across country to Gibraltar, but was advised to give up the idea: the country, they said, was uninteresting, (I should have seen manners, however,) and, what decided me, my time here would have been much curtailed; I came on therefore by sea, and this morning, about nine, we anchored under the Rock of Gibraltar.

I am glad that I saw Cadiz, a thoroughly Spanish town, before coming to this mongrel neutral ground, intensely interesting though it be. Bedreddin Hassan, awaking at the gate of Damascus, entered an unknown, but still an Eastern city; the contrast to him was nothing to what it was to me, stepping off the quay of Cadiz, surrounded by wild Cadesians, with their Calabrian-like hats, swarthy as their Phœnician ancestors, to

be set down among English uniforms, sentries, and all the pomp and circumstance of British soldiery, guards changing, officers riding past, and all speaking English. But nothing of this incongruity offended our eyes as we approached the Rock—Europe and Africa,

“ A palace and a prison on each hand,”

of Nature's architecture, or such rather by the God of Nature's decree ; the morning was gloomy, a lowering mist hung heavily over the Rock in front of us, and I could almost have fancied we were arriving at the Table Mountain instead of the northern pillar of Hercules. Mount Atlas was but dimly seen in the distance, but a purer light gleamed over Algesiras, as if the rays of chivalry still lingered over the death-scene of “ the good Lord James of Douglas ;” as the day advanced, the clouds disappeared, and when I gazed around me a few hours afterwards from the Peak of Tarif, a sunny haze was the only resemblance the scene bore to our northern atmosphere.

I need not tell you of the excavations, galleries, St. George's Hall, the blasted watch-tower, &c. I scrambled over the whole mountain, taking a

most intelligent artilleryman as my guide, a countryman, as I ascertained by the first word he spoke—his sergeant is a Lindsay from Dunse. I feared we should not see the monkeys, but there they were in numbers, apparently on excellent terms with the goats, their only companions on the height.

How beautiful the palmetto is! and oh! how A—— would have enjoyed our return through a perfect garden; strange tropical-looking plants, the fantastic prickly pear, and the aloe, hedging the pathway, and her old Italian acquaintances, the fig, almond, orange and lemon, and the grateful plane-tree—ay, and the Scotch fir, growing luxuriantly (and the rich vines, too) on the lower zone of the mountain. We descended by the Mediterranean Steps, as they are called, cut in the precipitous face of the rock, and winding round towards Europa Point; the broad Mediterranean—with those picturesque lateen sails that look as if, at the approach of a storm, they would furl themselves up and sink to the bottom—expanded in front of us, glowing in the waning sun,

—A leaf of gold

Of Nature's Book, by Nature's God unrolled.

I have just been leaning out of the window listening to a serenade ! all below me dark as Erebus, the raven down of night, and all silent save the “lively guitar,” and the deep voice of the caballero mingling in harmony, and swelling richly on the night-air. And when the last note died away, I could just hear the closing strain of another, far, far off, dying into silence like the echo of the “song of the olden time” I had just been listening to. Music such as this might have been lingering on the ear of Melancholy, when Albert Durer surprised, fell in love with, and immortalised her.

Very pleasant food all this for midnight musing, yet daylight too has its attractions, and I then look down on a motley and ever-shifting scene, all nations seeming to meet here as at Venice, though Gibraltar, to be sure, is anything but “enchanted ground ;” the Moor, with his white turban, burnoosh, and trowsers ; the Jew, with his black skull-cap, beard, and Israelitish face, the “index of his pedigree” the wide world over—I saw one stalk past this morning with the very air of a Maccabee, his haughty mien, and the scorn throned on his erect brow (or I wronged him) alike contrasting with the humble subdued gait of his

brethren, and the holiday attire and light springy step of the Andalusian peasant,—the contrast of a “gay Gordon,” to a “black Douglas”—no disparagement, surely, in a comparison with the Wallace of Judea; then comes the mule or donkey-driver, haranguing his beast as he trudges behind it, side by side, oh atrocity! with an English red coat! Here, at least, “motley is the only wear.” And now, dear James, *buenas noches*, and God be with you! I will not wish you the misery of living a thousand years. More to-morrow.

To-day, November the 11th, we have had a delightful gallop, Missirie and I, into Andalusia, past La Roque, to the Cork-wood, about ten miles from Gibraltar; the scenery is quite beautiful—the day, at first rainy, cleared up ere we had ridden half a dozen miles, and the afternoon was lovely. From a ruined Moorish tower in the centre of the wood, we enjoyed a most beautiful prospect over the long vale we had passed through, wooded with cork-trees, olives, vines, oranges, lemons, and one noble palm-tree near a convent, a steep range of mountains closing the vista at one end, the Rock at

the other, rising over the waves like some vast Pre-adamite sea-monster.

Returning, we rode here and there, this way and that, in search of the old town of Carteia, supposed to have been the first founded by the Phœnicians after passing the pillars of Hercules. After a long search we found it; the theatre is clearly traceable, scooped out in the side of the hill, looking towards Gibraltar; the background of the scene must have been noble indeed, the Mediterranean rushing between the two continents.

I am more and more pleased with Missirie; he is the most attentive creature possible, good-humoured, observant, and intelligent. I had much conversation with him this morning during our ride; he is really an agreeable companion, having read not a little by fits and starts, and having seen so many countries. He had studied for two years at Odessa, when the Greek revolution broke out, and then joined the patriots. We are on the best terms, and I am sure we shall continue to be so. His facility in acquiring languages seems extraordinary. English he speaks with singular correctness. ⁽¹⁾

Saturday, November 12.

I had no idea this letter would go so soon, but a steamer, I have just heard, sails for England in a day or two, and as I have not time to epistolise my mother at length, and she will be anxious to hear all my adventures, I have presumed to direct this letter to her, begging her to read and forward it to its rightful owner. We have a heavenly day, "blue above and blue below," for our departure. By-the-bye, they have an admirable garrison library here; the catalogue is well drawn up on the plan of that of the Royal Institution by Harris. I think I should like to spend a month or two here; nowhere, I suppose, could one enjoy at once such a climate and such a library.

Adieu.

LETTER II.

Voyage to Malta—San Giovanni—Ruins and Catacombs
of Alexandria.

TO THE COUNTESS OF BALCARRES.

Malta.

WE left Gibraltar, my dear mother, on Saturday afternoon, the 12th, and have had charming weather, and a delightful voyage to Malta. Sunday and Monday we were coasting Spain and Barbary, and admiring the mountain ridges that frown from either shore, awakening memories how interesting! of Juba and the Romans, on the one hand—of the Xarifas and Fatimas, the Zegrís and Abencerrages, of poor Boabdil, and of Gonsalvo de Cordova, on the other!

About eight on Monday night we touched at Algiers—thrilling name! The crescent moon was gleaming over it, but not very clear; the crescent is pale, pale all over the East now. We landed a

young Dane there, the son of the Danish consul at Tangiers, and one of the Royal Guard of Denmark ; he was going to join the French expedition against Constantina, and I really felt sorry when he left us on such a perilous adventure. I found him full of information, and very intelligent, particularly on the subject of Northern Antiquities ; he sang me several of his Danish songs as we walked the deck.

Still coasting the Barbary mountains—so runs the log-book ; pass Bona, old Hippo Regius, dear to the memory as the home of St. Augustine—but during the night, alas !—Bizerta—the Cani rocks—Porto Farina, Cato's Utica, and Cape Carthage, behind which lies the site of Dido's palace, Cyprian's garden, where the soldiers seized him—generous, noble-minded Cyprian ! Then across the Bay of Tunis, with a beautiful view of the mountains hemming it in to the south ; before weathering Cape Bon, pass the vast and lofty island-rock of Zembra, reminding one, when directly north of it, of the volcanic isle of Sabrina. Bid adieu to the Barbary coast, and for awhile nothing but the sea-circle for our horizon ; presently Gozo in sight—rough rocky hills, but the lights and shadows

beautiful—skim past it through the waves on which Telemachus floated, if Gozo *be* the Isle of Calypso, which I don't believe it was—and lo, Malta, with her deep harbours, picturesque tiers of houses, impregnable batteries, and English shipping! How changed—

But I had little time, or, in truth, inclination, at that moment, to think of days bygone, for scarcely had we anchored in the quarantine harbour, when dear William came alongside to greet me; he had secured me rooms in Beverley's Hotel, and we adjourned thither without delay; he is remarkably well, and we look forward with great pleasure to the prosecution of our tour together.

Oh! the rapture of a first visit to San Giovanni! those gorgeous and chivalric tombs of the Grand Masters and the Knights of St. John! I shall not be content now till I see Rhodes, invested with more *familiar* interest to a clansman of Radulphus de Lindesay, Lord David of the Byres, and Sir Walter,

“Lord of Sainct Johne, and Knicht of Torphicane,
By sea and land ane vailzeant Capitane,”

as Davie Lindsay calls him.

I visited the armoury in the old palace—neither

worth seeing; spacious galleries and chambers, but nothing after Venice; the library, too, full of the fat old folios of the seventeenth century. They seem a curious set, these Maltese: their language is most dissonant, a mere jargon of Arabic, but all speak broken English; their national airs, however, are beautiful, especially one, beginning, "Selloom tal harir," &c., which you will find in my MS. collection of national music; I have not heard it here, nor indeed anything in the way of minstrelsy except "Rule Britannia," which they have been chanting most uproariously in honour of their new governor, Sir Henry Bouverie.

Before re-embarking, I paid another visit to St. John's, by far the most interesting spot at Malta—for this is not the Melita where St. Paul was wrecked. One, the last survivor, I believe, of the old knights, a countryman too of Bayard and Duguesclin, was pointed out to me—a poor, decrepit, feeble old man—alas! alas!

Alexandria, November 30.

We arrived here last Friday, to wit, November the 25th; the day was lovely, the sea of a delicate

light green, the sky exquisitely clear, of a rosy transparent hue, smiling our welcome to the city of Cleopatra, as we sailed into the harbour—then a glorious oriental sunset. There is little or no twilight in these latitudes, and it was quite dusk by the time we reached our inn, riding on donkeys, the general conveyance in this country.

Ah! that was a happy evening! A month's cramp in the cabin of a steam-boat exchanged for freedom and terra-firma, and that terra-firma Egypt, still the land of mystery, still a land of beauty!

“ 'Tis here that the feathery palm-trees rise,

And the date grows ripe under sunny skies—”

and never will palm-trees rustle more melodiously, never will the moon and stars twinkle through their transparent foliage with more loveliness, never shall I enjoy the stillness and repose of an Eastern night with more thrilling pleasure, more thorough enjoyment, than I did that evening, walking in the pretty little garden behind Mrs. Hume's hotel, or resting in an arbour of trellis-work under a branching vine, meditating on the past and present, and anticipating the future, in which (unless it be the mirage) I see many a hun-

dred miles of Father Nile, many a lengthening vista of temples and colonnades, outstretched before me; Nature and Art beckoning me on, and offering me the fruits of knowledge as the reward of my wanderings. There is nothing, indeed, *new* to discover, but are not Vesuvius and Naples *new* to the eye that has never hailed them before?

We have been riding about ever since our arrival—over ruins, and nothing more. A town, half Turkish half Frank, turbans and hats seeming equally at home in it; mounds beyond mounds of rubbish stretching away to the south, east, and west of it; whole lines of ancient streets traceable by the wells, recurring every six or seven yards, by which the contiguous houses, long since crumbled away, drew water from the vast cisterns with which the whole city was undermined; wretched hovels clustered here and there in the suburbs, and towering groves of date-trees “scattered at wide intervals” over the cheerless solitude—such is the present aspect of Alexandria. The Desert has done for her what Vesuvius did for Pompeii—buried her so completely, that all we see above the present surface has been brought to light by excavation; not quite *all* indeed—Pompey’s Pillar

and Cleopatra's Needle, both misnomers, are still erect, solitary monuments of the flight of time, of the youth and the decrepitude of Egypt; for the Needle stood at Heliopolis, the On of Scripture, three thousand years ago,⁽²⁾ and the shaft of Pompey's Pillar adorned the temple of Serapis and the library of the Ptolemies till it was removed to its present site, and furnished with a capital and base, in honour of Diocletian, whose name Mr. Hamilton was the first to decipher, the whole inscription, long supposed to be entirely lost, having been recovered, letter by letter, by the united acumen of a few wise men of Britain. It is only distinguishable in the strong light of the mid-day sun. ⁽³⁾

One ruin only, just excavated, and a nondescript, will I trouble you with, inasmuch as mine, too probably, may be the only record of its discovery, for these Turks discover only to destroy. Four or five granite columns are still standing on their pedestals of white marble; the rest have been removed; and a few Corinthian capitals, also of white marble, are lying a short distance off, soon probably to be reduced to lime, and applied to as vile purposes, comparatively, as that to which

Hamlet's fancy traced the dust of the royal founder of Alexandria himself. Behind these pillars rises a solid wall of masonry, supported by three arches, on the reverse of which we found vestiges of curious Greek paintings, the colours very vivid, and the subject, it would appear, taken from Homer, the only figure that remained uninjured by the pickaxe being superscribed

Ο Δ Υ C
C Ε Υ C.

We observed, with surprise, three or four coats of stucco laid one over the other, all painted, and the lowest the best. It was merely through the chance encounter of an Italian monk that we were led, through a labyrinth of narrow lanes and groves of date-trees, to this interesting spot.

In Lucas's time, about one hundred and twenty years ago, a superb piazza was traceable in the middle of the ancient town, ornamented with lofty granite columns, and surrounded, to all appearance, by the principal palaces of the city, with a beautiful fountain in the centre. We saw no traces of it: in his day the remains were almost entirely covered with the sand. (4)

As for the far-famed library, its site can only be conjectured; the first library was attached to the palace of the Ptolemies, and was accidentally consumed when Julius Cæsar was obliged to burn his ships in the harbour, to which it was contiguous. We visited yesterday some recent excavations, which have laid bare the remains of a vast edifice, pronounced by antiquaries (I know not on what authority) to be those of the *second* library; but nothing is certain here—not even the date of the catacombs, or whom they were worked by; some contending they belonged to Alexandria, others, to the insignificant town of Racotis, which existed here before Alexandria was founded; ⁽⁵⁾ this can hardly be. Of their Greek *origin* there can be no doubt, the architecture being uniformly Doric.

These catacombs are at some distance west of the city, and highly interesting. We explored them with torches, creeping in many places on our hands and knees. Entering from the north, three chambers, running westwards, lead you to a large circular room to the south of the third, with a noble dome of beautiful proportions, and opening, towards the south, east, and west, into three small recesses, apparently for sarcophagi.

Over the door-way we found traces of the orb, or globe with wings, that Dr. Clarke mentions, but it has been broken off since his time. We saw the same emblem, however, (which reminded me of Isaiah's address to Ethiopia, ch. xviii. ver. 1,) over both doors of the vestibule, that we had entered, and that we proceeded by, still westwards; the plan of the catacombs seems modelled on this emblem, for the wings are clearly arranged in reference to the central and circular shrine. After exploring several other chambers in the same direction, all strewn with bones, we retraced our steps to the central chamber, and the rest of the party went out, while Captain Lacon (an intelligent officer who had joined our party) and I remained behind to examine more carefully what we had already seen.

The grand entrance clearly opened from the shore, and we wished, if possible, to discover it. Creeping up the sloping wall, or rather bank, as it ought to be called, of the second chamber from the present entrance, we found it was only the corner of an immense hall, supported by square pillars, that stretched away towards the shore, filled up by a long continuous mound of earth,

accumulated so close to the roof, that it was impossible to proceed except by crawling on one's breast like a worm. On we crept, however, with two or three of our Arab guides; and the result of a long and painful peregrination in this uncomfortable attitude was, that, following the walls, we fairly traced the three sides of the hall, and discovered what probably was the grand entrance, opposite, as nearly as we could guess, to the circular chamber.

The sea (probably at the time of the great earthquake, when fifty thousand Alexandrians perished, and the islet was washed away to which Mark Antony retired to enact Timon of Athens after the wreck of his fortunes) seems to have washed sand and soil into the catacombs, and, after filling as we now beheld them, to have finally choked up the entrance, so that it is undiscoverable from the shore. I do not think we have made any new discovery, for the French are said, in one of my guide-books, to have made a complete plan of these extraordinary excavations; but I am glad we made them out so satisfactorily to ourselves. Oh! that they were all cleared out, that one could enter from the shore, traverse that

noble hall, and enter the shrine, just as the votaries did of old, two thousand years ago!

So much for this "City of the Dead!" living Alexandria is equally interesting, though strangely different; turbaned Turks, wild Arabs, Copts, Armenians, Jews—every nation seems to have its representatives here; and the strings of camels towering along, the women gliding about in their long veils, with holes only for the eyes to peep out at—graceful in their carriage, some carrying their children at their sides,* others astride on their shoulders—are objects thoroughly oriental. The Arabs, especially, drest just like the Ishmaelites and Midianites of old, carry one's imagination yet further back even than the catacombs—far, far into antiquity—to the days of Joseph and the patriarchs.

But it is no use attempting to sketch so varied and shifting a scene; though already it be somewhat familiar to me, my ideas are still all in a whirl. One is really bewildered, too, with the crowd of associations, ancient and modern, this place teems with, independent of visible objects;

* "Thy sons shall come from afar; and thy daughters shall be carried at the side."—*Isaiah* lx. 4.

—Alexander the Great, who intended to make it the seat of his empire, and the emporium of the world, which indeed it became under the Ptolemies, as the link between India and the West—the museum, the library, the revival of Greek literature and philosophy under the enlightened successors of Alexander—the version of the Old Testament by the seventy-two interpreters, if we may believe the old legend, though its falsity cannot affect the historical fact that the Law and the Prophets were translated into Greek nearly three centuries before our Saviour's birth, and while those wonderful prophecies of Daniel about the kings of the North and the South, the Ptolemies and Seleucidæ, were actually fulfilling ⁽⁶⁾—Cæsar, Cleopatra, Antony, and Shakspeare's play—Mark and his ministry, the school of Clement and Origen, Athanasius, the noble patriarch, and his chequered fortunes during a lifetime devoted to the defence of God's truth against Arius—Amrou and the Saracens—and lastly, after twelve hundred years of silence and decay, Abercrombie, gallant Abercrombie, his Highland hearts around him, the cry of victory in his ear,

“ Looking *meekly* to heaven from his deathbed of fame !”

what varied scenes—what opposite characters—what warring influences of good and evil !

And under whose banner, Oromasdes' or Ahri-man's, must I rank Mohammed Ali himself, whose ships, proud as their mother Alexandria may well be of their magnificence, are, like his army, a very curse to the country ? *

* We visited the admiral's ship, a three-decker, on the 28th of November. "I had heard much," says Mr. Ramsay, in his private Journal, "of these vessels, and was prepared for their magnificence, and even for more than I found. The *show* certainly was very fine on the upper, the main, and the lower decks, everything being very spacious, clean, polished, and in order ; the breadth of beam, and the total freedom from all (I should imagine even *necessary*) encumbrance, gave her a noble appearance ; but one missed a great deal ; there was no accommodation for officers—all are down in the cockpit, and thus the whole range of the decks is thrown open from poop to stern in both decks. The officers seemed to be very poorly off, and as this was not a *show* part of the ship, it stood no comparison with the rest. The men not dining, like us, at tables, the lower deck was free from that encumbrance, like the main deck. There was not the finish which characterises everything in our ships, or the air of aptness and congruity which ought to pervade it. The crew are 1100, but a useless set ; every gun requires a marine to stand over the men with a musket, and eight small cannon are planted abaft to command the ship in case of a mutiny, I suppose."

But I must conclude. We start, I hope and believe, to-morrow morning, provided we get a boat, but the Pasha has impressed all he could lay his hands on, for the conveyance of his son's harem, and we may have to wait.

Adieu, my dear mother.

P.S.—Dec. 1. Think of our scampering off this morning on jack-asses, (instinctively,) on hearing that the harem was about to embark for Cairo! We had about three miles to ride, and when we got near it there was nothing to be seen of the ladies, nor could we approach the carriages (English and four-in-hand) they rode in. We watched them from a distance, and after seeing two or three children handed out, followed by a veiled lady, whom William pronounced to be dreadfully thick-ankled, we turned round and retraced our steps at a gentle trot, and have been laughed at for our wild-goose chase ever since. We were not, however, the only English who joined in it, and were the first to retreat—that is some comfort.

LETTER III.

Voyage to Cairo—Sais—Introduction to the Pasha—
Tombs of the Mamaluke Sultans—Cairo at sunset—
Bazars—Courtesy to Franks—Garden of Roda—Old
Cairo—Cemetery of the Mamaluke Beys—School at
Boulac—Printing-press—Egyptian Christians—Jews—
Magicians, Jugglers, &c.

December 17, 1836.

HERE, my dear mother, in Grand Cairo, we have been settled for more than a week, delighted with all we have seen, and fully prepared to enjoy ourselves during the remainder of our trip. We reached Cairo from Alexandria on the sixth day, the wind having been contrary during the first two or three of the voyage; we sailed on the Mahmoudieh canal to Atfi in the course of a night, and there embarked on the Nile in one of the can-gias, or boats of the country, which hold two conveniently enough. Missirie and Abdallah, a

handsome Kordofani—black as ebony—whom we have engaged as Arab interpreter and aide-de-camp extraordinary, occupied a tent in front of the cabin, and altogether we got on very comfortably.

The only place of interest on the western branch of the Nile is Sa-el-Hagiar, the site of the ancient Sais, from whence the worship of Nith, or Minerva, was carried to Athens by Cecrops and his Egyptian colony, sixteen centuries before the Christian era. There she stood, the idol of Egyptian worship, veiled with her mysterious peplus, carried for ages afterwards, though in ignorance of its mystic meaning, in the sacred processions of Athens, and uttering those thrilling words of wisdom, that text for human vanity to meditate on—"I am all that is, all that hath been, and all that will be; and my veil no mortal hath ever yet uplifted!" What know we even now of Nature's mysteries? Are we wiser than Job? I trow not.

Long before arriving at Cairo, we saw the Pyramids towering in the distance like mountains cut down into their present shape; we have not yet

visited them ; Monday next will, I hope, dawn on our departure for that purpose. Caviglia, the famous Italian, who rivals Belzoni in enterprise and success, breakfasted with us this morning ; he is certainly a very extraordinary man ; there is an account of his researches in an article of the Quarterly, furnished some years ago by Mr. Salt, very interesting, and well worth your perusal.

But I have had other visitors of no less celebrity—Linant, the French artist, who accompanied Laborde to Petra, and who discovered the ruined capital of Meroe ; Gobat, too, the Abyssinian missionary—Mr. Lieder, the resident missionary at Cairo, introduced him to me—a tall majestic figure, benevolent countenance, long beard, and in the Turkish dress ; I had a long and interesting conversation with him.

We have received the kindest attentions from every one. Colonel Campbell, our Consul-general, has procured us everything we could desire in the way of passports, firmans, &c. He introduced us to the Pasha a few evenings ago ; as it is now Ramadan (the Turkish Lent, during which they fast all day and feast all night,) he receives after

sunset. We visited the old spider in his den, the citadel, where he ensnared and murdered the Mamelukes. Ascending a broad marble passage on an inclined plane, (the substitute for a staircase,) and traversing a lofty antechamber crowded with attendants, we found ourselves in the presence-chamber, a noble saloon, richly ornamented, but without an article of furniture except a broad divan, or sofa, extending round the three sides of the room, in one corner of which squatted his highness Mohammed Ali. Six wax-candles, ten feet high, stood in a row in the centre of the hall, yet gave but little light. (7)

About half an hour's conversation ensued between Colonel Campbell and the Pasha, chiefly statistical, and interesting as showing his singular and intimate knowledge, extending to the minutest details, of everything going on in his dominions.*

* "We walked straight into the Divan chamber without being announced, or any ceremony whatever. The renowned Mohammed Ali was squatting in one corner of the room, smoking a most superb pipe, clustered with whole handfuls of diamonds; we all, after bowing, sat down on each side of him. Coffee was brought to each in the small cups like egg-cups, in beautiful filagree

He does, in fact, everything himself ; he has made a great deal of Egypt, considered as his private property, but at the expense of the people, who are fewer in number, and those few far more miserable than they were before his time.

And how could it be otherwise ? * He “ has stands, universally used in the East ; a pipe is never given but to a peer. He sent for his interpreter, and Colonel Campbell sustained the conversation for three quarters of an hour nearly. The Pasha spoke most practically and statistically of all his manufactures and undertakings, entered into all the details of shipbuilding, and the merits of particular woods, told us of some extraordinary instance of his *lenient rule* in the case of a village which he had pardoned its contributions, informed us he had exported 425,000 quintals of cotton last year, and so on.

“ He did not address any of his guests, but I observed his sharp cunning eye fixing itself on every one. The light was not strong enough to remark minutely, but I can agree with former travellers as to the vivid expression of his eye, and, for the rest, under a huge tarboosh and immense white beard and mustachios, it is absurd to talk of, or to have any clear idea of the expression of his face ; but an expression I have read somewhere, ‘ his cold heartless laugh,’ came suddenly into my head when I heard him laugh : it sounded hard, cold, and pleasureless, and enough to make any one freeze whose head was at his mercy.”—*Mr. Ramsay's Journal*.

* The following observations on the present state of

drained the country of all the working men. He presses them as sailors, soldiers, workmen, &c., and nobody can be sure of his own security for a day. His system appears to be infamous, and the change which has taken place in the general appearance of the country within a few years is said to be extraordinary. Everywhere the land is falling out of cultivation, villages are deserted, houses falling to ruin, and the people disappearing.

“ He taxes all the means of industry and of its improvement, and then taxes the product. Irrigation is the great means of cultivation and fertility ; he therefore charges fifteen dollars tax upon every Persian wheel ; and as the people can find a way of avoiding it by manual labour, raising the water in a very curious way by the pole and bucket, he lays a tax of seven dollars and a half even on that simple contrivance.

“ He then, in the character of universal land-proprietor in his dominions, orders what crop shall be sown, herein consulting his own interest solely,

Egypt are extracted from Mr. Ramsay's Journal ; I have substituted them for my own, which were nearly to the same effect, though shorter and less interesting.

in direct opposition to that of his people. He settles the price of the crop, at which the cultivator is obliged to sell it to him, for he can sell it to no one else; and if he wishes to keep any himself, he is obliged to buy it back from government at the new rate which the Pasha has fixed for its sale, of course many per cents dearer than when he bought it. Numberless are his little tricks for saving money; *e. g.* when he has to receive money, it has always to be paid in advance; taxes, particularly, he collects always just before the plague breaks out, so that, though the people die, he has their money; in paying the troops and others, it is *vice versa*; he pays after date, and gains also upon the deaths.

“We have heard much at home of the reforming enlightened spirit of Mohammed Ali, but what is it founded on? It looks more like a great and sudden blaze before the whole is extinguished and falls into total darkness; and whether this is to happen at his death or before, seems the only question: it seems not far distant. Last year he had no money (and he pushed hard for it) to pay

his troops and dependents, and this year he will have no more than he had last.

“He has *forced* the riches of the country prematurely, and to an extent they could not bear, at the same time removing the means of their production, and thus he has procured the present means of prosecuting the really wonderful, and what, in other circumstances, would have been the useful and beneficial improvements and institutions which we have heard so much of, and which certainly strike a traveller much.

“It is to the unprincipled roguery and ignorance of his European advisers and officials that most of this waste and expense is to be charged. His counsellors consist of all the needy emigrants from France and Italy, who are scouted or in bad odour at home, and who have the assurance to pretend to be what they are not here, where detection is difficult, and where success is their fortune for life. Ideas of the most extravagant kind, such as that of damming up the Nile, and others on which he has thrown away many hundred thousands of pounds, have been put into his head by these spe-

culating adventurers, who fill their own pockets by it, and thus prey upon the country.

“A man who has received the education of a scribe or clerk, comes out, talks of cotton-growing, and soon rises to the head of the cotton department; another, who has thought of nothing but trade and manufacturing, is put into the engineering office; and thus everything is mismanaged. The English are no longer employed in his service; he has found them too hard to deal with, too honourable and straightforward, not supple and promising enough. Mr. Hill is the only one here who understands engineering, and is now dismissed from his service. A steam-engine has been sent out; three years have passed, and its undertaker cannot put it up, though constantly at work. Mr. Hill has offered to do it in a week, but his offer is not allowed to reach the Pasha's ear.”

But enough of this—the prospect is very cheerless.

Mr. Hill, by the way, is our landlord, and a very clever, ingenious, obliging man he is. With English hotels at Alexandria and Cairo, and floating palaces at command for navigating the Nile,

what is there to prevent our English ladies and their beaux from wintering at Thebes, as they have hitherto done at Paris and Rome? A hotel in the city of Sesostris would in that case prove a most profitable speculation.

One word more, however, about Mohammed Ali:—Few in England seem to be aware how vast his dominions really are; nominally the Pasha of Egypt, he is supreme in Nubia, Dongola, Sennaar, to the borders of Abyssinia; the Hedjaz, the Peninsula of Mount Sinai, Palestine and Syria, and Asia Minor south of Mount Taurus, pay him tribute and obey him; and even the desert-dwellers as far as Palmyra stand in awe and respect him. But it is not mere extent of dominion that gives an abiding niche in the temple of history; he sits on the throne of Zenobia, but who will remember his name a hundred years hence?

So here we are at Cairo, the City of Victory—daughter of the Fatimites and the bride of Saladin—the Tyre of Saracen commerce, and of the Thousand and One Nights at that later era when Arab chivalry had burnt out, and the children of Antar had ceased to be gentlemen. Viewed

from any of the neighbouring eminences, she is still Grand Cairo, but the narrowness of the streets, a perfect labyrinth of alleys, and the general air of decay, forbid one's application of the epithet to the interior of the city.*⁽⁸⁾ Saladin sleeps at Damascus, and his house survived him but a few brief generations; a race of slaves succeeded them, Circassian slaves, raised successively from bondage to the throne of this "basest of kingdoms," for two hundred and thirty years previous to 1517, when Selim, the Grand Turk, conquered it. Their cemetery is one of the most interesting sights at Cairo.

Crossing a mile or so of the Desert, you come in sight of a city of tombs and mosques,

* "In the streets where there are no shops, the buildings are still closer; in fact, the second stories are almost always quite joined; the little projecting windows of the houses opposite fit into each other, and the sky is only at glimpses visible from below. They give one more the idea of private passages in a house, till you are undeceived by meeting people on horseback, and by their interminable extent and labyrinthic properties. Many are not much above a yard wide, few more than six or eight feet. They have the merit of coolness at least."

—*Mr. Ramsay's Journal.*

—the most splendid domes, pillars of the most exquisite Saracenic architecture, and minarets the lightest and airiest imaginable, rising from the desert, like an oriental Venice, to greet you ; I never saw anything more lovely than this City of the Dead—the evening sun shining brightly and cheerfully down its silent avenues. On a nearer approach you find with sorrow that they are already crumbling with decay ; the muezzin has long ceased his summons to prayer, and a few miserable Arabs are the only human tenants of their lofty courts and chambers.

After riding through the wide extent of the tombs, we climbed up to the top of the sandhills which separate the lonely sepulchral plain from the city of Cairo. Oh ! it was a scene for Mirza to dream of — an hour for years to look back upon ! the sun setting behind the Pyramids—the Nile, that once flowed blood, winding between the two deserts that are ever striving to rob him of the rich verdure that edges his channel—Cairo, with her thousand minarets, rising over the thin curling smoke—and the busy hum of men, that denotes how densely peopled she still is, murmur-

ing from below,—and then to turn round and look down on the hollow and silent valley of the dead sultans, already lost to the sun's rays, still and lifeless, except a string of camels winding among the tombs—'twas a strange contrast ! The sun sank, sank, sank, and at last disappeared, while we still stood there watching the Pyramids piercing the glowing sky, and listening for the Muezzin ; at last a cannon from the citadel announced the sun's total disappearance, and then first one, then every minaret "found a tongue," answering each other in the self-same words, "God is great ! There is no God but God, and Mahomet is his prophet !"

The crescent moon brightened over us as the night fell, and, pondering on the past and the present, we rode slowly homewards through the motley crowds with which this strange city is peopled, all eagerly preparing for their evening meal.

We are now tolerably familiar with oriental objects ; but the first three or four walks we took through the bazars were like a visit to another world, familiar to the imagination, but passing

strange when first realised by the eyes; portly duennas, veiled from head to foot, waddling along, followed by their slaves—harems taking the air on donkey-back, escorted by their black eunuchs, the most consummate puppies in Cairo—Arabs on their dromedaries—richly-drest Bedouin Sheikhs on their prancing steeds—Turks with their long pipes and ataghans—water-carriers, buffaloes, half-naked Santons,⁽⁹⁾ or religious fanatics, singing and rocking backwards and forwards—criers perambulating the bazars with objects of curiosity to dispose of—the small shops on either side the street, their owners sitting crossed-legged and smoking—everything reminded us of the Arabian Nights and Haroun Al-Raschid.

In one respect, however, a great and a happy change has taken place; the insults Christians were formerly subject to are now unknown. Whatever be one's opinion of the Pasha's domestic policy, travellers owe him much—for throughout his dominions (in Egypt and Syria at least) they may travel in the Frank dress with perfect safety. What would old Sandys or Lithgow have said, had any one prophesied in their days that two

Britons would, in 1836, walk openly through Cairo, preceded by a native servant clearing the road before them by gentle hints indiscriminately administered to donkeys and Moslemin, to get out of the Giaours' way ?⁽¹⁰⁾

The Turks are perfect gentlemen, and never stare—a marvel and a mystery to me, for we must cut uncouth figures in our tight European garments. But we have made up our minds in no case and nowhere to discard our national dress as if we were ashamed of it, though I think we well may be.

There is nothing, I fear, likely to be permanent of the few real improvements the Pasha has introduced here. His trees only are likely to survive him ; he has planted two hundred thousand olives in the neighbourhood of Cairo, and expects that in a few years they will pay him yearly a dollar per tree. We rode through this plantation a few days ago, and were delighted with it, but far more so with the gardens Ibrahim Pasha, Mohammed Ali's son, has planted in the island of Roda, which you reach after traversing the olive grounds. They are managed by two Scotchmen,

at least of Scottish descent, and do them great credit. I longed for you and dear A——; it is indeed a lovely spot; one walk, with borders of myrtle, particularly charmed me, leading, between rows of orange-trees in full bearing, to a fountain surrounded by cypress and *lignumvitæ* trees. Rosemary edges the walks like box in England, and roses bloom in profusion; gorgeous butterflies, “winged flowers,” as some one prettily calls them, were flitting about in every direction, and some strange plant or other, the banana, prickly pear, the beautiful *acacia speciosa*, or the date-tree with its graceful head-gear, constantly reminded us of the East.

Little canals for irrigation are conducted all over the garden, some of them of hewn stone, others merely dug in the earth, and the water is transferred from one into the other by opening or damming it with the foot, as in Moses' time. The under-gardeners, in their gay oriental dress, were in perfect keeping with the flowery landscape, but they were Greeks, alas! sighing for their own dear isle of Scio!

Mr. Traill, who had the kindness to accompany

us all through the garden, showed us several foreign plants he is attempting to naturalise,—the india-rubber tree, the sago palm, and one diminutive oakling—I wish it may answer; it will do his heart good to look at it—

“ Sae far frae hame in a strange countrie!” * (11)

On this island of Roda stands the Nilometer, a graduated octagon pillar, on which the rise of the river is marked during the inundation; we visited it, but it is scarcely worth seeing. I believe one cannot depend on the government reports of the rise of the Nile: his highness reports the height he chooses it to be, and if he is in want of money, the inundation is sure to be the right height.

Recrossing to Old Cairo, we proceeded over mounds of rubbish (the ruins of the Egyptian Babylon) to the Coptic Convent, and thence to

* “ Mr. Traill showed us a sarcophagus, which he had converted into a prison of state; instead of the bastinado, he put any refractory workman into it, and slued the heavy top round over him, keeping him there sometimes for two or three days. Its effects, he assured me, were wonderful.”—*Mr. Ramsay's Journal.*

the tombs of the Mamaluke Beys, far inferior in point of grandeur to those of the Sultans, but still many of them very elegant, and the *tout ensemble* a most impressive sight. Here—a curious situation for *him* to have selected—Mohammed Ali has erected a grand tomb for himself and his family, of coarse workmanship, but it contains several halls with lofty domes, and the monuments are already very numerous; all bear inscriptions in letters of gold, and the floors are richly carpeted.

Re-entering Cairo, we remarked an aloe planted over the door of a new house—a custom, I am told, constantly observed here; what can be its origin?

Two or three days ago we visited the college or school Mohammed Ali has founded at Boulac; give him his due; this is an improvement he deserves much credit for; there are separate rooms for each of the six classes, all airy, and opening on broad spacious galleries. Being Ramadan, the boys were enjoying their holidays, but in one of the rooms I found an “awkward squad” of volun-

tary "saps," gathered round a board, on which the tutor was working a sum in Arabic numerals. One or two of the lads were pointed out to me as being very clever, but, in general, the difficulty with the Arabs is to fix their attention. They are a lively, good-humoured people, and with kindness you may get them to do anything they are up to.

We visited the Pasha's printing establishment, also at Boulac, the same day ; the workmen seemed very active and well acquainted with their business. We saw several works in progress, the presswork, paper, &c., neater than the ordinary run of books printed in Germany or Italy—the types are English ; they lithograph also.* I shall

* " At Boulac saw the Polytechnic School, formerly Ismael Pasha's palace, a splendid establishment. The boys are neatly enough dressed, and, except the tarboosh and slippers, might pass for Europeans. They appeared, some of them that we saw, very quick and intelligent, and I am told that their examination surpasses most such in England in outward show, but it is all head-knowledge. They apply to algebra and abstruse mathematics. Their benches, slates, &c., were quite European. The printing-press we also saw, and were much pleased. They print a paper every week, and we saw several books in hand ;

send home a specimen or two of Egyptian typography, the Arabian Nights for instance. There is at present a quarrel, something like that between the stomach and the members, between the printing-office and the magazine, and, till it is settled, which cannot be till after Ramadan, no books can be purchased.

Perhaps the most useful work the Pasha has published is an Atlas in Arabic, copied from one the missionaries have executed at Malta. It is forbidden to print the Koran, or even to sell it to a Christian ; I have procured, however, through the kind mediation of my friend Mr. Lieder, a most beautiful manuscript (once a vizier's) of that holy volume, richly illuminated with gold and colours in the Arabesque style of our old missals—a style, indeed, imported from the East by Rome, the Arabian Nights is just finished ; the impressions are, some of them, beautiful. One venerable old savant, with spectacle on nose, appeared to be inspecting and deeply immersed in, some old chronicle : such an individual is much more striking and characteristic-looking in the handsome old Turkish dress he wore, with a reverend beard, than any dapper old European in a snuffy brown coat out at the elbows, and glorying in unbrushed classic dust.”—*Mr. Ramsay's Journal.*

and which, though condemned by the classic taste of Vitruvius, Raphael thought not unworthy of revival.

Missionary exertions throughout the Levant are chiefly directed to the conversion of the native Christians as a step to that of the Moslems. This they attempt to effect by schools for the young, and the circulation of the scriptures in the native dialects among those of more advanced years. Mr. Lieder is the amiable and zealous promoter of the good cause in Egypt, now, as in every age, emphatically a house of bondage; spiritual darkness, foreshadowed, one might almost think, by the three days gloom of Moses, broods over the land; the Christians seem to differ little from the heathen; indeed their character is, generally speaking, so bad as materially to impede the progress of the truth among the Mahometans.

There are many Arab Christians, besides the Copts and Armenians, *all* of whom rank nominally as such. The Copts, a sort of mongrels, in whose veins runs the blood of every nation that has trodden down Egypt, are by far the cleverest of the modern Egyptians, and the business of the

country is, for the most part, in their hands. Boghaz Bey, the Pasha's right-hand man, is an Armenian, but I do not believe there are many of his sleek and comely, honest, plodding countrymen here. The Jews are numerous—the same in appearance and character as elsewhere—scorned alike by Turk and Christian ;

“ Tribes of the wandering foot and weary breast,
When will ye flee away, and be at rest !”

You will easily gather from what I have said, that I fear there is no hope for Egypt—at least at present. There *is* a gleam in the sky, as if the light of civilisation were about to rise, but, like the false dawn in India, it will fade away, and deeper darkness will succeed. Yet the true dawn will come at last, and brighten into perfect day, and then, and not till then, will Egypt, Christian Egypt, rise from the dust, and resume her seat among the nations.

Do you remember the strange story Miss H—— told us of the Egyptian magician? I have had him twice here,—that is to say, the gentlemen at the inn had him the first time, and as I was not

satisfied with his performance, and he hardly got fair play among us, I had him a second time to myself, wishing to give him a fair trial. I am not yet satisfied; he succeeded in the first person we called for, but failed egregiously in the others.

The first night we all assembled in the *salle à manger* of the hotel, and the wizard being introduced, we seated him on the divan, furnished him with a pipe, and then proceeded to question him as to his power, &c. He said he was from Algiers (quære of Sycorax's family, Caliban's mother?) and that he belonged to a tribe or caste who are ruled by sheikhs or chiefs, and call themselves servants of Solomon. We asked him whether he worked by Allah or by Satan; he gave me a Scotch answer the first day, "Does not Satan come from Allah?" but the following evening affirmed it was by Allah.

I asked him whether he understood the words he used, which are not Arabic; at least one of my friends here, who speaks the language, could make nothing of them. He said Yes; and, in answer to my further inquiries, repeated thirteen words or names, which, he said, were all a man needed the

knowledge of to obtain the same power with himself;—you must learn them by heart, (he is willing to teach any one for “a consideration,”) then for seven days make a fire seven times every day, throw incense on it, and walk round the fire seven times, pronouncing seven times the thirteen names,—then go to sleep, and you will awake with the faculty required. A complicated receipt this!

The magician, meanwhile, was writing several lines in Arabic on a piece of paper, which he afterwards tore into seven pieces, each containing a distich. A boy having been procured, (for a child only can receive the power of magical vision,) he drew a double-lined square, with strange marks in the angles, on his hand, put some ink on the palm, and bade him look into it and tell us what he saw.

A chafing-dish having now been brought in, the wizard, his beads in his hand, began mumbling prayers or invocations, the same words, I believe, over and over again, at first in a loud voice, then gradually sinking till they were quite inaudible, (like a top falling asleep,) though his lips continued moving apace. From time to time he placed

incense and one of the torn scraps of paper on the fire, frequently interrupting his incantation to ask the boy whether he saw anything, to which he as frequently replied in the negative; at last he said, "I saw something flit by quickly;" but nothing more came, and the wizard said we must procure another boy, which we did.

The same ceremonies having been repeated, a man made his appearance, and, at the word of command, began sweeping; then he bade the boy call for seven flags in succession, all of which made their appearance, and, last of all, the Sultan, whom he described as seated on his divan drinking coffee. "Now," said the magician, "the charm is complete, and you may call for any one you like."

The first person we summoned was the Rev. ———, a mutual friend of William's and mine, and the first person who told him of these magicians; he was described, upon the whole, accurately, but this was the only successful summons; the spirits either would not come, or appeared by proxy, to the sad discomposure of our

Arab Glendower, who, it is but fair to state, attributed the failure to its being Ramadan.

I tried him with Daniel Lambert, who, I was informed, was a thin man, and with Miss Biffin, who made her appearance with arms and legs. He has been equally unsuccessful with a party of Americans : this is odd enough when one considers how strongly Mr. Salt, Lord Prudhoe, and Major Felix, who subjected him to long and repeated examinations, were impressed with the belief of his supernatural powers.

One thing is unquestionable—that the children *do* see a crowd of objects following each other—and, at the commencement of the incantation, the very same objects, as vivid and distinct as if they looked out of the window at noonday. How is this to be accounted for ? I cannot answer the question.

We have seen the jugglers ; they show great dexterity in sticking daggers into their eyes, necks, hearts, &c., running long bodkins up their noses, sheathing swords in their stomachs, the skin lapping quite over them (indeed their skins seem

to hang quite loose on their bodies ;) and, lastly, applying burning torches to their naked breasts ; upon the whole, a disagreeable exhibition, not worth seeing.

The Psylli, or serpent-charmers, were not to be found when we sent for them ; many believe in their pretensions ; my friend Mr. Lieder told me they charmed a poisonous snake out of his house, which he himself had seen the day before, but failed to kill, besides two others which they *might* have introduced. They never pronounce God's name Allah, but Pullah.

Both psylli and magicians seem to have been known among the Jews ; “ the deaf adder that shutteth her ears ” is proverbial, and “ the stone of imagination—that is, certain smooth images, in which, by art magic, pictures and little faces were represented, declaring hidden things and stolen goods,” mentioned by Jeremy Taylor, on the authority, I suppose, of some Rabbinical comment on Leviticus—was evidently kindred sorcery to that practised in Egypt at the present day.

Our boat is ready, and to-morrow, December

21st, we start for Upper Egypt. We returned from the Pyramids to-day.—I have written A——an account of our visit, which I enclose to you; read and forward it.

Adieu.

* * Few perhaps are aware that a species of incantation, extremely similar to that which has excited so much interest lately at Cairo, was practised at Paris at the commencement of the last century. I am indebted to the kindness of my hereditary friend Mr. Morritt for a reference to the following account of it, as witnessed by Philip, afterwards the Regent Duke of Orleans, and described by himself to St. Simon; from whose Memoirs (the fifth volume of the new and complete edition) I extract the passage—at full length—in order that the reader may determine how far the well-known trick with which the narrative closes, ought to throw suspicion on the supernatural character of the rest of the exhibition.

“Voici une chose qu’il me raconta dans le salon de Marly, dans un coin où nous causions tête-à-tête, un jour que, sur le point de son départ pour l’Italie, il arrivait de Paris, dont la singularité vérifiée par des évènements qui ne se pouvaient prévoir alors m’engage à ne la pas omettre. Il était curieux de toutes sortes d’arts et de sciences, et, avec infiniment d’esprit, avoit eu toute sa vie la faiblesse si commune à la cour des enfans d’Henri II, que Catherine de Médicis avait entre autres mœurs apportée d’Italie. Il avait tant qu’il avait pu cherché à voir le diable, sans y avoir pu parvenir, à ce qu’il m’a souvent dit, et à avoir des choses extraordinaires, et à savoir

l'avenir. La Sery avait une petite fille chez elle de huit ou neuf ans, qui y était née et n'en était jamais sortie, et qui avait l'ignorance et la simplicité de cet âge et de cette éducation. Entre autres fripons de curiosités cachées, dont M. le Duc d'Orléans avait beaucoup vu en sa vie, on lui en produisit un chez sa maîtresse, qui prétendit faire voir dans un verre rempli d'eau tout ce qu'on voudrait savoir. Il demanda quelqu'un de jeune et d'innocent pour y regarder, et cette petite fille s'y trouva propre. Ils s'amusèrent donc à vouloir savoir ce qui se passait alors même dans des lieux éloignés, et la petite fille voyait, et rendait ce qu'elle voyait à mesure. Cet homme prononçait tout bas quelque chose sur ce verre rempli d'eau, et aussitôt on y regardait avec succès.

“ Les duperies que M. le Duc d'Orléans avait souvent essuyées, l'engagerent à une épreuve qui pût le rassurer. Il ordonna tout bas à l'oreille à un de ses gens d'aller sur-le-champ à quatre pas de là, chez Madame de Nancre, de bien examiner qui y était, ce qui s'y faisait, la position et l'ameublement de la chambre, et la situation de tout ce qui s'y passait, et sans perdre un moment ni parler à personne de le lui venir dire à l'oreille. En un tourne-main la commission fut exécutée, sans que personne s'aperçût de ce que c'était, et la petite fille toujours dans la chambre. Dès que M. le Duc d'Orléans fut instruit, il dit à la petite fille de regarder dans le verre qui était chez Madame de Nancre, et ce qui s'y passait. Aussitôt elle leur raconta mot pour mot tout ce qu'y avait vu celui que M. le Duc d'Orléans y avait envoyé. La description du visage, des figures, des vêtements, des gens qui y étaient, leur situation dans la chambre, les gens qui jouaient à deux tables différentes, ceux qui regardaient ou qui causaient assis

ou debout, la disposition des meubles, en un mot tout. Dans l'instant M. le Duc d'Orléans y envoya Nancré, qui rapporta avoir tout trouvé comme la petite fille l'avait dit, et comme le valet qui y avait été d'abord l'avait rapporté à l'oreille de M. le Duc d'Orléans.

“ Il ne me parlait guère de ces choses-là, parce que je prenais la liberté lui en faire honte. Je pris celle de le pouiller à ce récit, et de lui dire ce que je crus le pouvoir détourner d'ajouter foi et de s'amuser à ces prestiges, dans un temps surtout où il devait avoir l'esprit occupé de tant de grandes choses. ‘Ce n'est pas tout,’ me dit il ; ‘et je ne vous ai conté cela que pour venir au reste ;’ et tout de suite il me conta que, encouragé par l'exactitude de ce que la petite fille avait vu de la chambre de Madame de Nancré, il avait voulu voir quelque chose de plus important, et ce qui se passerait à la mort du roi, mais sans en rechercher le tems qui ne se pouvait voir dans ce verre. Il le demanda donc tout de suite à la petite fille, qui n'avait jamais ouï parler de Versailles, ni vu personne que lui de la cour. Elle regarda et leur expliqua longuement tout ce qu'elle voyait. Elle fit avec justesse la description de la chambre du roi à Versailles, et de l'ameublement qui s'y trouva en effet à sa mort. Elle le dépeignit parfaitement dans son lit, et ce qui était debout auprès du lit ou dans la chambre, un petit enfant avec l'ordre tenu par Madame de Ventadour, sur laquelle elle s'écria parce qu'elle l'avait vue chez Mademoiselle de Sery. Elle leur fit connaître Madame de Maintenon, la figure singulière de Fagon, Madame la Duchesse d'Orléans, Madame la Duchesse, Madame la Princesse de Conti ; elle s'écria sur M. le Duc d'Orléans : en un mot, elle fit connaître ce qu'elle voyait là de princes, de seigneurs,

de domestiques ou valets. Quand elle eut tout dit, M. le Duc d'Orléans, surpris qu'elle ne leur eût point fait connaître Monseigneur, Monseigneur le Duc de Bourgogne, Madame la Duchesse de Bourgogne, ni le Duc de Berry, lui demanda si elle ne voyait point des figures de telle et telle façon. Elle répondit constamment que non, et répéta celles qu'elle voyait. C'est ce que M. le Duc d'Orléans ne pouvait comprendre, et dont il s'étonna fort avec moi, et en rechercha vainement la raison. L'évènement l'expliqua. On était alors en 1706. Tous quatre étaient alors pleins de vie et de santé, et tous quatre moururent avant le roi. Ce fut la même chose de M. le Prince, de M. le Duc et de M. le Prince de Conti, qu'elle ne vit point, tandis qu'elle vit les enfans des deux derniers, M. du Maine, les siens, et M. le Comte de Toulouse. Mais jusqu'à l'évènement cela demeura dans l'obscurité.

“ Cette curiosité achevée, M. le Duc d'Orléans voulut savoir ce qu'il deviendrait. Alors ce ne fut plus dans le verre. L'homme qui était là lui offrit de le lui montrer comme peint sur la muraille de la chambre, pourvu qu'il n'eût point de peur de s'y voir; et au bout d'un quart d'heure de quelques simagrées devant eux tous, la figure de M. le Duc d'Orléans, vêtu comme il l'était alors et dans sa grandeur naturelle, parut tout-à-coup sur la muraille comme en peinture, avec une couronne fermée sur la tête. Elle n'était ni de France, ni d'Espagne, ni d'Angleterre, ni Impériale. M. le Duc d'Orléans, qui la considéra de tous ses yeux, ne put jamais la deviner; il n'avait jamais vu de semblable. Elle n'avait que quatre cercles, et rien au sommet. Cette couronne lui couvrait la tête.

“ De l'obscurité précédente et de celle-ci, je pris occasion de lui remontrer la vanité de ces sortes de curiosités,

les justes tromperies du diable, que Dieu permet pour punir des curiosités qu'il défend, le néant et les ténèbres qui en résultent au lieu de la lumière et de la satisfaction qu'on y recherche. Il était assurément alors bien éloigné d'être régent du royaume, et de l'imaginer. C'était peut-être ce que cette couronne singulière lui annonçait. Tout cela s'était passé à Paris chez sa maîtresse, en présence de leur plus étroit intrinsèque, la veille du jour qu'il me le raconta, et je l'ai trouvé si extraordinaire que je lui ai donné place ici, non pour l'approuver, mais pour le rendre."

A kind communication from Mr. Hamilton, received at the very moment this sheet is passing through the press, enables me to add to the above extract another from the first Apology of Justin Martyr, in which, among various proofs of the consciousness of the separate spirit, he alleges the very art now in vogue in Egypt, with its peculiar characteristic of being only practised through the medium of children, in regard to their age, innocent and pure. His words are as follows:—

“ Νε κυομαντειαι μεν γαρ, και αι αδιαφθορων παιδων εποπτευσεις, και ψυχων ανθρωπινων κλησεις, και οι λεγομενοι παρα τοις μαγοις ονειροπομποι, και παρεδροι, και τα γιγνομενα υπο των ταυτα ειδωτων, πειστωσαν υμας οτι και μετα θανατον εν αισθησει εισιν αι ψυχαι.”—*Apolog. edit. Thirlbii, 1722, p. 27.*

LETTER IV.

Visit to the Pyramids—Pyramid of Cheops—Evening with Caviglia—Pyramids of Cephrenes and Mycerinus—Arab traditions respecting the Pyramids—The Sphinx, a talisman—Heliopolis—The Pyramids probably built by the Pali, or Shepherd-Kings of Egypt, afterwards the Philistines, in the time of Abraham.

TO MRS. JAMES LINDSAY.

Top of Cheops' Pyramid, Dec. 19, 1836.

DID you ever expect, my dear A——, to receive a letter from the top of the Great Pyramid? Here I am, and William at my side, a burning sun above us, and four half-naked Arabs chattering around us, greatly marvelling, doubtless, at the magical propensities of the English. It is a fatiguing business climbing up, but, once here, all is repaid! Such a view! the desert on one side, stretching away into Libya—waves beyond

waves, as far as the eye can reach ; the vale of Egypt on the other, green as if Hope had chosen it as her peculiar home, with a thousand little canals traversing it in every direction, left by the retiring Nile, for the inundation has scarcely yet subsided.

Caviglia is working here, and we are now his guests. He has palisadoed off a little citadel for himself, the chambers consisting of tombs excavated in the rock on which the Pyramids are built. After our descent, he is going to cicerone us through this monument of pride, science, or superstition—who knows which ? It was building while Abraham was in Egypt ; Joseph and his brethren must have seen the sun set behind it every day they sojourned in Egypt ; it must have been the last object Moses and the departing Israelites lost sight of as they quitted the land of bondage ; Pythagoras, Herodotus, Alexander, the Caliphs —it has been the goal of nations ! lost nations have pilgrimised to its foot, and looked up, as their common ancestors did before them, in awe and humility—and now, two strangers, from the “ultima Thule” of the ancients, Britain,

severed from the whole world by a watery line which they considered it impious to transgress, stand here on the summit, and, looking round, see a desert where once the "cloud-capt towers, the gorgeous palaces," the temples and tombs of Memphis arose in their calm beauty, and Wisdom dwelt among the groves of palm and acacia—solitary now and deserted except by the wandering Arab and his camel.

Midnight: Caviglia's Tomb.

After dining with Caviglia, dear A——, to continue my yarn, we started by moonlight for the Pyramid, in company with the Genius Loci, and duly provided with candles for exploration. I must premise that Caviglia, whose extraordinary discoveries you are doubtless well acquainted with, has just been set to work again by Colonel Vyse, Mr. Sloane, and Colonel Campbell, our Consul-general at Cairo. He is at present attempting to make further discoveries in the Great Pyramid, and, as soon as he gets a firman from the Pasha, intends to attack the others.

The shape of this Pyramid has been compared

to "four equilateral triangles, on a square basis, mutually inclining towards each other till they meet in a point."* "Lincoln's-Inn Fields, the area of which corresponds to its base, wholly filled up with an edifice higher by a third than St. Paul's, may give some idea of its dimensions." †

The entrance is on the northern face of the Pyramid, on the sixteenth step, though you can ride up to it, such immense mounds of fallen stones have accumulated at the base. A long low passage, most beautifully cut and polished, runs downwards, above 260 feet, at an angle of 27 degrees, to a large hall, sixty feet long, directly under the centre of the Pyramid, cut out of the rock, and never, it would appear, finished. This was discovered by Caviglia; the passage, before his time, was supposed to end half way down, ⁽¹²⁾ being blocked up with stones at the point where another passage meets it, running upwards at the same angle of 27, and by which you might mount in a direct line to the grand gallery, and

* Greaves, *Pyramidographia*.

† Conder, *Modern Traveller—Egypt*.

from that to the king's chamber, where stands the sarcophagus, nearly in the centre of the pile, were it not for three or four blocks of granite that have been slid down from above, in order to stop it up.

By climbing through a passage, forced, it is supposed, by the Caliph Mamoun, you wind round these blocks of granite into the passage, so that, with the exception of ten or twelve feet, you do in fact follow the original line of ascent; we descended by it. Close to the opening of this passage on the grand gallery is the mouth of a well, about 200 feet deep, by which we ascended from the neighbourhood of the great lower hall. Two or three persons had descended it before Caviglia's time, but he cleared it out to the full depth that his predecessors had reached, and believing it went still deeper, hearing a hollow sound as he stamped on the bottom, he attempted to excavate there, but was obliged to desist on account of the excessive heat, which neither he nor the Arabs could stand.

Think what his delight must have been, when, in the course of clearing the passage which, I

mentioned to you, leads directly from the entrance to the great lower hall, smelling a strong scent of sulphur, and remembering he had burnt some in the well to purify the air, he dug in that direction, and found a passage leading right into the bottom of the well, where the ropes, pickaxes, &c., &c., were lying that he had left there in despair, on abandoning the idea of further excavation in that direction as hopeless.

Up this well, as I said, we climbed, holding a rope, and fixing our feet in holes cut in the stone; the upper part of the ascent was very difficult, and bats in numbers came tumbling down on us; but at last we landed safely in the grand gallery, a noble nondescript of an apartment, very lofty, narrowing towards the roof, and most beautifully chiselled; it ends, towards the south, in a staircase, if I may so term an inclined plane, with notches cut in the surface for the feet to hold by; the ascent is perilous, the stone being as polished and slippery as glass; before ascending, however, we proceeded by another beautifully worked passage, cut directly under the staircase, to a handsome room, called the queen's chamber. Returning

to the gallery, we mounted the inclined plane to the king's chamber, directly over the queen's. The passage leading to it was defended by a portcullis, now destroyed, but you see the grooves it fell into. His majesty's chamber is a noble apartment, cased with enormous slabs of granite, twenty feet high; nine similar ones (seven large and two half-sized) form the ceiling. ⁽¹³⁾

At the west end stands the sarcophagus, which rings, when struck, like a bell. From the north and south sides, respectively, of this room, branch two small oblong-square passages, like air-holes, cut through the granite slabs, and slanting upwards, the first for eighty feet in a zigzag direction, the other for one hundred and twenty.

It is Caviglia's present object to discover whether these lead. Being unable to pierce the granite, he has begun cutting sideways into the limestone at the point where the granite casing of the chamber ends, has reached the northern passage at the point where it is continued through the limestone, and is cutting a large one below it, so that the former runs like a groove in the roof of the latter, and he has only to follow it as a

guide, and cut away till he reaches the *dénouement*.—"Now," says Caviglia, "I will show you how I hope to find out where the northern passage leads to."

Returning to the landing-place at the top of the grand staircase, we mounted a rickety ladder to the narrow passage that leads to Davidson's chamber, so named after the English consul at Algiers, who discovered it seventy years ago; it is directly above the king's chamber, the ceiling of the one forming, it would appear, the floor of the other. The ceiling of Davidson's chamber consists of eight stones, beautifully worked, and this ceiling, which is so low that you can only sit cross-legged under it, Caviglia believes to be the floor of another large room above it, which he is now trying to discover. To this room he concludes the little passage leads, that branches from the south side of the king's chamber. He has accordingly dug down into the calcareous stone at the further end of Davidson's chamber, in hopes of meeting it; once found, it will probably lead him to the place he is in quest of.

And now, I am sure, if I have been happy enough to inspire you with a tithe of the interest with which I followed every winding of the Pyramid and of our cicerone's mind, itself a most extraordinary labyrinth, you will be glad to hear that there seems every probability of his soon reaching the little passage. Leaving a servant in the excavation, descending to the king's chamber, and shouting at the hole, the man answered by striking on the stone—distinct strokes—as satisfactory a reply as could be wished for.

Here, of course, our wanderings ceased. We regained the gallery, and from thence descended, as I have already intimated, in a direct line, past the well, through the passage forced by Mamoun, and up the passage of entrance to the open air; and glad were we to breathe it; but our first care was to don our coats and cloaks as preventives against catching cold; the toil-drops were falling from us like rain, and such hands and faces were never seen, for many a rood had we to creep on our hands and knees, or, like the king of the beggars, who used to haunt the purlieus of the Tower

when I was a little boy, legs forward and face forward, punting with one's hands,—an attitude somewhat difficult to describe.*

After ablutions, &c., we drank tea, delicious tea! in Caviglia's tent; a candle stuck in a bottle enlightened our repast, but dark, mystical, and unearthly was our conversation,—a sequel to the lecture he had given us inside the Pyramid, pointing out an end, a hidden purpose, a secret meaning in every nook, cranny, and passage of the structure—the scene, he told us, of initiation into the ancient Egyptian mysteries.

We had him to breakfast two or three days ago at Cairo, and I had had a long confab with him before that. Living, as he has done, so solitary,

* “It is a pity no one thinks of looking for any probable entrance to the chamber in which Herodotus says the king is buried, in a sarcophagus isolated from the rest by the water of the Nile, which enters and flows round it. The level of the Nile is 130 feet below the foundation; the angle of descent always used here is known, and, with these two data, it is easy to calculate the level at which any passage to it must begin, and the distance from the Pyramid. It might be fruitless, but would be worth a minute examination all round.”—*Mr. Ramsay's Journal*.

I should rather say, in such society as that of the old Pharaohs of Egypt, their pyramids his home, and that strange enigma of a sphinx his fellow-watcher at their feet, he has become, to use his own expression, “*tout-à-fait pyramidale*” in dress, feature, manner, thought, and language. We are told that in Ceylon there are insects that take the shape and colour of the branch or leaf they feed upon—Caviglia seems to partake of their nature, he is really assimilating to a pyramid. His history is very curious: “As a young man,” he told us this evening, “*je lisais Voltaire, Jean Jacques, Diderot—et je me croyais philosophe;*”—he came to Egypt—the Pyramids, Moses, and the Holy Scriptures converted him, “*et maintenant,*” said he, “*je suis tout Biblique.*” I have seldom met with a man so thoroughly imbued with the Bible; the saving truths of the Gospel, man’s lost condition by the fall of Adam, Christ’s voluntary death to expiate our sins, our inability to save ourselves, and the necessity of our being born again of the Holy Spirit—every one of these doctrines he avowed this evening; he seems to cling to them, and to love our blessed Saviour

with the simplicity of a child (¹⁴)—he never names him without reverence; but on these doctrines, this rock, as a foundation, he has reared a pyramid of the most extraordinary mysticism—astrology, magnetism, magic, (his familiar studies,) its corner-stones, while on each face of the airy vision he sees inscribed in letters of light, invisible to all but himself, elucidatory texts of scripture, which he read off to us, with undoubting confidence, in support of his positions.

Every religious truth, in short, unessential to salvation, is in his eyes fraught with mysticism. His memory is as accurate as a Presbyterian minister's—every text he quoted was prefaced by a reference to the chapter and verse where it occurs. He loves the Arabs, and looks forward to their conversion and civilisation as the accomplishment of the prophecies that “there shall be a highway out of Egypt to Assyria” in that day when “Israel shall be a third with Egypt and Assyria, even a blessing in the midst of the land”—when the Lord shall have “set his hand the second time to recover the remnant of his people from Assyria, from Egypt, from Pathros, from Cush,” &c., and shall

bless the assembled myriads, saying, "Blessed be Egypt, my people, and Assyria, the work of my hands, and Israel, mine inheritance."

He quoted these remarkable prophecies, and I had the pleasure of telling him I looked forward to their speedy fulfilment with the same interest as himself.*

* "Caviglia told me that he had pushed his studies in magic, animal magnetism, &c., to an extent which had nearly killed him—to the very verge, he said, of what is forbidden to man to know; and it was only the purity of his intentions which saved him. He told me he could have the power of performing all the magical rites formerly practised, only that by the coming of our Saviour everything of minor degree was included, and it would now be a profanation to attempt such things.

"Now one is very apt to call such a man a monomaniac on this particular point, and I should not know well how to reply to any one who should do so. He gave us a sort of history of his life; he had come out a perfect infidel to Egypt; he had curiosity about the Pyramids, and on being told that they did not make attempts at discovery, because the devil was there, 'If it's only the devil,' said he, 'I shall not trouble myself about him,' and so descended to the well, and made the discoveries he showed us. By reading, first of all, the works of the Greek philosophers, and then the Bible, he has become, as he said, 'peu à peu Bibliste et Chrétien.'

"Yet he has strange unearthly ideas, which seem to

I must wish my dear A—— good-night. You can have no idea how comfortably we are lodged here. The rock is honeycombed with tombs, but this one has been cleared out, furnished with mats, glass-windows, &c. &c. Caviglia seems really to enjoy himself in his little fortress; the Arabs are very fond of him—he is monarch of all he surveys, knows his fame, and enjoys it—and long may he do so! He is now sixty-six, but still hale, active, and hearty. He hates Cairo, he says, the noise and bustle distract him, and he is quite happy here, with his pyramids, his mysticism, and his Bible.

Here we are at Cairo again. This morning, after breakfast, the kind Caviglia took us to Cephrenes' Pyramid, or Belzoni's as the Arabs call it.

open up to you, as he says them, whole vistas of unheard-of ground, which close up again as suddenly, so that one can hardly know what his theories are. He says it would be highly dangerous to communicate them, and looks mystical, but evidently does not like to speak on the subject, and otherwise loves a good hearty laugh and joke as much as any one."—*Mr. Ramsay's Journal.*

The passage of entrance descends very rapidly ; entering backwards, it is difficult to keep one's footing except by pressing one's back against the roof, and "straddling," like Apollon, over the whole breadth of the way. After creeping under the portcullis, which Belzoni raised so successfully, and descending the shaft by a ladder which Caviglia has placed there, we reached the chamber of the sarcophagus, beautifully cut out of the rock ; the roof is composed of hewn stones, and rises in a pyramidal shape, which shows there must be a chamber above ; but how to get at it ? The passage, leading to the other room discovered by Belzoni, has been blocked up with stones by the Arabs. Altogether this pyramid is much inferior, both within and without, to that of Cheops, alias Caviglia's.

Standing at the entrance, Caviglia pointed out to us a white hill, about a league and a half distant, where, he says, the base of a pyramid, three hundred feet long, is traceable, surrounded by little pyramids of pulverised granite, probably still more ancient than the pyramids of Djizeh themselves.

The rock has been cut away so as to form a spacious area to the north of Cephrenes' pyramid ; we rode through it towards that of Mycerinus—much smaller than its fellows, but of workmanship far superior to that of Cephrenes. The ground is covered with dislodged blocks of the red granite with which it was cased. ⁽¹⁵⁾

— Once upon a time, Pharaoh was presiding in his court at Memphis, when an eagle, hovering over his head, dropped into his lap the smallest and prettiest slipper that ever was seen ; inquiry being made whence it came and whose it was, it turned out to be the property of the fair Rhodope of Naucratis, and to have been snatched by the eagle out of her attendant's hands while she was bathing. Rhodope became queen of Egypt, and, on her death, was buried by her disconsolate husband in this Pyramid.—A pretty story—would it were true ! Do you remember our poor friend H—— mentioning it as possibly the original of Cinderella ? ⁽¹⁶⁾

Not less fanciful are the Arab traditions as to the origin of these world's wonders ! Saurid ebn Salhouk, who ruled in Egypt three hundred

years before the flood, saw in a dream the earth convulsed, its inhabitants lying on their faces, the stars falling from heaven, clashing as they fell, and, marvellous to relate! changing into white birds, which, snatching up his unfortunate subjects, hurried them between two vast mountains which closed behind them, and then the remaining stars went out, and there was thick darkness on the earth. Springing up in horror, he summoned the wise men of Egypt, one hundred and thirty priests ; (17) they consulted the stars, and foretold the deluge. “ Will it come to our country ?” said the king. “ Yea, and will destroy it.” “ And there remained a certain number of years for to come, and he commanded in the mean space to build the Pyramids, and a vault to be made, into which the river Nilus entering should run into the countries of the west, and into the land of Al Said ; and he filled them with talismans, and with strange things, and with riches and treasures, and the like. He engraved on them all things that were told him by wise men, as also all profound sciences, the names of alakakirs,* the uses and hurts of them, the

* Magical spells engraven on precious stones.

science of astrology, and of arithmetic, and of geometry, and of physic. All this may be interpreted by him who knows their character and language.

“After he had given orders for this building, they cut out vast columns and wonderful stones. They fetched massy stones from the Ethiopians, and made with these the foundation of the three great pyramids, fastening them together with lead and iron. They built the gates of them forty cubits underground, and they made the height of the pyramid one hundred royal cubits. The beginning of this building was in a fortunate horoscope. After he had finished it, he covered it with coloured satin from the top to the bottom, and he appointed a solemn festival, at which were present all the inhabitants of his kingdom.

“Then he built in the western pyramid thirty treasuries, filled with store of riches and utensils, and with signatures made of precious stones, and with instruments of iron and vessels of earth, and with arms that rust not, and with glass which might be bended and yet not broken, and with

strange spells, and with several kinds of alakakirs, single and double, and with deadly poisons.

“He made also in the eastern pyramid divers celestial spheres and stars, and what they severally operate in their aspects, and the perfumes which are used to them, and the books which treat of these matters.

“He also put in the coloured pyramid the commentaries of the priests in chests of black marble, and with every priest a book, in which were the wonders of his profession and of his actions, and of his nature, and what was done in his time, and what is, and what shall be, from the beginning of time to the end of it.

“He placed in every pyramid a treasurer. The treasurer of the westerly pyramid was a statue of marble stone standing upright, with a lance, and upon his head a serpent wreathed; he that came near it, and stood still, the serpent bit him on one side, and, wreathing round about his throat and killing him, returned to his place. He made the treasurer of the eastern pyramid an idol of black agate, his eyes open and shining, sitting upon a

throne with a lance; when any looked upon him, he heard on one side of him a voice, which took away his senses, so that he fell prostrate upon his face, and ceased not till he died. He made the treasurer of the coloured pyramid a statue of stone, sitting; he which looked towards it, was drawn by the statue till he stuck to it, and could not be separated from it till such time as he died.”*

Here, then, in these sepulchres of Saurid, his brother, and his nephew, were the knowledge and science of the antediluvians preserved, and hence they sprang forth again into life after the deluge. But it was a grander flight still which attributed their construction, with Baalbec and Istakhar, to Gian ben Gian, the Preadamite monarch of the world!—Well might the Arab poet look at them, and say, “Ce sont des edifices que les siècles redoutent, pendant que ceux que nous élevons redoutent les siècles!”†

priestly wisdom, no theory as to the *meaning* of the pyramids,

“Those glorious works of fine intelligence,”
has been broached so beautiful, to my mind, as old Sandys’s, who, like Milton and the ancients, believing them modelled in imitation of “that formless form-taking substance” fire, conceives them to express the “original of things.” “For as a pyramis, beginning at a point, by little and little dilateth into all parts, so nature, proceeding from one undividable fountain, (even the God and Sovereign Essence,) receiveth diversity of forms, effused into several kinds and multitudes of figures, uniting all in the supreme head, from whence all excellencies issue:”—truth that will outlive even the pyramids.

Each of them, according to the Arabs, has its guardian spirit; that of the southern pyramid is often seen hovering round it towards sunset, in the shape of a beautiful girl—but all go mad whom she favours with a smile. ⁽¹⁸⁾

The sphinx, too, according to the ancient Arabs, was a talisman fixed there to protect the district

from the encroaching sand, that ever-rising, never-ebbing tide of the Desert—which had already in the geographer Bakoui's time—the fourteenth century—swallowed up the palace and the city of Pharaoh, and other flourishing towns and villages to the west of Djizeh; one marble column remained, towering over the waste, but no one could reach it. Caviglia cleared away the sand from around the sphinx about twenty years ago, but the winds have nearly covered her again—her back, I should rather say, for she alawys held her head above water. Her attitude bespeaks the calm repose of conscious strength, her expression of countenance, benevolence—the *tout-ensemble*, strange mysterious beauty, awful in its stillness. A monster she is indeed, but not one to tremble at—oh no! you stand before her in awe and reverence, as before the wise but benevolent Simurgh; and oh! if one could but give her a tongue, what histories she would tell, what wisdom reveal to us! (19) A little temple is built between her paws; a lion couches in front of it, looking up at her—both now fathom deep under the sandy deluge.

There are numbers of tumuli, or barrows,

around the three great pyramids, heaving the soil, like graves in a country churchyard; they look mere mole-hills from the top, but contain spacious halls and chambers.

The sphinx, by-the-bye, Caviglia told us he believed to express, enigmatically, the doctrine of man's regeneration, as explained to Nicodemus by our Saviour, and which he supposes to have been one of the ancient Egyptian (it certainly was one of the Indian) doctrines derived from primitive revelation. That they had much traditional wisdom is unquestionable, and Heliopolis, the On of Genesis, was the shrine where it was preserved;—I know few places of more intense interest; Potipherah, Joseph's father-in-law, was prince and priest there; there dwelt the sages of Egypt, and there Moses, Herodotus, Plato, Eudoxus, successively became learned in all the wisdom of the Egyptians.

We visited the site two or three days ago—a range of mounds, enclosing an oblong square, smooth and covered with corn—Selim encamped on it when he came to conquer Cairo—one obelisk, lone survivor, still pointing to the sky. It was

erected, we know, by the Pharaoh Osirtesen, in the eighteenth century before Christ, in front of the temple of Vulcan ; but where, you ask, is the temple ? I see no propyla, no dromos, no shrine—where is the temple ? Are those shapeless fragments of granite the sphinxes Strabo mentions ? Possibly—Heliopolis was desolate even in his day. You may search, but there is nothing more to be seen ; the corn waves in the breeze, and you push your way through it without stumbling ; all is smooth, and you are ready to think the genies of Aladdin's lamp must have carried off the temple, and left that single obelisk to tell the tale. Alas, poor Phœnix ! wert thou to come to life again, and revisit Heliopolis ! ⁽²⁰⁾

I have said that the Pyramids were building while Abraham was in Egypt. I dare say you have been wondering on what grounds I assert this, so much dispute having always existed as to their antiquity. And when I add, that I think there is every reason to believe that they were built by the “ Royal Shepherds ” of Egypt, who

afterwards became the Philistines, you may well call on me for my reasons.

Come, dear A——, for I know the delight you feel in such adventures—come and let us venture, hand in hand, into this dark chasm, at the mouth of which we stand, the cavern of the past, and, with mummy-torches to guide us, let us explore its recesses. We shall find facts, isolated facts, like carbuncles, casting a sure light through the gloom, jewels of historical truth, worthy of being set into a necklace which Clio herself need not disdain to wear. Are you ready? come then The cave grows chillier and chillier, gloomier and gloomier, as we descend; do you hear the roar of waters? the deluge is still seething up here; the cave extends far beyond that dark and stormy water, but there is no crossing it, no reaching yon distant shore without the bark of Noah, and the ark has been buried for ages under the snows of Ararat. Here stop we——But a truce to this nonsense, and let me to my argument.

Yet do not mistake me; I have no new theory to advance; I aspire only to dovetail into one harmonious piece of *marqueterie* the scattered disco-

veries of those learned men who have studied the subject, and which, viewed connectedly, lead to the results briefly expressed above. *Ab initio*, then, dear A——, in other words, *commençons par le commencement*.

Of Ham's three sons, Canaan, the youngest, (the only one on whom the curse was pronounced,) was ancestor of the ten tribes whom Abraham found in occupation of the Promised Land, bearing the national patronymic of Canaanites—how awfully depraved in their morals, I need not remind you. Their iniquities, however, had not come to the full till four hundred years after Abraham, when the Israelites were the hammer in the Lord's hand for crushing them.

A giant race, distinct from the Canaanites, “a people great, and strong, and tall,” occupied many parts of the country between the Nile and the Euphrates in Abraham's day; their punishment, probably as being earlier depraved, took place between his time and that of Moses; the Anakim, who dwelt at Hebron in the hill-country of Judah—the Emim, who occupied the country east of the Dead Sea, afterwards Moab—the Zamzummim, who

dwelt in what was afterwards called Ammon, &c., being so utterly “destroyed by the Lord,” through the agency of the children of Lot, &c., who dwelt in their country, that, in the time of Joshua, “only Og, the king of Bashan, remained of the remnant of the giants.”

Besides these nations, the Chorim or Horites, who occupied Mount Seir, were destroyed to make room for the children of Esau, or the Edomites; and the Avim for “the Philistines, the remnant of the country of Caphtor”—“who came out of Caphtor”—“whom,” God emphatically tells us, “I brought from Caphtor.”

Caphtor is the same word as Egypt, or Copt, applied in scripture to Lower, as Pathros is to Upper Egypt, or the Thebaid.

It is clear, therefore, from the word of truth, that God, our Author and Disposer, “who hath made of one blood all nations of men for to dwell on all the face of the earth, and hath determined the times before appointed, and the bounds of their habitation”—brought the Philistines, after some great revolution which reduced them to the mere remnant of a once powerful nation, out of Lower Egypt into the land of Canaan.

While Canaan was peopled by the descendants of the younger, Egypt was so by those of the elder son of Ham, the Misraim. From her great natural advantages, she soon rose to civilisation, and flourished till a nomadic race, surnamed the Uk-sos, or Royal Shepherds, (by some, says Manetho, supposed of Arabian origin,) poured down upon the country, subdued the natives, and held the sceptre for two hundred and sixty years, till the natives roused themselves, and, after a long and bloody contest, compelled them to take refuge at Abaris, probably Pelusium, a stronghold on the eastern branch of the Nile, which the first shepherd king had fortified as "the bulwark of Egypt" against the Assyrians, then the dominant power in Asia. After a tedious siege, the Egyptians, in despair of getting rid of them otherwise, allowed them to depart, with their families and cattle, in quest of another settlement, which they did, in the direction of Syria.

It must have been during this usurpation that Abraham visited Egypt, for the revolution by which they were expelled had evidently taken place shortly before Joseph's time, when "every

shepherd was" such "an abomination to the Egyptians," that the pasturing Israelites were assigned the district of Goshen, "the best of the land," rich unoccupied pasture ground, for their residence, that they might dwell there with their flocks and herds apart from the natives; by which providential separation they were preserved as a distinct people. Jacob passed through Goshen, and Joseph met him there, on his road from Canaan to Egypt; the Israelites did not cross the Nile when they quitted Egypt; Goshen, therefore, lay to the east, probably along the eastern bank of the Pelusiac branch of the Nile. Why was "the best of the land" unoccupied, but because the shepherd owners had just been expelled?

Now, when we read in the Bible that the Philistines came out of Lower Egypt, and were settled in the land of Canaan before the arrival of the Israelites, from whose triumphant exodus (though Manetho ignorantly, and Josephus wilfully, confound them) theirs differed in being so calamitous an expulsion that "a remnant" only survived, though that remnant was numerous enough to

subdue the Avim, and occupy their country ; and when, naturally inquiring what light Egyptian history throws on the subject, we find this story of the expulsion of the shepherd kings, in the direction of Canaan, at a period anterior to the arrival of Joseph ; is it possible to doubt the identity of the royal shepherds and the Philistines ?—that warlike people, those “ foreigners” of the Septuagint, speaking a language distinct from that of the Jews, who, occupying the sea-coast between the Nile and Ekron, gave it their own name, Palestina, confined by the prophet Isaiah to their pentapolis, but afterwards extended to the whole land of Israel, Palestine—a word, mark you, not Hebrew, but Sanscrit, and still implying, in that language, “ the shepherd’s land !”

If this needed confirmation, we should find it in the testimony borne by the Hindoo records, that a branch of the great Pali, or shepherd race of India, whose sway extended from their far-famed capital, Pali-bothra, to Siam on the east, and the Indus on the west, the intermediate country bearing the same name Palisthan, or Palestine, afterwards imposed on the land of Canaan—con-

quered Egypt, and oppressed the Egyptians, in the same manner as the Egyptian records tell us the royal shepherds did. Nor is it less remarkable that while Abaris, or Avaris, the stronghold of the Auritæ, or royal shepherds, in the land of Goshen, derives its name from *Abhir*,⁽²¹⁾ the Sanscrit word for a shepherd — *Goshena*, or *Goshayana*, in the same language, implies “the abode of shepherds,” and *ghosha* is explained in Sanscrit dictionaries by the phrase *Abhiropalli*, “a town or village of Abhiras or Pallis.”⁽²²⁾

And who, then, (to revert to the point from which I set out,) who can the *shepherd Philitis*,* who fed his flocks near Memphis, whose name the popular tradition of the Egyptians, in Herodotus's time, gave to the pyramids, built by his *cotemporaries* Cheops and Cephrenes, the tyrants who shut up their temples, and forbade the sacrifices, and whose names the people held in such abhorrence that they would not pronounce them—who and

* *Bhilata* or *palita*, “a shepherd,” in Sanscrit. It is remarkable that one of the ancient Pali tribes in India was called Rajpalli, or Royal Shepherds.—See Colonel Tod's *Annals of Rajasthan*, vol. i. p. 119.

what can he be, but a personification of the shepherd dynasty—the Palis of the Hindoo records, who, after erecting the pyramids, those imperishable monuments of their glory, after the models they remembered in their native Assyria, reappear in later years, and when fallen from their high estate, as the Philistines, “the remnant of the country of Caphtor,” ever at enmity with the people of God and now, like every nation that oppressed them, vanished from our eyes?

I have argued it clumsily, but do you not now agree with me that the pyramids were built by the shepherd kings of Egypt, the ancestors of the Philistines, in the time of Abraham?

And will you not sympathise with me, dear A——, when I add, that the name of Pali, that once rang as the slogan of victory from the Irrawaddy to the Po,—which blazed on the banner that, ages before Rome was thought of, waved as free to the wind on Mount Palatine as on the hills of Meroe and the towers of Palibothra, (what a pyramid of empire!) is now a reproach, a curse, and a hissing, to the wretches on whose outcast heads that crown of glory has descended—Pali,

Pelasgi, Palatines all extinct—its sole inheritors ; dwelling on the hills where erst Palibothra rose—girt round by the Rajpoots, who supplanted their power and called their country by another name—and still worshipping Mahadeva, their ancestral god, who, in the twilight of Egyptian history, led their kinsmen to the conquest of Meroe and the Nile,—robbers, thieves, outcasts ; of all the degraded tribes of India, there are none more miserable, one only more despised, than the Bheels, the Palis of Malwah !

Bear with me a few minutes longer. Is it too much to argue from the fact that both nations were punished only, not exterminated, by a just and discerning God—that, fearfully as both had gone astray, neither the royal shepherds at the period of their expulsion from Egypt, nor the Egyptians at the time of the exode of the Israelites, had reached that acme of depravity, which, at corresponding seasons in the history of the chosen people, caused the earth to swallow up the cities of the plain—to vomit forth the tribes of the Canaanites ?

And were, then, the Anakim, the Emim, the Zamzummim, the Horim, the Avim, equally depraved? Else why were they thus exterminated?

“The Zamzummims, a people great, and many, and tall as the Anakims; but the Lord destroyed them before them; and” the Ammonites “succeeded them, and dwelt in their stead:

“As he did to the children of Esau, which dwelt in Seir, when he destroyed the Horims from before them; and they succeeded them, and dwelt in their stead, even unto this day;

“And the Avims, which dwelt in Hazerim, even unto Azzah, the Caphtorims, which came out of Caphtor, destroyed them, and dwelt in their stead.”

—— Oh! who can sum up, who can form a conception of the misery, moral, physical, temporal, and eternal, brought into this world by sin, and laid all upon our Saviour, when the life and death of three nations extirpated for their vices—we know nothing more of them—are summed up

in three verses—a mere parenthesis in the Bible such as this!

One word more: I forget whether or not you are a convert to the longer system of chronology, so ably advocated by our friend Dr. Hales, by which we get six hundred additional years before, and seven hundred after the Deluge—years most welcome to the historical antiquary, who feels himself wofully cramped in his investigations by the common Bible chronology, which makes Noah alive at the time of the great apostacy at Babel, and Shem cotemporary with Abraham, Isaac, and Jacob!* May we not derive another argument for this system from the consideration, that if God bore with the vices of the Canaanites four hundred years before he considered it a righteous thing to destroy them, the Avim, Emim, Zamzummim,

* See the *New Analysis of Chronology*, (vol. i. pp. 272—289, second edition,) a work, the title of which, says Mr. Hartwell Horne, “very inadequately describes its multifarious contents. Not only is it the most elaborate system of Chronology extant in our language, but there is scarcely a difficult text in the sacred writings which is not illustrated The ‘New Analysis’ ought to have a place in the library of every biblical student.”

Horim, &c., must surely have existed as nations at a period earlier than the received chronology assigns to the Deluge? If not, the Avim and Horim, to take these two as examples, must each have become a nation, have forsaken the patriarchal worship, sunk into all manner of depravity, and been destroyed from the face of the earth, within six hundred years after the deluge—judging by analogy, a manifest impossibility.

Adieu, dear A—; we start to-morrow for Upper Egypt.

LETTER V.

Our Dahabieh—Night-Scenes on the Nile—Pyramids of Saccara, Dashour, &c.—The False Pyramid—Minieh—Story of Ebn Khasib—Siout—Tombs of Lycopolis—Stabl Antar—Traditions of the Copts—Ruins of Abydus—Palace of Sesostris—Kenneh.

December 28, 1836.

My dear mother,

I have just been admiring our little bark from the banks of the Nile, as she glided slowly along, her wings spread, wooing the breeze, and a blue sky above us,

“So cloudless, clear, and purely beautiful,

That God alone was to be seen in heaven!”

You must understand the epithet *little* as one of endearment, according to Burke’s theory of the Beautiful; in truth, she is of ample dimensions,—come, let me describe her to you, premising that we left Siout last night, and are now in Upper Egypt, the land of Thebes—a rapturous reality

sometimes difficult to convince ourselves of. Two crocodiles have welcomed us already; we have only just entered their territory. No hippopotami are to be seen north of the cataracts; to supply the deficiency, we have named our boat "the Hippopotamus," an epithet by no means mal-appropriate to a river-riding bark like ours.

She is of the *dahabieh* class, the middle size of those employed on the Nile. Our first care, after securing her, was to have her sunk, to destroy the rats and vermin, then to have her painted and repaired; she is now quite clean, and I hope will last so a good while. The inner and smaller cabin is just large enough for me; the larger is furnished with a Turkish divan on one side, and William's bed on the other, with a table between and a mat below: the windows are Venetian blinds, and open or shut at pleasure, with chintz curtains drawing across them; on the panels we have suspended three pair of pistols, our large *farkeeker*, straw hats, looking-glass, &c., &c. A sword, with which we equip our dragoman, Abdallah, when we go on shore in state, and William's gun and rifle, occupy the corner. Shelves are put up in both

cabins ; in mine I have marshalled our little library, which looks charmingly there.

In front of the cabin a large tent is pitched, of double canvass, open at the mast-end, furling upwards at the sides during the day, and closed in at night, when Missirie, Abdallah, and Hadji Achmet (an Arab *help*) sleep on its cushioned divans. Here we breakfast and dine ; we live here, in fact, during the daytime, and after dinner (sunset) adjourn to the cabin to drink a cup of delicious Mocha coffee, and read till tea-time, then again till about midnight—and Bedfordshire.

Beyond the tent, and facing the mast, is the kitchen, a little edifice of wood and brickwork, where Missirie presides as *cuisinier*, and a first-rate *artiste* he is. Beyond the mast are the quarters of the crew, and a small cannon.

The crew consist of ten men, besides the reis or captain ; they are active, willing, good-humoured fellows, and have harmonious voices, a great lounge, (to speak Etonicé,) as the Arab boatmen are a noisy set, constantly singing to their work, and always in chorus ; one of them leads, and the rest join in, generally line by line, alternately, neither

uttering more than five or six words at a time. The chorus of each song is always the same, but the Coryphæus, or leader, seems to sing *ad libitum*, words and air both, often deviating into a wild yell.

A curious scene was going on around us three or four evenings ago. We are now in Ramadan, the Mahometan Lent, always rigorously kept by the Arabs, who taste nothing from sunrise to sunset. The sun had gone down behind the bank of the river, but, as they might not eat till the legal hour of sunset, there they sat, poor fellows! each with an onion in his hand, their eyes fixed on Missirie's watch, by which he was to let them know when they might conscientiously set to. That evening was a very merry one; squatted in a circle, they sang unceasingly for two hours or more—strange wild chants, keeping time by clapping their hands, a custom handed down to them from the ancient Egyptians, and to the accompaniment of a rude tambour or drum. Each song ended with two extraordinary yells, not inharmonious, in which all joined, the voices dropping, as if from exhaustion, at the close. Between each song was heard the distant chorus of a crew toiling

on the other side of the river, and the whistling drone of a reed-pipe from a boat full of Bedouins from the west, pilgrims to Mecca, keeping company with us; sitting silent and motionless, their features almost invisible—their dark eyes gleaming from under their massive white drapery—never saw I figures more savagely picturesque! The reises, meanwhile, being in the complimentary mood, guns and pistols were going off every moment, each followed up by the yell of all the crews, succeeded, at least on board *our* vessel, by another song—and so on. The rolling echo of the guns from the rocks across the river added to the effect of this strange night-scene on the Nile. I do enjoy these wild old airs.*

We have had favourable breezes for the most part hitherto, and have gone night and day, the crew relieving each other; the breeze generally fails at sunset, after which they punt the boat, or tow it along the shore. We constantly run aground,

* A beautiful 'boat-melody of the Nile,' with appropriate words by Mr. Riddell, will be found at p. 36 of R. A. Smith's 'Select Melodies'—chiefly national; a very choice collection.

and then they dash over into the water, fearless of the crocodiles, and push away, hands and shoulders, to the usual chant of "Haylee sa! haylee sa!" till they clear her. William gets a walk and a little shooting every day, and I often accompany him as his gamekeeper. The banks, as we skim past them, are sometimes absolutely covered with wild geese—fire a gun, and they rise in myriads, as *clangingly* as Homer heard them settle on the banks of the reedy Cayster.

And what delicious weather! the morning and evening clear and transparent as the dew; but no pencil could paint, no tongue describe, the rich glow of the western sky at sunset, or the pink zone that girdles the horizon as the night falls,—pink at first, but changing from shade to shade, like the cheek of Iris, till the last, a delicate green, like chrysopraz, darkens into night. And night, how lovely! the moon riding triumphantly along, not *let into* the sky, as in the north, but visibly round and detached—you can see far beyond her,—with all her starry train around her, "the poetry of heaven!" But richer sunsets and lovelier nights are before us—en avant!

We are pressing on for Thebes, and have consequently left several interesting objects unvisited till our return, when we shall be better judges of their merit. We started under peculiarly gratifying auspices, fairly distancing a boat that put off in pursuit of us from the custom-house; had they boarded us, a teskeray, which we had received that morning from M. Piozin, the vice-consul, would have cleared us.

Never, dear mother, knew I what luxury was till now! I have realised Horace's idea of complete repose in lying at length under a green arbutus (at least as shady a tree) beside his own bright fountain at Lucretilis; but what is that to reclining under a tent, on a Turkish divan, in an Arab boat, ascending the Nile—a never-ending diorama of loveliness! villages, dovecots, mosques, santons' tombs, hermits' cells, temples, pyramids, avenues of the thorny acacia, (from which the country derives one of its old Sanscrit names,) and, loveliest of all, groves after groves of date trees,

“bending

Languidly their leaf-crowned heads,
Like youthful maids, when sleep, descending,
Warns them to their silken beds,”—

all slumbrous—all gliding past like the scenery of a dream—without effort—peacefully—silently; and yet, as when watching the stars at midnight, you feel all the while as if the sweetest music were murmuring in your ear.

The Pyramids of Djizeh, of Abousir, of Saccara, of Dashour—the False Pyramid, as it is called, rising in degrees, as we are told the Tower of Babel did,—all these have flitted past, and minaretted Minieh, the largest town on the Nile between Cairo and Siout :—

Ages ago, in the days of Abbassides, to whom Egypt bowed the knee from the middle of the eighth to that of the ninth century, one of the Caliphs, even the great Haroun Al-Raschid himself, was displeased with the Egyptians, and, desirous at once to punish, and make them an example to others, picked out the lowest of his slaves, one Ebn Khasib, the bath-warmer of the palace, and sent him governor to Egypt, in the confidence that the insolence, rapacity, and cruelty of such a ruler would amply express his resentment. Never was a man more mistaken than the Caliph; never was Egypt happier than under the mild rule of Ebn Khasib.

His fame spread far and wide ; many even of the Caliph's immediate courtiers, and one, especially, of his nearest kinsmen, visited and were entertained by him ; in short, Ebn Khasib was a second Chebib.

On the return of his kinsman to Bagdad, the Caliph, who had remarked and wondered at his absence, inquired where he had been ? "To Egypt," replied the prince, and proceeded to extol the humanity, justice, benevolence, and generosity of the governor, and display the presents he had received from him. The Caliph, enraged at the failure of his scheme, sent instant and peremptory orders for his degradation, that his house should be razed to the ground, his goods confiscated, his eyes put out, and that he should be cast forth, naked and a beggar, into the streets of Bagdad.

To hear, of course, was to obey ; a few weeks, and behold Ebn Khasib, friendless, hungry, destitute, groping his way through the streets, or sitting near the gate of the Seraglio, forgotten by his old-fellow-slaves, unheeded by the nobles who had eaten his bread and salt in Egypt, and whose silken garments touched as they swept past him ; the summer birds flee with the summer flowers !

He was accosted one morning by a poet :—
“ Ebn Khasib,” said he, “ I was on the point of starting for Egypt with a poem in your praise ; your arrival here in Bagdad saves me the trouble of that long journey, and, if you will listen, I shall have great pleasure in repeating it.”

“ Poor and blind, naked and miserable,” replied Ebn Khasib, “ what have I to give thee ? Go, my friend, seek a richer patron ; *my* star has set.”

“ Only listen to me,” replied the child of song, “ and as for recompense, God only do for you as you have done for others !”

Khasib listened, and his heart was touched ; they were the first words of sympathy that had consoled him in his misfortunes. “ Cut open this seam,” said he, when the song was ended, “ and accept this ruby ;” it was the only valuable that he had been able to secrete on the wreck of his fortunes. The poet expostulated. Ebn Khasib insisted, and the poet accordingly carried the gem to the jewellers’ bazar.

“ Such a stone,” cried the syndik of the jewellers, “ can only belong to the Caliph,” and before the Caliph they brought him. He told his little story ; the Caliph’s eye glistened, he sent for Ebn

Khasib, owned he had done wrong, loaded him with presents, and sent him back to Egypt, proprietor of Minieh, the spot he was fondest of in all the valley of the Nile—that Nile, to whose bounty the poet's fancy had likened his own; the place is still called after him, “Minieh Ebn Khasib,” and his posterity flourished there for I cannot say how many generations, since they were extinct when my authority, Ebn Batuta, visited the spot in the fourteenth century.

“As pretty a story as that of Queen Rhodope and her slipper!” But this is *true*, dear children! And what a commentary on the prophecy.—“Egypt shall be a base kingdom—the basest of kingdoms!” Surely, looking merely to the cause of Ebn Khasib's promotion, her subjection to the warrior Mamalukes was not so degrading! ⁽²³⁾

Siout, on the west bank of the river, was the first place we stopped at,—to visit the catacombs and tombs of ancient Lycopolis, excavated in the mountain that overhangs that city, the modern capital of Upper Egypt. For many hours before arriving at Manfalout, ⁽²⁴⁾ the vast rocks that edge in the Nile to the east are perforated with hundreds

of grottoes, some natural, others cut by the hand of man, and often at a great height above the water—the retreats of the Christian hermits who treated Athanasius so kindly during his repeated exiles from Alexandria. We often sailed close under them, and with the glass I could see far within the dusky portals, uncrossed now for many centuries. The tombs of Lycopolis, (so called from the old Egyptian wolf-worship,) were in later times appropriated by a similar swarm to that which hived north of Manfalout:—"They sunk," says Gibbon, "under the painful weight of crosses and chains, and their emaciated limbs were confined by collars, bracelets, gauntlets, and greaves of massy and rigid iron; they often usurped the den of some wild beast whom they affected to resemble; they buried themselves in some gloomy cavern which art or nature had scooped out of the rock, and the marble quarries of Thebais are still inscribed with the monuments of their penance." This he says generally of the Anchorets, but the description is peculiarly appropriate to those of Lycopolis, who ejected the mummies of wolves to make living mummies of themselves! Some of the grot-

toes, however—those, probably, appropriated to the wealthier human mummies, are of noble proportions; they are excavated, one above another, in the receding face of the rocks. We visited, I believe, all the larger, and explored with torches some of the smaller catacombs to which they lead; many of them end abruptly, others seem to be continued far into the bowels of the mountain. Everywhere the ground sounds hollow under the feet, and one must walk with caution, the floors being full of mummy-pits and depressions where the earth has fallen in.

The first excavation we reached is called “Stabl Antar,” after the far-famed “lover of Ibla.” A lofty archway leads you into a hall of noble proportions, once most elaborately ornamented with hieroglyphics on the walls, and the richest tracery on the ceiling, flowers and diamond-shaped devices, of different patterns and colours, succeeding each other in parallel rows; they are now much defaced, and, from the description a Danish traveller of last century gives of them, must have suffered much during the last hundred years. Great pains seem to have been taken with this

chamber; we found in none of the others such elaborate ornament or such beautiful proportions.

Leading the way up the hill, our *guides following* us, we found, above the Stabl Antar, a range of smaller excavations, and, above them again, a third tier, more extensive, but of rougher workmanship, than the first; a very large hall, once ornamented with hieroglyphics, and supported by square pillars, (left standing when the grotto was hewn out of the rock,) forming a cross with an inner chamber, narrower but longer, leading to further catacombs and passages. Regaining the face of the mountain, which looks N. E., and turning to the left, we came to another very large hall on the same tier, originally entered by a vestibule between two square pillars, both now gone; of two others, which corresponded to them at the farther end, the one to the right only remains. On the right, entering the vestibule, is a large tablet of hieroglyphics, beautifully sculptured, especially the birds, and coloured blue; to the left, on entering the hall, are the remains of sculptures running along the wall, three rows of warriors marching in procession, with large shields,

covering nearly the whole body, and long spears or billhooks. The lower row is almost gone. Above them, and below (as it were supporting) the ceiling, runs an elegant frieze of ornaments shaped like daggers. Bones and fragments of mummies are lying here and there, wherever the riflers of the mummy-pits have thrown them—disgusting objects.

Proceeding to the left, we came to another large and loftier hall, much fallen in; many other chambers at different heights of the mountain have suffered the same fate. After visiting two or three other ranges of excavations one above another, we reached the summit of the mountain, and enjoyed a lovely view over the valley of the Nile—itself a river of verdure meandering through the desert—diversified with date-groves, the dark-foliaged fig-sycamore, and avenues of the yellow-blossoming Egyptian acacia, alternating with field of the richest produce, every shade of green, striped with canals and water-courses; the white minarets, towering over the capital of Upper Egypt, rendering a town of mud houses the most picturesque object in the landscape. ⁽²⁵⁾

Interesting too, very interesting, is Siout, as the residence of our Saviour and his Virgin mother, after the flight into Egypt, if we may lend the ear of credulity to the traditions of the Copts, who consider the place holy, and often come here to die. ⁽²⁶⁾ An ancient sycamore at Matarea, near the plain of Heliopolis, which sheltered the holy fugitives during the heat of noon, and opened spontaneously to conceal them from the pursuers, (so runs the legend,) and a grotto in Old Cairo where they subsequently found refuge, both of which we visited, share with Siout in the veneration of the Copts. Looking down on Siout, it is pleasing to remember and believe the tradition; and the fact of there being no monkish edifice either there or at Heliopolis lends a degree of credibility to both legends, which one cannot concede to many of the so-called "loca sancta" of Palestine.

The traditions of the fathers, however, point out Hermopolis as their residence till they removed to the balsam-grove of Matarea, ⁽²⁷⁾ adding, that when the heaven-born child "was, either by design or providence, carried into a temple, all the statues

of the idol-gods fell down, like Dagon at the presence of the ark, and suffered their timely and just dissolution and dishonour, according to the prophecy of Isaiah: 'Behold the Lord shall come into Egypt, and the idols of Egypt shall be moved at his presence.'"^{*} Hermopolis has now resumed her pristine name, Asmunein; her beautiful portico burnt for lime, no one now halts to notice her; we passed her by some days ago. But this is a digression.

The modern cemetery of Siout, a beautiful object, lies on the slope of the hill we stood on; north of the town stands the palace of the Pasha, and to the east, beyond the Nile, the horizon is bounded by the Gebel Mokattam, or eastern mountains, answering to the western or Libyan chain, on a ridge of which we were standing; sometimes approaching, sometimes receding from the river, they hem in the valley of Egypt, from Cairo to the cataracts.

After examining sundry other smaller tombs, from several of which low slanting passages, like those of the Pyramids, now choked up, seem to run

^{*} Jeremy Taylor's Life of Christ.

deep into the mountain, we descended through a stony valley (not a blade of vegetation) perforated on both sides by similar excavations, (they are really countless—there must be thousands of them,) and turning to the left again, arrived, to my great delight, (for, after reaching the first excavation, the lazy Arabs left me to lead the way and explore for myself,) at a portal far more magnificent than any we had previously seen,—not arched (remember, everything here is cut out of the living rock) but flat-roofed, the sides inclining towards each other with the old Egyptian courtesy, and beautifully sculptured,—a tablet of hieroglyphics is inscribed on either side of the entrance, but in the hall it led us into we found none. This hall, though inferior in beauty to that of Antar, appeared larger and loftier than any we had seen; if the hills of rubbish heaped up in it were cleared away, it would be very nearly a perfect square. We observed vestiges of four square pillars, stained, as in all these larger excavations, in imitation of granite; the old Egyptians excelled in these deceptions. Arched entrances are cut in every side, and, to judge by one we entered on the right, lead to low

chambers of considerable extent. We lighted our torches, and, creeping along, found our way to the opening of another smaller passage, about six feet from the ground. We climbed up it, and found ourselves in the first large cavern we had reached above Antar's, a very agreeable surprise. Our descent to the plain was soon effected, and a pleasant walk of about half an hour brought us to our boat—our palace rather.*

* Dec. 29. (Two days after we visited Siout.) "I noticed this morning on, or rather *in*, the bank on the east side, a heap of immense masonried stones, and discerned hieroglyphics on one or two with my telescope, but there was nothing to lead one to suppose there was anything further to tempt a traveller to land. I asked what was the name of the village? 'Gow el Kebir,' they said. So these were the last remnants (which will be swept away next summer) of the temple which, a few years ago, was said to be 'perhaps the most picturesque on the banks of the Nile.' It was singularly appropriate to find that the extensive plain on which it stood (formed by a deep bay in the Mokattem range) is that on which the combat between Osiris and Typhon, the principles of good and evil, and which has been interpreted by many learned men to imply the contest between the Nile and the cultivated land, is fabled to have taken place." — *Mr. Ramsay's Journal.*

January 3, 1837.

A happy new year to my dear father and mother, and all dear to me! For some days past we have made but little or no progress, but this morning we are skimming along merrily; we shall perhaps reach Kenneh to-day—to-morrow certainly, if the breeze lasts. These days, however, have been days of great enjoyment. ⁽²⁸⁾

Yesterday we rode on donkeys from Girgeh to Arabat Madfoun, the ancient Abydus, sending on our boat to wait for us at Bellini. Next to Thebes, Abydus was once the chief city of the Thebaid, but had fallen from her high estate as long ago as the Greek geographer Strabo's time, about the commencement of the Christian era. The day was lovely, and a pleasant ride of three hours and a half, through corn and bean fields, all alive with buffaloes, camels, goats, and children perfectly naked and as brown as bricks—alternating with groves of majestic date-trees, sheltering generally an Arab village in the heart of each, took to the town and burial-place of Osiris, where the spouse of Isis was adored in his holiest

character, and where Rameses the Second, the Grecian Sesostris, built himself a palace, which it was our chief object to visit.*

* "Jan. 2. Our route from Girgeh lay through the rich vale of the Nile, studded with frequent villages under groves of dates and palms,—threading our way through fields of young wheat just preparing to sprout into the ear, rich clover on which the cattle, camels, and horses were grazing, tethered in lines to certain ranges, so that the field gradually disappeared, and was again producing another crop where they had first commenced it,—extensive fields of beans also, and the stubble of large sugar plantations. The large groups of the nearly naked, half-black, savage-looking beings reminded one of the drawings of the natives of the South Sea Islands. The young camels were gamboling about, and here and there an old and stiff one, instead of supporting its character for staid and solemn stateliness, might be seen, free from the control of pack-saddle or halter, capering before his astonished comrades, flying before the wind at full gallop, or playing such antics as the ungainly form Nature has assigned him might admit of."—*Mr. Ramsay's Journal*.

"— The total herd receiving first from one
That leads the dance a summons to be gay,
Though wild their strange vagaries, and uncouth
Their efforts, yet resolved with one consent
To give such act and utterance as they may
To ecstasy, too big to be suppressed—
These, and a thousand images of bliss,

Threading a noble grove of date-trees, and passing the modern village, we found ourselves on the site of the ancient Abydus, mounds beyond mounds of ruins, covered with the drifted sand of the desert,—nothing visible above the soil; think, then, of our astonishment and delight at coming suddenly on a lovely little lake, nestled in a hollow of the sandhills that form a sort of amphitheatre around it, girdled with graceful date-trees, and the doum, or Theban palm, with its fantastic head-gear, like a gay coquette by the side of a lovely single-hearted woman—of such the date-tree were a fit emblem. I cannot express to you the pleasure the discovery of this little loch gave me, and which will be as vivid years hence in recollection as when first it gleamed before me, “a vision of delight.”

Antiquaries have been burrowing here, as elsewhere, and have found, 'tis said, treasures; but,

With which kind Nature graces every scene,
Where cruel man defeats not her design,
Impart to the *benevolent*, who wish
All that are capable of pleasure pleased,
A far superior happiness to theirs—
The comfort of a reasonable joy.”

oddly enough, they seem to have left the palace untouched. It is almost covered with sand, so that a step or two lands you on the flat roof, which is in perfect preservation, built of enormous stones, some of them above twenty feet long. The interior also is choked with sand nearly to the capitals of the columns, and it is very fatiguing to explore it. It was near sunset, consequently we had not time for a thorough examination, but, creeping from one apartment into another, we clearly traced the extent of the grand hall, a noble apartment, supported by pillars, and beautifully sculptured in every direction, roof, walls, pillars, with hieroglyphics:—two-thirds, at least, of it are buried in the sand. Every wall, every column, in Egyptian architecture, was painted; the colours often remain as brilliant as if they had only been laid on yesterday.

While William had found his way down into the hall, I descended to the extremity of the ruins, where I found two or three other chambers, all of them vaulted, that is to say, the span of the arch cut out of the single stones, of immense thickness, that form the roof: all but one are choked up

with sand ; that one, after rejoining William, and visiting the hall with him, we proceeded to examine. Here we found the most beautiful bas-reliefs we have yet seen, more exquisitely delicate and highly finished than I could have imagined ; as fresh too as if finished yesterday, and yet more than three thousand years old, for Rameses succeeded to the throne of Egypt above one thousand three hundred years B.C. The sculptures describing his eastern conquests are the most interesting historical documents yet discovered in Egypt,—those we shall see at Thebes ; these at Abydus are, I dare say, equally curious, though chiefly mythological. One of them, representing the sacred boat, we uncovered—it was lovely indeed. Above us, sculptured in the roof, we recognised a genealogical tablet, which we conclude to be that of the ancestors of Sesostris, discovered here some years ago by Mr. Bankes—a precious document for ancient Egyptian history.*

* “ It was formed of the ovals of hieroglyphics, which always imply some name, in a regular list, separated by stars. It was evidently a genealogical chart, and must be the one spoken of, but it is odd to call a vaulted roof a *tablet*. At the end we entered, the stones were orna-

Here, too, in the very sanctum of Sesostris—blissful moment!—I bought a papyrus—for about eighteenpence English! It is in very tolerable preservation, but very fragile, and no wonder, for it must be at least two thousand years old.

The sun had gone down before we quitted Abydus—three hours' walk to Bellini (²⁹)—no matter; mented with hieroglyphics in alto relievo, very protuberant and marked; on one side, the characters were those of the ordinary style, but on the other there was a specimen of a very superior style, which we deeply regretted our time did not permit us to clear away a little more. The ground was milk-white stone, and continued in the same-coloured stucco, over part of the darker stones forming the roof; the drawings were executed with a delicacy, vigour, and beauty we had not yet seen, and in that particular manner which, it struck me must be peculiar to sacred subjects. The subject was not at first sight apparent, but I conjectured the various groups and objects above the sand to be all united, and form, perhaps, a boat or vessel, which, on having it a little cleared away, we found to be the case,—but I had no time to draw it, and it is impossible to describe the extraordinary forms. We are generally inclined to attach an idea of sameness and rigidity to these hieroglyphical figures, and the poor specimens we have at home favour the idea; but in regard to those we saw here, nothing could be more incorrect. Every figure was varied, and quite of a different character from the others.”—*Mr. Ramsay's Journal*.

it was a beautiful starlight night,—the path, however, was difficult to keep, being only perceptible at a distance, like the *blind road* over a heath in Scotland, and we soon lost our way ; inquiring at a village, a man, after offering us hospitality for the night, volunteered to put us into the right road—not for *bagshish*, but for love ; he walked some distance with us, smoking his pipe, and we parted with friendly signs, though in silence—one of those little incidents that lend such a charm to daily life. One exchanges much courtesy of this sort here, talking by signs, a smile winding up each sentiment, like the little fillip in talking with one's fingers. After reaching the river, we had some difficulty in finding the boat, till the cannon and pistols of those on board replying to our e-pistol-ary interrogations from the shore, we soon rejoined them.

Kenneh, January 4, 1837.

We intended visiting Dendera to-day, but, having a fair wind, have written to Isis, “postponing that pleasure,” &c., &c., till our return. We have just been drinking coffee and smoking our pipes

with a jolly old cock of an Arab, his Britannic Majesty's consular agent here, who wanted us to dine with him, and accept his escort to Dendera—a courtesy which we had some difficulty in evading. On rising to depart, he mounted us on two superb donkeys, and sent a dwarf to escort us to the boat.

I have no time for more,—we are ready to start. We are both well—God bless my dear mother!

LETTER VI.

Thebes. Temple—Sculptures—Tombs—Fulfilment of the Prophecies.

Esneh—Edfou—Essouan—Ascent of the Cataracts—Nubia—Wellee Kiashef—Wady Halfa—Descent of the Cataracts—Wreck, and detention at Essouan.

Temples of Herment, Dendera, Ombos—Tombs of Benihassan—Memphis—Pyramids of Saccara and Dashour—Cairo.

February 3, 1837.

Returning down the Nile.

FAR have we wandered, and much have we seen, dearest mother, during the last month and a half. We arrived at Thebes, glorious Thebes! the day after I despatched my letter from Kenneh, and fired our cannon in triumph; we always do so on reaching any place which forms an epoch in our voyage; it astonishes the natives. We saluted a

Turkish Kiashef, or governor, the other evening, as he left our boat, after dining and chatting with us for three hours; the poor man *tottered* with astonishment, he took it in very good part, however—more of him anon.

Colonel Vyse, whose boat was moored alongside of ours, paid us a visit the evening we arrived at Thebes. He advised our taking advantage of the favourable wind, and proceeding direct to Nubia before it changed. It was impossible absolutely to turn our backs on Thebes without one glance at her, yet the advice was not to be rejected *in toto*, and we therefore took a hurried look only at the ruins, merely to familiarise ourselves with their plan: on our return we examined them minutely, but I will say now all that I think will interest you on the subject.

For a glance at the principal objects, two days suffice; the first we devoted to the western or Libyan suburb—for the Nile divides the city of Ammon into two portions, of which the eastern is the most considerable. Mounting, therefore, a couple of Arab steeds, we started for the ruins,

Ali Massaoud, the guardiano, leading the way, with a long spear on his shoulder.

We soon came in sight of

“Memnon’s statue which at sunrise played,”

and his companion, and in about half an hour dismounted at Gournou, to visit the temple of Ammon, the Theban Jupiter, begun by Osirei, and finished, with the palace contiguous to it, by his illustrious son, Rameses the Second. It is small comparatively, but very interesting, the columns of the portico, lotus-stalks bound together, being evidently the prototype of the Doric. The eastern court was the hall of assembly of ancient Thebes. A royal palace was attached to most of the great temples: the priests were equally well lodged in the lateral apartments.

Do you remember the discovery struck out some years ago by Dr. Young, and perfected by Champollion, of a hieroglyphical alphabet, by which they were enabled to read the names of all the kings who have recorded themselves on the ancient monuments of Egypt? It is to this discovery that we now owe the exact knowledge

when, and by whom, every temple was built and tomb excavated. This alphabet gives us no insight into the wisdom concealed under the abstruser hieroglyphics, yet we owe to it many gleams of history, not the least interesting of which is the confirmation of all that ancient historians have told us—so long discredited—of the glory of Sesostris.

Memnon's statue is indeed a marvel—between fifty and sixty feet high, and originally of one block of stone, he fell asunder before our Saviour's time, but was rebuilt soon afterwards: his companion is still entire, though the features are much defaced. The name of Memnon is a misnomer;* they represent Amunoph the Third, who flourished about a century before Sesostris. Hadrian and his ill-fated queen Sabina stood and gazed up at them just where we did, and, among the numerous inscriptions that prove

* Corrupted from Mi-ammon, "the beloved of Ammon," the favourite title of Rameses the Great, confounded by the Greeks with the Memnon of Homer, and applied by them indifferently to all the Pharaohs so surnamed. See an interesting note, p. 9, of Mr. Wilkinson's "Topography of Thebes."

Memnon's identity, we read, with no small interest, the names of the Roman ladies who accompanied their imperial mistress, and heard (as an inscription which I could not find testifies) the "unseen melody" salute the ill-assorted pair *twice*, the morning they were there. And there they will sit, probably, to the end of time; looking down, in the same silent austere majesty, on pilgrims from lands unheard-of when they were born—peoples even yet uninscribed in the muster-roll of nations. These statues marked the termination of a noble avenue, which led to the temple and palace of Amunoph, now levelled to the ground; two or three colossi, which once ornamented this grand approach, lie across it on their faces, half-buried under the soil accumulated by successive inundations.

The Memnonium, as the palace and temple of Sesostris are now misnamed, is indeed a noble ruin. The enormous granite statue of the monarch, overthrown by Cambyzes, lies on its face, prone as Dagon fell, the upper half split into two or three vast fragments, the lower shivered to atoms; the workmanship is exquisite. He sat a little in ad-

vance of the temple, his hands on his knees, resting after his conquests. Judge of his stature by the breadth of his shoulders, twenty-two feet ! Not *quite* such a giant, either, as Gog Magog Mac Finn Mac Coull, whose mouth was eleven miles wide, his teeth ten miles square :

“ He wad upon his taes upstand,
And tak the stars doun with his hand,
And set them in a gold garland
To deck his wifis hair.”

Near the colossus lie the neck and shoulders of another statue of Rameses, better known as that of “ young Memnon,” whose head Belzoni removed to England.

I cannot express to you how delighted William and I have been with the historical sculptures that the temples of the age of Sesostris are adorned with. The battle scenes on the Memnonium have reminded every traveller of Homer, and it is not unlikely, if he *did* visit Egypt, that he may have studied them, though in his sacred character of bard he must have seen many a noble *melee*—for blind, born-blind at least, he could not have been ; Schlegel has convinced me of this, A——’s favou-

rite critic, and mine, since she introduced me to him. The sculptures, however, Homeric as they are, remind me as much, or more, of the glowing war-imagery of the Prophets: lend them the eyes, the ears of your imagination, and you have “the rattling of the wheels, and of the prancing horses, and of the jumping chariots: the shield of the mighty men is made red, the valiant men are dyed scarlet, the chariots rage in the streets—they jostle one against another in the broad ways; the horseman lifteth up the flame of the sword, and the lightning of the spear, and there is a multitude of the slain, and a great number of carcases, and there is none end of their corpses—they stumble upon their corpses.” The “horse and his rider”—the chariots of Pharaoh—all are pictured here, such as Moses beheld them.*

But, after all, is not this resemblance of Homer and the Prophets to these sculptures and to each

* Mr. Ramsay's observations on the sculptures and paintings of Thebes, and of Egypt generally—scattered through his Journal—will be found collected together at the close of the first part of this letter; they will thus be read somewhat in the order in which he would probably have arranged them himself.

other very simply to be accounted for, by the similar state of society that prevailed in the respective countries during the heroic ages? "Antar" is in many passages as Homeric as the *Iliad*—for the same reason. We are apt to think of none but the heroic age of Homer, yet the world has never been without an heroic age, acting on one of her hundred national stages. What the age of Antar was to the Saracens, of Camillus to the Romans, of Achilles to the Greeks, of Joshua to the Jews, of Rustum to the Persians—that of Sesostriis was to the Egyptians.

The magnificent hall of the Memnonium (you enter it between gigantic statues twenty feet high, their arms folded, tranquil and sublime in the consciousness, it would seem, of benevolence and power) opens into a smaller chamber, to me by far the most interesting as the repository of the books of Thoth—the earliest library on record! The ceiling is astronomical, and very interesting, as the date of Sesostriis's reign is determined by it to B. C. 1322, the year from which the grand Canicular cycle of 1461 years, hieroglyphically veiled under the story of the Phoenix, began. On

the northern wall of this library, Sesostris is represented seated under the Tree of Life, which overshadows him, while Ammon-re and Thoth, or Mercury, write his name on the leaves*—one of the many curious patriarchal memories preserved among the Egyptians.

From the Memnonium we rode to the ruins at Medinet Habou—Medina Tabu, as it ought to be written—that is to say, the city Tabu—Thebes; for Tapo, the Sanscrit, and Tape, the Coptic name, could only be accommodated to Arab pronunciation by the substitution of *b* for *p*.† We visited the smaller temple first; the area, gateway, and propylon you enter by, and the second area and propylon—additions of yesterday, the former by the Ptolemies and Cæsars, the latter by Tirhaka, king of Ethiopia, the rival of Sennacherib—introduce you to the original edifice, built by a nameless predecessor of the second and third

* “ Her leaf hath withered on the Tree of Life.”

Thalaba.—B. x. 26. And see note.

† Tapovana, or Tabenna, is the name always given to Upper Egypt in the sacred books of the Hindoos.—*Vide* Wilford on Egypt and the Nile (Asiatic Researches, v. 3.)

Thothmes, who completed it rather more than one thousand five hundred years B. C. The small sixteen-sided pillars in the oldest part of the building bear still a nearer resemblance to the Doric than those we observed at Gournou.

The palace of Rameses the Third stands contiguous to the smaller, and to the south of the larger, temple. You ascend to it between two pavilions—porters' lodges probably—built in advance of the lofty towers, but there are no menials now to hinder your intrusion into the most private apartments of the Pharaoh. In the sculptures of one of the upper rooms, the floor of which has fallen in, you see him, seated with his wife and daughters around him—'tis like seeing their ghosts!

Beyond the palace, traversing a spacious area, two enormous pyramidal propyla, (towers of entrance, that is to say—and I ought to have said it before—truncated, and connected by a curtain pierced with a doorway,) introduce you into the great court of the temple, eclipsing all you have seen of previous grandeur. Do not expect architectural plans or descriptions from me—I have

neither time nor patience for them—I will only say, that all I had anticipated of Egyptian magnificence fell short of the reality, and that it was here, surveying those Osiride pillars, that splendid corridor, with its massy circular columns, those walls lined, within and without, with historical sculptures of the deepest interest, the monarch's wars with the Eastern nations bordering on the Caspian and Bactriana—study for months, years rather! it was here, I say, here, where almost every peculiarity of Egyptian architecture is assembled in perfection, that I first learnt to appreciate the spirit of that extraordinary people, and to feel that, poetless as they were, they *had* a national genius, and had stamped it on the works of their hands, lasting as the Iliad. Willing slaves to the vilest superstition, bondsmen to form and circumstance, adepts in every mechanical art that can add luxury or comfort to human existence—yet triumphing abroad over the very Scythians, captives from every quarter of the globe figuring in those long oblatinal processions to the sacred shrines in which they delighted, after returning to their native Nile—that grave, austere, gloomy architecture, sublime in outline

and heavily elaborate in ornament, what a transcript was it of their own character! and where could Clio write their history so appropriately as on the walls of their temples?—And never were pages more graphic. The gathering, the march, the *melée*—the Pharaoh's prowess, standing erect, as he always does, in his car—no charioteer—the reins attached to his waist—the arrow drawn to his ear—his horses all fire, springing into the air like Pegasuses,—and then the agony of the dying, transfixed by his darts, the relaxed limbs of the slain—Homer's truth itself; and, lastly, the triumphant return, the welcome home, and the offerings of thanksgiving to Amunre—the fire, the discrimination with which these ideas are bodied forth, they must be seen to be judged of.

Here, on our first visit, we met Colonel Vyse, and accompanied him to a place called Qoornet Murraee, to see the tomb of the elder brother of Amunoph the Third — the melodious Memnon. The entrance is a mere hole in the side of the hill; we crept in on all fours: though inferior in size and beauty to the tombs we afterwards visited,

the paintings lend it the highest interest, representing the chiefs of Cush, or Ethiopia, bringing gold rings, (the money of those times,) skins, a cameleopard, &c., tribute to Pharaoh. In an upper compartment, the sable queen of Ethiopia, throned on her chariot, with the chattah, or umbrella of state, and a train of attendants carrying presents, pays a visit to the monarch of Egypt; so attended must the Cushite queen of Sheba have approached king Solomon, and thus will “the kings of Tarshish and the Isles bring presents,” “the kings of Sheba and Seba offer gifts”—“the gold of Sheba,” to “the king’s son,” the “greater than Solomon,” at Jerusalem. ⁽³⁰⁾

After visiting another old temple called Deir el Bahree, at the very foot of the western mountains, which tower up majestically above it, we retraced our steps, and, climbing over the hills, descended into the valley of the tombs of the kings by a narrow and precipitous ravine—not the regular approach, but far more impressive. The valley is desolation itself, long and winding, shut in by lofty rocks—not a trace of vegetation;—

fit scene for the funeral processions of mighty Pharaohs—fit indeed for the last home of the extinct dynasties of a vanished nation ! They are temples rather than tombs, broad passages and gorgeous chambers opening one into another, till you find yourself in the lofty hall of the sarcophagus, terminating each. Some of them run three or four hundred feet into the heart of the mountain, a gradual slope figuring the descent into Amenti, the Egyptian Hades, or world unseen. The most beautiful are those of the Pharaohs who reigned from Rameses the First, grandfather of Sesostris, to Rameses the Fifth, in whose reign Troy was taken, B. c. 1184, inclusive. A regular series of portraits of the Pharaohs might be taken from these tombs ; the likenesses are always exactly preserved.

The spoilers have been at work in Belzoni's tomb ; it makes the heart ache and the cheek burn to see such wanton outrage ; one whole pillar (to say nothing of partial robberies, figures cut in two for the sake of a limb or an ornament) has been stript of its sculptures, and stands a melancholy wreck, naked and dazzling white,

amidst its companions, the chips all around it—
tongues of reproach, that curse the hand that
maimed it !

But, in spite of all this sacrilege, wonderful,
indeed, and brilliant is this tomb: the great hall,
where the sarcophagus once stood, is rich be-
yond conception in hieroglyphics, sculptures, and
general ornament ; but the unfinished chamber be-
yond it, where you see the simple and beautiful
outlines drawn for the sculptor to work upon, and
corrected by the master's hand, is, to a lover of the
arts, by far the most interesting of the series. The
whole is so fresh, and the drawing so beautiful,
that you almost expect the return of the artist,
and feel it would be a shame to go without com-
plimenting him on his performance. He was em-
balmed three thousand years ago—for this was
the tomb of Osirei, the father of Sesostris !

In Bruce's tomb—poor calumniated Bruce!—
(I felt more pleasure in visiting it for his sake than
for the real owner's, Rameses the Third)—we saw
the paintings of harps, copied and published by
him, from which it has sometimes been called the
“Harper's tomb,” but shall not be so by me:—

the harps are of the most elegant construction, and one of the performers seems to be damping the strings, just like a modern performer. They are respectively of eleven strings and thirteen—or fourteen, I could not ascertain which. I have counted the harp-strings in almost every tomb; there seems to have been no fixed number. I have seen also the five-stringed lyre, like that Apollo played on among the Muses, the guitar, exactly like the modern instrument, and held in the same manner, a sort of mandoline, the double flute, &c. They kept time by clapping hands; Herodotus mentions this, and our Arab-Egyptian sailors practise it when singing in the evening.

There are many other paintings in the side-chambers of Bruce's tomb, of great interest, as illustrative of the manners and domestic life of the Egyptians; in one you have the whole process of sowing and reaping, in another the mysteries of Egyptian cookery; a third is a painted armoury; in a fourth you see every description of Egyptian furniture, to the full as elegant as that of Greece—arm-chairs like our own, and of the most inviting appearance, ottomans precisely like ours,

steps for ascending to bed—at least exactly resembling those used in England for that purpose, and sofas, with crescents for the leg and neck to rest upon—luxurious appendages which Cowper had never heard of when he wrote the Task.

The tomb of Rameses the Fifth is peculiarly interesting, and Champollion has described it as a guide to the rest, the subjects represented in it being found in most of the other tombs, but not so detailed. The roof of the passage leading to the principal chamber is most richly painted, red and black, in the style of the Etruscan vases. The ceiling of the chamber of the sarcophagus is quite beautiful, and delightfully mystical, describing the procession of the Sun through the hours of the day and night—emblematical of the life of the terrestrial luminary, Ph're, the Sun, or Pharaoh, of Egypt. The symbolical paintings are enclosed by the double body of Nith, the goddess of the firmament, prolonged, like the folds of a serpent, round the ceiling and through the middle of it, separating the day from the night. In the east, Nith becomes the mother of the Sun, an infant, who is carefully placed in the bark, in

which he descends the celestial river with a large *cortège* of deities. Each hour of the day is marked by a globe—of the night by a star. They begin sounding at the seventh hour, and a pilot comes to steer them through the remaining hours of light, the river growing shallower and shallower, till, at the twelfth, the scene changes, and, veering round in the great western lake into which the river empties itself, they commence their return eastward, through the hours of the night, towed by ropes up a branch of the celestial river, which terminates, like the main stream, in the western lake. The sun is attended only by the pilot and one other deity during this nocturnal voyage.

I am not sure that this description is precisely correct, for the vault of this hall of mystery was too obscure for me to see as distinctly as I could have wished. Tablets of hieroglyphics are interspersed with the symbolical paintings, describing, says Champollion, the celestial influences of each hour on the several parts of the human body. In a recess at the end of the hall, Tethys, the wife of Oceanus, stretches out her arms to receive the descending bark of the Sun. In similar paintings

in other tombs, she is represented rising from the celestial Nile, the Oceanus of Homer. This mysterious imagery gives one an insight into the origin of the ancient Grecian idea (first hinted at by Homer) that the Ocean was a river encircling the Earth, into which the Sun descended in the west, and sailed round to his starting-place in the east every night.

But the information we can gather from these paintings as to the religious opinions of the Egyptians, is still more interesting. The doctrines of a future state, of judgment after death, and of rewards and punishments, are invariably subjects of representation; in one instance, a condemned soul is carried away in the shape of a sow, and the word *gluttony* is written over it to explain his crime; this is probably emblematical only, but it looks like the originally Indian doctrine of transmigration, which Pythagoras is supposed to have picked up in Egypt. The punishments of the bad are frequently depicted, and the rewards of the good, who swim and sport like fish in the celestial Nile—"the river of the waters of life!"

But, amidst these gleams of traditional truth, "every form of creeping things and abominable

beasts, and all the idols of the house of Israel, are portrayed upon the wall round about," in these dark chambers of imagery, just as Ezekiel beheld them in the temple at Jerusalem. Serpents of the most extraordinary forms are seen in every direction—short, thick, and hooded, or long and tapering—the latter often carried in long mystical procession, human heads surmounting their own, or female heads growing, as it were, on their backs, between each bearer. Belzoni's tomb is rich in serpents; I saw there a beautiful winged snake, with three heads and four human legs; others had a head at each extremity, crowned with the corn-measure and mitre, the body, curving downwards, supported by four human legs, two looking each way; others with four or five legs respectively. On each side of the descent to the sepulchral chamber of Rameses V., is a most magnificent snake with vulture's wings. How Holden, Faber, and those other excellent men who have written so ably and convincingly in proof of the literal fall in Paradise through the wiles of the serpent, arguing, among other proofs, from the universality of

serpent-worship, would have been interested with a sight of them! Every step I took reminded me of some incident in Indian or Grecian mythology, and convinced me more and more that every system, eastern or western, is intimately connected in its origin—primitive revelation and patriarchal tradition, more or less corrupted. One subject, frequently repeated in these tombs, forcibly struck me—the eventual conquest of the great serpent, Apophis, by the gods, who transfix him with daggers, and bind him, head and foot, with ropes: it was impossible not to think of the prophecies.

+C14 - V-9 to 19. What a commentary are these tombs on that most sublime passage of Isaiah^x, in which Hades, the world unseen, personified, is represented as stirring up the mighty dead, all the kings of the nations, from the thrones on which “they lie in glory, each in his own sepulchre,” to behold the corpse of Belshazzar, cast forth at the mouth of their long home, unburied, trodden under foot, and dishonoured:—

“Art thou also become weak as we? art thou made like unto us?”

“ Is thy pride brought down to the grave, and the sound of thy viols? Is the worm spread under thee, and doth the earth-worm cover thee?

“ How art thou fallen from heaven, O Lucifer, son of the morning!—art cut down to the earth, thou that subduedst the nations!

“ Yet thou hast said in thine heart, ‘ I will ascend into heaven, above the stars of God I will exalt my throne; I will sit on the Mount of Congregation on the sides of the north; ⁽³¹⁾ I will ascend above the heights of the clouds; I will be like the Most High!’

“ But thou shalt be brought down to the grave, to the sides of the pit!

“ They that see thee shall narrowly look upon thee and consider thee—‘ Is this the man that made the earth tremble, that did shake kingdoms?

“ That made the world as a wilderness, and destroyed the cities thereof? that opened not the house of his prisoners?’——

“ All the kings of the nations, all of them, lie down in glory, each in his own sepulchre:

“ But thou art cast out of the grave, like an abominable branch, and as the raiment of those

that are slain, thrust through with a sword,—that go down to the stones of the pit—as a carcass trodden under foot !”

In front of the tomb of Amunoph’s brother I saw a mummy that once possibly was his, and wore a crown, rifled of its cerements, black and bent double, peering, like a creature of life, over the brow of the hill, as if it watched my motions ; an Arab pushed it with his foot—it fell on its side, and the back broke,—and there it lay, “a carcass trodden under foot,” soon to be redissolved into the elements that human art had so many ages defrauded of their prey. “Was this the man that made the earth tremble, that shook kingdoms ?” A Pharaoh probably—I could have fancied him Belshazzar ; at all events, the miserable epitome at my feet had been a *Man* three thousand years before me. Hamlet might have moralised there for hours, but we have a brighter hope—

“Why should this worthless tegument endure,

If its undying guest be lost for ever ?

Oh ! let us keep the soul embalmed and pure

In living virtue, that, when both must sever,

Although corruption may our frame consume,
The immortal spirit in the skies may bloom !”*

How often, rambling over the ruins of Thebes,
has that noble poem sung itself to me !

But why should the kings’ tombs engross all
my praise? Gorgeous as they are, and interesting
for the study of ancient mythology, those of the
private Thebans are yet more so for the history of
manners and daily life among the old Egyptians.
Every light and shadow, indeed, of human life, is
portrayed in them, from the laughter of the feast
to the tears of the funeral—ointments poured on
the head at the one, dust heaped on it at the other
You see on one side the arrival of the guest in his
chariot, white horses and a train of running foot-
men betokening his consequence ; the other guests,
already assembled and seated, the men apart from
the women, wait for their dinner, and beguile the
intervening moments with smelling the lotus-flower,
and listening to the music of the dancing-girls. The
master of the house and his wife, richly dressed,
and lovingly seated side by side, preside at the

* From the Address to the Mummy in Belzoni’s exhibition by Delta (D. M. Moir, Esq.)

entertainment. But the tableau would be incomplete without side-views of the shambles and the kitchen, and a beggar at the gate receiving a bull's head and a draught of water from one of the menials. Facing this, on the opposite wall, the mourning-women, with wailing cries and dishevelled hair, precede the coffin that bears the hospitable Egyptian to his long home; the wife or the sister walks beside it, silent in her sorrow; a scribe takes account of the dead man's riches, his cattle, his horses, his household chattels: Death—and then the Judgment:—the deceased is ushered into Amenti; Horus and Aroeres weigh his merits against the ostrich-feather, the symbol of Truth;* Thoth, the god of letters, presents a scroll, the record of his thoughts, words, and works, to the Judge Osiris, into whose presence he is at length admitted on the favourable result of the scrutiny. Sad presumption for man thus to usurp his Creator's prerogative of reading and judging the heart!

And amidst all these varied scenes, as if to show how narrowly joy may be partitioned off from sor-

* “The good actions are weighed in the grand balance against a feather—a fine idea.”—*Mr. Ramsay's Journal.*

row, how the merry-hearted and the broken-hearted may unconsciously pillow within an inch of each other, and how the world jogs on in daily routine, indifferent to the feelings of either—the occupations of every-day life are pictured in their minutest details around you,—scenes of industry, scenes of frolic, parties pledging each other's healths, young folks dancing to the music of the harp, husbandmen in the fields, artificers of every trade at their work, (many of them with tools precisely like those now in use,) carpenters, smiths, glass-blowers, shoemakers, wheelwrights, statuaries, idol-makers—I saw a god under the graver's hand, and thought of Isaiah's noble apostrophe, which Sir Frederick P——, you may remember, read so beautifully that delightful evening he spent at Haigh last summer. The illustration was perfect. *see C. 44*

But of all the Egyptian tombs, scarcely any interested me so much as one I visited at Eilethyiæ above Thebes. Life on the one wall—Death was pictured on the other; to the left, rural occupations, ploughing, sowing, reaping, and gathering into barns—the vigour of the year and of human life; the owner and his wife, lovingly embracing

eath other, entertain their friends with the fruits of their labour; servants are in attendance, young men and maidens—the heyday of youth and riches; to the right he stands erect, but stiff and lifeless—the embalmer extracts his brain with a long crooked instrument,* preparatory to filling the skull with aromatics and spices; that work over, the coffin is borne in solemn procession; a figure, muffled up and shapeless—his wife (she was embracing his knees five minutes ago)—is drawn on a sledge in front of it; the sacred boat of the dead, two obelisks, and two trees like cypresses—Horace's lines came across me, as I gazed on them, with an indescribable feeling of melancholy,—

“ Linqenda tellus, et domus, et placens
Uxor, neque harum, quas colis, arborum
Te, praeter invisas cupressus,
Ulla brevem dominum sequetur !”

“ Thy lands, thy home, the wife of thy bosom—all must be relinquished; nor of these trees that thou cultivatest will any, save the hateful cypress, accompany their short-lived lord !”

In another tomb at Eilethyiæ, you see the father dandling his child, and the lady's pet monkey tied

* See Herodotus, Book ii. chapter 86.

to her chair.* In the tomb of one of the royal scribes at Thebes, the young princess of Egypt,

* “ 3d Feb. We went to see the grottoes of Eilethyiæ, which lie on the east bank, about a mile and a half inland. On the way, we came upon the walls of the ancient town, which are of crude brick, about thirty feet high and twenty thick, and in a very perfect state, the square openings for the gates in the middle of each side of the square being quite preserved: they enclose an area a mile long, and three quarters of a mile broad. The interior is flat and bare, except to the west, where a range of high mounds evidently conceals what remains of the ancient town. What its antiquity may be, I do not know. The grottoes are behind it. They are chiefly tombs, of tolerable size, dug out of the mountain-face, and extending some distance in. They are in general in a ruined state. The pits for the mummies are very apparent in some, and they have evidently been all ransacked and *sacked* by previous travellers and speculators. About six or eight of them contain designs on the walls, in a tolerably perfect state, of which three are highly interesting. They contain drawings, very well done, of the whole life of the individuals of whom they treat. One gentleman, who was a proprietor of boats on the river, then governor of the government shipping, and, lastly, an officer in different wars under Thothmes, has a very curious tomb; and next to him lay a priest of the goddess presiding here. The history begins from childhood. The principal figures are the person and his wife, seated together on a chair, under which is a pet monkey; they appear to be on loving terms, and are entertaining a party of friends, who sit

Amunoph the Third's daughter, whose tutor he had been, sits on his knees, as little Minnie might on mine, and playfully puts the lotus-flower to his opposite a large collection of dainties ; pages pour water on their hands, present them with lotus leaves, &c. Behind are all the preparations,—the butchers are killing and cutting up the oxen (very well executed)—the process of cooking goes on—the guests come over the river in boats. In another part, the proprietor comes in his car to superintend all his rural affairs ; ploughing, sowing, reaping, thrashing, stowing, and weighing the corn, and selling it for money in rings, and everything connected with agriculture, are minutely represented. The songs of the different occupations are written above, and Champollion has read them, he says. Drovers of oxen, donkeys, sheep, &c., very spiritedly done, are brought up to scribes, who register them. The similarity, and, in many instances, identity of things in common use with those used now in this country, is very striking. The filtering water-jars, and their wooden stands, are the very same ; the plough is the same, and the head-dress also. In one place boats are represented, some sailing, others being rowed, and others getting mended, or being charged or emptied. Our sailors were in raptures with them, and found out their own likenesses in the crew. The sail used was a very strange one. Again, they are drawing large nets for wild-geese, which are no sooner caught than plucked, dressed, and served up. The funeral is a very conspicuous part. In some the process of embalming is shown very clearly. The body was placed on a bier, resting on a sledge, to which a long cord was attached, the end of which was fastened to a cow, and all the

nose. It is nonsense limiting our sympathies by time and space—

“ A heart hath throbbed beneath the leathern breast,
And tears adown the dusky cheek have rolled ”—

and children *have* “ climbed the knees and kissed the face ” of every mummy that we trample on, scarcely regarding it as the sacred relic of humanity it really is. Human nature was the same then as now ; she has oscillated between smiles and tears ever since Adam’s fall—and philosophers may say what they please, but I will defy the most callous of them to visit these tombs, and deny that man may sympathise with man, his elder by half the world’s age.

The largest of all these Theban tombs is the least interesting, except from its immense extent, ramifying over more than an acre of ground—mourners had a hold of it. In some the preparations and sport of hunting are represented. These tombs are of the period of the eighteenth dynasty—about 3,300 years ago ; the colours are as fresh as ever, and, except where the people who, probably, live in them at times, or strangers have broken them down, they are not in the least the worse for their longevity. The precision with which the dates of all these places is determined is quite clear ; they have the dates inscribed, even to the day and month, in general.”—*Mr. Ramsay’s Journal*.

exceeding that of any of the royal sepulchres. A priest, named Petamunap, excavated it for himself, and probably his family, quite recently—in the seventh century, B. C. It is blackened with smoke and dirt; the bats flew past in swarms, as we intruded on their dusky domains; the descent to the lower range of excavations was like the mouth of Hades itself—I never plunged into a place so dreary.

So much for Western Thebes. You may well imagine it took some days to examine all the places I have described. We visited the temples the first day of our first visit, and some of the principal tombs, and a day of delight it was. Colonel Vyse sailed for Cairo the moment we reached Gournou, where the boats were moored; we saluted him with our cannon, and then crossed to the other side of the river.

The next morning we visited the temples of Luxor and Carnac. The former is a most magnificent pile, architecturally considered, but otherwise the least interesting of the four great temples of Thebes. You originally entered between four gigantic statues of Rameses the Great, and two superb obelisks, of which one only remains

— the French have carried off his brother, and every lover of antiquity must regret their separation. The obelisks, statues, and pyramidal towers were additions by Rameses to the original edifice, founded by Amunoph the Third.

From the propyla and obelisks of this temple, an avenue, guarded by sphinxes, facing each other, extended northwards to the great temple of Jupiter Ammon at Carnac, meeting it at right angles, the latter extending from west to east. The road we followed lay nearer the river, and led us through a comparatively small temple of Isis, which would have detained us longer in a less attractive neighbourhood, into the great court of Jupiter Ammon's temple, the noblest ruin in Thebes. A stupendous colonnade, of which one pillar only remains erect, once extended across this court, connecting the western propylon or gate of entrance built by Sesostris, with that at its eastern extremity, leading to the grand Hall of Osirei and the sanctuary. We ascended the former;—the avenue of sphinxes, through which the god returned, in solemn procession, to his shrine at Carnac, after his annual visit to the Libyan suburb, ascends to it from the river,—the same avenue

traversed age after age by the conqueror, the poet, the historian, the lawgiver, the philosopher—Sesostris, Cambyzes, Homer, Herodotus, Thales, Anaxagoras, Solon, Pythagoras, Plato—and now the melancholy song of an Arab boy was the only sound that broke the silence; but that poor boy was the representative of an older and a nobler race than the Pharaohs.

Long did we gaze on the scene around and below us—utter, awful desolation! Truly, indeed, has No been “rent asunder!” The towers of the second or eastern propylon are mere heaps of stones, “poured down”—as prophecy and modern travellers describe the foundations of Samaria—into the court on one side, and the great hall on the other,—giant columns have been swept away like reeds before the mighty avalanche, and one hardly misses them. And that hall, who could describe it? Its dimensions, 170 feet by 329,—the height of the central avenue of columns 66 feet, exclusive of their pedestals,—the total number of columns that supported its roof 134,—these particulars may give you some idea of its extent; but of its grandeur and beauty—none.

Every column is sculptured, and all have been richly painted. The exterior walls, too, are a sculptured history of the wars of Osirei and Rameses. How often I longed for J—— and A—— while examining these noble designs! except those I shall presently mention at Beit Wellee, I have seen nothing in Egypt that would interest them so much. In one corner, of especial interest, are represented the Jews captured by Shishak, and their king Rehoboam, with the hieroglyphical inscription “Jehouda Melek,” “the king of the Jews.” This is the only reference to the Israelites found in Egyptian sculpture; many have wondered at finding no allusions to their residence in Egypt, but I think without cause; for, except the pyramids, the tombs in their vicinity, those of Beni Hassan, and a few other remains of but little interest, I do not believe that any monuments exist coeval with Moses and the Exodus.*

* According to Dr. Hales' rectified chronology, the Exodus took place B. c. 1648, the birth of Moses, B. c. 1728, and the settlement of Jacob and his family in Goshen, B. c. 1863.

May I be permitted to suggest that, in calculating the reigns of the *very early* Egyptian kings, allowance should be made for the greater longevity of those times; and

Two large boats ornament one of the outer walls of the great hall ; these sacred arks are sculptured in every temple—reminiscences, evidently, like the Argo of the Greeks, the Argha of the Hindoos, &c., of Noah's. It is very curious that Baris, the old Egyptian word for them, is mentioned by Nicholaus Damascenus, a peripatetic of Augustus's time, as the name of the mountain on which the patriarch's bark rested.

Passing two or three propyla and two lovely obelisks, each mourning a prostrate brother,—(the larger—it is sweet to think of it—dedicated by Amense to the memory of her father Thothmes I. 3400 years ago, yet the hieroglyphics are as sharp as if cut yesterday,)—two small granite pillars, ornamented with the lotus-stalk and blossom—the remains of the ancient portal, introduce you to the sanctuary—not the original edifice, for that was destroyed by Cambyzes, but the restoration by Philip Aridæus, brother of Alexander the Great. Beyond that the restitution of the seven hundred years abstracted in the common Bible Chronology from the generations of the post-diluvian patriarchs, will amply justify such an extension.

it are the remains of the small polygonal columns erected by the Pharaoh Osirtesen, the oldest in this temple, indeed in all Thebes. It is curious to trace at a glance the progress of Egyptian architecture from these diminutive columns to the stupendous pillars of Osirei. Many other halls and buildings, almost buried under the accumulated soil, extend as far as an unfinished propylon, commenced by the Ptolemies, which closes the eastern appendages to the temple.

Returning to the great obelisk, and seating myself on the broken shaft of its prostrate companion, I spent some delightful moments in musing over the scene of ruins scattered around me, so visibly smitten by the hand of God in fulfilment of the prophecies that describe No-Ammon as the scene of desolation I then beheld her. The hand of the true Jove Ammon, Ael-Amunah, the God of Truth, has indeed "executed judgment on all the gods of Egypt," but especially on his spurious representative, the idol of this most stupendous of earthly temples: silence reigns in its courts; the "multitude of No" has been cut off; Pathros is "desolate;" the land of Ham is still "the basest of
*see Jeremiah C. 46. v. 26
 & Ezekiel C. 30
 v. 14. 15.
 Ezekiel C. 29 - v. 15.*

kingdoms,"—so sure is the word of prophecy, so visible its accomplishment!

But oh! that obelisk is lovely! yet ten times dearer to me than ever mere loveliness could make it;—temples and palaces have been crumbling into dust, dynasties and nations vanishing around it, yet there it stands, pointing to heaven in its meek beauty, the record of a daughter's love—love strong as death,—stronger, for it has triumphed. Time, surely, read the inscription, and could not find it in his heart to strike.

Or might not one fancy, rather, that when earth cried out to heaven for vengeance on Thebes, and the Lord came down as he had threatened, to "rend No asunder," he planted a guard of angels round this monument of filial piety, to shield it in the storm—to protect it against the indiscriminating zeal of the ministers he had commissioned to destroy?

And is not the same record of filial love written by the Spirit on the heart of every Christian, and when "the Lord our Righteousness" comes down in his glory to take vengeance on his enemies, and on "all the people that forget God"—spiritual

Babel, and spiritual Egypt — will he not then encircle with his angels the faithful few on whose hearts he reads that blessed inscription, and, amid the crash of empires, and the wreck of all that this world esteems most excellent and glorious, strengthen their hearts, and stablsh their feet, and cheer them with the smile of his love?

Meditation “might think down hours to moments” among the ruins of Carnac.

We returned to Luxor through the four propyla, successively built across the avenue that connects the two temples, lined with sphinxes, massive and mutilated, yet singularly beautiful in design and execution; the face of one that we discovered in a cross avenue near the lake is very lovely,—a little girl’s evidently — the cheek as soft and rounded as dear little Mayflower’s. We started that same evening.

Nothing can be more unaccountable than the cloud of utter oblivion that hung over Thebes till the middle of the seventeenth century. No Frank traveller, certainly, had penetrated beyond Cairo; but that the Arab writers, who are generally apt to exaggerate in their descriptions of architec-

tural remains, should take no notice of ruins like those of Thebes, is most extraordinary.* Abd'alatif gives us no assistance; he was not in the upper country, and his valuable work on Egypt is merely an account of what he himself had seen, extracted from a larger compilation;—Edrisi, Ebn al Ouardi, and Bakoui, are quite silent;—Abulfeda, who finished his work in 1321, after bestowing just praise on the antiquities of Oshmunein, Ensina, and Memphis—pronounces a grave eulogium on the pottery of Luxor! Ebn Batuta, who ascended the Nile in 1325, mentions El Aksar (Luxor) as one of the stages of his journey, but says nothing (at least in the abridgment, which is all we possess of his work) of its ruins. How Leo Africanus could have omitted all mention of them is most surprising; he must have passed and repassed them by night, for he expressly states that he sailed up the river as high as Essouan. But did he *hear* nothing of Luxor and Carnac? Were there no tales current of those vast halls, that genii might walk under with unbended brow,—of those awful statues that, side by side, look

* Yet not more so than that Herodotus should pass em over so completely.

down on the Nile like the tutelar guardians of Egypt—works worthy of the Preadamites;—were there no tales of mystery, no talismans concealed there for Al Ouardi or Bakoui to record?—One would almost fancy they believed that merely naming them would wake Memnon and his brother from their charmed slumber, let loose the sphinxes, and bring them down a mighty army, to revenge the wrongs of Egypt on her oppressors' heads.

Neither Carnac nor Luxor are to be found in D'Herbelot's precious "*Bibliothèque Orientale*," published in 1697, and he suggests that Cous in the upper Thebaid may possibly be the ancient Thebes.

In short, the first notice I have been able to find of them occurs in the brief narrative, dated 1668, of Father Protais, a worthy Capuchin missionary, who, after describing Luxor and Carnac with the simplicity and accuracy of Burckhardt, does not appear to have been aware he had trodden on the dust of Thebes! (³²)

For this fyte adieu!*

* Remarks by Mr. Ramsay on the Theban sculptures.
Battle-pieces at Carnac. "There is extreme spirit and

I will be brief, my dear mother, in my description of the temples of Esneh and Edfou, which we visited *en route* for Essouan: the names of

boldness in the execution, and the story is told most distinctly and plainly. Though modern artists might have more correct ideas of perspective and true proportions, yet I doubt if any of them, following those rules, could so clearly represent in the same space the subjects contained in these. The liberty used by the sculptor, of giving you ground-plans, or elevations, or both, as it suits his purpose, is undoubtedly contrary to all just rules of drawing; but one's eye soon accustoms itself and ceases to be offended, while the story is told with much greater facility and correctness."

Sculptures at Medinet Habou. "It is difficult to analyse one's feelings with regard to these drawings: except in the hieroglyphical representations of animals, (which are *perfect*,) nothing is critically correct: you confess that the drawing of everything is most faulty, but yet the soul and fire, the animation and expression in the figures, is most wonderful! A lion wounded, for example, strikes you as the most admirably expressive and living thing ever drawn; but look again, and though the idea of a lion in agony and rage has been most forcibly presented to your mind, yet there is not a single line of the lion critically correct."

"In a neighbouring tomb to the first we saw at Qoornet Murraee, a group of oxen is splendidly drawn. I don't think I ever saw finer execution; the rules of perspective

both are Egyptian, and have survived the comparatively modern Greek appellations of Latopolis and Apollinopolis Magna.

are quite observed; the gambols of the calves in every possible position, and the free touch and taste of the whole, are admirable. Near them are a few which have been fattened, for show, I suppose—not less beautifully done. It is thus in almost all of the tombs; here and there, amidst the common work of routine of professed painters, a master hand has been called in to dash off a few groups. In one it was particularly evident—two groups were unfinished in the middle of a series of the usual representations of a funeral—they were merely sketched in with red paint, but with a vigour and correctness of proportion which would have done honour to Raphael.”

“The grand Entrance-Hall is the place which stamps Carnac as the first architectural remain in the world. Ammon had indeed a magnificent temple for his worship! The varied style of the columns is interesting; some are as old as Joseph’s time. On the last propylon towards Luxor are the torsos of two lovely statues, perhaps twenty-five or thirty feet high; they are much mutilated and have no heads, but what remains of their sculpture and contour is beautifully graceful, and yet in the Egyptian style, arms close to the sides, and left foot advanced. The priests seem to have employed real master geniuses, but to have confined them to certain fixed forms, at least in the human figure, for where they are freed from these

Of the former, dedicated to Kneph by the early Cæsars, the beautiful portico only remains; fresh from Thebes, we little expected to view it with

shackles, as in the animals in the phonetic hieroglyphics, nothing can surpass the execution of the drawing, as well as the finishing. Hundreds of sphinxes, statues, and figures of all sorts, are lying about this grand approach. One sphinx, in particular, made a great impression on me; they say all sphinxes are male, but the features of a really sweet, pretty girl could not be mistaken; and though her nose, part of her mouth, and chin were gone, yet one hardly missed them, what remained was so pretty and elegant. One pitied the poor thing being tacked to such an uncouth body as that of a sphinx, and obliged to sit in line with a hundred uninteresting fellows for ever, as it were fascinated down by the wand of some ancient magician."

"Off Luxor. We have revisited the temple here, and walked as far as Carnac, which is certainly the most stupendous thing conceivable. Everything else sinks into perfect insignificance in the comparison. But we could only give a hurried glance before the sun set. We revisited the crowds of sphinxes and broken statues on the grand southern approach—There is a great deal that is uncouth and unskilful, the effect of which is only to be estimated by their situation as parts of a grand whole, and the constrained stiffness of which must be explained and excused by the despotic influence of form and custom in religious matters, studiously inculcated and preserved by the priests—but there are among them forms

the admiration it excited. The features are so grand, and the general effect so sublime, that one almost forgets the modern mud walls which divide it into two unequal parts, and intercept the light so much that we looked in vain for the zodiacs sculptured on the ceiling between the walls and the last row of pillars at each extremity. Nothing would offend the critical eye, were the capitals more uniform; they are variations of the lotus-leaf, and all individually beautiful; the sculptures and hieroglyphics reveal the *decadence* of Egyptian architecture, but, on the other hand, the columns are of juster proportions and more regular distribution than any we have yet seen.*

of eternal beauty, such as remain henceforth part and parcel of one's mind—pure and clear as truth—no mystery, no mere symbol of mystical priestcraft, but a bright embodying of the soul of genius, which speaks from mind to mind at the interval of three thousand years.”

* “The pillars, twenty-four in number, are magnificent. They are straighter and more classical-looking than any we have yet seen, somehow or other reminding one of the Pantheon at Rome, one hardly knows why; for, except the absence of the usual enormous swell of the pillars, they retain all the characteristics of the Egyptian style, and are, to my mind, the most beautiful we have yet seen, as well from their regularity and beautiful pro-

The temple of Edfou, (delightful was our walk to it through fields of the beautiful castor-oil plant, of cotton, Indian corn rustling in the breeze, and

portions, as from the majestic elegance of the capitals, so different from anything Grecian ! But nothing could be finer ; though these pillars be ponderous, they are by no means heavy ; there is nothing which offends the eye, all is in character and keeping. The fact of being reminded of the Pantheon, however inexplicable, makes me feel certain that the same mind which gave birth to the one style had influence in the formation of the other. People derive Grecian architecture from the Egyptian, and there is no doubt they drew much of their science and wisdom from this country ; but that the Egyptian is the coarse, rough attempt of beginners at an art afterwards improved and brought to perfection in Greece, is too much to say, for two different lines have been pursued, and superlative excellence has been reached in both, as this portico at Esne proves. If we look solely to Egypt for the origin of Grecian architecture, we may easily talk of cutting down and paring away, and thus this style of Esne, of the largest pillars at Carnac, Luxor, &c., will merge into the Corinthian, and the other style used here into the Doric ; but it appears to me absurd to slice off, for the sake of argument or supporting a theory, the most essential and peculiar features of a particular style. Why, one might pare every upright thing in the world down to the Doric, as it is the simplest of all—may we not for this very reason suppose that it is the earliest, or, at least, original? ”—*Mr. Ramsay's Journal.*

groves of date-trees,) is quite perfect—not a stone displaced, and an Arab village is built on the roof. And no wonder—it was built only yesterday. Antiquity, in our enlarged ideas, ends with the reign of Rameses the Fifth, the cotemporary of Hector and Achilles. We had a hearty laugh the other day at the expression “stupendous antiquity” being applied to a pitiful infancy of nine hundred years. The propyla, dromos, or court, portico, and cella, are richly ornamented with sculptures and hieroglyphics, but it is the general effect, the distribution, the proportions of this temple, its perfect state of preservation, and the grandeur of its outline, that render it so interesting; the details are of inferior execution. The court is choked with Arab huts, and from the top of the propylon you have a curious view of the town beneath, like an enormous honeycomb, mud cells, for the most part roofless, with a single minaret towering over them—our Reis had gone there to pray.*

* “Edfou, Jan. 9. The fields were looking very beautiful; the system of irrigation is carried on to an immense extent here, it is everything; at every short distance,

We saw some ostriches near Esneh, others since—they are numerous in the Eastern desert; crocodiles, too, in abundance—William fires at them sometimes; the young ones flounce into the water in an awful fright, the old ones look astonished at

one sees the water raised from the Nile by men, who hand it up in buckets one to another, into little tanks, till it reaches the top, when it runs down the channels formed for it. There is one great channel which branches off into smaller ones, and these again into smaller, till at last it enters the small fields or plots, generally about ten feet square, where it spreads and remains, each little plot being enclosed by raised banks, on which the channels run; when one plot is watered, the entrance for the water is closed with a lump of earth, and the water passes on to the next; when the whole of one division has received its share, the connexion with the grand passage is stopped, and so on. The squares are all very neatly and carefully kept, and, in fact, in this irrigation consists the whole system of husbandry. A plough, I suppose, is never used; all the land requires is a rough breaking up with a hoe for wheat—for clover, not even that. Indian corn is now ripe, and its harvest is going on. It is sown before the rise of the Nile, and is ripe soon after its fall; and it is thus calculated that it must have been the corn which was *not* smitten in the plagues of Egypt by the hail, as it was just sprouting above ground when the other corn, which is sown on the waters retiring, was ripe and fit for the harvest. The same system seems to be pursued now as in the early and palmy days of this country. The draw-

our impudence, and then sink down with more regard to their dignity, but still it is a very clumsy operation. Of the other "venomous creatures bred in this river, as scorpions, water-snakes, grievous misshapen worms, and other monstrous things, which," according to old Lithgow, "often ings on the walls of some of the tombs display all the processes of husbandry and other daily occupations—and allusions in the Bible might have been made as to what happens at the present day, so much the same has everything remained. It is called 'the country which thou wateredst with thy foot,' and it is so now—the people use their naked feet for stopping their water-channels, when required. A very beautiful plant, which we saw a good deal of to-day in the fields, is the castor-oil tree—I never saw such a diversity of appearances on one plant at the same time; two totally different flowers on the same stalk, one red, the other white, berries, buds, and fruit something like horsechesnuts, but more delicate—the young leaves also were of a deep purple, the old ones bright green."

"2 Feb. Edfou. Since we were here last, the appearance of the country is very much altered. The forests of Indian corn are cut down, and the stubble is a poor substitute, especially when the sun is so hot as to-day; the wheat has grown to eight inches or a foot, in three weeks; the cotton plants have withered, and the irrigation has altered its character."—*Mr. Ramsay's Journal*.

• annoy the inhabitants and those who traffic on the water," I can give you no account.

The colour of the natives waxed darker and darker as we approached the tropic; the peasants, who were plying the *shadoof*, or pole-and-bucket water-engine, where we landed at Edfou, were nearly black, and naked above and below the waist—the children quite so.

The vale of Egypt appears to end in a cul-de-sac as you approach Essouan, old Syene, its southern boundary since the days of the prophets, and, indeed, from time immemorial, for, though many of the Pharaohs extended their sway over Ethiopia, the two countries remained always politically, as they are geographically, distinct. We reached Essouan, one of the most beautiful spots in Egypt, on the 10th of January, mooring on the eastern bank near the enormous granite rocks, on which the ancient Syene stood; a Saracenic succeeded to the Egyptian town, but was visited so severely by the plague, four hundred years ago, that the survivors deserted it; the ruins at a distance strikingly resemble an old European town of the middle ages. ⁽³³⁾

Opposite Essouan is "the Isle of Flowers," ancient Elephantine, the dwelling, according to Herodotus, of the Ichthyophagi, or fish-eaters, whom Cambyses sent as his ambassadors to the Ethiopians—those "blameless Ethiopians" eulogised by Homer, whose country, according to the father of song, the gods visited annually, and who appear to be the Yadavas or Yatus of Hindoo story, a primitive and sacred race, which, emigrating from the east in the infancy of time, established themselves, under their monarch, Yatupa, on the mountains of Yatupeya—the Ethiopia and Ethiops of the Greeks, who, designating these as the Western, refer to their brethren who remained near the Indus, as the Eastern Ethiopians, describing the whole nation as "a two-fold people, who lie extended in a long tract from the rising to the setting sun"—Cushites, I conceive, all of them, and whose original settlement must surely have been Khusistan, Susiana, or Cush, between the Tigris and Persia. But I shall weary you.—Elephantine! this was really mythic land! We crossed to the lovely island, and, walking to the rocky southern extremity, saw the Nile, no longer pent in as

below Syene, but expanded a bright broad lake before us, studded with islets of granite, polished and glittering in the sun. Hence to the northern extremity, through fields of the richest verdure, irrigated by innumerable little canals, about a foot wide, of banked earth, supplied by Persian wheels with the precious water of the Nile—and groves of date-trees, that draw their nutriment seemingly from the very sand of the desert, whispering in reply to them. These little canals (opened or shut by the foot) connect my associations with the Egypt of scripture, “where, thou sowedst thy grain, and wateredst it with thy foot,” as God described it to the Israelites in contrast to Palestine, “the land of hills and valleys, drinking water of the rain of heaven,” more vividly than all the temples and pyramids. They are often alluded to in scripture, particularly in that most beautiful proverb of Solomon, true indeed of every man, “the heart of the king is like the canals of waters in the hand of Jehovah; whithersoever it pleaseth him, he inclineth it.” Here, as elsewhere, from ignorance of eastern scenery and manners, our translators, admirable as

their version is for all practical purposes, have failed in expressing the minute poetical beauty of the original imagery. These little aqueducts are more refreshing to the eye than it is possible to conceive in your frigid zone.

The temples that, till of late years, adorned Elephantine, have all been levelled with the ground; two or three square pillars, some vestiges of what is called the Nilometer, and a solitary statue seated among the ruins, are the only remains. But old remembrances and the perennial verdure of nature are still enough to render it a little paradise for the imagination. Here was the limit of Herodotus's Egyptian travels; the geographer Eratosthenes (I honour his memory) probably often sauntered along the shore; I have too little love for Juvenal to feel much interest in the remembrance that he was banished to Syene—his spirit was little kindred to such a scene as this.

Now for the cataracts. Next morning, (the 11th,) soon after breakfast, the reis, or pilot of the cataracts, made his appearance, and, after pipes and coffee, announced that, till the wind sprung up, it was useless starting. Æolus had compas-

sion on us, and sent a breeze so favourable that within half an hour we were under sail, a prayer having previously been offered up by the reis and her crew for our safe passage.

Bidding adieu to Elephantine, the breeze carried us gently along between the black granite islets mentioned above, of the most singular forms, many of them sculptured with hieroglyphics—their polished edges glittering in the sun; a scene strangely beautiful, almost too wild for beauty. A hawk, nature's sculpture in the living rock, springing up propitiously on the left from the brow of the eastern craigs, seemed to invite us to the sacred isle of Philae, and augur a prosperous passage of the intermediate cataracts. The wind freshened, and, ere long, the lovely isle of Shehayl stole into sight, and flitted past like a dream, its palm-trees waving in the breeze, and children sporting under them, naked as the day they were born; an Isle of the Blest it seemed—one of those happy islands where poets tell us the shades of heroes of old wander, under whispering groves, in sweet converse, placid and at rest after the turmoils of life—aptly figured by the black rocks that, hemming in the noble

river, gave so awful a character to the surrounding scenery. And yet this little isle had still more exalted inhabitants; Sati and Anuki, the Juno and Vesta of Egyptian mythology, and Kneph, the spirit of the universe, delighted in its bowers, and honoured it with their protection; and hieroglyphical tablets, anterior to the birth of Cecrops, attest its early sanctity. The whole valley, indeed, of the Nile, between Elephantine and Philae, was "holy ground" to the Egyptians and Ethiopians.

The scenery now exchanges its character of mingled beauty and terror for that of unmingled grandeur; not that the rocks are particularly lofty, but Salvator never dreamed of such strange unnatural combinations—sometimes shooting into craggy pinnacles, often piled one on another, regularly and methodically, as if in mockery of human architecture, or wildly and confusedly heaped like the fall of a volcano shower—all gloom, relieved only by the yellow sands that lie drifted, like snow-wreaths, on the face of the western shore; if that can be called relief which carries the imagination beyond the narrow bounds

of visible desolation to the illimitable waste of the desert, where even Fancy's wing must sink exhausted. The sun, glowing in a cloudless sky, reminded us of our approach to the tropics, while Father Nile, flowing swifter and swifter as we drew near each successive rapid, dashing and foaming over the islets, and often there most turbulent where we were to force our passage, seemed to bar all further progress towards his undiscoverable source. But his opposition, like that of the visionary waters of fairy legends, vanished before the steady breeze of resolution; he offered a more formidable barrier in ancient times, if we may believe the fictions of the poets.

The Arabs, who met us by appointment at the first rapid, were of little use; the breeze carried us up steadily and beautifully, and we sailed on again for a while in smooth water; but the river recovered its velocity as we approached the second and more formidable rapid, winding our way between the little glittering islets, constantly expecting to fall foul of them, but escaping always by an inch or two—thanks to the counter-eddies,—shifting our broad lateen sail every moment, as we

changed our position with regard to the wind ; the white-bearded reis, meanwhile, conspicuous from afar in his brilliant robes of red and blue, with variegated turban and cane of office, gesticulating and shouting from the rocks—the sons of Shem, Ham, and Japhet, yelling the languages of Europe, Asia, and Africa around us—our last detachment of Arabs and Nubians watching us from the opposite shore, or, clinging to a log of wood, flinging themselves fearlessly into the very jaws of the cataract, swept down like lightning, soon to re-appear at our vessel's side, like mahogany and ebony statues, with a request for “ bagshish,” a present, viz. in guerdon of their intrepidity—altogether it was a strange, a savage scene, worth coming all the way from England to witness.

Here, at the second rapid, the Nile appears completely closed in by the rocks ; it was at first sight difficult to conceive the possibility of threading our way between, or penetrating beyond them. After one fruitless attempt, we succeeded in crossing to the opposite rocks, where, the natives attaching a large and strong rope of twisted palm-fibres, we commenced our ascent, with the chorussed

song of " Haylee sa ! " " God help ! " By dint of pulling and poling, in which we all lent a hand, we got up famously—to our wonder, looking back—for the rapid we had surmounted is by far the most difficult of ascent, owing to the narrowness of the channel where alone it is practicable. Then we had smooth sailing for a while, the reis, in his ample robes, heading our cortège on the eastern shore, at least seventy or eighty men and boys, efficient and inefficient, following in his rear, laughing and skipping, pelting each other with sand, and flourishing their long dirks, half-earnest, half-play, till we arrived at the third and principal rapid, where the Nile, collecting all his waters, rushes down in one broad sheet, smooth as a mirror, and fleet as an arrow ; but we mounted it with little difficulty, there being no rocks to defile through ; pull, pull, pull, steady and unrelaxing, and the cataracts were past. We detached the rope, unfurled the sail, (it had been useless since our arrival at the second rapid,) and glided gently over the calm waters till, the rocks opening, the sacred island of Philae and its noble temple stood forth to greet us, like the castle of some ancient

Dive among the rocks of Ginnistan. High on the eastern bank stands a beautiful columnar edifice, supposed by some to have been once shown as the tomb of Osiris, but styled, in the traditions of the country, the Bed of Pharaoh ; there we moored, and, quitting the boat, proceeded to explore one of the most interesting spots in the whole valley of the Nile.

Isis, her husband Osiris, and their son Horus, were the triad worshipped at Philae. The sacred isle is only three or four hundred yards in length, but it was covered with shrines and colonnades : fringed with a few date-trees, the interior is now a mass of ruins ; Nubian huts have succeeded Ethiopian temples, and both are deserted.

The Temple of Isis is the principal ruin. An irregular colonnade, of which the western range, built up perpendicularly from the river, is covered with hieroglyphics and sculptures, while the eastern seems never to have been completed—irregular, inasmuch as symmetry, a charm to which the Egyptians seem to have been little sensible, was here necessarily sacrificed to the limited space the architect had to work upon—leads from the

southern along the western bank to the propylon, or pyramidal towers of entrance, similar to those at Edfou, but on a smaller scale, and covered with colossal sculptures of the moon-crowned Isis, the hawk-headed deity, and a gigantic warrior about to inflict the fatal stroke on thirty wretches, whom he holds by the hair of their head, back to back, reminding one of the many-headed, many-handed monsters of Indian mythology. These figures are repeated, as well as the smaller row of deities above them, on the second propylon, which you reach through an irregular dromos or court, surrounded by columns covered with sculpture and hieroglyphics; not only are all the capitals different, but those on the left are surmounted by square tablets with masks of Isis—the same sweet and mournful expression that characterises all her portraits; perhaps suggested by the beautiful planet with which she was identified. The second propylon ushers you into by far the finest part of the temple—a noble and truly beautiful portico, supported on three sides by lofty columns, sculptured with hieroglyphics, and painted azure and yellow. The walls, ceiling, &c., are also beauti-

fully ornamented, the winged orb forming the principal device; this is sculptured over the entrance of almost every temple in Egypt and Nubia—how like *our* idea of “the Sun of Righteousness arising with healing on his wings!”

We explored all the cells with torches, but looked in vain for the sculptured hawk that travellers mention. I was particularly anxious to find it. Dr. Richardson supposes it was venerated at Philae before Osiris, Isis, and Horus supplanted its worship. If so, I cannot but suspect that the true God was worshipped here before the rise, as He undoubtedly was after the fall, of paganism, when the temples of Philae, Edfou, Thebes, and many others, were dedicated to the Saviour.

“The God,” says the patriarchal Zoroaster, in his noble enumeration of the Almighty’s attributes, “is (represented) having a hawk’s head; He is the Best, Incorruptible, Eternal, Unmade, Indivisible, most unlike everything, the Author of all good, the Wisest of the wise,” &c. “Here,” observes Dr. Hales, “we have perhaps the first instance on record of symbolical representation blended with pure spiritual description, and in this

respect it is highly curious, as furnishing, perhaps, the earliest specimen of those animal hieroglyphics, attributed to the Deity so copiously in Egypt, still to be found on their ancient monuments, and which, when the recondite or mystical meaning came to be lost, in process of time produced all that multifarious polytheism, which corrupted the primitive theology of the Egyptians, Indians, Greeks, and Romans."

Egypt was first peopled from Ethiopia; to the Ethiopians, (who considered themselves, says the Greek historian Diodorus Siculus, the most ancient of mankind,) the Egyptians looked as the parents of their religion; and Philae was held equally sacred by both nations. Here then probably was the seat of the primeval Egyptian worship, established by Misr and his successors, the children of Ham, a race, with the exception of the Canaanites, neither blessed nor cursed by their patriarch Noah,—who are mentioned without approbation in the earliest scriptural records, but who, doubtless, retained for some generations the knowledge, and maintained the worship, of the true God in Egypt and Ethiopia, as their kinsmen

of the line of Canaan did at Salem in Syria. Originally, I conceive, familiarised to Egyptian as well as Persian imagination by the symbol of the hawk's head, the omnivision of the Deity was probably thus represented by the Egyptians in hieroglyphical sculpture; and its spiritual meaning being, in lapse of time, forgotten, in this case, as in so many others, "the creature came to be worshipped more than the Creator, who is above all, God blessed for ever." Philae, then, losing its real sanctity as the Salem of the Land of Cush and Ham, retained, I conceive, its celebrity as the seat of idolatry; the hawk continuing the chief object of worship, till that of Osiris, Isis, and Horus supplanted and, in part, became blended with it; the *name* of the Almighty, in fact, supplanting his *attribute*: for *Osiris*, as Dr. Hales elsewhere observes, is evidently a corruption of *Iahoh Sihor*, or *Jehovah the Black*, the "black-clouded Jove" of Homer. Nor is the character of Osiris, as the good principle and judge of the dead, unlike that of the Deity: his identification, moreover, with Bacchus, the giver of the vine, (Iswara in India,) is another proof of his identity

in name with the giver of all good things “and fruitful seasons, filling our hearts with food and gladness”—for Iacchus, the Greek form of the name of Bacchus, is simply the guttural pronunciation of Iahoh, with the Greek termination; and the mystic fan of Bacchus, represented in the Eleusinian mysteries of Ceres, (Isis,)—introduced originally, says Herodotus, from Egypt, strikingly resembles that in the hand of the Son of Man, with which he is to purge his threshing-floor.

Here are theories for you, dear mother! “guesses at truth” rather: I would not have troubled you with them, only they will tend to explain a little poem which I enclose you, begun while we were passing the cataracts, and finished afterwards in Nubia.* I should premise, however, that I have

* THE ASCENT OF THE CATARACTS.

The sky is clear, not a cloud in heaven,
And blithely swells the sail,
While myriad islet rocks between
We skim before the gale—
Like a black swan each on a still lake's breast,
Peacefully cradled in noontide rest.

no authority for making St. Thomas visit Ethiopia on his way to India.

One guess more—was not the eagle of Zeus, the

The Cataract s roar ! around their chief,
Each to the God of Ishmael bending,
The turbaned crew approve his prayer,
Their lives to Allah's will commending ;
A prayer of much simplicity—
And we too, Lord ! we trust in Thee !

Syene's rocks are far behind,
And thy green banks, sweet Isle of Flowers !
And Thine, Shehayl ! whose children's laugh
Rings merrily through the date-tree bowers,
That erst, mysterious rites concealing,
O'ershadowed silent Pharaohs kneeling.

And yearly to the triple shrine—
For Kneph's and Sati's equal smile
With Anuki's was courted there—
Dark-visaged queens from Meroe's Isle,
And kings from farthest Hadramaut
Bright gems and Indian incense brought.

The Nile ! the Nile ! I hear the gathering roar—
(No vision now—no dream of ancient years !)
Throned on his rocks, amid the watery war,
The King of Floods, old Homer's Nile appears !
With gentle smile, majestically sweet,
Curbing the billowy steeds that vex them at his feet.

Roman Ju-pater, or Father Jove—the same emblem, borrowed from the same Egyptian or Persian source? How unlike *its* eye, closing, as Pindar

Not so when, bursting from the matron breast
Of central Afric, veiled from eye profane,
Ten thousand fertile streams, with foamy crest,
Rush down to waft their monarch to the main ;
Then to those billowy steeds he gives the rein,
And, leaning on his car with simple grace,
Speeds, like the light, o'er Egypt's thirsty plain;
The Hours, the Seasons, laugh before his face,
Fresh as the new-born sun, rejoicing in his race.

Thus, when the Sun of Righteousness, his wings
Of healing spread, shall rise upon our woe,
The River of Life, from heavenly Zion's springs,
As Nile o'er Egypt, o'er the earth shall flow ;
Desert no more, Zahara's sands shall glow
With purple flowers—where'er the floods extend
Knowledge shall bloom, and Love enthron'd below
Dwell in all hearts ; and every bough shall bend
With sacramental pledge of blessings without end !

Then, Philæ!—(lo! the Rapids past,
Like wrath supplanted by a smile,
'Tween opening rocks and waters clear
That murmur music to the ear,
Steals into view the lovely Isle)—
Then, Philæ! then shall hymns once more
Resound along thy templed shore!

beautifully describes it, under the lulling influence
of the lyre, to His who never slumbers nor sleeps!
Interesting as is the temple of Isis, and noble as

Shrine of old Faith, though long defiled!
To God and man thou still art dear,
For Cushite kings of earliest time
And blameless creed have worshipped here,
Ere blinded man the All-seeing Eye
Degraded to idolatry.

Christ's agony! a second blight
That morn pale Egypt overspread;
The hoary Pyramids, steeped in night,
Trembled upon their rocky bed,
Foreboding judgments from on high
Fiercer than those that shook their infancy. (³⁴)

Isis that morn, moon-crested dame,
Sweet Philae's bowers forsook for ever,
Her shrine thenceforth was dumb, kings came
To ask, but answer gat they never!
The priests, too, fled—their time was o'er,
And votaries sought her Isle no more.

Years dawned and died till, bound for Ind,
With holy eye and snowy beard,
With scrip and staff and girdled robe,
One autumn eve a sire appeared;
More to be loved seemed he than feared,—
The children rested from their play,
And craved his blessing as he went his way.

its general effect is, the sculptures and hieroglyphics are of a very inferior style. The lovely non-descript edifice by the river-side pleased me much

Well might they ask it ! he was one
That He who little children loved
Had breathed His holy Spirit upon ;
And, by that Spirit inly moved,
He then sought out an humble pair
That dwelt in lonely virtue there.

The night in lonely converse past,
The stranger went his way the morrow,—
Long, long remembered, uneffaced,
His words of mingled cheer and sorrow !
For meek and mournful was his mien,
As one that of himself had much mistrustful been.

Me lists not to recount the tale
How, through that pair by truth enlightened,
To hundreds, o'er each Nubian vale,
The sun of Gospel gladness brightened,
And Philae heard once more delighted
Hymns to the God to whom her youth was plighted.

But Persecution, even here,
Sought out and slew them ; writ in heaven
Their names unread in human story,
Shine like the morning stars in glory ;
In robes of whiteness, freely given,
Palms in their hands, the Victor band
Before the Lamb, their Saviour, stand.

more; the eye willingly turns from the heavy grandeur and rude sculpture of the larger, to repose on the airy grace and unadorned simplicity of the smaller ruin. There is not a hieroglyphic on it, nor any sculpture except the winged globe over the portal by which it was entered from the temple; open above and laterally, and seen from below, it

Uncouth inscriptions, rudely traced,
A sculptured cross—mute things alone
Reveal where erst Acceptance graced
The prayers through which their prize was won:
And Philae, with a mother's moan,
Unmindful of their happier lot,
Weeps o'er her children that are not!

Rise, sweet one, rise! and dry thy tears;
A brighter day is dawning o'er
A world for twice three thousand years
Trodden down of man, and drenched in gore;
Thy children thou shalt see once more,
Shalt hear their voices blend united
In hymns like those in which thy youth delighted!

Soon, O soon! may the day-star rise
O'er Egypt's vale and Asshur's bowers,
To warn the nations, unseal their eyes,
And guide their feet to Salem's towers,
When every hand shall an offering bear,
And every heart be a House of Prayer!

is beautiful indeed. No roof was ever added or intended, and the intercolumniations are built up only a little more than a third of the height; the capitals of the columns are leaves of the date-tree. Several courses of stone, intervening between the columns and the cornice, add to the singular effect, without diminishing from the beauty of this dear little temple—as our sweet Minnie would call it. This cannot surely be the tomb of Osiris—the Egyptian lowered his voice, and sunk his eye,

“ And pointed upwards as to God in heaven,”

when he swore the tremendous oath, “By Him that sleeps in Philae!” Neither edifice is older than the day of the Ptolemies. ⁽³⁵⁾

The sullen roar of the cataracts was our music for the night.

This rocky range above Syene I take to be the Hemacuta or Golden Mountains of the Hindus,⁽³⁶⁾ who, considering the course of the Nile, after issuing from the Lake of the Gods under the *Southern* Meru, exactly analogous to that of the Ganges, after issuing from Lake Mansarowar under the *Northern* — assert that each bursts

through three ranges of mountains, named alike in both countries Himalaya, Nishada, and Hemacuta, before reaching its last unfettered flow towards the ocean. Each river is held equally sacred, as well as the points of junction of each with its tributaries. Few Indian pilgrims, however, in these degenerate days, visit Egypt. Wild and grotesque as it often is, there is a world of beauty in the old Hindoo mythology, and more truth than we are often disposed to allow in their geography and history.

The next morning, January the 12th, we started on our voyage into the Land of Cush, gliding smoothly along between rocky hills that confine the fertilising influence of the Nile to a very narrow strip of cultivable ground, often encroached upon by the sands of the desert, which lie in broad sheets on the western bank. The scattered clumps, however, of date and doûm trees (Theban palms) lend a pleasing variety to scenery, otherwise of the gloomiest character. Once this country was rich and beautiful and populous, till Surya, the Regent of the Sun, being seized one morning with a most unseasonable fit of devotion, descended on it

to say his prayers, the waters dried up immediately, the mountains took fire, and the inhabitants were roasted to death. Brahma and Vishnu descended to expostulate with, and, indeed, console, the unlucky Surya—for he was as concerned as they were at the unfortunate issue of his zeal, and promised, with deep contrition, to amend the mischief. “It is I,” replied Vishnu, “who must repair it, and when I shall revisit this country, in the character of Crishna, to destroy the demon Sanch’asura, the land shall cool, and be replenished with plants and animals. The race of Palis shall then settle here, with the Cutilacesas, the Yavanas, the Barbaras, and other mixed tribes.”—Crishna has been incarnated—the demon Sanch’asura destroyed—the Palis have arrived and departed,—the Yavanas, or Iaones, are forgotten even in Greece, the “ultima Thule” of their wanderings—but Vishnu’s promise has been only partially performed, and the effects of Surya’s approach are still visible in the blackened and scorched aspect of the hills of Nubia.

We now entered the region of the Berber language, but the children were as familiar with the

magical word *bagshish*, as ours in England are with the kindred phrase *Christmas box*—which Bishop Heber thinks may have been derived from it.

We visited a temple at Dabod—the first within the tropic, and another at Kalabshe: those between the Cataracts were for the most part built by the Ptolemies and Cæsars; many of them have been left unfinished; they can boast, generally speaking, of but few sculptures, and those of a very inferior execution. The Augustan age in Egypt was that of the *decadence* of the arts; long indeed before the Ptolemies, they had fallen from their high estate under Osirei, Sesostris, and their immediate successors; there were Homers then in the land, who celebrated the wars of those heroic princes on imperishable stone; but you see few historical sculptures later than Rameses the Fifth; the national spirit had died out—religion had sunk into a mere *caput mortuum*—and the descendants of the artists who sculptured the Memnonium had degenerated into mere mythological copyists, constantly reiterating a Pantheon of deities, whose every attitude was prescribed by law—it is only

wonderful that they copied so well, but the life is wanting.—The likenesses of the Pharaohs, as I have observed already, whether painted in the tombs or sculptured on the temples, were always exactly preserved—but once taken, they seem never to have sat a second time for their portraits. The same likeness is constantly reiterated; you cannot trace the gradual change—step by step—year by year—from the full cheek and brent brow of youth to the sunk and care-worn lineaments of age—that lends so touching an interest to the series of a Greek king's medals. It would be interesting to compare the Egyptian with the medallionic portraits of the Ptolemies and Cæsars, and ascertain whether any pains were then taken to preserve the resemblance.

The most spirited sculptures we have seen in the Valley of the Nile are those in the small rock-temple of Beit-Wellee, half an hour's walk from Kalabshe—founded by Sesostris to commemorate his victories over the Cushites or Ethiopians, and the Shorii, an eastern nation, according to Mr. Wilkinson (I quote his words) “apparently of Arabia Petræa, who, having been previously re-

duced by the Egyptian monarchs and made tributary to them, rebelled and were reconquered by Osirei and the Second Rameses." Open and exposed for three thousand years to the air of heaven and the hand of man, these sculptures are still as sharp and fresh almost as when the artist exhibited them, in his pride, to Rameses.

To the right, entering the open area excavated in front of the temple, you have the conquest of the Shorii; to the left, the submission of the Cushites: everything bespeaks the desperate resistance of the former, the tame cowardice of the latter. On the right wall, Rameses, alike victorious on foot and in his war-chariot, attacks the Shorii, slays their chief in single combat, and drives them to the fortifications of their town; his son, the heir of Egypt, storms the walls, and presents his prisoners bound to his father, who, in the last compartment of this sculptured history, is represented seated on his throne reposing after his toils, the favourite lion that accompanied him in battle crouched at his feet. On the left wall, the Prince of Cush, his hand raised in supplication, his son and daughter at his side, is introduced by

the Prince of Egypt to the mighty Rameses, throned in state; rings of gold, bags of precious stones, elephants' teeth, apes, (but no peacocks,) —the wealth of Ethiopia, are borne after him, offerings to the conqueror; the lion, the giraffe, the bull, the gazelle, the ostrich, figure in the procession. The contempt of the Egyptians for their unwarlike neighbours may be traced here, as elsewhere, in the caricatured features of one of the tribute-bearers, whose countenance bears a ludicrous resemblance to that of the monkey that precedes him in the procession.

And yet they did not yield absolutely without a blow. There is one scene of most touching interest. The Cushites have been defeated—they hurry confusedly to the woods for refuge, stumbling over the dying and the dead, but one of them has outstripped the fleetest, in hopes of saving his friend's wife from the pursuers—he knew not that that friend was already at his own door—but alas! faint and bleeding, wearily dragging on, his arms thrown round two of his comrades' necks, who grasp his wrists to strengthen him. He overtakes them at the moment when his

friend's *sister* and his children recognise him—*she* stands aghast ; one boy holds up his hands in horror,—another covers his face with one hand, and runs to clasp his father's knees with the other,—the third runs to tell his mother, who, unconscious of what awaits her, is preparing her husband's meal. But the tumult approaches—the flying Cushites, the chariot-wheels of Pharaoh and the Egyptians—fly ! oh fly !—they see only, they hear only, the wounded man !—a minute—and wife and husband, brother and sister, children and friend, will all be overwhelmed by the mighty torrent ;—a monkey has climbed to the top of a tree for refuge—there is yet time—but what are they to do with the wounded man ? 'Tis too late now—they come, they come, rushing—crushing through the forest—and now let us drop the curtain.

The sculptures of the interior temple are highly interesting, and evidently allusive to the scenes of conquest sculptured without. A Shorian and an Ethiopian, the representatives, I presume, of their respective nations, lie at the feet of Rameses ; with one hand he grasps their hair, the uplifted battle-

axe gleams in the other. Forced on his knees, but those knees clenched together, the muscles rigid, the joints unyielding, the brave Arab meets with unquailing eye the glance of his conqueror, and raises his left arm firmly to ward off the blow which the Ethiopian tamely submits to,—the contrast is that of courage with cowardice—personified in the relaxed limbs, uplifted but shrinking hands, and averted face of the negro; the lips of both are moving, but you need not fancy to supply words—every limb, every gesture speaks.

The following morning we visited the gloomy and awful temple of Guerf Hassan, ancient Talmis, completely excavated in the sandstone rock, and singularly resembling, travellers say, the Cave of Elephanta, in India—I hope, my dear mother, I shall some day be qualified to judge of the resemblance! But for the name of Rameses graven on every wall and every pillar throughout the temple, one would be inclined to assign it to the earliest period of Egyptian or, more strictly speaking, Ethiopian architecture; it is almost impossible not to believe it more ancient than any other monument in Egypt except the Pyramids; there is not a

trace of the taste and beauty of Rameses' time. A ruined portico (square columns, faced with colossal statues) leads to the first and largest of the excavated chambers, a noble hall, supported by six enormous square columns, faced, like those of the portico, with statues of Osiris, above eighteen feet high, cut in full relief,—mild, chubby, undignified countenances, the arms crossed, holding the scourge of power and the crosier of peace,⁽³⁷⁾—the legs naked and shapeless, more like pillars than human stumps;—the attitude of the lower part of the body reminded me of the Esquimaux, and their pendent sashes of Highland sporrans, the head of some animal projecting in the usual place, with seven tassels below it. Statues of Phthah, or Vulcan, to whom this temple is dedicated, of Athor the lion-headed, (Venus,) and of Anuki, (Vesta,) are sculptured in recesses behind the columns on each side of the hall. Beyond it are the cella, supported by two large columns, and the adytum, or innermost shrine, at the further end of which, on a high platform, sit four most mysterious-looking, colossal figures,—a large hewn stone on the floor in front of them, perhaps an altar. In

the small lateral apartments are benched recesses, probably for embalming. All the chambers are sculptured, but they are so black with smoke and dirt, and the rock has in many places proved so unfaithful to its trust, that we could make nothing of them. Negro and Nubian boys ciceronied us with burning ropes through this extraordinary excavation. Mithras' cave itself could scarcely have been gloomier than the Rock-temple of Guerf Hassan !

The Persians, those Iconoclasts of antiquity, piqued themselves on their spiritual worship of the Deity, and certainly they never sank into such gross polytheism as the Egyptians, Greeks, and Romans; yet their reverence for fire, while it proves that *both* nations drew their religion from one primeval source, was no less idolatrous than that of the Egyptians for Phthah, the Vulcan of Egypt, and all the rest of their "divine menagerie," as William calls it.

The sacred fire of the Persians, like that of the Jews, was originally emblematical only of Mithras, the hidden god, but when the "spiritual meaning of the visible sign" had been forgotten, they wor-

shipped it as a deity ; and, if they regarded *it*, as we know they did the element in general, as a *living creature*, Cambyzes (unless, indeed, like his father, Cyrus, he acknowledged “ the Lord for his God”) had no excuse for sheathing his sword in the bull Apis.

Again: In all ages the Egyptians revered Phthah as their earliest king, assigning no duration to his reign—in other words, ascribing dominion to him from all eternity, till his resignation of the sceptre to his son Helios, the orb of day, whose reign they limit to 30,000 years.

Surely we see the God of Light enshrined, the fire by which he will try all things gleaming, in the adyta of both caves, both creeds, at first sight so unconnected, in their actual encounter so hostile !

And whom can the pigmy Pataici—the diminutive images placed by the Phoenicians on the prows of their galleys, and to which Herodotus likens the statue of Vulcan at Memphis—whom can they have represented, and whence can they have derived their name but from Phthah ? whatever was his origin, Egyptian or Chaldean, still

the primeval, eternal Phthah ; Vulcan of Rome, Hephaistos of Greece, Phthah of Egypt, Mithras of Persia—with reverence be it added, Jehovah of Heaven !—the God of Light, dwelling in thick darkness as his pavilion, his cloudy cave—who, in the olden time, “ looked unto the host of the Egyptians through the pillar of fire and of the cloud, and troubled the host of the Egyptians ”—by fire, and wind, and water, his ministering elements, “ executing judgment on all the gods of Egypt,” while he “ led forth the people whom he had redeemed ” from an apostate land that, no longer recognising him as a spirit, no longer worshipped him in spirit and in truth.

Approaching Korosko, we sailed through a strange country, black volcanic-looking mountains on either side the river, and in many places a few yards only of cultivation intervening between it and the desert. We moored for the night at Korosko. Imagine our dismay when Wellee Kiashef, the Turkish governor of the country between the cataracts, resting there for the moment on one of his progresses through his little vice-royalty, sent to offer us a visit ! It could

not be helped, so we entertained him—an intelligent and very inquisitive man, most anxious for information; he said it was his great delight to make acquaintance with, and gain knowledge from Englishmen, whenever he could meet with them. The first compliments were scarcely paid, when he produced a little Arabic treatise on geography, printed by the missionaries at Malta, and asked how many men formed the standing force of Russia? We expected to be regularly catechised on the resources of every state in Europe, but his subsequent questions were chiefly geographical; he had evidently made the most of his little book—his sole library, he told us—and had treasured the information he had picked up from travellers. I gave him four or five Arabic books, one on astronomy, the others chiefly religious, that I had found lying at Alexandria along with some books I bought there, and included them in my bargain, on the chance of finding some opportunity of giving them away.

All his geographical ideas, except those derived from his text-book, were very vague. He discriminated the Abyssinian branch of the Nile from

the western river, the most considerable of the two, by calling it emphatically Bahr el Nil, or the Blue River; I believe it is always painted blue in the sculptures—the word is Sanscrit too, and applied in the sacred books to the western Nile, though the usual name for it is Cali or Chrishna—the Black, which corresponds in meaning with the Hebrew name Sihor: and yet, oddly enough, the river is neither black nor blue, but a muddy colour. The Kiashef, in reply to our question where the sources were, said they were not very distant, but that the barbarous tribes and fierce animals, with which the intermediate country abounds, rendered them difficult of approach. One of these tribes, he told us, is a nation of dogs with women wives! the old tradition, then, of the Cynocephali, or dog-headed men, is still current here. The same belief prevailed in Tartary in the time of Zinghis Khan, and Mr. Buckingham was asked at Assalt, east of the Jordan, whether he had ever been to the Belled el Kelb, where the men had dogs' heads. The Nile, added the Kiashef, parts into three rivers—the Egyptian stream, another that reaches the sea near Algiers, and the third near Spain.

Naming our acquaintance Omar Effendi, (a young Turk, sent by Mohammed Ali to study in England, but now returned and settled at Cairo,) he said he was from the same village, and seemed interested in hearing we had been at college with him.

Taking his departure, he sent us a couple of turkeys, and a sort of firman or order to furnish us everything we might need between the cataracts. Nothing could be kinder than his offers of procuring us men, camels, and assistance of every sort, wheresoever we might be disposed to go. It was interesting, but painful, to see a man, evidently of talent, born and bred in intellectual darkness, and aware of his situation, struggling and catching at every ray of light. He entered at once on his inquiries, never doubting our willingness to afford him what aid we could; the conversation seldom flagged a moment, and, in his eagerness, the pipe was often neglected. On paying us another visit on our return, (to which I alluded at the commencement of this long epistle,) he told us very feelingly that, since he had become acquainted with Europeans about three years ago, he had dis-

relished the society of other Turks; all their conversation ran on women or dress, never on subjects of real interest. "Now," said he, "I like to know how the sun shines, how the world was created, who inhabit it, &c., and because I do so, and seek the society of those who can instruct me, my countrymen call me proud, and I am quite alone among them;"—"solo, solo, solo!" as Abdallah translated it: it went to my heart—poor fellow! he must indeed be lonely, and so must every one be who outstrips his fellows, while they are still as unenlightened as the Turks, even by the very insignificant distance that Wellee Kiashef has got before them.

We reached Wady Halfa, the limit of our Ethiopian voyage, on the 19th, passing Ebsambul, the magnificent rock temple opened by Belzoni, without landing—our large boat could ascend no higher. I ought to have told you that, to our delight, we found we *could* take her beyond Es-souan; we thought we should have been obliged to hire a small one there, and anticipated bugs, cock-roaches, spiders—all sorts of miseries.

Friday, the 20th January, we started for the

second and principal cataracts of the Nile, a few miles only beyond Wady Halfa, in a small boat, manned with Nubian sailors, or Berbers, as they are called in their native tongue; and Barbaradesa is the name given to all this district in the Hindoo records. They are a very handsome race, far superior to the Arabs—of Egypt at least; almost black, but with a polished skin, quite unlike the dirty hue of the negro; the eye rests far more complacently on their naked limbs than on those of the whiter castes: they are tall, for the most part, and beautifully proportioned—sinewy, no fat—the heel on a line with the back of the leg, a noble expression of countenance, and fine phrenological foreheads; their honesty is proverbial. Cultivation, I think, might do wonders with them.* So much for the race in general; the

* *Mr. Ramsay's Observations on the races of Nubia.*
“The people here (Philae) are of the Berber race, or Nubians, a very fine nation. No people have ever struck me so much; they are almost invariably handsome and elegant in their form and features, with an expression of high intelligence and mind I never saw in other people of their rank. Talking phrenologically, their heads are *perfect*, and I cannot help thinking their capabilities for civilisation very great. They seem to have a great deal

individuals on this occasion—naked except the waist, and full of fun and merriment, punted and rowed us up the river, as far as the boat could

of ready wit and humour, to judge by the constant repartees and roars of laughter; and their songs are beautiful.”—*Letter of Mr. Ramsay, Feb. 18.*

“Jan. 12, Kalabshi. The natives are the most savage uncivilised looking beings one could wish to see. They grow darker at each village, but have by no means the attributes of genuine Nubians; their hue is more like that of a very dirty collier in England, or a sweep, than the pure, shining, polished skin of the true breed. The little dingy, naked children, running away to hide themselves, or staying to joke and laugh at us, which they do with all their heart and soul, as different in appearance as in manners from their neighbours south of Essouan, have a very savage look.”

“Jan. 17, beyond Derr. The country grows wilder and more picturesque. The varieties of inhabitants are remarkable; each village appears to have a different race—at one point, a group of thorough-bred, woolly-headed, frightful negroes—at another, that race we call (whether rightly or no) *Nubians*, a handsome, interesting people, not black, though nearly approaching to it—at another, the Berbers (I suppose,) a *peculiarly* fine set, with the free independent air of the desert, and simple elegant dress. They are considered as having the best character of any people in every respect. The Arabs also here and there appear, the same as in Egypt. The women’s dress in some places is peculiarly elegant, consisting of wide trowsers, drawn tight at the ankle, and apparently con-

ascend, and then, landing on the western bank, we proceeded on foot, alternately over sand and rock, to Abousir, a lofty cliff that overhangs the rapids, conspicuous from afar, and covered, we found, with the names of former travellers.

Climbing the rock, the Nile lay before us like the map of an Archipelago—so it seemed to me at first, till the eye presently discovered the main stream of the river winding between myriads of little black islets, tufted with the Egyptian acacia, and glistening in the sunbeams like those near Philae—themselves washed by hundreds of collateral streamlets that glitter, foam, and roar in emulation of their parent. Ten miles in length and

continued as a sort of boots over the shoes. These reach to the waist; the upper robe is very elegant, formed, apparently, of a doubled cloth, square, and with a hole for the head, which is passed through it, and it then falls gracefully over the whole body. Their hair is always in layers of curls, with something black on the top. The whole dress is of coarse unbleached linen cloth, and has a thoroughly different appearance from that of the Arab women, which is always deep blue or black. But I have seen none of them near; they never show themselves, nor ever appear in company with the men, who come in troops down to the banks.”—*Mr. Ramsay's Journal*.

two in breadth, are these rapids. It is the lower cataract on an infinitely larger scale, but the impressions excited are widely different; there you feel an interest in every rock as you pass it, you admire their savage grandeur individually, and the rapids the while are dashing away under your feet—there you thread a labyrinth—here you look down on one, quite bewildered.

The prospect, miles to the eastward, is bounded by the prolongation of Gebel Mokattam—to the south, by the mountains of Dongola—it was something to have seen them! It was a sad thought, that I had reached the limits of my southern excursion; sad—though now every step I took would bring me nearer to my happy homes in England and Scotland! From one of the western crags I had a partial view over the Libyan desert—a dreary sight.

While William carved our names on the rock, where many a future traveller will read them in association with those of Belzoni, Burckhardt, Irby and Mangles, &c., I enjoyed half an hour's delightful rumination, on a most commodious natural seat that overhangs the Nile beyond the rock

Abousir, and on which, before departure, I cut my cipher by way of claiming it as my own; Coutts will perhaps one day find it there, and add his own to it. Nowhere else have we attempted to immortalise ourselves in this way. At Petra, if we ever get there, we have a plot *in petto*—to carve our names, “Rames’” and “Lindes’,” (they are actually written so in many ancient characters,) on some conspicuous rock or wall, in hieroglyphical characters within king’s ovals; “what a splutter” will this make among the antiquaries!

Our Nubian sailors entertained us with some most extraordinary Berber songs, as we returned to Wady Halfa—much more melody in them than in the Arab airs. One of them ended in the wildest and shrillest single yell I ever heard—single in its effect, though decomposable into a rapid reiteration of the same high note, springing from the throat like stones from the mouth of the Geisers, followed by a second yell of one single note, every voice joining in it—two or three heathenish laughs, liker the neighing of a score of horses than aught human, finishing off the melody.

We started northward on regaining the “Hip-

popotamus," rowing now to expedite our motions, floating down stream between two and three miles an hour. From Alexandria to Wady Halfa, the distance is nine hundred and sixty miles.

Words cannot express to you how much I have enjoyed my trip hitherto, but this expedition within the tropic I shall always remember with peculiar delight. How you would both enjoy Nubia! the weather is lovely, the mornings and evenings exquisitely beautiful, fresh breezes tempering the heat; the sky, by day, transparent as crystal—at sunset, a sea of molten gold, rich beyond conception—and at night, lighted by a moon and stars so brilliant and clear! I finished Cowper's Task one evening, lying on the divan in the tent, with no light but the fair moon to read by; the air was balm, and the musical dash of the oar shed a thousand sparkles of broken light as we glided along.

Thursday, however, the 26th of January, dawned on us the gloomiest morning we had seen in Egypt—now, at last, for an adventure! Few travellers have been shipwrecked in the cataracts of the Nile!

The Reis made his appearance, and we started on our descent to Essouan immediately after breakfast. The first rapid we passed prosperously, with the exception of one bulge, but the rope attached to the vessel, to retard the rapidity of her descent, breaking as we approached the second and more difficult one, we were hurried off by the torrent, and struck against a rock under water, the same which Ibrahim Pasha ran against some years ago, when his whole crew perished. We, most providentially, struck sideways, or we should probably have suffered the same fate. The force of the blow drove us on a shoal near an isolated rock in the middle of the river; the vessel grounded—our men leapt on the rock, and secured her with ropes. Our first idea was to lighten her by landing the heavy boxes, &c., but the water (for we had sprung two or three leaks) gained on us so fast, that all hands were set to work to remove the luggage to the island—everything was hurried out, pell-mell; I was in the cabin, giving out the last handful of books, after pocketing one or two that I valued, and a bag of gold pieces, on the chance of being able to save nothing

else, when the cry rose that we were going down the stream again! I sprung out, the vessel was edging away from the rock—I leaped and caught by my hands, my feet in the water; the Arabs pulled me up, and I was safe, thank God! Twice did the boat nearly escape us, the current was so violent; at last we got her safely lashed to the rock with all the ropes we had, and for an hour, or more, the men were occupied in landing everything portable, first our things, then the oars, planks, &c., of the boat, lastly, their own stores of dates and biscuits, which they would not touch, honest fellows! till ours were safe. We expected every minute to see the ropes break and the boat topple over, lying sideways as she did, the deck half under water.

Here we were then, and a most extraordinary scene it was to be in! wild and picturesque at all times, doubly so now, dark purple clouds lowering around us, rain pouring, (a wonder of itself in Upper Egypt,) lightnings flashing, and thunder outroaring the rapids that were dashing past on either side our islet, covered as it was with boxes, books, pipes, pistols, guns, crockery, pigeons,

fowls, lambs, goats ; and, last and least, two chameleons, poor little things ! we had bought them at Derr, the capital of Nubia, and had had great fun with them.* Our Arabs and Nubians—some were sitting idle on the baggage, others unloading the vessel ; a messenger every now and then

* “ Jan. 22. Gave half a piastre for a couple of chameleons, which we have been trying, unsuccessfully, to tame. Their natural colour appears to be a fine green, which is changed into a deep brown or black, and varies between the two. It is a very curious animal, like a lizard in general appearance, but much slower in its motions, and differently organised. The body is about four inches long, and the tail, which is long and tapering, about double that length. It has a large head and enormous mouth ; the eyes are covered with a skin the same as its body, with a small hole in the centre, which they have the power of directing to any point they choose, so that they can see in all possible directions, without moving the head ; each eye is moved quite independently of the other, so that one is often pointed forward while the other looks backward. The feet are divided into two parts, of the same size and form, with three sharp claws on each part, and they have the power of grasping with the two divisions, as well as hanging by the tail ; the division and action of the feet are on much the same principle as those of our hands and thumb, only as if there were two hands thus united, with three fingers each.”—*Mr. Ramsay's Journal*.

catamaraning it from the shore on a log of wood, or fearlessly dashing through the rapids, calculating his distance, and the necessary allowance for the force of the current, with the most unerring precision. Our captain, meanwhile, sitting on the edge of the rock, bare-headed, and almost naked, was raving like a madman, now rocking backwards and forwards, now stretching out his hands, apostrophising his boat, and crying like a child; one of the sailors covered his head, exposed as it was to the rain, and robed him—he was quite unconscious of the attention; I never saw a man so utterly unnerved. The crew, too, were blubbering at first, but afterwards they worked like men. Abdallah was active and useful; Missirie, a host in himself, was packing up this, tying up that, stowing away the books, and preparing everything for the re-embarkation which we hoped to effect, though we were not unprepared for the necessity of making the rock our bed for the night; a situation, altogether—what with the war of elements, the wreck, our uncertainty how we were to get off, if at all—as impossible to describe as to forget.

We had ample time, three hours or more, to reflect on the kindness of Providence in directing us against the rock we struck on ; had we missed it, we should have been hurried down the cataract, at the certainty, almost, of being dashed to pieces ; had we grounded nearer the first rapid, we must have swum for our lives—we should have had no islet to take refuge on, such as proved our safety this morning.

Having sent to Philae and Essouan for help, both messages took effect in due time, the former producing a small boat, the latter our friend of Korosko, Wellee Kiashef ! who, we found afterwards, was just stepping into his boat for Esneh, when he heard of our misfortune, and came forthwith to our assistance, with his Armenian secretary, and the dragoman, or interpreter, of a German baron, bound on the Pasha's service to the gold mines in Sennaar.

The Philae boat was beautifully manœuvred ; it darted past us, and down the rapids, like an arrow, and then veered round under the rocks, and was towed up by the Nubians, swimming from rock to rock, till they brought it alongside

our islet. After getting all our valuables on board, we embarked with Missirie, Abdallah, Achmet, the captain of our boat, the portly Reis of the Cataracts, and the surviving chameleon, for the other, drooping for some days past, had died on the island—together a tremendous freight. We started, held back for a while by a rope till we reached the line of the rapid; then they let go, and, without rope or guidance except the helm, we rushed down between the rocks, cleared them to a wish, and, in a few seconds, reached still water, and rowed to the shore, where we were kindly greeted by the Kiashef. The baggage landed, Missirie arranged a mat and divan, and we sat down and talked with him for an hour or so, waiting for the camels which he had sent from Essouan to carry our baggage. He had also brought donkeys for us, and we accepted a most cordial invitation to dine with him, and lodge in apartments at the Government-house. No camels appearing, and the day wearing, we started for Essouan on the Kiashef's own donkeys, for this good Samaritan would not suffer us to mount the hired beasts, or to pay for them on our arrival.

We had ridden but a few minutes when we met the camels towering along at their stately slow pace. I should have mentioned, by the bye, that, on landing, we let the little chameleon go; Missirie took it to a grassy spot where I dare say it has been enjoying itself, after the fashion of chameleons, ever since. Poor little thing! its adventures surpass even those of the "Travelled Ant," in the Evenings at Home!

Our road to Essouan lay just within the edge of the eastern desert, through the wildest scenery:—a ravine, which we could only thread our way through one at a time, opening into a broad sandy plain, like the dry bed of a river—both plain and ravine edged in by rocks of the most extraordinary shapes, piled one on another like the fragments of an earlier world—black and massy—not a blade of vegetation,—contrasting strangely with sheets of the finest white sand, sparkling as snow, and rippled all over by the wind, lying here and there in broad wreaths between them,—and a clear evening sky above us, for the day had brightened after the storm. The sandy valley ends in the cemetery of old Essouan, the Saracenic town, depopulated

(as I mentioned above) centuries ago by the plague, and deserted ever since. Hundreds of tombstones, carved with inscriptions in the old Cufic character, lie on each side the road; ruined mosques, and the shattered walls of the old town, crown the hills on the left, and had a most singular appearance, relieved against the sunset sky. I could scarcely have imagined anything more dreary than the desert, that death-bed of nature; but a cemetery in the desert, and that the forgotten one of a deserted town, strikes cold to the heart.

It was dusk by the time we dismounted at the Kiashef's harem, the first house we came to; he brought out a couple of arm-chairs, and gave us a most acceptable cup of coffee, and then, leading the way to the Government-house, ushered us into the presence-chamber, as I suppose I must call it, where the Bey gives audience during the summer.

Here we again smoked our pipes, and drank the coffee of our hospitable friend. William and myself, seated in arm-chairs of state—the Kiashef (as grave and silent as a judge now he was among his

countrymen) and a Turkish officer, on two plain chairs—and the Armenian secretary cross-legged on his mat—formed our party, and a very pleasant one it was, for nothing could be more cordial than their attentions.

Dinner at last made its appearance. Napkins were first given us; then raisins and a fiery liqueur of aniseed were placed on the table as a whet; then came the dishes dressed *à la Turquie*, which we partook of *à l'Anglaise*; the Turks ate after their fashion, dipping in the dishes very neatly, with pieces of bread for spoons: little was said during the meal, for the Turks don't talk on such occasions; lastly, a servant brought water to each of us, to wash our hands, pouring it over them;—then coffee again. We had a good deal of conversation afterwards, through Abdallah and a Nubian, who had travelled with Lord Belmore some years ago, and spoke a little Italian. The officer spoke highly of his own achievements in the chase, of having killed (and eaten?) a lion, &c. &c. A lion, he told us, would never attack a woman, even armed:—

“ ’Tis said that the lion will turn and flee
From a maid in the pride of her purity—”

I did not expect to hear a sentiment of chivalry in this part of the world.

About nine we rose and wished the party good-night. Missirie, we found, had made our rooms comfortable in the extreme, putting up the campbedsteads, making a divan of the cushions of the boat, and getting the things in order; everything almost had been saved. We were much the better for our tea, as you may suppose, and read and wrote afterwards till bed-time, by the light of an immense Turkish candle stuck in the orange-basket.

Next morning, before we were up, Wellee Kiashef had been to see us, and had smoked three pipes; he returned about ten, and breakfasted with us; he drank his tea and ate his omelet with great apparent satisfaction, and afterwards smoked his pipe again, seated on the divan, and cherishing his foot. The Armenian secretary also came to see us. An Abyssinian boy attended, the Kiashef's page, and apparently a great favourite, respectful,

but without servility ; the Kiashef spoke kindly to him, and the boy made his observations freely, though modestly :—the henchman stood at the door, like Evan Mac Combich in Waverley. William gave the Kiashef a musical snuff-box, which he seemed pleased with. After staying about an hour, he again inquired whether he could do anything for us, and protested, on our repeating our gratitude for his past kindness, that really it was “ nothing—nothing.” He then rose to go, and, with kind wishes and salams, we parted.

We then started, with Abdallah, for the Cararacts, to see after the boat. It was a lovely day, but so hot that we had almost resolved on giving up the walk, when the appearance of some donkeys that we had countermanded determined us to proceed. I was glad to see the Saracenic tombs again in broad daylight ; the headstones are in perfect preservation, many of them lying quite loose—dear A—— would have enjoyed a walk among them,—she is tout à fait Saraçenique, as Caviglia would say.

We followed nearly the same route as yesterday, and were equally delighted with the extraordinary

scenery. Before descending to the river, we took a last look at Philae in the distance, and its beautiful temple. The boat, we found, had kept its place during the night; the Reis of the Cataracts was there with his men, and they were stopping up the leaks in order to bring her to the bank, that they might get her ready for coming down to Essouan the next morning. Swarms of Nubian children clustered around us with curiosities for sale; we bought some necklaces and bracelets of red and white beads and straws, (they show beautifully on a black skin,) and several fetiches or amulets, which they wear generally under the right arm—the dagger under the left; the latter even the children carry. William dissected one of these fetiches afterwards, and found a long roll of paper inside, covered with Arabic writing and mystical diagrams, magical and astrological apparently.

The fearlessness of the boatmen, their intimate acquaintance with every eddy of the river, and their dexterity in manœuvring, struck us with admiration; while we were standing there, a vessel in full sail, every oar plied, ascended half the rapid, landed some of the crew on a projecting rock, and then

floated back again, the broadside to the stream; the most graceful, lady-like retreat imaginable.

After sauntering about, identifying the scenes of our first and second passage, we returned by a Nubian village built on the shore in a grove of date trees,—plenty of women and children—no reserve in the former, though one of them, whenever we looked at her, hid her face like the Arab women, for fear of the evil eye probably; the boys were naked, most of them; the little girls wear belts of small leathern thongs. One of the children danced before us, naked, and brandishing a short spear, a thorough young cannibal.

Next morning we crossed to Elephantine, and had another delightful stroll over the lovely island. It was a heavenly day, still and thoughtful; the broad Nile lay before us, sparkling as if with a thousand eyes; the fishermen were paddling about on their catamarans—I have called them so, unadvisedly perhaps, but they much resemble those used at Madras, if the descriptions I have read be correct; they consist of a log of wood, fixed between two bundles of reeds tied together at the two extremities; the fisher sits on it, not astride,

like the Indian, but as on a sledge, and with his single paddle strikes twice or thrice on each side alternately, zigzagging it like a water-fly. I thought the Isle of Flowers lovelier than ever!

Sunday morning we had a delightful walk along the heights beyond old Syene. A solitary forsaken minaret, or watch-tower, crowns the brow of one of the hills; we climbed up it, and read the service there—some boys who had followed us the whole morning with curiosities for sale, must have thought us magicians. We extended our walk much further. Every hill is crowned with a mosque; in one of them that we entered, the arches were all pointed—it is among the tombs and mosques of Old Essouan that Mr. Wilkinson thinks the earliest specimens may be found of that style of architecture. The oldest known at present is the mosque of Sultan Ahmed e' Tayloon at Cairo, erected A. D. 879.

I was reading, most comfortably disposed on the divan, that afternoon, when William entered with a gentleman from India, one of a party of three who had started from Philae in the morning—his friends by land, having heard of our disaster—

himself, more adventurous, by water. The Reis presumed to pilot the boat without a rope; the consequence was, that she was hurried by the current against the rocks, and her bottom completely and irreparably stove in. The captain went as frantic as ours did, forgot even his child, which was left in the boat; Mr. Clarke, our new acquaintance, caught it up and swam to land. William met Mr. C. on the shore, and advised his applying for rooms in the Government-house, which were granted immediately.

Soon afterwards the other gentlemen arrived; we asked them, of course, to dinner. Mr. Clarke, a very pleasing gentleman-like young officer, proved to be the son of Dr. Edward Clarke, the celebrated traveller; his companions were Dr. Mac Lennan, the distinguished physician, chef d'hôpital, I believe, at Bombay—so kindly mentioned by poor Victor Jacquemont in his last letter to his brother,—and Mr. Southhouse, also in the Indian service. We spent a very pleasant evening, and at night sent them some cloaks and the cushions of our divan to sleep on, none of their things having arrived from the wreck.

Messrs. Mac Lennan and Southhouse breakfasted with us next morning; Clarke, like a man of his word, had gone betimes to the boat, having promised the men to do so. He found them very hungry, and yet they had not touched their master's provisions, nor attacked the fowls in the hen-coop; one poor fellow being quite naked, he arrayed him in a shooting-jacket and knee-breeches; a strange figure he must have cut!

They all three dined with us, and, after another agreeable evening, we parted on the stairhead—such a night it was! I stood long there watching it,—brilliant, and yet inexpressibly soft and lovely, the stars, varying in tint and apparent distance, twinkling through the whispering date-trees, or crowning them like diamonds on the forehead of beauty.

Finally, on Tuesday morning, the 31st of January, A.D. 1837, we started for Thebes, after bidding our Indian friends farewell. They felt most kindly on the subject of the trifling attentions we had paid them, and expressed it not only by words but deeds: think of Clarke's sending us half a dozen of Hodson's ale, an Indian luxury, and Dr.

Mac Lennan a dozen of Madeira, and four bottles of Constantia ! What sunshiny days such are in human life !

And so we bade adieu to Essouan—sorrowfully, at least on my part ; I had received kindness there, and had shared with William in showing it to others. I took more than one last look at the noble rocks, and the minaret we visited on Sunday, conspicuous from afar on the hill beyond them, and the lovely Isle of Flowers—never, probably, to greet her again ! They had become “things familiar” to us, and it was painful

“Even from their lifelessness to part.”

Since that morning we have been leading our Nile life again, the old routine ; the vessel is all right, and everything goes on as it did before our wreck. What mercies all these are to be grateful for !

P.S. I find, on looking over “fyttē the second” of this interminable epistle, (I hope you will not consider it a *romance*,) that I have omitted all mention of our visit to the magnificent temple of Re, (³⁸) or the Sun, at Ebsambul, near Wady

Halfa, discovered by Burckhardt, and opened by Belzoni, Irby, and Mangles;—two words only—I must not pass over the most stupendous excavation in the whole valley of the Nile.

You enter between four enormous statues of Rameses the Great, about sixty feet in height, seated—the expression of countenance almost feminine in its mild beauty; they are admirably sculptured, in full relief, their backs scarcely resting against the rock; looking up at them from the southern and shadowy angle of the excavation, their sublimity is, indeed, almost overpowering.

The doorway is surmounted by a beautiful sculpture of the hawk-headed deity Osiris, and that by a frieze of hieroglyphics, above which—strange finish for such a work!—sit a row of monkeys—but nothing, however quaint or extraordinary, is out of character in Egyptian architecture.

Descending between the colossal statues, you enter the great hall, supported on each side by four columns, faced with gigantic statues reaching to the ceiling, similar in dress to those we saw at Guerf Hassan, but, in proportions and execution,

far finer ; nor are they so awful—you have room to look at these—there you felt the passage between such monsters too narrow.

The temple was excavated soon after the accession of Rameses, and the sculptures seem to refer chiefly to his earliest campaigns. On either side of the door, inside, is a gigantic figure of the Conqueror, holding by the hair a group of kneeling captives, back to back, and about to slay them ; they are of different nations and colours—you distinguish blacks of various castes, and the same Shorii, with the forked beards and aquiline noses, who die so nobly at Beit Wellee. The sculptures on the south wall appear to record his victories over this people. Standing on his chariot, drawn by two horses, with the usual feathers on their heads, the reins fastened to his girdle behind him, his bow in his hand—a perfect arc—Rameses pours his unerring arrows on the enemy, many of whom have already fallen, and others vainly try to avoid them ; farther on, dismounted and trampling on one of their chiefs, he seizes another by the arm, and pierces him with his lance. On the opposite or northern wall are sculptured battles on a

smaller scale, spirited, but inferior to those of Thebes; the preparation for the battle, the parting of a warrior and his wife, the clash of chariots and riders, and horses falling under the arrows of the Egyptians—all the tumult of war and bloodshed. After all, these war-scenes are composed in the very spirit of a Highland pibroch; the gathering, the advance, the battle, the song of triumph, the welcome home, and the coronach for the dead,—you hear, and you see them all.

Beyond this noble hall, there are a second, supported by square columns, a cella, and an adytum, with four deities seated at the extremity, and an altar before them, as at Guerf Hassan; besides many lateral chambers of inferior interest.

There are several other temples of much interest between Wady Halfa and Essouan; but I will only mention one of them—that of Hermes Trismegistus at Dakke—beautiful! beautiful! What fame such a visit would have conferred on us in the good old days of astrology, alchemy, and diablerie! *

* “Dandour, Jan. 24. The temple is a small one, and hardly mentioned in the books, but is very interesting.

“ Fytte the Second ” has kept, upon the whole, so free from antiquities, that I shall make no apology to my dear mother for reverting to that seducing subject in the present, after which it will be

“ Adew, ye get nae mair of me ”

on the subject of Egypt.

Thebes I have said more than enough about already ; but there is a little temple at Herment, old Hermonthis, a few hours' sail to the south of it, well worth mentioning, as a rich mythological museum, and invested, moreover, with peculiar interest as having been built by the unblushing Cleopatra, to commemorate the birth of Cæsarion, her son by Julius Cæsar. I was much struck at finding it a perfect Augean stable, disgustingly filthy within, and plastered without with cakes of dung, drying for fuel. The accouchement of the goddess Ritho, symbolical of Cleopatra's, is sculp-

The turn of the ornaments on the doors, &c., is elegant, and the hieroglyphics, though not of the palmy days of Rameses II., are of that substantially good style, which never offends the eye by any glaring defects or false drawing and taste.”—*Mr. Ramsay's Journal*.

tured in the adytum, and the scheme of young Cæsarion's nativity on the ceiling.* (39)

* "Feb. 5. Rose off the temple of Hermonthis, which we visited before breakfast. It is interesting, and differs from any we have yet seen in style and appearance, which are such as to have induced Dr. Richardson, and other travellers before the hieroglyphical discoveries were made, to consider it as one of the oldest in Egypt. It seems never to have been completed; at least the ovals for the names have never been filled up in the interior of the temple, and very few on the outside. The portico is composed of tall pillars in the style of that age, but not very graceful, from being too near each other. The interior is very simple, consisting of two chambers, very lofty and very gloomy; the furthest and smallest one seems merely a slice of the whole building, built off, and, consequently, its length is the breadth of the temple, its width not above three yards, and its height equal to the other. A window at the top throws light on the roof, which has been called a zodiac, and bears some appearance of being so. It is a strange device, in all probability an astrological scheme of nativity of the young Cæsarion. On the walls are represented the birth, education, &c., of the same child, or rather of the young God Haphré, his patron, I suppose. Astronomical subjects cover the ends of the room. In the larger apartment is a strange series of designs; the child is presented to all the different gods, and the whole show of the divine menagerie is exhibited—cats, dogs, crocodiles, &c., as well as the hideous figures of Typhon and his consort. A winged scarabæus, with the globe, also the winged hawk, are conspicuous

Nor must I wholly pass over the far-famed temple of Dendera, a most extraordinary pile, unlike anything we had seen in Egypt, at once grotesque in its details and magnificent in its general effect, and in perfect preservation. The ceiling of the portico is covered with astronomical subjects, representing, for the most part, the processions of the Sun and Moon, in their barks of state, through the signs of the zodiac; each zodiac is involved within the interminable body of that celestial boa, Nith, the mother of the Sun, whose beams are represented, at the moment of his birth, illuminating the disk of the moon. Strange mythological fancies are sculptured here—snakes, for instance, with human arms or legs, or erect on their tails, presenting offerings, &c. When the sepoy's were here, they recognised the gods of India in those sculptured

objects over the door, where the child is seated on the horns of the bull Apis. The demon Typhon is the only one I have ever seen represented with his face towards the spectator, and his body turned half so, between front and profile—and this only in one other place, where he is made of enormous size and hideous deformity. A house is built on the top of this temple, and it stands in a dung-yard.”—*Mr. Ramsay's Journal.*

on the walls, and worshipped with the same ceremonies they would have performed at Benares. This of itself proves the brotherhood of the two religions.* (40)

A deadly feud raged whilom between the crocodile-haters of Dendera, and the crocodile-worshippers of Ombos; one of the latter having fallen into the clutches of the Tentyrites, “ they eat him

* “ Dendera. However grand and stupendous this temple may be, it is not worthy of the lavish encomiums most travellers indulge in—perhaps because it is the first they see in Egypt, whether in ascending the Nile, or coming overland from India. It bears extreme evidence of the great decadence of art at the period of its erection. The spirit which animated the early ages in this country had long passed away, the forms only remained—these were preserved scrupulously by the interested zeal of the priests, and under the Romish rule, which considered all religions equally useful, were dignified by such dedications as this. But the peculiar turn of spirit which breathes from even the most insignificant remains of the Pharaonic period, is quite wanting here; it is dead, formal, and in details quite uninteresting—or, if one’s curiosity be excited by the zodiacs and planispheres which are one of the peculiar features of this temple, the fact again recurs to the mind, that they are, after all, but priestly imitations of what we have already seen in the tombs of the Pharaohs; made to be stared at, not felt and understood.”—*Mr. Ramsay’s Journal.*

up, baith stoup and roup," as the devils are said to have served the victor of Culloden. Near the temple at Ombos (a noble relic) is a large wall of crude brick, on which, Dr. Richardson supposes, the sacred crocodile took his daily airing, and, below it, the tank in which he bathed—poor wretch, to be debarred his own imperial Nile!

The quarries at Hadjar Silsili are wondrous indeed! What think you of squares a hundred feet deep, and as spacious as those of London, cut out of the mountain, and communicating with each other by long winding streets or passages?

At Beni Hassan we visited the oldest tombs we have seen in Egypt, excavated in Osirtesen's time, seventeen centuries B. C. The owner of one of them seems to have been a regular sporting character; his dogs stand by his side in the full-length portrait drawn of him, as is usually the case, in one corner of the tomb; hunting, fowling, and fishing scenes are represented in other compartments; a mock fight, and the successive rounds of a wrestling match, (or, probably, of several, for there are scores of groups, exhibiting every attitude and vicissitude of the struggle,)

adorn the extremity of the tomb. These wrestling matches are found in most of the tombs at Beni Hassan ; it was evidently a science in Egypt at a very early period.

The game of draughts, two seven-stringed harps, tossing up and catching three balls successively, the pirouette with extended arms, practised by figurantes in the modern opera, and the attendance of dwarfs on the Egyptian nobles, are among the note-worthy objects depicted in these curious sepulchres. The columns that support them are of two orders, both extremely primitive ; polygonal, like those of Thebes, slightly fluted, and very elegant ; or, simply, four lotus-stalks tied together by a broad band under the buds.

And now, my dear mother, I have almost done. You must be sick of temples and tombs ; I fear that many things I have expatiated on, in the hope of their amusing you, must have failed to do so ; but all I can say in excuse is, that I have spared you much. I shall continue, however, to write *lengthily*, for I think you and A — will be pleased to follow me, step by step, throughout my pilgrimage. Memphis is the only place we have

now to visit; in two or three days we shall arrive at Cairo, but shall be very sorry to bid adieu to the little bark that has been our home so long, and in which we have become so thoroughly domesticated.

Port of Cairo, 23rd Feb.

We arrived here this evening, but do not intend landing till to-morrow; this is the last night we are to spend on board the Hippopotamus!

We have spent the whole day in visiting the site of Memphis and the pyramids of Dashour and Sacara. Mounds and embankments, a few broken stones, and two colossal statues, disinterred a few years ago by our friend Caviglia, are the solitary remains of the ancient capital of Lower Egypt. We rode for miles through groves of palm and acacia, cultivated fields, and wastes of sand, over what we knew must be the site of Memphis, but every other vestige of her ancient grandeur has disappeared. Noph is indeed "waste and desolate."

The colossus of Rameses the Great, forty feet

in height, lies on its face—the workmanship beautiful, the features (mild and benignant) in perfect preservation. This was, without doubt, one of the six statues (of himself, his wife, and four of his sons) erected by Rameses in front of the great temple of Vulcan, which, from the descriptions of the ancients, must have been a wonder of the world. A short distance to the south lies a small statue, about ten or twelve feet high, we thought, and which perhaps belonged to the edifice where the bull Apis was kept and exhibited, which lay in that direction, according to Herodotus. This is all:—how truly has the prophecy been fulfilled, “I will destroy the idols, and will cause their images to cease out of Noph!”⁽⁴¹⁾

Near the temple of Vulcan, the site of which is now completely overgrown with date trees, lay the Lake Acherusia—whence the fictions of Charon and his boat, and the Elysian fields. We crossed the dry bed on our way to Sacara. The Sheikh and his friends were enjoying *otium cum dignitate* under an acacia, as we rode past the village. The groves of acacia near Sacara and Mitraheni are mentioned eighteen hundred years ago.

The principal pyramid at Sacara is built in five degrees, or steps, like the Tower of Babel; there is another, some degrees to the south, similarly built, and called the False Pyramid; magnificent at a distance, it loses its grandeur in proportion to the nearness of your approach.

The two great Pyramids of Dashour are very beautiful, each about seven hundred feet square, but of much lower elevation than those of Djizeh. We descended into the northern one by a steep and sloping passage, for two hundred feet, and, crawling on our wrists and feet some yards farther, on a level, found ourselves in the first of two lofty chambers, connected by a low passage, and leading to a third by another passage, the entrance to which was too high for us to reach it without a ladder. The structure of these apartments is very remarkable, each successive course of stone, beginning from about ten or eleven feet from the ground, projecting about six inches beyond the one below it, till the two walls meet. It is said to resemble the inside of a Cyclopean or Pelasgic building at Argos, popularly called the Treasury of Atreus.

We rode between many other pyramids, some of them still preserving their shape, though partially covered with sand, others already sinking into tumuli, or enormous barrows; these latter are, perhaps, the oldest of all.

A curious root, transparent and juicy as a white radish, grows here under the sand, betraying its existence by a tiny stalk, as thin as a blade of grass, shooting above the surface. Southey, I think, alludes to it in one of his poems.

The ride from Sacara to the point where we regained the boat, about an hour north of a place called Sheikh Etmin, was very beautiful—through extensive palm-groves clustering round Arab villages and Bedouin encampments—wandering Ishmaelites—the pyramids of Djizeh, contemporary with their father Abraham, towering in the distance.

February 24.

Once more at Grand Cairo—soon, I hope, to leave it for Mount Sinai, Petra, and Jerusalem—for such is the route we intend attempting. We

shall travel on camels and dromedaries, and sleep in tents, like the patriarchs.

Adieu, my dear mother !

P. S. You will be glad to hear that I have sent our friend the Kiashef a little Arabic library, consisting of Robinson Crusoe, two or three books on history, the Arabic atlas I mentioned in my last letter from Cairo, a summary of the Old, and the whole of the New, Testament. Adieu once more.

March 2.

P. S. (bis.) We visited the Pyramids yesterday, and were most kindly received by Colonel Vyse, who is carrying on his researches there in person, Caviglia having quitted the field. He has attacked the three Pyramids and the Sphinx, all at once, with a troop of two hundred Arabs. In Cheops's—he is in hopes of discovering the chamber above Davison's, and an entrance on the western side, corresponding to that on the northern in its degree of distance from the centre, calculating that, the one being so many feet to the left,

the other will be as many to the right of it. We saw an immense stone, that his workmen had dislodged, roll down the side of the pyramid ; it was sad to see the sleep of four thousand years so rudely broken !

Colonel Vyse is cutting right into the heart of the third pyramid, but as yet has found no chamber ; when he reaches the centre, he intends boring right up and down. He has bored thirty feet into the Sphinx, in expectation of finding the chamber said to exist inside it—as yet without effect. He has many other ideas experimenting, and I should not be surprised if he make some curious discoveries.*

We dined with him, and returned to Cairo, much gratified with his kind attentions, the same afternoon.

* Colonel Vyse's success subsequent to our visit to him at the Pyramids has indeed been most gratifying.

EDOM AND THE HOLY LAND.

LETTER VII.

Journey to Mount Sinai. Desert of Suez—Mara—Route of the Israelites—Wady Shellal—Wady Mokatteb—Wady Feiran—Ascent to the Sinaite Mountains—Ascent of Mount St. Catherine—Of Gebel Mousa—Of Gebel Minnegia, possibly the real Sinai.

Convent of St. Catherine, Mount Sinai,
March 21, 1837.

My dear A——,

Finding a Polish pilgrim here, about to return to Cairo, I seize the opportunity of letting you and my dear mother know, a month sooner than otherwise I could, how well we have got on hitherto, and under what peculiarly favourable auspices we are likely to continue our journey by Petra to Jerusalem.

On Monday, the 6th of March, we started on our voyage through the desert, ⁽¹⁾ a caravan of ten camels, with two tents, one for our followers Misirîe and Abdallah, the other (an Indian one, of bamboos) for ourselves. We arrived at Suez on the fourth day. The hot *kamsin*, or southerly wind, blew violently all Monday, bringing clouds of sand, and pelting us with small pebbles, which made our Arab *gillie-comstrains* skip, as they rattled against their naked legs—never was I in a heavier hail-storm; luckily, I had provided myself at Cairo with a Turkish scarf, which protected my eyes; my lips were parched and chapped for several days afterwards, and a book in my pocket was scorched as if it had been held to the fire. But we were fairly in the desert—delightful thought! pilgrims following the steps of the Israelites to the Promised Land.

We halted a little before sunset, and pitched the smaller of our two tents (the wind being too high for the other) in a hollow between two mounds, which afforded a few thorns and tufts of arid grass for the camels, and tolerable shelter for ourselves. I really felt ashamed when we were

fairly established in the tent, seated on our iron bedsteads, with a table, our old shipmate on the Nile, between us—far too comfortable. It blew quite a storm the first part of the night, and we thought the tent would have flown away, but it weathered it:—we were covered with sand when we awoke on Tuesday morning; much rain succeeded, but it cleared up before we started, and the day turned out delightful; there was little sun, but the wind had changed to the west, a fresh exhilarating breeze.

The weather, indeed, has been charming ever since. I always commenced the day with a long walk; nothing can be more enjoyable;—the desert, half gravel, half sand, crunches under the feet like snow;—sometimes bounded by low hills, sometimes it stretches out into an interminable plain, but always of the same unvaried hue. We passed skeletons of camels repeatedly, and scattered bones bleached to the whiteness of snow; and, one morning, prowling about near our encampment, I found an open grave and a skull grinning up into my face within it—the relic, doubtless, of some hapless pilgrim. Melancholy memorials these! but

all was not death there ; a frog, a species of gray lizard, some quails and vultures, were symptoms of animal—and various thorny plants, a few wild flowers, and a strongly scented plant, (a species of wild camomile we thought it,) called by the Arabs *behharran*—of vegetable life ; nor should I forget a solitary tree, long conspicuous on the horizon with the apparent dignity of a palm, but which dwindled, long before we reached it, into a stunted thorn, covered with rags streaming in the wind, hung there by every pilgrim as he passes *en chemin* for Mecca. The half-eaten carcass of a camel lay beneath it, and the vultures that had been garbaging on it flew heavily away at our approach.

I should have told you that the route we took was that by Mataria, north of Gebel Ataka, a long and picturesque ridge of hills, which we coasted all the third day ;—of a clear pinky gray in the morning, it assumed a deep iron-gray after sunset, as the rays died away ; it slants to the southward, as you approach Suez. The Israelites arriving at Etham, on the edge of the wilderness, from the north-west, the land of Goshen, turned

southwards, a day's journey, to Pihahiroth, "the mouth of the ridge," i. e. of this very mountain Ataka:—closed in by the mountains on each side, with the sea in front, and Pharaoh behind, they could only be saved by such a miraculous interposition as that which is still traditionally remembered in the Arabic name Ataka, or Deliverance.

On Thursday we started, with the Arabian mountains, and, as we conceived, the Red Sea, in front of us; it was the mirage! A ship, too, was curiously refracted in the clouds before we came in actual sight of either ship or sea.

Kodsy Manoly, a Candiote Greek, the East India Company's agent at Suez, and a shrewd, intelligent man, received us with great hospitality, and we found there—and this is the news that I think will please you—the celebrated Hussein, who accompanied Laborde to Petra ten years ago. We struck a bargain with him to convey us to Sinai, and have since engaged him to accompany us during the rest of our travels in Arabia. "An excellent warrior and hunter," says Laborde, "and renowned for his generous hospitality, he

unites in himself all the qualities which render a Bedouin respectable, especially those of so much importance to the traveller, unimpeachable integrity, discretion which always deserves to be confided in, and, what is very rare, genuine fidelity." He is the principal of the three guardians, or protectors, of the Convent of Mount Sinai, and is known and respected wherever he goes; Laborde made all his arrangements with the other tribes through him, and so shall we.

Hussein and I have become great friends; many a kind pat on the back have I had from him. Our intimacy commenced with a long walk one morning, that he and I took one road while the caravan went the other; we had a great deal of pleasant and most animated conversation; acting, gesticulating, drawing with my stick on the sand, and the judicious use of the *very* few Arabic words I have perforce picked up, were generally sufficient to make myself understood. We outwalked the camels, and sat and chatted a quarter of an hour or twenty minutes under the shadow of a projecting rock, before they came up. My recollection of the names and "countries" of

certain of the Arab clans, allusions to Antar, and such-like scraps of Arab tradition, have stood me in great stead. I have got much information from Hussein, through Abdallah, for whatever interesting point I asked him about,—(do not mistake me—I don't believe I am master of more than a dozen words of Arabic)—I always repeated through the interpreter.

Hussein provided us with eleven camels, those of Arabia not being so strong as the Egyptian breed, besides two dromedaries for riding;—a dromedary is to a camel what a race-horse is to a dray-horse—there is no generic difference; the Bactrian camel only has the two humps commonly attributed to the dromedary. Most of the camels were accompanied by their owners, all of whom, two excepted, were of Hussein's tribe, which, I should have told you, is the Waled Said, the principal branch of the Zoalia, the first in consideration of the Tora, or Sinaite, clans. The political constitution of these Bedouin tribes strongly resembles that of our own clans in Scotland; each is divided into several septs, governed by subordinate Sheikhs or Chieftains, under

whom the clansmen rally without prejudice to the patriarchal supremacy of the High Chief of the whole race, to whom the *chieftains* owe the same deference that the clansmen in general pay themselves. My heart warms to these Bedouin Highlanders, and the Tora tribes are a peculiarly fine race; the whole party, indeed, were good-humoured, hearty fellows.

All of us, masters and men, were armed to the teeth, William with rifle and gun, myself with holster pistols; every Arab had his *sikkkeen*, or short sword, and some of them long match-lock guns, ornamented with pebbles, shells, and Turkish coins, which they use very expertly. One of them, unpoetical villain! shot a young gazelle one morning, and had the barbarity to press me to eat it.

Their attire was very simple,—the *kefia*, or kerchief of the desert, loosely and gracefully tied round the head by a piece of rope, or a turban,—a long white robe of rather cumbrous drapery, sometimes of lighter material, secured by a girdle,—a long blue cloak, (peculiar, I believe, to the Arabs of this peninsula,) and sandals of fish-skin,

secured across the instep, and by clasps at the ankles, exposing the foot as in scripture paintings;—a small kneading-trough or bowl, a leathern bottle for water, a pipe, tobacco-pouch, and sometimes the short crook-headed stick, represented in the hand of Osiris in the Egyptian sculptures, completed their equipment. Throw away the pipe and tobacco, (many of the Bedouins, however—our friend Hassan, for instance—never smoke,)—substitute a lance or a sword for that ignoble weapon the gun, and any one of them might sit for a portrait of the Caliph Omar;—you cannot but remember the striking picture your favourite Ockley draws of him, on his journey from Mecca to Jerusalem.

So much for our guides,—a word or two on our own mode of travelling. I walked generally, for the first three or four hours, in advance of the caravan, resting every now and then under a shadowy rock or shrub, where such was to be found, till it came up, and then off again. Mounted—I read, mused, talked with William, or with the Bedouins, through Abdallah, and took notes, till near halting-time, when I generally took another

walk. We soon got accustomed to the camels' pace, which we were told was so fatiguing. (2) The caravan advances at a regular and certain pace, about three miles an hour; but the individual animals proceed very irregularly, stopping every now and then to graze on the thorny shrubs and scented plants with which the Arabian desert (particularly) abounds; the drivers humour them in this, and are constantly leaving the road, and even scrambling up the rocks for a handful of any herb the animals are fond of. The first *taib* I received from my friend Hussein was for feeding a camel tied behind mine, which had not time to crop for itself.

We generally halted about sunset, on some smooth spot under the rocks or hills, made our camels kneel down, unloaded—and then let them go free to browse *à discretion*; in half an hour more, the tents were pitched, fires blazing around, and the stars above us, for in these countries there is little or no twilight. The camels were then tethered down, and the Bedouins, their frugal meal and merry chat over, wrapped themselves up in their *abbas*, and went to sleep. We also dozed

from dinner till tea-time, and then, after a cheerful cup or two, followed their example. Evenings as peaceful, and cups as cheering as those immortalised by Cowper, yet how different in their accessories!—no newspapers, no politics, no prose of the present to mar our meditations on the past.

We all lent a hand in the tent-pitching; this Bedouin life is quite to my taste; 'tis the realisation of one of my childish day-dreams, when I used to pitch a tent on the nursery floor at Muncaster, and call it my home. And yet I *have* a lingering touch of European prejudice; there is something very melancholy in our morning flittings; the tent-pins are plucked up, and, in a few minutes, a dozen holes, a heap or two of ashes, and the marks of the camels' knees in the sand, soon to be obliterated, are the only traces left of what has been for a while home. There are a thousand allusions to this primitive mansion in scripture, almost unintelligible, till familiarity with the tent, the camel, and the desert, explains them. I never drive in a tent-pin without thinking of Jael and Sisera.

Now for our journey. M. Manoly accompanied

us to the shore of the Red Sea, and saw us embark for Asia. We crossed in about half an hour. I read the sublime description of the Passage of the Israelites, the song of Moses, and the seventy-seventh Psalm, with the scene before my eyes; for it was a little to the south of Suez that they crossed the gulf. It was a strange and thrilling pleasure to look down on those waters, now so placid, and remember their division—to look up at that azure and spotless sky, and figure to one's-self the cloud by day and the pillar of fire by night, that guided the chosen race to the Land of Promise. ⁽³⁾

The view from the shore of Asia is very beautiful; Gebel Ataka, and Gebel Deradje, each running into a long promontory, stretch along the shore of Africa, and nearly opposite the “mouth of the ridge” is Ras Mousa, the promontory of Moses; *ras* and *ros* mean the same in the Arabic and Gaelic. We did not mount till near four, two of the camels not having arrived. The sun set superbly behind Ataka, and the crescent moon was shining brilliantly when we encamped at Ain Mousa, the Fountains of Moses. There are many palm-trees scattered around them, neglected, and

grown thick and bushy from want of pruning. Frogs, shrill and musical as the rings in Lady Minnatrost's Castle, serenaded us all night.

Next morning we proceeded for three hours over the desert, sandy and stony alternately, the Red Sea, of the deepest blue, on the right, and the chain of the Gebel 'Tih, on the left; the country beyond it is called El Tih, 'the desert of the wandering'—Israelites.⁽⁴⁾ Between the third and fourth hour, we entered on a boundless plain of desert, called El Ata, white and painfully glaring to the eye; the wind, too, began to blow from the south, and rendered the heat very oppressive. El Ata is probably the Etham of scripture, though the desert so called extended, as we may gather from the Mosaic account, round the head, and perhaps for some distance along both sides, of the gulf.

After seven hours' ride and a half—a short day's journey, we encamped for the night in Wady Seder, on a bed of sand as smooth almost as a ball-room.—*Wady*, you must remember, means a valley, and is applied indifferently to a craggy mountain glen, and a mere depression in the flat

expanse of the desert, as in this instance. The Spanish *Guadi* is the same word.—Seder is supposed to be a corruption of Shur or Sdur, the ancient name of the desert that separates Egypt from Palestine; it was to this desert, you will recollect, but to a more northerly district of it, that Hagar fled with the ancestor of the Northern Arabs: the shrub under which she cast him—the leathern bottle (or *zumzumma*, as it would now be called) empty—the spring, which in these wilds lies often deep in the ground unseen, till you are close upon it—(unless we are to believe that Hagar's fountain was produced miraculously)—I cannot express to you how vividly that most beautiful scene paints itself to me now. The ground hereabouts is covered with beds of the finest chalk, caked by the sun into large flakes of pure white; the whole of this low country is under water during the rainy season.

Next day, starting at a quarter past seven, we reached the bitter well of Howara at half-past two, and watered the camels there. The Arabs never drink of it themselves; I tasted, and at first thought the water insipid rather than bitter, but,

held in the mouth a few seconds, it becomes excessively nauseous. It rises within an elevated mound, surrounded by sand-hills, and two small date trees grow near it. The sky was shining with great heat as we approached, and a pale hue diffused itself over the landscape, like the eclipse one might fancy overshadowed it when the Israelites murmured against the Almighty,—for there can be no doubt, I think, of this well being the Mara of scripture, sweetened by Moses. The name Mara, implying “bitter,” seems to be preserved in that of the Wady Amara, which we crossed shortly before reaching it. There is no other well, Hussein tells me, on the whole coast, absolutely undrinkable.

I asked whether they had any means of sweetening bad water, and he mentioned the *mun*, a gum that exudes from the tamarisk tree, and the juice of the *homr*-berry; to this latter inquiry I was guided by Burckhardt's expression of regret that he had not made it; he, too, was informed that no other well, bitter enough to be identifiable with that of Mara, exists, as far as Ras Mohammed.

The *homr*-plant and *tarfa*, or tamarisk tree, grow in great abundance in Wady Gherandel, two hours beyond Beer Howara, where we halted for the night; the former bears small, red, juicy berries, which they squeeze into water; the munn has a strong aromatic taste like turpentine;—one of our guides had a piece of it, which I tasted; they keep it in casks, melt it when required, and spread it on their bread like honey. Some have taken it for the miraculous manna—too absurd an opinion to be confuted.*—Are we to understand that the effect produced on the bitter waters of Mara by casting in the tree showed to Moses by the Almighty, (or “something of a tree,” as the Arabic translation runs,) was also miraculous? If not, it has been suggested that the munn or the *homr*-juice may have been the specific employed:—the *homr* is, however, a mere shrub, and had the whole valleys for miles round been full of *tarfa* trees or *homr*-bushes, there would scarcely have been enough to sweeten water sufficient for

* See Mr. Conder's observations in his volume on Arabia in that most valuable, judicious, and—considered as the work of one man—astonishing compilation, the *Modern Traveller*

such a host as that of Israel. Moreover, the Israelites were here within a month after the institution of the Passover at the vernal equinox, whereas the munn-harvest does not take place till June ; this, I think, must decide the question in favour of the miracle.—The tree that Moses threw in is called the *alvah* ; (5) I think, sometimes, I have discovered it in the *elluf*, a species of acacia, with very small leaves, and very large thorns, which grows abundantly in the valleys more to the south ; it bears bunches of long pods twisted together, of the size and appearance of French beans, slightly bitter, but not unpalatable when chewed. The radical letters of the words are the same, and Hebrew and Arabic are languages so nearly allied that the resemblance cannot surely be accidental. But whatever the tree was, it can have no more inherent virtue in it for sweetening the bitter well of Mara, than the salt had, which produced the same effect, when thrown by Elisha into the well of Jericho.—But you will be tired.

Between Beer Howara and Wady Gharendel the country becomes more mountainous, and as-

sumes a more picturesque character. Two divisions of the Waled Said were encamped near the Wady; one of the Bedouins quitted us, and disappeared, diving down a small ravine that seemed to end in nothing. One could scarcely fancy human inhabitants of such wilds. We halted among the tarfa bushes under one of the hills of Wady Gharendel, but at too great a distance from the wells to admit of our visiting them. This, probably, is the Elim of Scripture. ⁽⁶⁾

Soon after starting next morning, (at half-past seven,) we met a man driving a flock of goats, the first human being we had encountered since leaving Suez. Our road lay through Wady Ussait, west of which, Hussein told me, Mousa and the Beni Israel crossed, and Faraoun was drowned in the Bahr Souf, or Weedy Sea—the name has little changed from the Yam Souf of Moses! We came in sight of Gebel Serbal that morning, a magnificent mountain of granite, N.W. of Mount Sinai.

At a quarter past one, half an hour after watering our camels at the wells of Wady Sal, we reached the spot where the roads to Mount Sinai,

by Wady Mokatteb and Sarbout el Kadem, diverge ; we took the former, by far the most interesting as the route of the Israelites. Turning westwards, therefore, at this point, we entered Wady Taibi, the sea-breeze warning us of our direct descent to the sea-shore. The scenery of this valley is very striking. During the rainy season a torrent flows down it, of the height of two men, i. e. ten or eleven feet deep ; the bottom, as in most of these valleys, is sheeted over with white mud, caked so hard as to receive no impression from the camels' feet,—in fact, in progress to stone. Rock-salt, of the purest white, and perfectly clean, is dug up plentifully hereabouts ; they showed us some, fit for an emperor's table.

After passing a little forest of tarfa and wild date trees—winding round a black volcanic-looking mountain—defiling through a narrow ravine, where we heard a blackbird cheerily singing amidst the solitude, and leaving another black mountain to the left, we turned the angle formed by it with the valley, and the bright sea suddenly burst on us, a sail in the distance, and the blue mountains of Africa beyond it, a lovely vista ;—but when we

had fairly issued into the plain on the sea-shore, beautiful indeed, most beautiful was the view—the whole African coast, from Gebel Ataka to Gebel Rrarreb, lay before us, washed by the Red Sea, a vast amphitheatre of mountains, except the space where the waters were lost in distance between the Asiatic and Libyan promontories. It was the stillest hour of day; the sun shone brightly, descending to “his palace in the Occident,”—the tide was coming in with its peaceful pensive murmur, wave after wave;—it was in this plain, broad and perfectly smooth from the mountains to the sea, that the children of Israel encamped after leaving Elim; what a glorious scene it must then have presented, and how nobly those rocks, now so silent, must have re-echoed the song of Moses and its ever returning chorus, “Sing ye to the Lord, for he hath triumphed gloriously; the horse and his rider hath he thrown into the sea!”

The plain narrows into nothing at the southern extremity, where the hills end in a detached headland, jutting into the sea, and concealing a deep bay. I expected something beautiful, but the

reality far surpassed my anticipations; we stopped half way through the gap;—a large lake, so it seemed, of the deepest blue, lay slumbering before us, hemmed in by mountains, variously tinted by the evening sun, and of the most singular appearance, worn away and crumbling, as if of very old age,—with the blue heights of Gebel Serbal towering in the distance;—a scene and hour never to forget; the warm tears rushed to my eyes as I gazed there; not a sound broke the silence,—the caravan was far before us,—the waters lay all unruffled, scarce rippled by the evening breeze.

Twenty steps more—and, the headland disappearing behind us, the lake vanished, and the bay opened in full beauty. The rocks, as we advanced, descended into the sea so abruptly as to cut the path quite off; we waded round them on our dromedaries,—at high tide the passage would scarcely be practicable. As soon as we reached the little plain beyond them, the sun set behind the mountains of Africa, and night came on in her calm loveliness; the “sea of Edom” retained for a while the roseate hue that it can only boast of at such an hour, (7) but all ere long was gray, and

by the time we had pitched our tents, the moon and stars were brightly gleaming over us. We rode ten hours and a half this day.

Starting at 10 m. p. 7, next morning, we continued our route along the narrow track under the rocks, broad enough only for one camel at a time. Winding round another headland, we entered El Murcha, a large triangular plain, covered with shrubs, and affording a well of very bad water—formed by the intersection of two ranges of mountains, the most southerly, black as if they had been only quenched yesterday, ending in Gebel Zizezzat, the same promontory as that marked Jas Jehan in Laborde's map, nearly opposite to Gebel Rrarreb in Africa. A lower range of limestone hills, crumbling away with age, runs parallel with them; we pierced it through a ravine called Wady Luggum, and then, turning to the right, ascended the valley formed by the two ranges.

The *lussof* grows here abundantly—a beautiful green plant, with large juicy pods; at the proper season it produces a fruit as large as one's finger, and good to eat. We observed another fruit, of a very different character, but equally useful—medi-

cinally, the colocinth, or, as the Arabs call it, *humvul*; might not this fruit, golden as an orange externally, but bitterness itself within, and retaining its fair exterior long after the inside has all dried up, have given rise to the story of the apples of Sodom? It grows, they say, as large as a small melon, and they use the rind, dried, for holding water, butter, &c. Ostrich eggs are used for the same purpose in Egypt.—Two other shrubs I will mention here, though we chiefly noticed them more to the south,—one edible, the *hemmar*, a bunchy plant, the leaf juicy, and bitter when chewed—William thought it tasted like sorrel,—the other ornamental, the *sekarran*, bearing a very pretty flower of blended purple and white, on a thick leafy stem; its general appearance reminded me of the lotus in Egyptian paintings.—I need not apologise to my dear A—— for this little floral episode.

In this black chain of mountains is an extraordinary ravine, called Wady Shellal, or the Valley of the Cataract. Hussein took us through it, while the caravan went on by the usual route; the valley is not a stone's jerk wide, but the

scenery is awfully grand: not a sound was heard except the *sugh* of the wind among the rocks, and the solitary chirp of a bird. Hussein and I walked on quicker than William, who was looking out for partridges and quails; as we ascended the Wady, enormous rocks, fallen from the heights, of every shape, and in several instances inscribed with the same unknown characters that I shall have to mention presently, lay on either side of the way, becoming gradually more numerous, till, at last, they formed a little valley of themselves within the large one, which, gradually diminishing into a narrow winding passage, brought us to a perpendicular rock, beyond which there seemed to be no passage. It is impossible to describe the extraordinary appearance of this finale.

Hussein and I sat down in the shadow, and talked after our fashion, till William and his attendant Arab overtook us; Hussein then started up, and, climbing up the rocks, led the way to an upper valley, of which I had not suspected the existence, broader than the lower, but quite as extraordinary; the ground in some places was as smooth as a gravel walk. In the rainy season the

torrents pouring down it, and over the rocks into the lower valley, form the magnificent cascade from which the Wady takes its name. We walked on some distance to a well, which we found full of sand; Hussein scooped it out with his hands, and the water rose; all of us drank—I never tasted anything so delicious, always excepted the water of the Nile, to which no other beverage is comparable; but then I was very thirsty, for the day was by far the hottest we had yet travelled on. Returning a few steps, we climbed over the hills, and across two or three small ravines, till we reached Wady Boodra, where we saw tracks of the camels. It was well we had drunk at the spring, for the ascent and descent of the hills was dreadfully hot work, my tongue felt in my mouth like a parrot's, the sides of my throat clove together, and I could scarcely articulate when we overtook our caravan. One of the most delightful walks, however, I ever took! What a blessing water is! None can appreciate it, who has not thirsted in the desert. It is bad policy to drink during the march, if one can possibly avoid it. (8)

All the mountains of Wady Boodra are more

or less volcanic-looking; some of them resemble the heaps of cinders thrown out from an iron foundry—utter silence and lifelessness. At half-past two, we passed, on the left, the entrance of Wady Magara, one of the mining-stations of the Pharaohs, whose hieroglyphics are to be seen sculptured on the rocks,—and, nearly opposite, on the right, a Bedouin burial-ground; soon afterwards, the valley opening, we had a beautiful view of the distant Gebel Serbal, standing nobly alone, a King among the hills.

We now entered Wady Mokatteb, a spacious valley, bounded on the east by a most picturesque range of black mountains, but chiefly famous for the inscriptions, from which it derives its name of the Written Wady, cut probably by the early pilgrims on the rocks that line the valley,—inscriptions too—and here is the mystery—in a character which no one has yet deciphered; there are thousands of them. William copied a few, and afterwards sketched the valley, with our tents, camels, &c., for we encamped here for the night, after nine hours' ride.

Our next day's journey (starting at half-past

six, and quitting Wady Mokatteb at half-past eight) was through the noble Wady Feiran: P and F being cognate letters, always interchangeable, there can be no doubt, I think, that Feiran is the ancient Paran; the wilderness, however, so called, like those of Shur and Etham, extended far and wide beyond the spot to which the ancient name has since been limited.—

It was noon—past. For some hours we had been anxiously looking out for the palm trees and gardens which were said to render Wady Feiran the prettiest spot in the peninsula, but nothing had hitherto appeared, except the usual shrubs and plants of the Arabian desert, and an occasional elluf tree. Notwithstanding our guides' repeated promises of *nackel*, (date trees,) I began to doubt whether we should ever come to them, when suddenly, at half-past one, turning an angle of the valley, we found ourselves in a paradise; date trees (like the fair ones they always remind one of, so much more graceful by cultivation) rustling in the breeze, *sidr* and *tarfa* trees, gardeners' huts, and dogs barking; I could not have conceived such a transition. We dismounted, climbed over

a garden wall, let down our zumzummiya into a well under a palm tree, and drank copiously of the delicious water, re-mounted, and in ten minutes, turning another angle of the valley, were in the desert as before, with the torrent-ploughed peaks of Gebel Serbal directly in front of us. The change suggested a thousand comparisons; it seemed as if we had been dreaming.

We now came to the ruins—overgrown with tarfa trees, and crowning a lofty rock in the middle of the valley—of the ancient town of Feiran the seat of a bishopric in the early days of Christianity—the Phara of Ptolomy the Geographer, in whose time it gave its name to the Sinaite promontory, and to its inhabitants the Pharanitæ—and, as one learned traveller has remarked, not improbably the El Paran in the wilderness, to which Chedarlaomer and his associate kings chased the Horites of Mount Seir.—It has now nothing of magnificence to boast of. On both sides of the vale beyond it are seen deserted houses, some perched at a great height,—and ancient tombs cut in the rocks.—The gardens of Wady Feiran I fancied were past, but the sight of a few date trees, and a stream

of water crossing the road, as we wound round the ruined crowned rock, showed I was mistaken ; indeed, it was now only that we had fairly come to them. The large river, that once flowed through the valley, indignantly sank into the ground and disappeared, when a Frank presumed to write a description of it, but one of the loveliest little brooks I ever saw supplies its place, overrunning the rocky path, the bed of the summer torrents, in tiny crystal rivulets ; I drank repeatedly as I walked along, wherever the pebbles at the bottom gleamed clearest—just deep enough to use one's hand as a cup ; the camels were constantly stopping to drink and browse on the tarfa trees. The stream became at last so copious that I was obliged to mount my dromedary, to avoid being wet-footed.

For two hours and a half, every winding of the valley revealed new loveliness ; it would be beautiful even without a single tree. At the first turning, after passing the ruined town, a most superb view of Gebel Serbal opened on us,—every crag and pinnacle of his five peaks relieved clearly against a sky of the most delicious blue,

and perfectly cloudless,—the pale moon about half full, sailing in the pure ether above us—the eye could pierce far beyond her. Gebel Serbal was of a bluish gray, but the jagged rocks of the valley, forming the foreground of the picture, were black, the bright lights and deep broad shadows rendering them perfectly beautiful.—I sat on my dromedary under a tarfa tree, enjoying the shade and a delightful breeze, and talking with the Bedouins, while William sketched this lovely scene.

And was not that Mount Paran !

“ God came from Teman,
And the Holy One from Mount Paran.
His glory covered the heavens,
And the earth was full of his praise.
His brightness was as the light,
Rays streamed from his hand,
And there was the hiding-place of his power.
Before him went the pestilence,
And flashes of fire went forth after him.
He stood—and measured the earth,
He beheld—and drave asunder the nations,
And the everlasting mountains were scattered,
The perpetual hills did bow,—
The eternal paths were trodden by him.
Thou sawest the tents of Cushan in affliction,
The curtains of the land of Midian trembled !

Was the Lord displeased against the floods?
Was thine anger against the rivers?
Was thy wrath against the sea,
That thou didst ride upon thine horses,
And thy chariots of salvation?
Thy bow was made bare,
According to the oath unto the tribes, even the promise.

Thou didst cleave the streams of the land,
The mountains saw thee and trembled,
The overflowing of waters passed away;
The deep uttered his voice,
And lifted up his hands on high.
—The sun and moon stood still in their habitation;
In their light thine arrows went abroad—
In their brightness the lightning of thy spear!

Thou didst march through the land in indignation,
Thou didst thresh the heathen in anger:
Thou wentest forth for the deliverance of thy people,
Even for the deliverance of thine anointed ones."

Following the windings of the valley, alternately through sun and shade, under lofty rocks and umbrageous date trees, whispering in the breeze, and shedding the most delicious coolness, we heard from time to time the chirping of birds,

the barking of dogs, and the merry voices of children—generally unseen, though occasionally we caught a passing glimpse of them and of their dusky mothers and sisters under the thick foliage embowering their huts and tents. We exchanged cordial *salamats* and *bissalams* with some of the natives that we met on the road, particularly with one aged white-bearded patriarch. Our guides, too, were constantly meeting their acquaintance, receiving their welcome and striking wrists with them: their greetings struck me as remarkably low-voiced, though cordial as between brothers. (9)

The blending of greens in these gardens is exquisitely beautiful,—a regular gradation from the pale transparent foliage of the *tarfa* to the darker hue of the date towering over it, and the still deeper green of the *sidr* or *nebbek*, as dark as that of the orange and citron. Our Bedouins brought down the fruit with stones, and gave them to us as we rode along; it was delicious. In twenty days the *sidr* harvest will be quite ready; they sell the greater part of it at Suez,—part they

keep and dry in the sun, press and reduce it to flour, which, with water or milk, they make into small cakes.

In the proper season, the Zoalia Arabs, the owners of these gardens, who entrust the cultivation to the Tebenna, a branch of the Gebali tribe, (who receive three out of every ten dates for their trouble,) hold a sort of harvest-home in the valley,—and a merry scene it is then, by all accounts. These Gebali are the descendants of a Christian colony, transported by Justinian from the shores of the Black Sea, to act as servants to his monastic establishment at Mount Sinai. They have long since become Moslems and Bedouins, though the pure tribes never intermarry with them, and, as their daughters are the prettiest girls in the peninsula, many a sad tale of the course of true love thwarted is current in the glens.

About four o'clock we lost sight of the last palm, and, after riding awhile through a wood of tarfa trees, they too ceased—adieu for ever to the gardens of Wady Feiran! I shall never probably see them again, but often, often will they gleam in loveliness on my waking and sleeping visions. We

encamped at a quarter to five, about ten minutes beyond El Boueb, "the Mouth," a remarkable defile in the valley, not more than eight paces broad in the narrowest part, and beyond which the valley takes the name of Wady Sheikh.

The Waled Said encamp for the present about half way between this spot and Mount Sinai. Notwithstanding that the day after the morrow was the second Bairam, a great feast among the Mahometans, Hussein most hospitably invited us to visit his tribe in the hills and share his tent the following evening, and proceed the third day to the convent. We were anxious to press on, and therefore declined his invitation; but, on reflecting that our visit, so kindly urged, would have excluded him, and all our other Bedouins, from participating in the festivity of their tribe, we could not but feel equally delighted at having received such an invitation, and at having declined it.

Thursday morning, the 16th of March, we started at half past five, commencing a continual ascent towards the elevated district of Sinai; the rising sun was just lighting up the peaks of the mountains—it was very cold at first till he had

fairly risen—the birds were singing their matins merrily; again and again did I look back on the valley, closed directly behind us by the noble peaks of Gebel Serbal, at this early hour of a reddish brown, with deep blue shadows; there are five peaks, or perhaps six; at least from this point there appeared to be so many—each composed of several pinnacles; the mountain is prolonged westwards, displaying another peak of lower elevation, but very beautiful. William sketched it from this point, the best, I think, that could be chosen—he is verily an admirable draughtsman.

Soon afterwards, leaving to the left the usual circuitous route to Mount Sinai by Wady Sheikh, we turned up Wady Selaff, a long valley, broader but far less picturesque than Wady Feiran, yet affording rich pasturage for sheep and goats, which were feeding there in considerable flocks, tended by Bedouin shepherdesses. The *rattam*, a species of broom, bearing a white flower, delicately streaked with purple, afforded me frequent shelter from the sun, walking on in advance of the caravan; and two other shrubs, the *selleh*—thorny, with leaves of the lightest tint of green, bearing a

very pretty flower of a light pink colour, beautifully streaked inside, — and the *ooraga*, deep green, with hairy pods, ending each in a thorn, instead of leaves, and bearing a small pink flower, five petals with yellow stamina—delighted me with their simple beauty. Hundreds of little lizards—the colour of the sand, and called by the Bedouins *serabani*, were darting about, and altogether I hardly felt myself in the desert.

We reached the foot of Gebel How about half past eleven. I mounted my dromedary there, having walked ever since starting, but soon got down again, for it was as much, we found, as the animals could do, to cross the mountain. Two of them, indeed, knocked up, and were left behind; the Arabs took them back that evening, returning to the camp of their tribe. This route through the Wady How—one of the wildest and most extraordinary defiles I ever saw, leads in a direct line to Mount Sinai. The path, rudely paved in the steepest part, winds amongst fallen rocks, many of them of enormous size, and some bearing inscriptions in the same unknown character as those in the Wady Mokatteb. One rock, worn deep by

the torrents of ages before it thundered down from the heights, singularly resembled a human skull. All the fallen rocks in these valleys—eaten into by the winds and torrents, have a ghastly look. A few shrubby date trees and occasional patches of coarse grass refreshed the eye from time to time, and two or three sparkling mountain streams the parched throat—one of them I discovered myself. The groups of camels slowly defiling along, at different heights of the ravine, and sometimes in different directions, were highly picturesque.

We reached the summit about two: the Mountain of Sinai, its northern prolongation rather, called Gebel Shereyk, stood nobly out, as we descended the broad plain El Raha, that slopes to its foot, the scene of the encampment of the Israelites. On the left, after about an hour and a half's gradual descent, we passed the opening of Wady Sheikh, which, had we not crossed Gebel How, we should have had to go round by, and to retrace going to Akaba,—and soon afterwards, on the right, a stone on which, according to the monks, Moses broke the tables of the Law, on coming down from the Mount, and seeing the

calf-worship. Hussein called it simply *Hadj Mousa*, “the stone of Moses.” Hassan, another of our Bedouins, who had been praying as he walked, saluted it with his hands.

In a few minutes more, advancing up a narrow ravine at the extremity of the plain, and passing the garden with its lofty cypresses, we arrived under the walls of the Convent of St. Catherine, a regular monastic fortress—it has exactly the appearance of one, and is, indeed, defended by guns against the Arabs. A window, under a projecting shed, was presently opened, and a rope (Sir Frederick Henniker calls it a halter) dropped, by which, first our luggage and letter of introduction from the Greek Convent at Cairo, and then ourselves, were hoisted up by a windlass; there *was* a door, but it has been walled up, for, whenever it was opened, which only took place on the arrival of the Archbishop, the Bedouins had the right of entrance. For this reason the Archbishops always reside now at Cairo.

The monks are obliged to supply the Bedouins with bread *à discretion*, and an ample provision in that kind was lowered to them after our ascent.

No Arabs are ever allowed to enter, except the servants of the convent. ⁽¹⁰⁾ The maxim "*quis custodiat ipsos custodes*," is literally acted upon here; our conference with Hussein, the Sheikh or chief protector of the convent, about conveyance to Akaba, was carried on through a hole in the wall; we squatted on one side, and he stood at the other; it was like talking through a key-hole.

We were received by the Superior and some of the monks on the landing-place, but could not answer their greeting, nor make ourselves understood, till Missirie came up, not one of them, apparently, speaking any language that we were acquainted with. Modern Greek and Arabic seem to be the only tongues in use here. The Superior, a fine old man, with a mild benevolent countenance, a long beard and immense mustachoes, (sadly in need of Princess Parizade's scissors,) showed us to our apartment, carpeted and divanned in the eastern style, and adorned by a print of the Virgin and Child, with a lamp burning before it; we sat down with him, and he welcomed us kindly to Mount Sinai. He is a Greek from Candia; I

had the pleasure of informing him a day or two afterwards, when he told me of his birth-place, that an ancestor of mine, Sir Alexander de Lindsay of Glenesk, a brave and adventurous knight, died there on his pilgrimage to the Holy Sepulchre, in 1382. Dried fruit and rakie, a strong brandy made from dates, were presented to us while dinner was in preparation — *maigre*, it being Lent.

Father Dimitri ciceroned us over the convent two or three days afterwards. It resembles a little fortified town, irregularly built on the steep side of the mountain, and surrounded by lofty walls; the passages and courts are kept very neat and clean; balconies with wooden balustrades run round each area, on which the doors of the several apartments open; texts of Scripture are inscribed on the walls in every direction—in inextricably contracted Greek.

The principal church, built by the Emperor Justinian, the founder of the convent, is really beautiful; the richly ornamented roof is supported by rows of granite pillars barbarously white-washed;—the pavement is of marble;—the walls

are covered with portraits of saints, the Virgin and Child, and scenes from the Bible, in the old Greek style of the middle ages ; most of them are modern, but some very ancient and very interesting for the history of the art ; they are almost all in good preservation. The dome of the choir displays in Mosaic work, said to be contemporary with Justinian, the transfiguration of Our Saviour. The chapels are also full of paintings, some of them Russian, but in the same style. The nave is lighted by a superb silver chandelier, presented by Elizabeth of Russia, and I saw several candelabra of great beauty. The reading desks, &c., are of tortoise-shell and mother-of-pearl inlaid. In the choir is preserved the coffin in which Saint Catherine's bones are said to repose, and the silver lid of a sarcophagus, embossed with the portrait of Anne of Russia, who intended being buried here. ⁽¹¹⁾

We put off our shoes from off our feet, before approaching the most revered spot on Mount Sinai, or rather Horeb, (as they call this part of the mountain,) —where our Lord is said to have appeared to Moses in the burning bush. This little chapel is gorge-

ously ornamented ; a New Testament in modern Greek, with superbly embossed covers, lies on the altar,—behind it, they show—not exactly the burning bush, but a shrub which they say has flourished there ever since, its lineal descendant. The kind, hospitable monks are not to blame—they believe as the tale has been handed down to them ; but on what authority, we must again and again ask, are these spots pointed out as the scenes mentioned in the Bible?

The monks are summoned to their different services by striking with a mallet on a piece of wood suspended in one of the upper galleries. Two small bells of Russian manufacture, and very sweet tone, hang there also.

Close to the church rises the minaret of a mosque ! built, for the nonce, three centuries ago, when the convent was threatened by the Paynim Soldan of Egypt ; he spared the convent for its sake. It is plain and unornamented—the contrast of a Scotch kirk to an Italian cathedral—and is seldom used unless some Turkish pilgrim of rank visit Mount Sinai. The refectory is a spacious apartment, a world too wide for the

shrunk body corporate of Saint Catherine's votaries. There are only twenty-two monks now. ⁽¹²⁾ One of them reads to his companions, while they dine; I saw a large folio "Synagogue," as it is called, of passages from the Fathers, printed at Venice, lying on the desk, and several other religious volumes in a small book-case.

In the archbishop's apartment, now used as the Treasury, we were shown a most beautiful manuscript of the Gospels in Greek, on vellum, in uncial, or capital, letters of gold; I thought the good father would never have done turning over the preliminary leaves of illuminations, and arranging the silk screens interposed between them. Would that it were in the British Museum! I wonder whether it has ever been collated.

I was disappointed in the library of the convent, finding no very ancient Greek manuscripts, or valuable printed books; a manuscript of Saint Chrysostom, in a great number of folio volumes, all apparently in the same handwriting, interested me most. There are many MSS. of the Scriptures in Greek, and some in Slavonic of portions of the Bible; many Arabic manuscripts

also, all of which were examined by Burckhardt. The books are arranged alphabetically in large cases.

Wednesday, March 22.

Enough of the convent; now for the environs. Yesterday I ascended Gebel Mousa, commonly called Mount Sinai, and the day before, Gebel Katerin, a much loftier peak of the same mountain; neither of them agrees with the Sinai described in the Bible.

With two exceptions, all the old travellers that I am acquainted with, from Frameynsperg in 1346 to Belon in 1548, call Gebel Mousa — Horeb, and Gebel Katerin — *Sinai*. Since the middle of the sixteenth century that hallowed name has reverted to Gebel Mousa — reverted, I say, because, from Justinian's time till the beginning of the fourteenth century, the tradition identifying it with Sinai appears to be uninterrupted. In very early times, Gebel Serbal seems to have been the chief place of pilgrimage, under the belief of its being the Mount of God. Such uncertainty hath tradition! ⁽¹³⁾

Both days were clear and beautiful. Starting on Monday morning, at 20 m. to 10—descending the valley of the convent northwards into the great plain El Raha, and then turning to the left, and winding round Gebel Shereyk—the prolongation of Gebel Mousa that, as I mentioned above, juts into it—I found myself ascending the El Ledja, a deep ravine, running southwards, nearly parallel with the valley of the convent, and separating Gebel Mousa from Gebel Katerin; it is filled with fallen rocks, one of which, a large block of granite, to the left of the path, is pointed out as the stone from which Moses struck water; there are above a dozen holes like mouths, from which the stream is said to have issued; it did not appear to me that they were the work of art, chiselled, as some travellers have described them, but certainly this El Ledja, abounding, as it does, in springs of water, cannot be the Vale of Rephidim. (14)

I reached the rock at a quarter to eleven, and, shortly afterwards, climbing over a low wall, entered the gardens of the Convent El Erbayn, or of the Forty Martyrs; I should have

mentioned that, to the right, at the entrance of the El Ledja, I passed another convent and garden called El Bostan, and, before reaching the stone of Moses, a beautiful orchard, with seventeen cypresses towering, like obelisks, over apricot and other fruit-trees in full blossom. Nothing can be more refreshing to the eye than these little paradises in the wild.

I entered the Convent El Erbayn, — a rude building, quite deserted. Pilgrims, for two centuries and more, have scrawled their names there; the earliest I saw was, if I recollect right, of 1598, the latest that of Professor von Schubert, a German savant, who had been here, with a large party, on his road to Petra, this very month. I looked into the church; a picture of the Virgin glittered through the gloom, — I saw nothing else. The garden, or rather orchard, attached to this convent, is delightful. Olives seem to thrive there; it was pleasant walking under their shade, enjoying at the same time the full grandeur of the scenery, clearly discernible through the transparent foliage. The pomegranate trees were quite bare. The white blossoms of

the apple and damascene trees presented a lovely contrast to the funereal gloom of three superb cypresses that stand in advance of the convent.⁽¹⁵⁾ Under its walls grow two magnificent orange trees; would that a wish could transport them to your greenhouse!

Leaving the convent about 5 m. to 11, and turning westwards, I began the ascent of Gebel Katerin by a steep ravine, between Gebel Djeraigni on the left, and Gebel Lehummar on the right, for every crag of the mountains has its peculiar name among the Arabs. About ten paces from the garden wall lies a large stone, inscribed with the same unknown characters of which we saw such numerous specimens in Wady Mokatteb. I observed others here and there as I ascended. At 10 m. to 12, turning out of the path and climbing over the rocks, I reached a platform overshadowed by Gebel Djeraigni, which is scooped out, as it were, above it, like Mac Duff's Cave at Earlsferry. At the very foot of the rock rises a small spring of the coldest water, called Beer El Shonnar, "the well of the par-

tridge;" we drank of it, filled our zumzummiya, and then recommenced the ascent.

Nothing can surpass the rude and gloomy grandeur of these valleys; utter silence reigned on all sides, though, now and then, the report of a gun from the neighbourhood of Mount Sinai murmured around us like distant thunder. Odoriferous shrubs grow in great abundance among the loose stones, as high as the peak of St. Catherine's,—which is easier to climb than to descend, the solid granite being split into thousands of diminutive pinnacles and ledges, smooth and slippery, and in some places so nearly perpendicular that a false step would be broken bones, if not worse.

I reached the summit—stood, indeed, above it—on the roof of the chapel (hut, rather) built on the spot whither St. Catherine's remains are said to have been carried by angels, at 5 m. past 1, exactly two hours after leaving El Erbayn; and well—well was I repaid for my toil! The gulfs of Suez and Akaba, with the mountains of Africa and Arabia Deserta bounding the horizon behind them—the white and double chain of the

Rua and El Tih mountains running across the peninsula, like an isthmus separating the desert beyond them from the sea of mountains at my feet—(this is Sir Frederick Henniker's simile, and none could give a juster idea of their extraordinary appearance; "it seems," he says, "as if Arabia Petræa had once been an ocean of lava, and that, while its waves were running literally mountains high, it was commanded suddenly to stand still"—

"And who commanded—and the silence came—

Here let the billows stiffen and have rest!")

—such are the principal features of this superb panorama; condescending to particulars, I recognised Gebel Mousa or Sinai considerably below me,—Gebel Shomar to the south, higher than St. Catherine's,—to the S. W. the plain of El Kaa, intervening between the Sinaite mountains and the low range called Gebel Hemam, bordering on the Red Sea—(Tor is not visible)—and to the N. W. Gebel Serbal, far less picturesque from this elevation than from the Wady Feiran. The direction of the principal valleys was clearly discernible from this great height. On an immense scale, the

view strongly reminded me of General Pfyffer's models of Switzerland. The Gulf of Akaba—if I am right in believing I saw it—was of the deepest blue; a very few clouds, but high above the horizon, a bright sunny sky, and breezes fresh and exhilarating as spring, rendered this excursion one of the most delightful I ever took.

The ascent of Mount Sinai is as fatiguing almost as that of St. Catherine's. Starting from the convent, the walk commences by the ascent of what is now called Mount Horeb, the general name in scripture for the district in which Sinai stood, but here considered as the breast from which the peak of Sinai rises. Rude steps have been laid by the monks, very wearisome to climb; the only relief is where they have been broken, or where a sheet of granite occurs. Two arched gateways, with a steep ascent between them, lead to a small plain surrounded by rocks, the scene, according to Mahometan tradition, of Moses' interview with the Almighty: a noble cypress tree towers in the centre, with a well of excellent water at its foot. A rude building, called the Convent of St. Elias, or Elijah, commemorates his visit to

Horeb. ⁽¹⁶⁾ From this plain begins the still more fatiguing ascent of Sinai. On the summit stand a chapel and a mosque. I climbed to the top of the former, the more elevated of the two, and from thence enjoyed a superb prospect, similar to that from Mount Catherine, but inferior to it, the Gulf of Akaba being totally concealed. ⁽¹⁷⁾ The echo of a pistol there is most extraordinary; mountain after mountain takes up the tale, answering each other across the deep valleys. I descended the other side of the mountain direct to El Erbayn, by a precipitous ravine, nearly opposite that by which I had ascended Mount St. Catherine; and, after resting in the garden, while my cicerone and two or three Arab hangers-on took some refreshment, (a delightfully fresh breeze driving the white blossoms before it like snow-flakes,) returned to the convent. The temperature of these valleys is most delicious.

I have said that neither Gebel Mousa nor Gebel Katerin answer the scriptural description of Mount Sinai; William pointed out to me a hill this morning—Gebel Minnegia, or Limnegia the Arabs called it—which he had a strong impression

was the real mountain ; and, on careful examination, I think he is right. Your kind attention, if you please :—

There can be no doubt, I think, that the Israelites encamped on the plain El Raha ; it is the largest, indeed the only large plain in all this district,—a noble expanse, covered with shrubs fit for pasturage, and a gentle slope.

The mountain in question rises directly in front of you, as you descend El Raha, closing the vista formed by the valley on the slope of which the Convent of St. Catherine stands.

The Israelites, encamping in El Raha, would camp directly in front of Gebel Minnegia, as we are told they did before Mount Sinai.

There is not space enough in the narrow precipitous ravines from which alone the peaks of Gebel Mousa and St. Catherine are visible, or in any other plain or valley in the whole district, for the people to have encamped with such regularity and comfort as it is evident they did, (Exod. c. 32,) nor for their having removed and stood afar off, as they had apparently ample space to do, when trembling at the thunderings and lightnings,—nor,

after the golden-calf idolatry, for the tabernacle to have been pitched without the camp, afar off from the camp,—when all the people rose and stood, every man at his tent-door, and looked after Moses, till he was gone into the tabernacle.

Moses went up to the “*top* of the mount”—and God came down upon Mount Sinai “on the top of the mount,” and the glory of the Lord was “like devouring fire on the *top* of the mount,” “in the eyes of the children of Israel,” “in the sight of *all* the people.” Neither Gebel Mousa nor Gebel Katerin are visible from the plain, but the Israelites could have seen the *top* of the mountain, and the cloud, and Moses’ entrance into it, from every part of the plain, supposing that William’s conjecture be correct, and Gebel Minnegia be really Sinai. I climbed up it this afternoon—the highest point is a sheet of dark sun-burnt granite, and from thence I looked over the convent, directly up the El Raha: the mountain stands single, isolated by deep ravines, on three sides very precipitous.

It would appear, moreover, from the account of Moses, that he went and returned, communicating

between the people and their God, without much difficulty of ascent; a hale old man, as he was till his death, could easily ascend and descend this mountain twice or thrice in a day—certainly not either Gebel Mousa or Gebel Katerin.

There is nothing in the Bible to lead us to suppose Mount Sinai a very lofty mountain; ⁽¹⁸⁾ yet that it was some distance from the camp, though visible from it, we may gather from the account of Moses' return with the two tables; "Moses turned and went down from the mount, and as soon as he drew nigh unto the camp, he saw the calf and the dancing," &c.

The directions to Moses, before the audible utterance of the commandments, were, that bounds should be set unto the people round about, "that they go not up to the mountain, or touch the border of it," on pain of death. And, on the third day, Moses brought the people *out of the camp* to meet with God—(probably leading some of them up the valley of the convent, and sending others by a more circuitous road to the other side of the mountain,)—and they stood at the nether part of the mount, &c.—and when the people heard the

voice out of the midst of the darkness, &c., they removed, and stood afar off, retreating, I take it, to the plain, from which they could see just as well ; indeed, the divine command was, “ Get ye into your tents again.”

Yet what, after all, avails the inquiry, if we think merely of the stage, and not of the action performed on it ? This is the wilderness of Sinai—there can be no doubt of that ; and, whichever the individual mount was, every hill around heard the thunder and quaked at the sound of the trumpet, waxing louder and louder as God descended in the cloud,—and trembled at the “ still small voice,” that, deeper than the thunder, and high above the trumpet, spoke to every man’s ear and heart that fiery law—holy, and just, and good—existing from all eternity, which requires of man that spotless obedience which he cannot yield, and at the first transgression, even in thought, of its purity, lays him under the curse of eternal death—“ Thou shalt love the Lord thy God with all thy heart, and thy neighbour as thyself.”

One only of Adam’s seed, the man Christ Jesus, has fulfilled that law ; we must travel to Jerusa-

lem—we must look to the cross on Calvary, to know how His righteousness may become ours.

Well, dear A——! time is flying—'tis eleven at night; Hussein arrived this evening with the camels, and the sheikhs of the eastern tribes of the Peninsula to whom they belong; the bargain is struck, and we start betimes to-morrow morning. Adieu!

Your's, my dear A——! I have now a right to subscribe myself

HADJI LINDSAY.

NOTES.

NOTE 1, PAGE 14.—Missirie.

I feel great pleasure in bearing testimony to the merits of this excellent man. During the whole time he travelled with us as courier, we never once had occasion to find fault with him, except for exerting himself too much. He kept our boatmen, muleteers, native servants, &c., in perfect order; we had not the slightest trouble with them. With other gentlemen he has travelled over most parts of Europe, in North America, and Mexico. He speaks Greek, (his native tongue,) Turkish, Russian, Walachian, Arabic, English, (which he has taught himself to read and write,) French, Italian, Spanish, and, I believe, can make himself understood in some other languages.

Of his personal character, intelligence, activity, energy, and those more important points,—honesty, sobriety, and christian principle,—it would be impossible for me to speak too highly.

I cannot refrain from mentioning (what would never have come to my knowledge directly) his having ransomed from Turkish slavery, and sent home to their native country, (Argos,) a mother and a daughter. Nor is this the only instance, as I have reason to know, of his having stood the friend of the fatherless, and caused the widow's heart to sing with joy.

NOTE 2, PAGE 22.—Cleopatra's Needle.

Its companion lies beside it, almost covered by the sand. Both appear to have been standing when Abd'allatif wrote his account of Egypt, A. D. 1203.

NOTE 3, PAGE 22.—Pompey's Pillar.

“Nulla sane columnarum huic similis!”

EDRISI.

This noble column appears to have stood in the court of a large

quadrangular edifice, popularly called the School of Aristotle, and supposed to have been built by Solomon, till the reign of Saladin, when the governor of Alexandria destroyed it.—*Abd'allatif*.

Edrisi, about the middle of the twelfth century, describes this building as supported by sixteen columns at each extremity, and by sixty-seven at either side; and Benjamin of Tudela, the last writer who speaks of it as an eyewitness, (A. D. 1160,) says it contained twenty colleges, divided from each other by marble columns, "whither men flocked from all parts of the world to learn the philosophy of Aristotle."

Abd'allatif saw the remains of the columns on the shore,* whither they had been carried by the governor, and traces of them all round the pillar, within thirty years after their destruction.†

The central pillar was cut in the quarries of the Said, or Upper Egypt. "Il en existoit originairement," says an Arab writer of the twelfth century, cited by Langlès,) "sept, de la même dimension, qui servoient d'ornement à un palais immense nommé *Maison de la Sagesse*, qui n'avoit pas son pareil sur la terre."—"Sept géants de la famille de Aad apportèrent chacun un de ces colonnes sous leurs bras, depuis le Mont Bérin au midi d'Eçouan jusqu'à Alexandrie."—*Notes to Norden's Travels*, vol. iii. p. 181.

Pompey's pillar has at different times been represented as a monument erected by himself to his own glory, (*Breydenbach*), and a memorial of Cæsar's triumph on his rival's defeat. (*Belon*, *Sandys*.) In 1507, when that "pious, honourable, and magnanimous knight," Martin à Baumgarten, visited Egypt, it was popularly supposed that Pompey's head was buried under it.

"Elle étoit surmontée, je crois, d'une statue colossale d'airain, placée sur un énorme stylobate, et qu'on nommoit *chérakhyl*; elle regardoit la mer, et avoit le doigt dirigé vers Constantinople. Un receveur général des impositions d'Egypte, Açameh ben-Zeid, demanda au khalife El-Oualyd ben-Abdoul-melik ben-Merouan,

* "Je découvris au pied des murailles, sur le bord de la mer, plusieurs blocs de porphyre, qu'il seroit fort facile d'enlever pour en faire d'excellens ouvrages. Il y en a qui pesent assurément deux ou trois milliers; j'en enlevai un de 150 livres, que j'ai envoyé en France, et on peut juger par cet échantillon de la beauté du porphyre, et de l'usage qu'on en pourroit faire."—*Troisième Voyage de Paul Lucas*, (1714,) tom. ii. p. 29.

† See *Edrisi*, *Geogr. Nubiensis*, p. 214.—*Ben. Tud. Itin.* p. 214, ed. Elzev. 32mo.—*Abd'allatif*, *Relation de l'Egypte*, and a very interesting note of M. de Sacy, p. 182, and pp. 230 sqq.—or in Pinkerton's Collection, vol. xv. p. 828.

la permission de faire fondre cette statue pour en frapper une grande quantité de *fels*, petites pièces de billon.”—*Langlès*.

This sacrilege must have been perpetrated between A. D. 714 and 717—the duration of El Walid’s reign.

Every one has heard of persons ascending Pompey’s pillar by means of a rope-ladder and a kite, but perhaps the most extraordinary achievement of the sort was that of a famous ropedancer, who climbed up by a knotted rope with a donkey on his shoulders, left it there to pass the night, and brought it down again the next morning.—*D’Arvieux, Memoires*, vol. i. p. 191.

Some beautiful porphyry columns were standing at a little distance from the pillar in 1658, when D’Arvieux visited Alexandria—perhaps the same as the “six pillars of marble, twenty spans about, and three fathoms high without the ground,” mentioned in Grimstone’s ‘*Estates, Empires, and Principalities of the World*,’—London, fol., 1615*—a work, the title-page of which, engraved by Elstracke, is even more beautiful than that of Purchas’s *Pilgrims*.

NOTE 4, PAGE 23.—Remains of Alexandria.

“Je vis aussi, en passant dans le milieu de la ville, un rang de colonnes de marbre granite, d’une hauteur et d’une grosseur extraordinaires, dont il y en a encore une qui conserve son chapiteau ; ces colonnes, qui sont sur une même ligne, s’étendent près de 500 pas, et ne sont pas aujourd’hui dans une égale distance l’une de l’autre, parce que la plus grande partie en a été enlevée ou abbatue, et l’on en voit encore beaucoup de renversées. Entre celles qui subsistent, il y en a qui ne sont éloignées que de dix ou douze pieds, ce qui fait juger qu’il y en avoit sur chaque rang plus de 150. Encore faut il supposer que la première et la dernière de celles qui se trouvent sur cette ligne étoient effectivement aux deux extrémités de ce rang ; ce qui n’est pas vraisemblable, puisque vis-a-vis de ces colonnes on en voit à deux cents pas delà d’autres semblables qui leur sont opposées ; et quoiqu’il n’en reste aujourd’hui que trois ou quatre, il est visible, par la disposition des lieux, par le même ordre, la même grosseur, qu’elles ne faisoient qu’un même tout avec celles dont je viens de parler. Il paroît aussi par d’autres colonnes, qui sont à une égale distance de ces deux rangs, qu’il y avoit autrefois en cet endroit une superbe fontaine ;

* Translated from the French of P. d’Avily.

l'édifice de brique, et les bassins où l'eau tomboit, se voient aujourd'hui manifestement. Ainsi on peut conclure qu'il y avoit là une place superbe, dont la figure composoit un quarré long, large de 200 pas, et long de 500. Les principaux Palais de la ville faisoient sans doute les quatre faces de cette belle place, puisque derrière ces colonnes, du côté où il en reste un plus grand nombre, on voit quantité de murs de brique, les uns renversés, les autres encore entiers, qui laissent juger de la grandeur et de la beauté des edifices qui étoient en cet endroit. On distingue même, parmi les mesures, des bains presque entiers, et j'en ai vu un dont les murs étoient faits d'un ciment si dur, qu'il ressembloit à du marbre. Les Turcs en détachent tous les jours quelques morceaux pour faire servir à leurs bâtimens. Mais comme ces ruines sont presque entièrement couvertes de sable, ils n'enlèvent que ce qui paroît en dehors; et s'ils vouloient se donner la peine de creuser jusques aux fondemens, ils decouvriroient bien des choses curieuses."—*Troisième Voyage de Paul Lucas*, vol. ii. p. 31, sqq.

"Proh dolor! illustrem, maximam, habitatoribus refertissimam, pulcherrimam, opulentissimamque quondam Ptolemaeorum sedem, Alexandriam, collapsam, dirutam, majori ex parte desertam, miserando spectaculo, deploravi. Heu infelicem! quæ et quanta mœnia, quales et quàm amplae ejus urbis stratae viae, quàm conspicuae domorum frontes ad cœlum tendentes, qui portarum fornice! Sed in cinerem versa domorum interna omnia prætereuntes conspiciēbamus." — *Petri Martyris Legatio Babylonica*, (1502,) printed after his *Decades*, fol. 80, verso, ed., 1532.

NOTE 5, PAGE 24.—Racotis.

M. Langlès, however, claims much higher consideration for Racotis:—

"Alexandre ne fit que relever les ruines et changer le nom d'une des plus anciennes et des plus grandes villes de l'Egypte. Cette ville se nommoit Raqouth, ou Raqoudah, suivant les auteurs Arabes, mais plutôt Rakhoty, suivant l'orthographe Qopte; mot dont les Grecs et les Latins ont fait Racotis."—*Notes on Norden*, t. iii. p. 158.

Murtadi, in his curious legendary history of Egypt, says it was built by Masar, grandson of Ham, and his thirty followers, with whom he came to Egypt on the dispersion of nations. His pater-

nal grandfather was the wise priest Philemon, who, being deputed by Pharaan, the last antediluvian king of Egypt, on a religious conference with Noah, was converted by the Patriarch, and admitted into the ark with his daughter, afterwards married to Misraim son of Ham. Philemon, returning to Egypt with his grandson and his thirty followers, reopened the pyramids, taught them the secret writing of the *birbas* or temples, the knowledge of the talismans concealed in them, and how to make new ones, and also the rules how to subject spirits. “Ils bastirent plusieurs villes sur la mer Romaine, et entre autres celle de Racode, au lieu où est maintenant Alexandrie.”—*Merveilles d’Egypte*, p. 119.

Others attribute its foundation to Shedad the son of Aad, illustrious in the annals of the East for the gardens of Irem, which he planted in rivalry of the celestial paradise. A third account states that he merely rebuilt it after its destruction by the Amalekites, or Shepherd Kings.

NOTE 6, PAGE 28.—Daniel’s prophecies.

“These prophecies of Daniel, foretelling the sufferings and persecutions of the Jews, from Alexander’s successors in Syria and Egypt till the end of the reign of Antiochus Epiphanes, during a disastrous period of 160 years, are, if possible, more surprising and astonishing than even his grand prophetic period of 2300 years, and the several successions of empire, or the four temporal kingdoms, that were to precede the spiritual kingdom of God upon earth. The magnificence of the whole scheme, comprising the fortunes of all mankind, seems to be an object suitable to the Omniscient Governor of the universe, calculated to excite awe and admiration; but the minuteness of detail, exhibited in this part, exceeds that of any existing history of those times. The prophecy is really more concise and comprehensive, and yet more circumstantial and complete, than any history. No one historian has related so many circumstances, and in such exact order of time and place, as the prophet; so that it was necessary to have recourse to several authors, Greek and Roman, Jewish and Christian, for the better explaining and illustrating the great variety of particulars contained in this prophecy.—The astonishing exactness with which this minute prophetic detail has been fulfilled, furnishes the strongest pledge, from analogy, that the remaining prophecies were

and will be as exactly fulfilled, each in their proper season.”—*Dr. Hales’ Analysis of Chronology*, vol. ii. p. 556.

NOTE 7, PAGE 34.—Interview with Mohammed Ali.

We entered unannounced—in our plain Frank clothes, and found no one in attendance on the Pasha. It is curious to contrast this unceremonious reception with that of foreigners on the same spot in Mandeville’s time, about 1330.

“And before the Soudan comethe no Strangier, but zif he be clothed in clothe of gold, or of Tartarye, or of Camaka, in the Sarazines’ guise, and as the Sarazines usen. And it behovethe that anon at the firste sight that men see the Soudan, be it in wyndowe, or in what place elles, that men knele to him and kisse the erthe: for that is the manere to do reverence to the Soudanne of hem that speken with him. And whan that messangeres of straunge contrees comen before him, the meynee of the Soudan, whan the straungeres speken to hym, thei ben aboute the Soudan, with swerdes drawen and gysarmes and axes, here armes lift up in highe with the weapenes, for to smyte upon hem, zif thei seye ony woord that is displesance to the Soudan. And also no straungere comethe before him, but that he makethe him sum promys and graunt of that the straungere askethe resonably, be so it be not azenst his lawe. And so don othere princes bezonden. For thei seyn that no man schalle come before no prynce but that he be better, and schalle be more gladdere in departynge from his presence thanne he was at the comynge before him.”—*Voiage and Travaile of Sir John Maundeville, knight*, p. 47, ed. 1727.

For the ceremonies of reception in the time of the Caliphs, see William of Tyre’s graphic account of Hugo de Caesarea’s mission,—book 19 of his *History of the Crusades*.

NOTE 1, PAGE 41.—Streets and houses of Cairo, in 1634.

“Some of those streets I have found two miles in length, some not a quarter so long; every one of them is locked up in the night, with a door at each end, and guarded by a musketeer, whereby fire, robberies, tumults, and other disorders are prevented. Without the city, towards the wilderness, to stop sudden incursions of the Arabs from abroad, there watch on horseback four Sanjiaks, with each of them a thousand horsemen.

“This city is built after the Egyptian manner, high, and of

large rough stone, part of brick, the streets being narrow. It hath not yet been above one hundred years in the Turks' possession, wherefore the old buildings remain ; but, as they decay, the new begin to be after the Turkish manner, poor, low, much of mud and timber ; yet, of the modern fabrics, I must except divers new palaces which I have seen, both of Turks, and such Egyptians as most engage against their own country, and so flourish in its oppression. I have oft gone to view them and their entertainments, sometimes attending the *Illustrissimo*," (Signor Santo Seghezzi, of Venice,) "with whom I lived ; otherwhiles accompanied with some of his gentlemen. The palaces I found large and high, no state or flourish outwardly ; the first court spacious, set with fair trees for shade, where were several beasts and rare birds, and wonderful even in those parts ; the inner court joined to delicious gardens, watered with fountains and rivulets ; beside the infinite variety of strange plants, there wanted no shade from trees of cassia, oranges, lemons, figs of Pharaoh, tamarinds, palms, and others, amongst which pass very frequently chameleons. The entry into the house, and all the rooms throughout, are paved with many several-coloured marbles, put into fine figures ; so likewise the walls, but in mosaic of a less cut ; the roof layed with thwart beams, a foot and a half distant, all carved, great, and double gilt ; the windows with grates of iron, few with glass, as not desiring to keep out the wind, and to avoid the glimmering of the sun, which in those hot countries glass would break with too much dazzling upon the eye ; the floor is made with some elevations a foot high, where they sit to eat and drink ; those are covered with rich tapestry ; the lower pavement is to walk upon, where in the chief dining chamber, according to the capacity of the room, is made one or more richly gilt fountains in the upper end of the chamber, which, through secret pipes, supplies in the middle of the room a dainty pool, either round, four-square, triangular, or of other figure, as the place requires, usually twenty or twenty-four yards about, and almost two in depth, so neatly kept, and the water so clear, as makes apparent the exquisite mosaic at the bottom ; herein are preserved a kind of fish of two or three feet long, like barbels, which have often taken bread out of my hand, sucking it from my fingers at the top of the water.

"But that which to me seemed more magnificent than all this was my entertainment. Entering one of these rooms, I saw at

the upper end, amongst others sitting cross-legged, the Lord of the Palace, who beckoning me to come, I first put off my shoes, as the rest had done, then bowing very often, with my hand on my breast, came near; where he making me sit down, there attended ten or twelve handsome young pages, all clad in scarlet, with crooked daggers and scymetars, richly gilt; four of them came with a sheet of taffety, and covered me; another held a golden incense with rich perfumes, wherewith being a little smoked, they took all away; next came two with sweet water, and besprinkled me; after that, one brought a porcelain dish of coffee, which when I had drank, another served up a glass of excellent sherbet. Then began our discourse.In their questions and replies, I noted the Egyptians to have a touch of the merchant or Jew, with a spirit not so soldier-like and open as the Turks, but more discerning and pertinent.”—*Voyage into the Levant, by Sir Henry Blount, of Tittenhanger, Knight. Harleian Voyages, vol. i. p. 525.*

NOTE 9, PAGE 44.

“Foule-fat-fool-Saint.”

“Another of their Saints went about the Citie continually starke naked, covering neither head, foot, nor any part of his foule fat bodie; yet I have seene divers as hee passed along, at divers times, (yea, women,) kiss his naked armes and hands. On a time, at Bullaco, going over Nilus, he going in a passage-boat, in which I, with others, went over, a Moore in the companie, seeing him come, layed him a piece of an old coat to sit on; but when he felt it under him, he layd it aside, and sate on the bare boords; so hee ever did on the stones, earth, and sands. This man was in Cairo before I came thither, and I know not how long after.

“This great fat lubberly beast would goe through the streets and take off the stalles to eat, bread, little baked meats, and fruits, and roots, and no bodie denied him, but counted themselves happie that he would do so. He would not touch money of any sort, a very kinde of scorched bacon hogg, hee was as fat as he could goe.

“Other of those saints of Cairo goe but half-naked, and some of them are very leane rascalls.”—*Sundrie the personall Voyages performed by John Sanderson, of London, Merchant, begun in October, 1584. Ended in October, 1602.—Purchas's Pilgrims, vol. ii. p. 1616.*

NOTE 10, PAGE 45.

“ Here I may fitly take occasion to teach those that purpose to travel into Turkey how to behave themselves. If they be set upon by thieves, they may defend themselves, if they be strong enough ; but if they be polling officers, they must not be contradicted. But neither in their cities, nor in their travels, may they strike again, though they be abused and beaten by any man, except they be thieves and robbers, for if they do, they shall either be put to death, or have their hand cut off. Neither if a man receive a box on the ear at any of their hands, must he give one bad word, or look frowning upon him that smote him ; for then he will strike him again, and say, ‘ What, Goure ; dost thou curse me ? and wish the devil had me ? ’ But he must kiss his beard, or the skirt of his garment, and smile upon him, and then he will let him pass.”—*Biddulph's Travels of Four Englishmen*, &c. 1600—11. *Harleian Voyages*, vol. i. p. 812.

NOTE 11, PAGE 47.—Isle of Roda.

“ Ce fut sous le vézyrat de Chahan-Chah, surnommé *El Afdhal*, et fils du celebre Bedr el-Djemaly, qu'elle reçut le nom de *Raoudah*, ou Jardin. Ce prince avoit affectionné cette isle, et en avoit même acquis une portion assez considérable, qu'il avoit embellie avec soin, et où il se promenoit fréquemment. Il l'appelloit son jardin ; cette dénomination est restée à l'isle entière : cependant le véritable *Raoudah* ne paroît pas avoir subsisté longtemps après la mort de Chahan-Chah, assassiné en l'an 515, (A. D. 1121-2.) Le khalife el Amar Behhakâm-Allah, que l'on soupçonne avec beaucoup de vraisemblance d'avoir été l'instigateur de ce crime, s'empara de toutes les propriétés du malheureux vézyr, de son trésor qui renfermoit plusieurs millions de pièces d'or, de ses pierreries, de ses chevaux, et de ses armes : la maison de plaisance située dans l'isle en faisoit aussi partie ; et si le khalyfe négligea de l'entretenir, c'étoit pour lui en substituer une infiniment plus vaste et belle, et sur-tout plus analogue au gout de la personne qui devoit l'occuper.

“ Ce prince avoit un penchant particulier pour les Arabes Bedouynes. Ayant appris qu'il y en avoit une, célèbre par sa beauté, dans le Said, il y alla déguisé en Arabe Bedouyn, et après beaucoup de courses et de démarches il parvint à la voir. Sa passion

en devint alors plus violente ; de retour dans son palais, il envoya auprès des parens de la jeune fille un négociateur chargé de la demander en mariage pour le khalyfe. On imagine bien que la proposition ne fut pas rejetée. Arrivée auprès de son auguste époux, environnée de toute la pompe des grandeurs, la jeune Bedouyne n'en sentit pas moins vivement la perte des jouissances, ou plutôt de la liberté à laquelle elle étoit accoutumée, et peut-être aussi l'absence d'un jeune Arabe de ses parens. Par condescendance pour cet amour de la liberté, qui devoit lui paroître fort étrange dans une femme, le khalyfe fit bâtir dans l'île de Roudah, sur le bord du Nil, auprès du *Mokhtar*,* une maison de plaisance d'une étendue et d'une magnificence étonnantes, et que l'on nomma el *Houdedje*.† Peut-être ce nom fut-il imaginé par la jeune Bedouyne, qui, dans ce vaste palais, se trouvoit aussi à l'étroit que dans ces litières où les Arabes enferment leurs femmes pour les transporter sur des chameaux quand ils changent de campement.

“ Le Khalyfe rendoit des visites si assidues à cette belle captive, que les Bathenyens,‡ qui avoient formé le complot de l'assassiner, se mirent en ambuscade, dans un four situé à l'extrémité du pont du côté de l'île ; ils fondirent sur lui au moment où il passoit, et le poignardèrent. Après sa mort le *houdedje* fut abandonné, et vers le milieu du quinzième siècle de l'ère vulgaire on n'en connoissoit plus l'emplacement.

“ Les contes que l'on a faits sur la jeune Bedouyne, sur ebn Mobahh son cousin, et sur le khalyfe El Amar Behhakam Allah sont aussi nombreux que ceux d'El Bathal et des Mille et Une Nuits.”—*Langlès, Notes on Norden's Voyage, &c.*, tom. iii. pp. 207-9.

This story will probably remind some of my readers of the song of Maisuna, the Bedouin bride of Moawia, who, sighing for the

* Al Mokhtar, “ the preferred,”—a magnificent garden, planted in the island, A. D. 937.

† “ Le *houdedje* est une litière dans laquelle les Arabes transportent leurs femmes quand ils changent de campement ; c'est une espèce de caisse, garnie de planches ou de l'étoffe ; elle est quelquefois découverte, ou surmontée d'une impériale, à laquelle pend un rideau, pour cacher les femmes dans la marche. Le *houdedje* est porté par un chameau : ce nom convenoit assez bien à une demeure dans laquelle, malgré toute son étendue, notre jeune Arabe devoit se trouver aussi gênée que dans une litière.”—*Langlès*.

‡ “ Les Bathenyens étoient une secte hérétique de Musulmans, partisans, pour ne pas dire adorateurs, d'Aly. On les nommoit aussi Nossairytes, (Abulfeda.) Les écrivains des croisades les nomment *assassins*.”—*Langlès*.

desert amidst the pomp of Damascus, found her greatest comfort in singing its melancholy strain in private ; Moawia overheard her, and sent her back to Yemen.

“ The russet suit of camel’s hair,
With spirits light and eye serene,
Is dearer to my bosom far
Than all the trappings of a queen.

The humble tent and murmuring breeze
That whistles through its fluttering walls,
My unaspiring fancy please
Better than towers and splendid halls.

The attendant colts, that bounding fly
And frolic by the litter’s side,
Are dearer in Maisuna’s eye
Than gorgeous mules in all their pride.

The watch-dog’s voice, that bays whene’er
A stranger seeks his master’s cot,
Sounds sweeter in Maisuna’s ear
Than yonder trumpet’s loud-drawn note.

The rustic youth, unspoiled by art,
Son of my kindred, poor but free,
Will ever to Maisuna’s heart
Be dearer, pampered fool, than thee ! ”

Carlyle’s Specimens of Arabian Poetry, p. 38.

NOTE 12, PAGE 66.

Yet it would appear to have been open in Abd’allatif’s time :—
“ Cette ouverture mène à des passages étroits, à des conduits qui s’étendent jusqu’à une grande profondeur, à des puits et à des précipices, comme l’assurent les personnes qui ont le courage de s’y enfoncer ; car il y a un grand nombre de gens qu’une folle cupidité et des espérances chimériques conduisent dans l’intérieur de cette édifice. Ils s’enfoncent dans ses cavités les plus profondes, et arrivent enfin à un endroit où il ne leur est plus possible de pousser plus avant. Quant au passage le plus fréquenté,

et que l'on suit d'ordinaire, c'est un glacis qui conduit vers la partie supérieure de la pyramide, où l'on trouve une chambre carrée, et dans cette chambre un sarcophage de pierre."—On a second visit, he plucked up courage to enter the pyramid in company with a large party—but he shall tell his own story :—" Dans un autre visite que je rendis aux pyramides, j'entrai dans ce conduit interieur avec plusieurs personnes, et je pénétrai jusqu'aux deux tiers environ ; mais ayant perdu connaissance par un effet de la frayeur que m'inspiroit cette montée, je redescendis à demi mort."—*Relation, &c.*, p. 175.

" A most dreadful passage, and no less cumbersome, not above a yard in breadth, and four feet in height, each stone containing that measure, so that, always stooping and sometimes creeping by reason of the rubbish, we descended (not by stairs but as down the steep of a hill) 100 feet, where the place for a little circuit enlarged, and the fearful descent continued, which they say none ever durst attempt any further, save that a Bassa of Cairo, curious to search into the secrets thereof, caused divers condemned persons to undertake the performance well stored with lights and other provision, and that some of them ascended again well nigh thirty miles off in the deserts. A fable devised only to beget wonder. But others have written that at the bottom there is a spacious pit, eighty and six cubits deep, filled at the overflow by concealed conduits ; in the midst a little island, and on that a tomb containing the body of Cheops, a king of Egypt, and the builder of this Pyramis, which with the truth hath a greater affinity. For since I have been told by one out of his own experience that, in the uttermost depth, there is a large square place, (though without water,) into which he was led by another entry opening to the south, known but to few, (that now open being shut by some order,) and entered at this place where we feared to descend."—*Sandys*.

" Au fond de ceste descente y a une espace à main gauche, de laquelle se void une autre descente, qui va beaucoup plus bas sous la Pyramide, mais l'entrée en est murée."—*Relation des Voyages de M. de Breves, &c.*, Paris, 4to., 1630—p. 277.*

I transcribe from Murtadi's " Merveilles d'Egypte " the fol-

* De Breves, French Ambassador at the Porte, visited the Pyramids on his return to France in 1605.

lowing specimen of the popular Arab traditions regarding the Pyramids.

“Après que la Pyramide fut ouverte, le monde la vint voir par curiosité pendant quelques années, plusieurs entrant dedans, et les uns en revenant sans incommodité, les autres y perissant. Un jour il se rencontra qu’une troupe de jeunes hommes, au nombre de plus de vingt, jurèrent d’y entrer, pourvu que rien ne les en empeschast, et de pousser tant qu’ils fussent arrivez jusques au bout. Ils prindrent donc avec eux à boire et à manger pour deux mois. Ils prindrent aussi des plaques de fer et des barres, des chandelles de cire et des lanternes, de la mesche et de l’huile, des haches, des serpes, et d’autres tranchans, et entrèrent dans la Pyramide.

“La plupart d’entre eux descendirent de la premiere glissade et de la seconde, et passerent sous la terre de la Pyramide ou ils virent des chauve-souris grandes comme des aigles noires, qui commencerent à leur frapper le visage avec beaucoup de violence. Mais ils souffrirent constamment cette incommodité, et ne cessèrent d’avancer jusques à ce qu’ils parvindrent à un lieu estroit d’ou il sortoit un vent impetueux et froid extraordinairement, sans qu’ils peussent reconnoistre d’où il venoit ny où il alloit. Ils s’avancerent pour entrer dans ce destroit, et alors leurs chandelles commencerent à s’esteindre, ce qui les obligea de les enfermer dans leurs lanternes ; puis ils entrèrent, mais le detroit se trouva presque entièrement joint et clos devant eux. Sur quoy, l’un d’eux dist aux autres, ‘Liez moy avec une corde par le milieu du corps, et je me hazarderay de passer outre, à la charge que, s’il m’arrive quelque accident, vous me retirerez aussi-tost à vous.’ Il y avoit à l’entrée du destroit de grand vaisseaux vuides faits de pierre en forme de bieres, avec leurs couvercles à costé, ce qui leur fist connoistre que ceux qui les avoient mis là les avoient preparez pour leurs morts, et que pour parvenir jusques à leurs thresors et à leurs richesses, il falloit passer par ce destroit. Ils lierent donc leur compagnon avec des cordes, afin qu’il se hazardast de franchir ce passage.

“Mais incontinent le destroit se ferma sur luy, et ils entendirent le bruit du fracassement de ses os. Ils tirerent les cordes à eux, mais ils ne le peurent retirer. Puis il leur vint une voix espouvantable du creux de cette caverne, qui les troubla et les aveugla si bien qu’ils tombèrent immobiles et insensibles.

“Ils revindrent à eux quelque temps apres, et chercherent à

sortir, estant bien empeschez de leurs affaires. Enfin ils revindrent apres beaucoup de peine, horsmis quelques uns d'eux qui tomberent sous la glissade. Estant sortis dans la plaine, ils s'assirent ensemble tous estonnez de ce qui leur estoit arrivé, et alors voicy que tout d'un coup la terre se fendit devant eux et leur jetta leur compagnon mort, qui demeura d'abord immobile, puis deux heures apres commença à remuer, et leur parla en une langue qu'ils n'entendoient point; car ce n'estoit pas de l'Arabe; mais quelque temps apres quelqu'un des habitans de la Haute Egypte le leur interpreta, et leur dit qu'il vouloit dire cecy, ' C'est icy la recompense de ceux qui taschent de s'emparer de ce qui ne leur appartient pas!' Apres ces mots leur compagnon leur parut mort comme auparavant, c'est pourquoy ils l'enterrerent en la mesme place."—*Merveilles d'Egypte*, p. 55.

NOTE 13, PAGE 69.

Cheops is doubtless the "Priest Saiouph" of Murtadi, who lived till the time of King Pharaan, under whose reign the deluge took place. " Il faisoit sa demeure dans la pyramide maritime (ou septentrionale) laquelle pyramide estoit un temple des astres, ou il y avoit une figure du Soleil, et une de la Lune, qui parloient toutes les deux."—*Merveilles d'Egypte*, p. 19.

NOTE 14, PAGE 74.—Caviglia.

" His pursuits have unsettled many of those notions which he probably received in childhood, and have given him, I suspect, no consoling equivalent. I remembered, however, that there lay in his cottage" (at Memphis) "one of the finest uninspired volumes ever penned," the 'Thoughts of Pascal,' "and I could not help wishing that, while looking for the Temple of Vulcan, he might find a nobler prize."—*Scenes and Impressions in Egypt and Italy*, 1824, p. 197. The wish—the prayer, of the kind and excellent writer has been answered.

NOTE 15, PAGE 78.

The granite casing of the Pyramid of Mycerinus appears to have been entire in the sixteenth century. " C'est un edifice merveilleux," says Villamont, in 1589, " pour estre tout basti en-

tièrement de marbre, et s'estre conservé du tout en son entier. Il n'y a non plus de degrez au dehors et au dedans pour y monter qu'en la seconde."—*Voyages, &c.*, p. 581. "La troisieme Pyramide," says a much more accurate and trustworthy traveller, the naturalist Belon, (in 1548,) "est encor en son entier, n'ayant aucune tache de ruine. Ceste troisieme Pyramide n'a non plus d'ouverture en toute la masse, que si elle venoit d'estre faite: car la pierre dont elle est faite est d'une sorte de marbre nommé Basalten, autrement appelé lapis Æthiopicus, qui est plus dur que le fin fer. Ceste sorte de pierre est celle dont pour la plus grande partie tous les sphinges Egyptiens ont esté mis en sculpture, tels qu'on voit à Rome au Capitole, et qui ont esté autrefois entaillez par les Egyptiens."—*Observations de plusieurs singularitez, &c.*—c. 45, fol. 204, verso. (edit. 1555.)

The exterior coating of the other two pyramids was entire at the commencement of the thirteenth century:—"Ces pierres sont revêtues d'écriture dans cet ancien caractère dont on ignore aujourd'hui la valeur. Ces inscriptions sont en si grand nombre que, si l'on vouloit copier sur du papier celles seulement que l'on voit sur la surface de ces deux pyramides, on en empliroit plus de dix mille pages."—*Abd'allatif, Relation, &c.*, p. 177.

All the early Arab writers bear witness to the existence of these inscriptions:—see the passages collected by De Sacy, Notes to *Abd'allatif*, pp. 221 sqq., or in Pinkerton's *Voyages, &c.*, vol. 15, p. 825. Mandeville, about 1330,* and Baldensel,† in 1336, men-

* Mandeville's whole description is curious:—"Now I schalle speke of another thing, that is bezonde Babyloyne, above the flode of Nyle, toward the desert, betwene Africk and Egypt,—that is to seyn, of the Gernerres of Joseph that he lete make, for to kepe the greynes for the perile of the dere zeres. Thei ben made of ston, full welle made of masonnes' craft, of the whiche two ben merveyllouse grete and hye, and the tothere ne ben not so gret; and every Gerner hath a zate for to entre withinne, a lytille highe fro the Erthe, for the lond is wasted and fallen sithe the Gerners were made. And withinne thei ben alle fulle of serpentes. And aboven the Gernerres withouten, ben many scriptures of dyverse languages. And sum men seyn, that thei ben sepultures of grete Lordes that weren sometyme: but that is not trewe: for alle the comoun rymour and speche is of alle the peple there, both fer and nere, that thei ben the Gernerres of Joseph. And so fynden thei in here Scriptures and in here Cronycles. On that other partie, zif thei weren sepultures, thei sholden not ben voyd withinne. For yee may well knowe that tombes and sepultures ne ben not made of such gretnesse, ne of such highnesse. Wherefore it is not to believe that thei ben tombes or sepultures."—*Voyage, &c.*, p. 63.

Does Sir John intend to intimate that the Pyramids of Cephrenes and Mycerinus were open in his time?

† Baldensel also found a Latin inscription of six lines, sculptured on a

tion them, but in Bakoui's time—1403, they would seem to have totally disappeared. "On pretend," says he, "que sur ces pyramides qui étoient couvertes de sculpture il y avoit une inscription en caractères *mousnads*, (anciennes lettres Hemyarites,) par laquelle il étoit dit que leur construction étoit une preuve de la puissance des Egyptiens, et qu'il étoit plus facile de les détruire que de les élever."—*Notices des MSS. de la Bibliothèque du Roi*, tom. 2, p. 457.

Yet Vansleb, in 1672, asserts that he saw upon some of the Pyramids hieroglyphic characters, but he had not time to copy them.—*Present State*, &c., p. 84.

"To reconcile the silence of the Greek and Latin writers, on the subject of the inscriptions on the Pyramids, with the testimony of the Arab writers, Mr. White makes a judicious observation which I transcribe: 'Such abundance of hieroglyphical characters were seen in every part of Egypt that they would fail of exciting admiration in the observers, and be deemed unworthy of particular relation. Owing to this it is, that, in the description of the obelisks, which from the ground to the very summit are covered with hieroglyphics, this circumstance has remained unnoticed by the greater part of the ancients.'"—*De Sacy*.

stone in one of the Pyramids, and beginning in the following affecting strain:—

"Vidi pyramidas sine te, dulcissime frater!
Et tibi, quod potui, lacrymas hic mœsta profudi,
Et, nostri memorem luctus, hanc sculpo querelam."

The concluding lines, as given by him, are unintelligible.—*Hodoeporicon*, &c. ap. *Canisii Lectiones Antiquas*, t. 4. p. 342.

Ludolf, rector of Suchen, who performed his pilgrimage to Jerusalem the same year as Baldensel, furnishes another copy of this inscription, which is found, says he, along with other Latin inscriptions, on the wall of one of the two larger pyramids; its second, third, and fourth faces being similarly sculptured with inscriptions in Greek, Hebrew, and an unknown character. Ludolf's work being extremely scarce, I transcribe the original passage from the folio edition printed by Eggestein at Strasburgh, (but without name, place, or date, paging, or signature,) in the fifteenth century:—"Item, juxta Babiloniam Novam, trans fluvium Nyli, versus desertum Egypti, stant quamplurima mire magnitudinis antiquorum monumenta, ex lapidibus sectis facta; in quibus sunt duo maxima et olim pulcherrima sepulchra quadrata, in cujus unius pariete uno Latine, in secundo Græce, in tertio Hebraice, in quarto multa quæ ignorantur scripta sunt et sculpta. Sed in primo pariete quo scripte erant Latine, in quantum pro vetustate discerni potest, hi versus sunt insculpti, &c. . . . Haec monumenta 'horrea Pharonis' ab incolis vocantur."

NOTE 16, PAGE 78.

Do we not recognise another well-known tale in Bakoui's account of the great and ancient city of Ansina, (Antinopolis,) to the east of the Nile, where the inhabitants had all been changed into stone, and were to be seen, some asleep, some awake, each in the different attitude and occupation he had been engaged in when the spell took effect? Ansina was called, in Edrisi's time, (A. D. 1153,) the City of Magicians, those opposed to Moses by Pharaoh having been summoned by him from that town.—*Geogr. Nub.*, p. 41. I wonder they did not ascribe the transformation to the rod of Moses.

Ebn Haukul, however, in the tenth century, brings Pharaoh's magicians from Bouseir.

NOTE 17, PAGE 79.

“ L’Egypte étoit alors, disent ils, partagée en quatre-vingts-cinq provinces, dont il y en avoit quarante-cinq dans la partie basse et quarante dans la haute. Et en chaque province il y avoit un gouverneur, du nombre des princes des prestres, qui sont ceux dont Dieu parle dans l’histoire de Pharaon, quand il dit, ‘ Envoye par les villes des herauts, qui amènent vers toy tous les scavans magiciens ;’ il entend ces Gouverneurs. L’on dit que les villes des Princes des Magiciens avoient esté basties par Busire. Le Prestre qui servoit les astres estoit sept ans en charge, et quand il estoit parvenu à ce degré, on le nommoit Cater, comme qui diroit *Maistre des Influences*,* et alors il prenoit seance avec le Roy, en mesme rang, et le Roy menoit ses bestes à l’abrevoir et les ramenoit (c’est à dire, faisoit toutes les affaires) selon son conseil. Quand il le voyoit venir, il se levoit pour le recevoir, alloit au devant de luy et le faisoit asseoir. Puis les Prestres s’approchoient, et avec eux les Maistres des Arts, qui se tenoient debout au dessous du Cater. Chaque Prestre avoit un Astre à servir particulierement, sans qu’il luy fust permis d’en servir aucun autre, et on le nommoit le serviteur de tel astre, tout de mesme que les

* “ Les prestres estoient distinguez en sept ordres, dont le premier estoit celui des Caters, qui estoient ceux qui servoient tous les sept astres, chaque astre sept ans. Avec le Cater estoit le Docteur Universel. Le second ordre appartenoit à ceux qui servoient six astres, et qui estoient ceux qui suivoient immédiatement apres le premier degré. Apres cela ils nommoient celui qui en servoit cinq et audessous, le suivant et l’inferieur.”—*Ibid.* p. 46.

Arabes servoient chacun son dieu, et se nommoient Gabdosamse, Gabdiagoth, Gabdolgasi, c'est à dire, Serviteur de Samse ou du Soleil, Serviteur de Jagots, Serviteur du Gazi. Le Cater disoit donc au Prestre : ' Ou est aujourd'hui l'astre que tu sers ! ' et le Prestre respondit, ' Il est en tel signe, tel degré, telle minute.' Puis il demandoit la mesme chose à un autre, et quand il avoit eu response de tous, et qu'il scavoit la position de tous les astres, il s'adressoit au Roy, et luy parloit ainsi : ' Il est à propos que vous fassiez aujourd'hui telle chose, que vous envoyez telle armée en tel lieu, que vous vous vestiez de telle maniere, que vous parliez en tel temps, que vous fassiez assemblée en tel temps ; ' et de mesme de tout ce qu'il trouvoit bon dans toutes les affaires du Roy, et dans tout le gouvernement de son Royaume. Le Roy escrivoit tout ce que disoit le Cater, et tout ce qu'il desapprouvoit.

" Puis il se tournoit vers les artisans, et leur parloit ainsi. ' Grave, toy, telle figure sur telle pierre, ' ' et toy, plante tel arbre, ' ' et toy, fais le plan geometrique de tel ouvrage, ' et ainsi de suite à tous, depuis le premier jusques au dernier. Incontinent ils sortoient tous, et se rendoient promptement chacun à sa boutique, où ils mettoient la main à l'œuvre, travaillant aux ouvrages qui leur avoient été commandez, et suivant exactement le dessein qui leur avoit esté prescrit par le Cater, sans s'en éloigner aucunement. Ils marquoient ce jour là dans le registre des ouvrages qui s'y faisoient, et le registre estoit plié, et mis en garde dans les thrésors du Roy.

" Leurs affaires se faisoient selon cet ordre ; puis le Roy, quand il luy survenoit quelque affaire, faisoit assembler les prestres hors la ville de Memphis, et le peuple s'assembloit dans les grandes rues de la mesme ville. Alors ils entroient l'un après l'autre chacun en son rang, le tambour battant devant eux pour faire assembler le monde, et chacun faisoit voir quelque trait merveilleux de sa magie et de sa sagesse. L'un faisoit paroître sur son visage, aux yeux de ceux qui le regardoient, une lumière pareille à celle du soleil ; de sorte que personne ne pouvoit arrester sa veue sur luy. L'autre paroissoit revestu d'une robe chamarrée de pierreries de diverses couleurs, vertes ou rouges, ou jaunes, ou tissue d'or. Un autre venoit monté sur un lyon, environné de grands serpens entortillez autour de luy en forme de cengles. Un autre s'avançoit couvert d'un dais ou pavillon composé de lumiere. Un autre paroissoit environné d'un feu tournoyant autour de luy, en sorte

que personne ne le pouvoit approcher. Un autre se faisoit voir avec des oyseaux terribles voltigeans autour de sa teste, et tremoussans de leurs aisles, comme des aigles noires et des vaultours. Un autre faisoit paroistre en l'air devant luy des personnages effroyables et espouvantables, et des serpens aislez. Enfin, chacun faisoit ce que luy enseignoit son astre qu'il servoit : mais tout cela n'estoit que phantosme et illusion, sans aucune verité"—the *gramarye* of European superstition."—*Merveilles d'Egypte*, pp. 5—10.

NOTE 18, PAGE 83.—Spirits of the Pyramids.

"Tous ces esprits sont veus manifestement par ceux, qui approchent d'eux et des lieux de leur retraite, et y hantent longtemps. Il y a pour tous certaines offrandes particulieres, par le moyen desquelles il se peut faire que les thresors des Birba et des Pyramides paroissent, et qu'il se forme amitié et familiarité entre les hommes et les esprits, suivant ce que les sages ont estably."—*Murtadi, Merveilles d'Egypte*, p. 66.

"Les fables que les Arabes nous racontent sur ces gardiens et ces esprits attachés aux Pyramides, ne seroient-elles pas fondées sur les figures monstrueuses disposées probablement à l'entour de ces monuments, et dont la sphinx est la seule qui subsiste?"—*Langlès, Notes on Norden*, t. 3. p. 272.

NOTE 19, PAGE 84.—The Sphinx.

"On dit que c'estoit anciennement un oracle, qui donnoit response à ceux qui luy parloient et demandoient son avis et conseil en beaucoup de choses."—*De Breves*, p. 279.

Abd'allatif speaks of the Sphinx with great admiration : "On voit sur la figure une teinte rougeâtre et un vernis rouge, qui a tout l'éclat de la fraîcheur. Cette figure est tres belle, et sa bouche porte l'empreinte des grâces et de la beauté. On diroit qu'elle sourit gracieusement."—*Relation, &c.* p. 179.

The face was mutilated by a fanatic sheikh of the Sofy sect, in 1379, "et depuis cette époque, les sables inondent le territoire de Djizeh."—*Langlès, Notes on Norden*, t. 3, p. 339.

NOTE 20, PAGE 86.—Heliopolis.

The name Heliopolis or Beth-Shemesh, the House—is still pre-

served in that of the adjacent spring *Ain-Shems*—the Fountain of the Sun.

Abd'allatif describes *Ain-Shems* as a small town, "qui étoit entourée d'un mur, qui l'on reconnoît encore aujourd'hui, quoique détruit. On voit facilement que ces ruines appartiennent à un temple; on y trouve des figures effrayantes et colossales de pierre de taille, qui ont plus de trente coudées de long, et dont tous les membres sont dans des dimensions proportionnées. De ces figures, les unes étoient debout sur des piédestaux; les autres assises dans différentes positions singulières, et avec une parfaite régularité. La porte de la ville subsiste encore aujourd'hui. La plupart de ces pierres sont couvertes de figures d'hommes et d'autres animaux, et d'un grand nombre d'inscriptions en caractère inconnu. Il est rare de rencontrer une pierre qui n'offre, ou une inscription, ou quelque objet gravé en creux, ou une figure en relief."

He proceeds to mention "les deux obélisques, si renommés, que l'on appelle *les deux aiguilles de Pharaon*,"—one of them erect, "la tête recouverte d'un espèce de chapeau en cuivre, en forme d'entonnoir, qui descend jusqu'à trois coudées environ du sommet,"—the other lying on the ground broken in two, with its cap taken away. "Autour de ces obélisques il y en a une multitude d'autres qu'on ne sauroit compter: ceux-ci n'ont que la moitié ou le tiers de la hauteur des grands. Parmi ces petits obélisques, on n'en voit guère qui soient d'une seule pierre; la plupart sont de plusieurs pièces rapportées. Le plus grand nombre ont été renversés, mais leurs bases sont encore en place."—*Relation*, &c., pp. 180-1.

Both the obelisks were erect in 1118, and De Sacy's conjecture is probably correct, that we should read 556 for 656—the year of the Hegira in which the one mentioned by Abd'allatif as lying broken on the ground, fell—corresponding to our year of Christ, 1160. Inside of the fallen obelisk (of which not a trace is now to be seen) was found, according to Makrisi, our authority for the above date, nearly two hundred quintals of copper, and from its summit copper was taken of the value of ten thousand dinars. These copper caps (on which, according to a writer cited by Makrisi, the figure of a man, seated and looking towards the east, was engraved) were seen by Denys de Telmayre, A. D. 775; and

Ephraim Syrus mentions them in his commentary on Isaiah, in the fourth century.—*De Sacy*.

The surviving obelisk was supposed by the Arabs to have been erected by Hushenk the Just, father of the Pischdadian dynasty of Persia, and famous for his doughty deeds in Peri-land, warring against the Dives. The sculptured figures, which were to be seen at Ain Shems in Bakoui's time, were similarly attributed to the Genies.

NOTE 21, PAGE 93.—Abhir.

With the utmost deference to the learned Klaproth, might not the illustrious race of the *Avars* have derived their name (written indifferently Abares, Auairas, Awares, and Aviri,) from this Sanscrit word? The Gaelic *aodhair*, contracted *aoir*, a shepherd, (from *aodh*, a sheep,) appears to be the same word.

I cannot help remarking how singularly the hereditary title Topa, or Master of the Earth, borne by the Khans of the Geougen, afterwards called Avars,—and that of Tobbaa, assumed by the Hamyarite dynasty of Yemen, resemble each other. The arms of the Tobbaas were carried as far as China, and an inscription in the *Musnad*, or ancient Hamyarite character, was long shown on one of the gates of Samarcand, attesting their presence and their victories, “a thousand parasangs from Senaa,” at least 500 years B. C. See Ebn Haukul's Oriental Geography, translated by Sir W. Ouseley, 4to., 1800.

NOTE 22, PAGE 93.

I am aware that the Philistines and Cherethim are identified in Scripture, and that Calmet and many learned commentators consequently bring the Philistines from Crete. Major Wilford's and Mr. Taylor's opinion appears to me nearer the truth—that Crete was colonised by the Cherethim, a tribe of the Philistines or shepherd race, who preserved their distinct appellation, though an integral part of the nation, in the same manner as one of the principal branches of the Pali in India (to all appearance the same as the Cherethim) is distinguished to this day by the kindred name of Ciratas.—Crete, it is remarkable enough, is said by Anaximander (ap. Plin.) to have been named from the Curetes under their king Philistides.

With all deference, however, to those learned men, I cannot subscribe to their opinion that the Philistines came all the way from India. Gausanitis, or Goshan, in Mesopotamia, and Palestine to the east of the Tigris, seem to be the two ventricles, as it were, of that mighty heart, from which the streams of Pali and Ciratas flowed towards the east, and those of Philistim and Cherehim towards the west.

The argument in the text refers to the great migration from Caphtor to Canaan; some Philistines had certainly settled on the borders of Canaan at a much earlier period. Abimelech, king of Gerar, was king of the Philistines in Abraham's time. Gerar, however, no longer existed as a capital, nor the Abimelechs as a line of kings, in the time of Joshua.

NOTE 23, PAGE 109.

Peter Martyr draws a sad picture of the moral degradation and political oppression of the Egyptians, at the commencement of the sixteenth century:—

“ Gens autem ipsa incolarum est imbellis, effœminata, inermis, discincta, mollis, timida: mechanicis tantum artibus aut mercaturae intenta: vitam silentio præterit ingloriam. Nec aliis legibus à Mameluchis gubernata, quàm absoluto judicio. Est præterea Mameluchi cujusvis tanta in incolas universos potestas, ut clavâ ligneâ, quam manu gestat semper, quemcunque incolam obvium ferire pro libito, vel levissimâ occasione sumptâ, liceat: quod scilicet ipsum transeuntem tetigerit, aut venienti non assurrexerit, vel minus honorifice salutaverit, aut non citus loco cesserit. Interdum etiam nullam nactus causam, dum aut temulentus aut insanus vel aliâs iratus incedens per urbem Mameluchus occurrit incolae, ipsum quotquot ictibus libet percutit, nec mussitare miser audet, neque in ejus auxilium vel labium movere quisquam intentat: quamvis pater filium, aut filius patrem à Mamelucho cædi conspiciat, æquo tamen vultu patiatur, necesse est. Incolae cuiquam arma ulla, vel gladiolum quidem acutâ cuspide vel rectâ, apud se habere, equo vel pedibus ambulanti, vetitum est. Redituum autem, præter ordinaria vectigalia, lex est—principum voluntas. Exigunt, expilant, extorquent, et ad ossa usque excoriant. Propterea etsi animus ad vindicandum se in libertatem à tam impiâ servitute adesset, vires tamen defi-

*cérent : cum pecuniae, quae sunt nervi belli, illis desint ; exercitique minime sint armis. Voluptatibus omnifariam dediti, futurorum omni curâ posthabitâ, vivunt ; suoque Mahometae se magis gratum facere tunc arbitrantur, quando ardentius delectationibus incumbunt.

“ Judicate igitur, serenissimi reges, quàm infausto sydere regiones hae gubernentur, in quibus servi dominantur, liberi serviunt, graves opprimuntur, stulti extolluntur ; ubi nulla fides, nullum jus, nulla pietas, misericordia rara, avaritia immensa ; in domibus summa ob multas uxores discordia, foris ingens inter se odium.”—*Legatio Babylonica*, lib. 3, fol. 84.*

Nor was the Egyptian policy of the Grand Signors less oppressive than that of the Caliphs and Sultans :—

“ Now the Turk, to break the spirits of this people the more, oppresses them with a heavier poverty than any of his other Mahometan subjects ; and, therefore, if there be one Vizier more ravenous than another, he sends him thither, and connives at all his extortions, though afterwards, according to the Turkish policy, he knows how to squeeze him into the treasury, so satisfying the people ; the prince drains them, and they discern him no otherwise than as their revenger.”—*Blount's Voyage into the Levant ; Harl. Voyages*, vol. i. p. 529.

The following passage from Vansleb I need only preface by reminding the reader that the Copts are the *sole* remnant of the ancient Egyptians :—

“ I must needs confess that there is no nation in Egypt so much afflicted as are the Copties, because they have nobody amongst them who deserves to be honoured for his knowledge, or feared for his power and authority ; for all that were rich or wealthy are destroyed by the cruelty of the Mahometans ; therefore the rest are now looked upon as the scum of the world, and worse than the Jews. The Turks abuse them at their pleasure ; they shut up their churches, and the doors of their houses, when they please, upon light occasions, altogether unjust, to draw from

* The writings of Peter Martyr “ abound in interesting particulars not to be found in any cotemporary historian. They are rich in thought, but still richer in fact, and are full of urbanity, and of the liberal feeling of a scholar who has mingled in the world. He is a fountain from which others draw, and from which, with a little precaution, they may draw securely.”—*Washington Irving, Life of Columbus*.

them some sums of money.”—*Present State of Egypt*, 1672, * p. 174.

“ It shall be the basest of kingdoms, neither shall it exalt itself any more among the nations, for I will diminish them, that they shall no more rule over the nations. Her power shall come down—I will sell the land into the hand of the wicked—I will make the land waste, and all that is therein, by the hand of strangers. I the Lord have spoken it.”—*Ezekiel*.

NOTE 24, PAGE 109.—Manfalout.

Manfalout has been almost swept away by the Nile. Besides “ certain huge and high pillars and porches, whereon are verses engraven in the Egyptian tongue,” Leo Africanus mentions “ the ruins of a stately building, which seemeth to have been a temple in times past,” as standing “ neare unto Nilus.”—It has long since suffered the fate of those at Antaeopolis, and elsewhere—and Ombos will follow.

Among the ruins, he adds, the citizens “ find sometimes coin of silver, sometimes of gold, and sometimes of lead, having on the one side hielygraphic notes, and, on the other side, pictures of ancient kings.”—*Geographical History of Africa*, p. 325.

NOTE 25, PAGE 113.—Siout.

Leo Africanus, at the beginning of the sixteenth century, describes Siout as “ most admirable in regard of the hugeness and of the variety of old buildings, and of epitaphs engraven in Egyptian letters ; although at this present the greatest part thereof lyeth desolate. When the Mahometans were first lords of this city, it was inhabited by honourable personages, and continueth as yet famous in regard of the nobility and great wealth of the citizens.”—*Geographical History*, &c. p. 325.

Siout was the birth-place of many celebrated Arab literati, especially of Gelaleddin Aboul Fadhl Abdal-rahman Mohammed, surnamed Assiouti,—a most voluminous writer, who flourished under Saladin, and to whom we owe the story of the fair Bedouin and the Garden of Roda.

NOTE 26, PAGE 114.

Mallem Athanasius, the last of the Copts that spoke his native tongue, was living at Siout in 1673, when Vansleb ascended the Nile. "I could not benefit myself much by him, because he was deaf, and about fourscore years of age; nevertheless, I had the satisfaction to behold that man, with whom the Copties' language will be utterly lost."—*Present State*, &c. p. 219.

NOTE 27, PAGE 114.

The Balsam, carried originally, says Arab tradition, from Yemen by the Queen of Sheba, as a present to Solomon, and planted by him in the gardens of Jericho, was brought to Egypt by Cleopatra, and planted at Ain Shems, or Heliopolis, now Mataria, in a garden which all the old travellers, Arab and Christian, mention with deep interest. The Balsam of Jericho, or Balm of Gilead, has long been lost; it may not be uninteresting to trace the gradual extinction of that of Mataria.

The Christians, we are informed by an Arab writer, cited by D'Herbelot, attached a peculiar religious value to the Balm of Mataria, using it "pour faire ce que les Grecs et les autres Chrétiens Orientaux appellent *myron*, qui est la crème de la confirmation." "Les souverains Chrétiens," says Makrisi, "le recherchent à l'envi les uns des autres, et tous les Chrétiens, en général, l'ont en grande estime: il ne croient point qu'un Chrétien soit devenu parfait Chrétien, si l'on ne met un peu d'huile de baume dans l'eau baptismale, quand on l'y plonge."*—*De Saey, Notes on Abd'allatif*, p. 88.

* The Greek word, which the French have softened into *crème*, is retained with greater purity in the *chrism* or *chrisome* of our old English writers.

Till the revival of the liturgy in 1551, the chrism or consecrated oil was applied immediately after baptismal immersion; the infant's head was then enveloped in the *chrisome-cloth*, a vesture of white linen, originally, in all probability, emblematical of those robes of righteousness provided for the redeemed soul by the Saviour, and wrapped in which, by an affecting image, its little body was consigned to rest, if the Almighty was pleased to recal the spirit he had given within a month after birth. Such an infant was called a *chrisome-child*. "Every morning," says Jeremy Taylor, alluding probably to the beautiful idea that the smiles of infants are the medium of their converse with angels—"creeps out of a dark cloud, leaving behind it an ignorance and silence deep as midnight, and undiscerned as are the phantasms that make a *chrisom-child* to smile."—And perhaps, to a thoughtful mind, Mrs. Quickly's comparison of Falstaff's death to the peaceful departure of a *chrisom-child* is, in the reflections it suggests, the most awful in the whole compass of literature.

The Balm of Mataria was also indispensable at the coronations of the European sovereigns :—

“ Nor all the water in the rough rude sea
Can wash the balm from an anointed king !”

The first writer, I believe, who mentions it, is the author of the Apocryphal Gospel of the Infancy of Christ—a work supposed to have been translated from a Greek original of ancient date,—p. 69, *Sikes' edition*, 1697.

Abd'allatif gives a minute account of the plant, and of the method of gathering the balm. “ On le cultive,” he says, “ dans un lieu enclos, et soigneusement gardé, de l'étendue de sept fed-dans.”—p. 20-1.

The garden, Ebn al Ouardi tells us in the thirteenth century, was a mile square—the only spot (and this assertion, as old as Ebn Haukul's time, is reiterated by every traveller) where it was preserved. De Salignac, in 1522, describes this garden as two bow-shots long, by a stone's cast broad.

Sir John Mandeville, about 1330—(his authority is not to be contemned while he treats of the well-known regions of Egypt, Mount Sinai, and Palestine)—has dedicated a chapter of his marvellous narrative to the ‘ Field of Balsam,’ which he asserts would no where else bear fruit, nor even there, unless under the culture of Christian gardeners. They call the tree, he says, *Enonchbalse*, the fruit *abebissam*, the liquor or gum, *guybalse*. The incisions were made with bones or stones, never with iron, or the gum would be corrupted. It was an infallible specific for fifty different diseases, but was very rarely to be obtained pure.—*Voyage, &c.* p. 60.

One tree only existed in Bakoui's time, (1403,) which, he says, “ en commençant à pousser, ressemble au grenadier et au hanna ; on en tire la baume dans des vases de verre. Il s'en fait un grand commerce ; on compte qu'on en recueille par un an 200 livres d'Egypte ; il y a là un Chrétien, qui seul a le secret de la preparer et de la purifier.”

But the fullest account of this garden is to be found in Breydenbach's curious folio, the “ Peregrinatio in Montem Syon, ad

In process of time the word *Chrisom* came to be used indifferently for the unction, the vesture, and the infant ; it is in the last sense only that it now survives, as heading the most numerous column in the London bills of mortality.

venerandum Christi sepulchrum, atque in Montem Synai, ad divam Virginem et Martyrem Katherinam," performed in 1483, and printed at Mentz, in 1486. Arriving from Mount Sinai, weary and way-worn, and having for many days tasted only the foul water of the desert, one can well imagine his delight in welcoming the "sweet, clear, and cold" waters of Mataria, and reposing in a "spacious and delicious" edifice, built over the fountain of the Virgin, its windows opening on the garden, and completely perfumed by the fragrance of the balsam. This 'palace,' as a cotemporary of Breydenbach's calls it, was built by the Soldan, who paid it an annual visit at the season when the balm was gathered. The earliest and choicest balm was obtained in December, incisions being made thrice in that month, and the produce was reserved exclusively for the Soldan, who made presents of it to the Cham of Tartary, Prester John, Xanssa Lord of the Tartars, and the Grand Turk: the subsequent produce was sold, but much adulterated.

Dismissing their camels here, Breydenbach and his companions rested for the remainder of the day, after sending to Cairo for a dragoman, without whose escort no Christians were allowed to enter. Wine, they complain, was the only luxury they could not obtain here; every thing else was to be had in abundance, and on reasonable terms.

When the Holy Family, on their flight from Egypt, arrived at Mataria, they went from house to house, asking, but in vain, for a cup of water: faint, thirsty, and sorrowful, the Virgin sat down to rest herself, when suddenly the sacred fountain sprang forth at her side. The balsam, adds Breydenbach, with fond and amiable superstition, refuses to yield her produce to any irrigation save that of the fountain of the Virgin.*

In Breydenbach's time, therefore, the garden appears to have been flourishing. Shortly afterwards, most unaccountably, the balsam plants—for the single shrub mentioned by Bakoui had been extensively propagated, it seems—all died out—whether through carelessness of the gardener, through fraud and envy of the Jews, or through religion and piety being offended, no one

* Peter Martyr says that Iaches, king of Cyprus, with permission of Cayt-beius, (Qaetbai e' Zaheree,) the sultan, attempted to rear it in Cyprus, irrigating it with water brought from Mataria; but the plant would not live.—*Legatio Babylonica*, lib. 3.

could tell; "however that may be," says Peter Martyr d'Anghiera, the Spanish Ambassador, who visited Mataria in 1502, "all those plants have perished from the very roots, nor does the slightest trace of them remain." This must have been some years before his visit, as the interior of the Sultan's palace, deserted ever since the balm failed, had already fallen to ruin.

Baumgarten, five years afterwards, tells the same tale, adding, that "the balm failing, a neighbouring fountain was dried, which, as they told us, used to moisten the trees, and make them fruitful." The fountain, however, was still as sweet and plentiful as ever, when the plenipotentiary of Castile was there, who tells his sovereign, in elegant latinity, that though water was forbidden him by his physicians, he could not, remembering who had bathed in that fountain, abstain from taking three such copious draughts of it, that his stomach swelled to such a degree that he was obliged to loosen his girdle.

One solitary plant, however, appears to have been recovered, and the fountain (Baumgarten would have supposed by sympathy) had sprung up again, when Leo Africanus, the protégé of Leo X., finished that 'golden volume,' his Description of Africa, in 1526. "At Amalthria," says he, "there is a garden containing the only balm tree, (for in the whole world beside there is not any other tree that beareth true balm,) growing in the midst of a large fountain, and having a short stock or body, bearing leaves like vine-leaves, but not so long; and this tree, they say, would utterly wither and decay, if the water of the fountain should chance to be diminished. The garden is surrounded with a strong wall," (in Peter Martyr's time only by a mound of earth,) "whereinto no man may enter without the special favour and licence of the Governor."

"Ils sont dedans un grand jardin," says Belon, in 1548, "enfermez en un petit parquet de muraille, que l'on dit y avoir esté fait depuis que le Turc a osté l'Egypte des mains du Souldan; et dit on que ce fut un Bacha, qui estoit lieutenant pour le Turc, qui les estima dignes d'avoir closture à part eux. Lorsque les veismes, il n'y en avoit que neuf ou dix plantes, qui ne rendent aucune liqueur."—*Observations, &c.*, p. 195.

These plants, being totally withered, were in 1575 replaced by forty fresh cuttings from Mecca, which had also perished, how-

ever, through the negligence of the gardener, in 1580, when Prosper Alpinus (who lays the scene of his "Dialogus de Balsamo" in the garden of Mataria) visited the spot.

Another supply had been procured before De Breves' visit, in 1605. He speaks of the garden as "gardé avec grand soin ; et avant que d'y entrer, le Bostandji ou jardinier pria un chacun de ne point toucher aux plantes. Là dedans nous vismes sept ou huit petits arbrisseaux de baume, ayant chacun son quarreau à part ; ils sont fort petits, de la hauteur d'un pan et demy, ou deux, ayant la feuille petite comme de la marjolaine sauvage, ses branches fort desnuées de feuilles. Le Bostandji nous donna deux ou trois petites phioles de baume, et un petit du bois ; il rend une fort bonne odeur. Nous en vismes un qui avoit esté incisé, qui distilloit sa liqueur dans une petite phiole. En nous promenant dans ledit jardin, quelqu'un des nostres, ayant marché sur une des dites plantes, en rompit une branche tout à fait ; ce qu'ayant apperçu le pauvre jardinier, il en devint palle et transi de douleur et de frayeur, comme s'il eust esté condamné à la mort, et se desesperoit, disant qu'autre que sa vie ne pouvoit reparer ce dommage, le sçachant le Grand Seigneur ou le Bassa ; car ceux qui sont à la garde de ces plantes en respondent sur leur teste. En fin on appaisa ce pauvre homme, avec un peu d'argent qu'on luy donna."—*Relation, &c.*, p. 271.

Two plants only, and almost dead, existed in 1612, when Brenning visited Mataria. Sandys mentions one—"the whole remnant of that store, which this orchard produced, destroyed by the Turks, or envy of the Jews, as by the others reported."

This last survivor perished in 1615, in consequence of an excessive inundation of the Nile.

Thevenot's account of Mataria, in 1657, throws so much light on the preceding descriptions, and gives so accurate an idea of the present appearance of the garden and its facilities for pic-nics, that I cannot resist transcribing it:—"Vous y voyez une petite salle presque quarrée, qui autrefois étoit une simple grotte, maintenant elle est enclose avec un jardin, dont on a le soin : au commencement de cette salle, à main gauche, est un bassin qui est à rez-de-chaussée du pavé, un peu plus long que large. L'eau qui vient en ce bassin de cette salle, et partout le jardin, se tire par deux bœufs, qui font tourner une saki dans la cour, par le

moyen de laquelle ils élevent cette eau. Après avoir vu cette salle, on passe dans un grand jardin, enfermé aussi de murailles, où il y a plusieurs arbres, mais entr'autres il y a un gros sycomore, ou figuier de Pharaon, fort vieux, qui porte toutes fois du fruit tous les ans; on dit que la Vierge passant par là auprès avec son fils Jesus, et voyant que des gens la poursuivoient, le figuier s'ouvrit, et la Vierge y étant entrée dedans, il se referma; puis ces gens étant passez, il se rouvrit, et resta toujours ainsi ouvert jusqu'à l'année 1656, que le morceau qui s'étoit séparé du tronc fut rompu.* . . . Ce jardin est assez agréable pour se reposer, et on y dîne ordinairement dans quelque allée couverte d'orangers et de limoniers, dont il y a si grande quantité, et qui font un tel ombrage, que le soleil n'y passe point du tout, mais ils sont si bas, qu'il faut se baisser extrêmement pour passer en plusieurs de ces allées, au milieu desquelles il y a des canaux faits pour conduire l'eau par tout le jardin; on vous fait passer l'eau par l'allée où vous êtes, et vous y faites rafraîchir votre vin; mais il faut porter là ce que vous voulez manger, car on n'y trouve que des oranges belles et bonnes en quantité, et des petits limons."—*Voyages au Levant*, tom. ii. p. 440.

Two prints of the 'house of Joseph and Mary,' as the hut

* "The Copts say that when our Lord Jesus Christ and his most holy mother hid themselves in this opening of the Sycomore, they [saved themselves from the soldiers' violence by the favour of a spider's web that covered them suddenly, and appeared very old, though it was made in an instant by a miracle; so that they imagined not that any person could be hid within, much less the persons whom they were seeking."—*Vansleb, Present State of Egypt*, p. 141.

No mention of this tree, or of its miraculous history, is to be found in the Gospel of the Infancy of Christ.

A large sycomore is still revered at Mataria as the Virgin's tree. But the stump of another, which bore the same title, was shewn in the garden, and the fragments of its trunk were preserved as relics by the Franciscans at Cairo, in 1672.—*Vansleb*.

Another sacred tree was to be seen at Cairo in the days of Jacques de Vitry, Bishop of Acre, who died in 1244. "At Cairo is a very ancient date tree, which spontaneously bent itself to the blessed Virgin when she wished to eat of its fruit, and rose again when she had gathered it. The Saracens, seeing this, cut the tree down, but the following night it sprang up again as straight and entire as before, and consequently they now venerate and adore it. The marks of the axe," adds the Bishop, "are visible to this day."—*Jacobi de Vitriaco Hist. Orientalis; Liber 3, ap. Martenne, Thes. v. 3, p. 375*.

The Virgin is said, in the Koran, to have borne our Saviour leaning against a withered date tree, which miraculously let fall ripe fruit for her refreshment.—*Sale's Koran*, c. 19, p. 250.

The latter tree was said in the tenth century to be preserved in the "dome or vault" of Bethlehem, and held in high repute.—*Ebn Haukul's Oriental Geography*, p. 40.

erected over the sacred fountain was then called, as it existed in 1681, may be found in the *Voyages de Lebrun*, vol. i., plates 76, 77.

The well is now open to the sun, and the balm survives only in tradition.

Between Mataria and Cairo, a garden and pleasure-house of the Mamaluke Sultans existed in Belon's time, 1548—of which he gives the following description :—

“Quand nous l'eusmes veu, tournasmes bride vers le Caire, nous destournants de nostre chemin, en declinant à main dextre, pour aller voir un autre jardin, qui n'est qu'à une lieu du Caire, ou il y a une grande et spacieuse salle, qui fut faite par les Cercasses au temps que le Souldan étoit Seigneur d'Egypte. Cestuy edifice est une grand espace pavée de grandes pierres quarrées, et est couverte dessus en manière de terrasse pour defendre du soleil, dont la couverture est soustenue à pilliers de pierre de taille à claires voyes. Le Nil y arrive tout joignant les murailles, non pas le courant, mais quand il inonde. Au costé de levant de ceste salle, il y a un beau petit jardin, dedans lequel sont plusieurs arbres de casse, des arbres de henne, des rosiers, et josuin jaune : mais aux costez de septentrion et de midy, il y a deux petits reservouers en maniere de viviers, qui servent à garder l'eau pour boire. Tout ce bastiment est peinct par le dessus. Les poutres et aix sont de palmiers. Depuis que l'Egypte est rendue tributaire au Turc, il a toujours continué tomber en decadence.”—*Observations*, &c. p. 109.

Prince Radziwil, in 1583, describes another royal palace, the Gaurea—in which he dined, returning from Mataria. It was erected, he says, by Sultan Gaur, (or El Ghoree, the last of the Mamaluke Sultans,) who attached to it an elegant mosque with two lofty minarets, in which he was buried. The porticoes of this palace, supported by numerous and beautiful columns, may vie, he says, with any for elegance. In the centre is a tank, fifty cubits square and six deep, which the Sultan, whenever, as was his frequent custom, he held a solemn banquet for his court and people, filled with sherbet, that whoever would might drink as much as he liked. Four flights of marble steps descended from the brink of the pool, for the convenience of the people, who descended, step by step, as the sherbet diminished. Refres -

ments, meanwhile, were laid out for them under the porticoes, while the Sultan looked on from the upper story of the building. Ibrahim Pacha, adds Radziwil, occasionally resided in this palace;—possibly the same described by Belon, repaired and enlarged.

The Gipsies wandered over Lower Egypt in great numbers about the middle of the sixteenth century:—

“ Il n’y a lieu en tout le monde qui soit exempt de telle pauvre gent ramassée que nous nommons de faux noms Egyptiens ou Baumiens—car mesme estants entre la Materée et le Caire, nous en trouvions de grandes compagnies, et aussi le long du Nil en plusieurs villages d’ Egypte, campez dessous des palmiers, qui estoyent aussi bien estrangers en ce pays là comme ils sont aux nostres.”—*Belon, Observations, &c.* livre ii. c. 41.

“ Nous voyons en allant,” (à Matarée) “ plusieurs pauvres gens campez par les camps comme les Arabes, et nous estans enquis quels ils estoyent, on nous dit que c’estoyent de ceux que nous appellons en noz quartiers Sarrasins ou Boemiens, que les Italiens nomment Zingani.”—1581.—*Peregrinations du S. Jean Palerne*; ed. 1606, p. 138.

NOTE 21, PAGE 118.

Between Siout and Girgeh we visited Akhmim and Gebel Sheikh Heridy.

The legend of the serpent into which Sheikh Heridy’s soul is said to have migrated, is well known, and perhaps of Indian origin; at least the Hindoos appear to have been acquainted with it. See Major Wilford ‘On Egypt and the Nile.’—*Asiatic Researches*, vol. iii. p. 344, edit. 4to.

At Akhmim—the ancient Chemmis or Panopolis, and the retreat and abode, according to the Arab writers, of the most powerful magicians—we found little of interest. Nonnus, author of the *Dionysiaca*—that “ vast repertory of Bacchic fable—the Grecian Ramayuna,” as Mr. Keightley calls it, was born there; and it has produced two great men among the Arabs—Dhou el Noun, surnamed El Akhmimi, the founder of the religious sect called Soufi, who died A.D. 859—and Zulmin ebn Ibrahim, a skilful chemist, not inferior, we are told, to Geber ben Haian, in

that art, and who added the science of mysticism to his other acquirements; the temple of Akhmim was his constant resort and study, "as a museum of antiquities, where wondrous images and statues of exquisite labour were to be seen."—*Casiri, Bibliotheca Arabico-Hispana*, vol. i. p. 441.

Man, as usual, has whetted the scythe of Time: "the pillars and principal stones of Akhmim" were employed, according to Leo Africanus, in building Menshieh, on the opposite bank of the Nile; and of the zodiaks, sculptures, and other "arcana sapientiae," recorded by Edrisi*—the "restes admirables de palais, d'obelisques, et de statues colosses," mentioned by D'Herbelot—nothing now remains except an arch almost buried in the earth, and a few massive stones of the great Temple of Perseus, in a hollow, picturesquely surrounded by palm-trees, the representatives of those mentioned by Herodotus.

Perseus, according to the report of the natives, frequently appeared in the temple and the neighbourhood of Panopolis; "a beardless and naked youth," such as he is represented in the works of Grecian art, is the description Murtadi gives of the guardian spirit of the Temple of Akhmim—well known, he adds, among the inhabitants of that place. The coincidence is curious—nor is it less interesting to find the name of the earliest hero of European romantic fiction attached to a spot, illustrious among the Arabs as a sort of Egyptian Domdaniel.

NOTE 29, PAGE 123.

A talisman was supposed to be preserved at Bellini, to hinder crocodiles from descending lower.—*Bakoui*.

NOTE 30, PAGE 138.

Near this tomb is another containing paintings of animals beautifully executed, but almost destroyed, and apparently since Burckhardt's time, who mentions them as "the most elaborate

* Edrisi decidedly prefers the temple of Akhmim to those at Dendera and Esne. "In prædicta urbe Echmim extat aedificium illud, quod appellatur Beraba; sunt autem plures Berabae, inter quas est Beraba Asnae, Beraba Dandarae, et Beraba Echmim: at haec et aedificio firmior et rebus memoria dignis ornatior est; nam in isto domicilio sunt nonnullae stellarum, et artium quarundarum, picturae, scripta diversa, variaeque scientiae. Istud domicilium, quod Beraba dicitur, est in media urbe Echmim, ut diximus."—*Geogr. Nubiensis*, p. 42.

and interesting work of the kind" that he had seen in Egypt. He adds the curious remark, that "among the innumerable paintings and sculptures in the tombs and temples of Egypt," he "never met with a single instance of the representation of a camel."

NOTE 31, PAGE 147.

"Mount Meru made also part of the cosmographical system of the Jews; for Isaiah, making use of such notions as were generally received in his time, introduces Lucifer, in Sanscrit Swar-bhanu, or Light of Heaven, boasting that he would exalt his throne above the stars of God, and would sit on the mount of the congregation, on the sides of the north. Meru has also the name of *sabha*, because the congregation or assembly of the gods is held there on its northern side."—*Wilford on the Sacred Islands of the West. Asiatic Researches*, vol. viii. p. 284.

NOTE 32, PAGE 165.—Thebes.

The reader will not be displeased to compare Father Protais' account of the ruins of Carnac with those given by modern travellers; they have suffered much, it seems, within the last hundred and seventy years. I do not know how it may be with others, but to me the glimpses of the progress of ruin one meets with in the old travellers are as affecting as the varying shades of age deepening over a beauty's features in a succession of portraits taken at different stages of her life; this will plead my apology, I hope, for the present and similar notices of the changes wrought by the foot of Time, falling heavier and heavier every year he makes his rounds over the monuments of antiquity.

After a brief but accurate description of Luxor, Father Protais proceeds as follows:

"Le deuxième village est el Hamdie, ou Loxor el Cadim, ou Carnac. La tradition des gens du pays dit que c'estoit autrefois la demeure d'un Roy; il y a bien de l'apparence, car on y voit de grands et beaux restes d'un chasteau, aux avenues duquel il y a des sphinx de part et d'autre, la teste tournée vers l'allée dans la posture à peu près qu'on donne aux lions du throne de Salomon. Ils ont vingt-une semelle de longueur, distans de deux les uns des autres. J'en ay veu quatre allées toutes garnies, avant que d'arriver

au Palais; je ne sçay pas s'il y en a d'autres, parce que je ne vis que la moitié du contour: j'en comptay soixante de chaque costé dans la premiere allée, et cinquante-un dans la seconde, le tout fort bien ordonné. Les portes sont grandes et exhaussées au delà de toute mesure et de la croyance, couvertes des plus belles pierres qu'il est possible de voir; j'en mesuray une de trente-cinq semelles. Je ne pus rien connoistre dans la cimetrie des bastimens, tant ils sont en desordre et ruinez, outre que le peu de temps que nous avions à y demeurer ne nous permit pas d'observer toutes ces choses; pour les bien examiner piece à piece, il faudroit du moins un mois, et je n'y fus pas plus de trois heures et demie. Je croy qu'il y a plus de mille figures demy relief, et quelques-unes tout relief. Il y a un tres-grand nombre de colonnes; j'en comptay environ 120 dans une seule salle, qui estoient de cinq grandes brasses de grosseur. Je remarquay sept aiguilles, deux desquelles sont assez regulieres, excepté que l'une a demy pied de face plus que les deux de Loxor, et que l'autre est beaucoup plus petite. Il y en a trois par terre, brisées, qui à moitié, qui tout à fait, et deux autres de jaspe rompues par le haut, sur lesquelles il y a de grands personnages gravez avec quantité d'ornemens fort particuliers. Il y a un grand bassin d'eau dans la cour du chasteau avec un tour de belles pierres: on me dit que cette eau seule blanchissoit fort bien le linge; pour l'eprouver, j'y trempay un mouchoir, qui conserva l'odeur du savon durant quatre ou cinq jours. A l'un des portaux du palais il y a deux grandes statues d'une pierre blanche comme albastre, mais le visage en est tout ruiné: elles ont l'epée à la ceinture.* Une autre paroist encore vers le milieu du chasteau, de mesme taille, c'est à dire, de la hauteur de trois hommes bien proportionnez."

He supplies some further particulars in a letter dated Cairo, January 6th, 1670:—"Je croy qu'il y a plus d'un million de statues et de figures de bas relief. Dans les bas relief des murailles et des piliers toutes les figures sont de bas relief, et il n'y en a aucune qui soit veue de front: il m'eust fallu un mois tout entier dans un semblable lieu pour en observer toutes les particularitez: je me contentai de tirer seulement les postures d'une douzaine de diables les plus extravagans avec leurs troupes d'hommes et de

* These are the statues, now decapitated, which Mr. Ramsay was so much pleased with.

femmes qui les adorent, et quelques frontispices de temples, lesquels ne sont pas fort riches en architecture, mais ils sont bastis de tres belles pierres ; ce qui me plaisoit le plus, c'estoit le plat-fond et l'azur, et les autres couleurs qui sont liées comme de l'émail, paroissant aussi fraiches que si elles avoient été appliquées depuis un mois."

" Ce que je viens de dire n'est que bagatelle au regard de ce qui se trouve vis-à-vis, à une lieue de là, du costé du Ponant, selon le rapport de plus de cinquante personnes, de qui je me suis informé ; c'est un lieu qui s'appelle l'ancienne ville de Habou, pleine d'antiques et de curiositez incomparablement plus belles que celles de Hamdie ; outre qu'il y a quantité de momies que les Arabes brulent tous les jours, aussi bien que leurs divinitez de bois. Le lieu où sont les momies se nomme Biout (beït) el Melouc : on découvre de loin avec des lunettes d'approche deux épouvantables Idoles, masle et femelle, assises dans des chaises, tournées au Levant, lesquelles doivent avoir la teste à peu près comme celle des Pyramides du Caire appelé Aboul et Saoul.* Elles sont bien proportionnez ; on discerne aisément l'homme d'avec la femme ; leurs noms sont Tama et Cama.†

" Tout proche de là est un lieu nommé Legourné, ou el Abouab, où les temples et les statues se sont conservées si fraiches, et les couleurs si vives, qu'il semble (disent les habitans) que le maistre n'a pas encore lavé ses mains depuis son travail,—ce sont leurs propres termes. On en decouvre quelque chose du bord du Nil. Les chrétiens de Loxor, voyant que j'avois grande envie d'aller sur les lieux pour en considerer les beautez, s'offrirent de me mener à Habou, mais pour plusieurs raisons je ne le jugeay pas à propos, dont je me suis repenti ; mon dessein est d'y retourner non seulement par curiosité, mais à cause des Chrestiens qui sont comme de pauvres brebis sans pasteur il y en a qui ont passé cinquante années sans confession et sans communion, n'ayant ni eglise ni prestre."

He closes his letter from Cairo—" J'espere y retourner bientost, et n'en pas revenir avec tant de precipitation ; mais il me faut faire un petit voyage sur la Mer Rouge, où je vais tous les ans pour visiter les pauvres esclaves dans les galeres du Turc, et leur

* He means the sphinx, called by the Arabs Abou-el-hol, the Father of Terrors, or Abou-el-haoun, the Father of the Column.

† They are still called so—Shama and Tama.

administrer les sacremens.”—*Relation du Voyage du Said, ou de la Thebayde, fait en 1668, par les P. P. Protais et C. F. d’Orleans, Capucins Missionnaires. In Thevenot’s Collection of Voyages, &c. tom. ii. part 2. **

The good father never revisited Thebes, falling a victim to the plague the year following, 1671. (*Vansleb.*) His companion, Father Carlo Francisco d’Orleans, was afterwards superior of the Capucins at Cairo.—*Letter of Dr. Huntington—Ray’s Collection, &c. vol. ii. p. 463.*

Père Sicard’s exaggerated account of more than one thousand columns to be seen at Carnac, and of many hundreds at Luxor—to say nothing of his mistake of the statues in front of the propyla there for sphinxes—contrast unfavourably with the simple and accurate statement of his humble predecessor, who had but three hours and a half to examine them in! Among the precise facts, however, mentioned by Sicard, is the existence of six obelisks—two of which, small ones but the most interesting, were of porphyry—at the time of his visit to Thebes about 1714.—See his interesting plan of a work on Egypt—*Lettres Edifiantes et Curieuses*, tom. v. p. 255.†

These small obelisks, evidently the same as those mentioned by Protais, are described by Norden as follows:—“On voit au devant d’un petit temple deux autres obélisques, mais beaucoup plus petits que les precedents. Ils peuvent avoir à peu près onze à douze pieds de hauteur, et leurs faces n’ont qu’un pied et demi de largeur. Quant à la matiere, elle est de granit, et d’un grain si fin qu’elle approche beaucoup du porphyre. Ils ont servi, selon toutes les apparences, de piédestaux à deux idoles, et ils sont ornés d’hieroglyphes peints de divers couleurs; et ces hieroglyphes représentent, pour la plus grande partie, des figures qui s’embrassent.”—

* Father Protais evidently mistook Memphis for Thebes, as Thevet did in the sixteenth, Breydenbach in the fifteenth, and Burcardus de Monte Sion in the thirteenth century.—“From Babylon,” (old Cairo,) says the latter, “Thebes is two leagues distant, and the desert of Thebais, once densely peopled with monks, lies adjacent to it.”—*Descriptio, &c. apud Canisii Lectiones Antiquæ*, tom. iv. p. 26.

† In his list of “restes de l’ancienne Egypte paienne,” he reckons “dix-huit obélisques, deux à Alexandrie, dix à Thebes, quatre à Phile, une à Arsinoë, et une à Heliopolis.”—*Lettres edif.*, tom. v. p. 495.

Father Sicard fell a victim to his humanity in attending the sick and dying while the plague raged at Cairo, in 1726. See a sketch of his life and character, *Lettres edif.*, &c., p. 354.

Norden, Remarques sur les Obelisques ; vol. i. p. 171 of his Travels —Langlès' edition.

They probably stood behind the sanctuary, where two pedestals of red granite are still to be seen. When they were destroyed I know not, but it must have been before Pococke's visit in 1737. He only found four obelisks, all of red granite—three standing, and one, the last towards the S. E. fallen. Perry, a year or two afterwards, found two only erect, and in his time *two* pillars of the great colonnade of the first court were standing—the other six lying on the ground, “like a pile of mill-stones thrown down”—there could not be a juster simile.

I need not dwell longer on the tale of ruin.

Sicard appears to have been the first traveller who recognised Thebes in the ruins of Carnac and Luxor. Lucas supposed it to have been situated much more to the south*—near a little Turkish fortress called Naassa, where he describes the ruins of what appeared to him, he says, the greatest city that ever existed in the world—ruins which have remained as invisible as the gardens of Irem to all subsequent travellers.

“Je demeurai comme interdit à l'aspect d'un ouvrage le plus grand et le plus magnifique. C'est un palais grand comme une petite ville ; quatre avenues de colonnes conduisent à quatre portiques. On voyoit à chaque porte entre deux grandes colonnes de porphyre deux figures d'un beau marbre noir, de geans, qui ont chacun une masse à la main. L'avenue de colonnes qui conduit à chaque porte, est de trois colonnes en triangle de chaque côté composée de plus de 1500 colonnes. Sur le chapiteau de chaque triangle il y a un sphynx, et sur l'ordre des trois colonnes qui suivent, un tombeau, et ainsi successivement de chaque côte dans toutes les quatres allées. On en voit beaucoup de tombées. Chaque colonne a soixante et dix pieds de haut, toutes d'une seule pierre, de manière que dans les quatre avenues il faut qu'il y ait plus de cinq à six mille colonnes.

“Je trouvai la première salle de ce palais toute peinte de très-beaux sujets d'histoires, et il ne paroisoit pas qu'il y eût longtemps que cette peinture fût achevée. On y voyoit des chasses de gazelles ; en d'autres endroits des festins ; et quantité de petits

* Lucas had visited Luxor and Carnac some years before Sicard ; he speaks of “plusieurs obelisques,” but his account is strangely confused and inaccurate.

enfans qui jouoient avec toutes sortes d'animaux. Je passai de là à d'autres appartemens tout revêtus de marbre, dont les voutes étoient soutenues par des colonnes de porphyre et de marbre noir. Quoique les denombrements ne permettent pas d'aller partout, nous trouvâmes le moyen cependant d'aller en haut, d'ou j'eus le plaisir et en même tems le chagrin de promener ma vue sur les ruines de la plus grande ville qui ait été, ce me semble, au monde. Je me figurais dans ce tems là que ce pouvoit être Diospolis, l'ancienne Thebes à cent portes, et ceux de mes amis qui ont fait un cours d'antiquitez, semblent en convenir. Ils trouvent même dans ce que je rapporte une exactitude et une precision que n'est pas venue dans les auteurs jusqu'à nous. Je me flatte ainsi que cela donnera quelque merite à ma relation, et qu'on me sçaura gré de ma diligence.

“ On découvroit, du côté du desert qui est au Levant, environ douze Pyramides, qui ne cedent rien à celles du Grand Caire. Outre quantité de bustes, de plus de trente pieds de haut, de figures d'hommes, j'y remarquai un fort grand nombre de palais qui paroissent encore tous entiers, mais si ensevelis dans les ruines, que l'on n'en voit plus les portes, et même j'entrai dans quelques uns par les fenetres. Je partis de ce lieu le cœur tout contrit de voir que tant de beaux édifices fussent deserts et abandonnez à l'injure du tems ; que la demeure de tant de rois soit devenue la retraite des serpens et des autres animaux semblables ! En revenant à Naasse nous passâmes par un endroit qui est sur le penchant de la montagne, tout plein de puits quarrez, qui servoient à enterrer les gens du pays ; tous ces lieux sont tout à fait deserts.”

This extraordinary tissue of lies circumstantial is illustrated by a bird's eye view of the chateau, and by prints of a pyramid, fourteen hundred feet high, and of a female bust, seventy-two, without the pedestal !!!

NOTE 33, PAGE 174.

Edrisi, in the twelfth century, describes Essouan as a small but densely populated town, abundant in all sorts of vegetables, and noted for its excellent breed of camels, goats, &c.—all very fat and well flavoured.—*Geogr. Nubiensis*, p. 18.

Ebn al Ouardi, in the following century, speaks of it as “ très

peuplée, mais on ne peut y parvenir que par la montagne Alaki ou Allaki, située dans un lieu bas et couvert de sables, sous lesquels, en creusant, on trouve l'eau. Il y a dans cette montagne des mines d'or et d'argent; et au midi du Nil est une autre montagne dans un desert, où est une mine d'émeraudes, la seule de cette espèce qu'on trouve dans le monde."—*Notices des MSS.*, &c. vol. ii. p. 31. In this singular account the Gebel Ollaki, or Golden Mountain of the present day—the Hemacuta, I conceive, of the Hindoos, east of Dakke, is misplaced to the north of Essouan. The emerald mine is in the desert, east of Edfou.

Syene still deserved the name of "the great, ancient, and populous city of Assuan," in Leo's time. "The citizens are exceedingly addicted unto the trade of merchandise, because they dwell so near unto the kingdom of Nubia, upon the confines whereof standeth their city; beyond which city Nilus, dispersing himself over the plains through many small lakes, becometh innavigable. Also the said city standeth near unto that desert over which they travel unto the port of Suachen upon the Red Sea, and it adjoineth likewise upon the frontiers of Ethiopia. . . . Here are to be seen also many buildings of the ancient Egyptians, and most high towers, which they call in the language of that country *Birba*. Beyond this place there is neither city nor habitation of any account, besides a few villages of black people, whose speech is compounded of the Arabian, Egyptian, and Ethiopian languages. These being subject unto the people called Bugiha, (Beeja,) live in the fields after the Arabian manner, being free from the Soldan's jurisdiction, for there his dominions are limited."—*Description of Africa*, p. 238.

NOTE 34, PAGE 191.

"And it was about the sixth hour, and there was darkness over all the earth until the ninth hour. And the sun was darkened."—
 'This obscuration of the sun was observed at Heliopolis, in Egypt, by Dionysius the Areopagite, afterwards the illustrious convert of St. Paul at Athens; who, in a letter to the martyr Polycarp, describes his own and his companion the sophist Apollophanes' astonishment at the phenomenon. Apollophanes exclaimed, as if divining the cause, 'These, O Dionysius, are the vicissitudes of divine events.' Dionysius answered, 'Either the

Deity suffers, or he sympathises with the sufferer.' And that sufferer, according to tradition, recorded by Michael Syncellus of Jerusalem, he declared to be the unknown God, for whose sufferings all nature was darkened and convulsed."—*Hales' Analysis of Ancient Chronology*.

NOTE 35, PAGE 194.

While Elephantine was the boundary city, Philae seems to have been the extreme out-post of the Roman empire, to the south.* Diocletian, after settling the Nubians, originally inhabitants of the great Oasis, along the banks of the Nile, built a strong fortress on the island, and, in the view of cementing a friendly alliance with them and the Blemmyes, who inhabited the interior country, erected "temples and altars," common to the Romans and barbarians, under the care of priests chosen from both nations. Narses, the Pers-Armenian refugee,† while stationed there as lieutenant of Justinian, received the imperial mandate to destroy the temple; he did so, says Procopius, and, throwing the priests into prison, sent the images of the gods to Byzantium.—*Procopius de Bello Persico*, lib. i. cap. 19.

NOTE 36, PAGE 194.

"Agatharcides, et Diodore après lui, ont parlé des mines d'or abondantes que renfermoient des montagnes situées dans ces cantons et sur les bords de la mer. Agatharcides rapporte même un fait intéressant à saisir, et qui prouve que ces mines étoient exploitées dès la plus haute antiquité. 'On y trouve encore aujourd'hui,' dit cet auteur, 'une immense quantité d'ossements humains, des outils, et des marteaux de bronze, dont on se servait autrefois, parce que dans les anciens temps le fer étoit très rare.' Ces mines n'ont point cessé d'être connues des Arabes. L'Edrisi et Abulfeda en parlent: le premier dit qu'elles produisoient de l'or

* Procopius makes a marked distinction between Elephantine and Philae: "νησον τινα εν ποταμω Νειλω αγχιστα πη της Ελεφαντινης πολεως ευρων ο βασιλευς ουτος, φρουριον τε ταυτη δειμαμενος εχυρωτατον . . . διο δη και Φιλας επωνομασε το χωριον."

† Not the illustrious conqueror of Italy, but "the brother of Isaac and Armatius, who, after a successful action against Belisarius, deserted from his Persian sovereign, and afterwards served in the Italian war."—*v. Gibbon*, c. xlv. n. 17.

et de l'argent. On les fouilloit encore de leur temps, mais elles commençoient à être moins abondantes, et il est probable qu'elles ont été négligées depuis. Ils nomment les montagnes où elles se trouvent, Ollaki ou Alalaki, et les placent à quinze journées d'Asuan, et à huit journées d'Aidab."—*Gossellin ; Recherches sur la Géographie des anciens*, tom. ii. p. 144.

NOTE 37, PAGE 203.

The Franks found the Ethiopian scourge a most formidable weapon at the battle of Ascalon:—"D'abord les Ethiopiens ou Azoparts qui, selon leur usage, combattent un genou en terre, s'avancèrent sur la première ligne, et attaquèrent vivement les Français Ces mêmes Azoparts, hommes horribles et très-noirs, portaient en outre des fléaux en fer, instrument terrible avec lequel ils battaient violemment les cuirasses et les casques, frappaient les chevaux à la tête, et dont les coups redoutables retentissaient d'une manière épouvantable dans les rangs des fidèles."—*Albert d'Aix, Hist. des Croisades*, livre vi. p. 366, ed. Guizot; or p. 287 of the *Gesta Dei per Francos*.

NOTE 38, PAGE 233.

Is not the word Re, "the Sun"—which, with the demonstrative article prefixed, became Ph're or Pharaoh, the hereditary title of the kings of Egypt—recognisable in most of the primitive dialects of mankind as implying a *king* or *prince*? We find *righ*, or *ri*, in the Celtic—*reich*, or *recks*, in the Teutonic languages; *rec* in Hebrew, *reis* in Arabic and Turkish, *rajah* in the East Indies, *eree* and *rhio* in Otaheite and the Sandwich Islands.—See *Armstrong's Gaelic Dictionary*, sub voce *righ*.

NOTE 39, PAGE 238.

"Armand," or Herment, is described by Father Protais as almost entirely abandoned, "les gens du pays ne m'en purent dire le raison; ils l'appellent *Balab* (bellad) *Mouse*; il y a encore un temple d'idoles, où l'on va par un chemin couvert et souterrain."

“ They call it in Arabic *Beled Muse*, or the country of Moses, because the Egyptians believe that Moses was born there.”—*Vansleb, Present State, &c.*, p. 243.

Bakoui speaks of Ghouft, the ancient Coptos, as follows :—

“ On y voit un bâtiment extraordinaire qui a 360 colonnes, chacune d’une seule piece. Sur le sommet de ces colonnes est une figure d’homme, ayant sur la tête un espèce de bonnet ou mitre (*calansara*). Le toit de ce bâtiment est de pierres, dont les extrémités posent sur des colonnes, et on n’y aperçoit aucunes jointures.”

The 360 columns are probably according to the usual Arab *façon de parler*, but there must have been some monument of uncommon grandeur at Ghouft even to account for such an exaggeration.

NOTE 40, PAGE 240.—Dendera.

“ Les gens du pays disent que ce palais a été bati par les demons, et que l’on voit la nuit plusieurs fantômes se promener dans ses ruines.”—*P. Lucas, Voyage au Levant*, tom. i. p. 109. Bakoui notices the *birbe* of Dendera, “ et autres bâtimens, qui sont autant de talismans,” and De Guignes, in a note on the passage, suggests the probability that the dread of the natives, lest the talismans should be discovered and injured, may contribute as much as the belief in concealed treasures to their aversion to the excavating propensities of the Franks.—*Notices des MSS.*, &c., tom. ii. p. 436.

NOTE 41, PAGE 244.—Memphis.

Rapid must have been the work of decay and destruction since the time of Abd’allatif :—“ Malgré l’immense étendue de cette ville et la haute antiquité à laquelle elle remonte, nonobstant toutes les vicissitudes des divers gouvernements dont elle a successivement subi le joug, quelques efforts que différens peuples aient faits pour l’anéantir, en en faisant disparaître jusqu’aux moindres vestiges, effaçant jusqu’à ses plus légères traces, transportant ailleurs les pierres et les matériaux dont elle étoit construite, dévastant ses

édifices, mutilant les figures qui en faisoient l'ornement ; enfin, en dépit de ce que quatre mille ans et plus ont dû ajouter a tant de causes de destruction, ses ruines offrent encore aux yeux des spectateurs une réunion de merveilles qui confond l'intelligence, et que l'homme le plus éloquent entreprendroit inutilement de décrire. Plus on la considère, plus on sent augmenter l'admiration qu'elle inspire ; et chaque nouveau coup d'œil que l'on donne à ses ruines est une nouvelle cause de ravissement. A peine a-t-elle fait naître une idée dans l'ame du spectateur, qu'elle lui suggère une idée encore plus admirable ; et quand on croit en avoir acquis une connoissance parfaite, elle vous convainc au même instant que ce que vous aviez conçu est encore bien au-dessous de la vérité."—*Relation, &c.*, p. 185.

Besides a beautiful monolithic shrine, called the Green Chapel, (destroyed in 1449,) he specifies idols that, whether their number or size be considered, surpass description ; " Mais ce qui est encore plus digne d'exciter l'admiration, c'est l'exactitude dans leurs formes, la justesse de leurs proportions, et leur ressemblance avec la nature. Nous en avons mesuré une qui, sans son piédestal, avoit plus de trente coudées : sa largeur, du côté droit au côté gauche, portoit environ dix coudées ; et du devant au derrière, elle étoit épaisse en proportion. Cette statue étoit d'une seule pierre de granit rouge ; elle étoit recouverte d'un vernis rouge, auquel son antiquité sembloit ne faire qu'ajouter une nouvelle fraîcheur."—*Relation, &c.*, pp. 185-7.

This, probably, was the statue of Sesostris discovered by Caviglia, or one of its brethren that stood before the temple of Vulcan.

Abulfeda, who flourished a century later, speaks of the antiquities of Memphis as considerable, but neglected and perishing ; the green and other colours, he says, remain as vivid as ever.

" On voit encore les ruines de cette ville," is all the notice Bakoui bestows on them at the commencement of the fifteenth century.

Furer, in 1565, asserts that two giants, or colossi of porphyry, originally elevated on lofty bases and sculptured with hieroglyphics, were then lying prostrate in Memphis—the name he gives to Old Cairo. " One of them," he says, " measures twenty feet from the head to the extremity of the torso,—the other wants the head. The Arabs will have it they are the images of the son and

daughter of Pharaoh. Very many other statues, a camel especially, of stupendous size, a lion, a sphinx, besides other animals, are seen there—all of red marble, but all broken and destroyed.” *Itinerarium*, p. 19. I am inclined to think he never saw them, and has misunderstood and misstated information similar to that which Radziwil obtained in 1583—that two colossi, twenty cubits high, each of one stone, most beautifully sculptured, both fallen, but entire—one of them representing a Pharaoh, the other a Queen, perhaps his wife—were lying on the ground five miles to the south of the Pyramids: he did not see them himself, he tells us, but received this account from persons at Cairo, who assured him they had.—*Hierosolymitana Peregrinatio*, p. 164.

Villamont, however, in 1590, speaks of these statues as an eyewitness. “En chemin,” he says—for the mummy-pits, nine miles from Cairo, “nous veismes sur le sable deux grands Colosses, que nous laissâmes pour suivre nostre chemin jusques à Zaccara.”—*Voyages, &c.*, p. 584.

“A city, great and populous, adorned with a world of antiquities! But why spend I time about that that is not, the very ruins now almost ruined? Yet some few impressions are left, and divers thrown down statues of monstrous resemblances; a scarce sufficient testimony to show unto the curious seeker that there it hath been. Why then deplore our human frailty?”

“ ‘Mors etiam saxis nominibusque venit.’ ”

“ ‘When stones as well as breath
And names do suffer death.’ ”

Sandys, p. 132.

NOTES.

EDOM AND THE HOLY LAND.

NOTE 1, PAGE 250.

“Camels are the ships of Arabia, their seas are the deserts.”—*Sandys*.

NOTE 2, PAGE 258.

“As this was the first time that I rid upon a camel, I could hardly endure the shakings, which the manner of walking of this fantastic beast caused me to suffer. I confess, when I saw myself upon this colossus, without any stay, lifted up in the air, seated upon an ugly beast; my feet in two ropes instead of stirrups, holding in my hand a cord made with the strings of a palm-tree, which cut my hands, it seemed to me very strange; I resolved, nevertheless, to overcome all these difficulties; and, instead of vexing myself, I made a sport of that which would have troubled other persons.”—*Vansleb's Present State of Egypt*, p. 196.

NOTE 3, PAGE 260.

“The tracks of the chariot-wheels are not only to be seen on the shore, but as far into the sea also as one's sight can reach; and if they should at any time be defaced, either by chance or through curiosity, the divine power immediately orders the winds and floods to restore them to their former condition.”—*Orosius*, quoted by *Baumgarten*, who confirms the tale, lib. i. c. 21.

NOTE 4, PAGE 261.

The El Tih, Ard El Tia, or Tiah beni Israel, lies, according to the best Arab geographers, between Aila and the mountains As Schorah, or Mount Seir, to the east, the Sea of Kolsum or Gulph

of Suez, to the west, Palestine to the north, and the Sinaïte promontory, to the south. "Major autem pars terrae hujus At Tiah arenis constat, alia loca salebrosa sunt: reperiuntur quoque palmae et fontes late dimanantes pauci."—*Abulfedae Tabula Syriae*.

This, in Ptolomy's time, was the country of the Saraceni, whose name (derived, Mr. Farren thinks, from the word *Sarakeen*, robbers—the epithet bestowed on them by their enemies) was afterwards popularly extended to the whole Arab race. Ptolomy distinguishes them from the Pharanitae, who then inhabited the country south of Gebel Tiah; but Procopius, four centuries later, extends their power over the whole peninsula, describing them as the ancient inhabitants of the Phaenicon, or palm-forest, extending to a great distance along the coast, and which their prince, Abocharubus, who dwelt there, had nominally given to Justinian.*

The monks of Sinai, in the day of their power, appear to have made good their claims as representatives of the Emperor; they are still in possession of extensive palm-groves, near Tor, but those of Wady Feiran—all, indeed, in the peninsula, are said to have once belonged to them.

Procopius, I may add, as well as Bakoui and others of the Arabian geographers, consider Aila as the eastern boundary of Egypt.

Sir John Mandeville gives a graphic description of the Bedouins, who inhabit the desert between Sinai and Jerusalem.

"Thei ben folke fulle of alle evylle condiciouns. And thei have none houses but tentes, that thei maken of skynnes of bestes, as

* "Sur les bords de ce golfe est un canton où se trouvent plusieurs sources, et que sa fertilité a rendu celebre: on l'appelle Phænicon, à cause des palmiers qu'il produit. Ces arbres forment un bois pour lequel on a le plus grand respect, parce que les environs, exposés à toute l'ardeur du soleil, sont brulans, sans eau et sans ombrage. . . .

"On y voit un ancien autel construit en pierres dures, et dont l'inscription est en caractères inconnus.

"Vers ces lieux on remarque des montagnes élevées de différentes couleurs: elles se prolongent pour former un cap, et s'étendent ensuite jusqu'à Petra, dans le pays des Arabes Nabathéens, et jusqu'à la Palestine."—*Periples combinés d'Agatharcides et d'Artemidore*. Gosselin, *Geographie des Anciens*, t. 2, p. 232.

M. Gosselin conceives that the palm-groves near Tor represent the ancient Phaenicon.

of camaylles and of other bestes, that thei eten ; and there-benethe thei couchen hem, and dwellen in place where thei may fynden watre, as on the Rede See, or elleswhere. For in that desert is fulle gret defaute of watre ; and oftentime it fallethe that where men fynde watre at o tyme in a place, it faylethe another tyme. And for that skylle they make none habitations there. Theise folk that I speke of, thei tylen not the lond, ne thei laboure noughte ; for thei eten no bred, bet zif it be ony that dwellen nyghe a gode toun, that gon thidre and eten bred som tyme. And thei rosten here flesche and here fische upon the hot stones azenst the sonne. And thei ben stronge men and wel fyghtyng. And there is so meche multitude of that folk that thei ben withouten nombre. And thei ne recchen of nothing, ne don not but chacen afre bestes, to eaten hem. And thei recchen nothing of here lif ; and therefore thei dowten not the Sowdon, ne non other prince ; but thei dar well werre with them, zif thei don ony thing that is grevance to hem. And thei han oftentyme werre with the Soudan ; and namely that tyme that I was with him. And thei beren but o scheld and o spere, withouten other armes. And thei wrappen here hedes and here necke with a gret quantytee of white lynnyn clothe. And thei ben ryghte felonouse and foule, and of cursed kynd.”—*Voiage and Travaile*, &c. p. 77, sqq.

“ They are of mean statures, raw-bone, tawny, having feminine voices, of a swift and noiseless pace—behind you, ere aware of them.”—*Sandys*.

“ Sono huomini molto piccoli, e di color leonato scuro, e hanno la voce femminile e li capelli lunghi, stesi, e neri. Sono veramente questi Arabi una grandissima quantità, e combattono continuamente fra loro.”—*Barthema, Itinerario*, 1503.

“ And they had hair as the hair of women,” is expressly stated in the prophetic description of the Arab locusts, (Rev. ix. 8,) a metaphor, by the way, which the Arabs apply to themselves, to express their numbers ; See *Antar*, vol. i. p. 6.—“ I must assail you, without further preparation, and I shall command these armies, numerous as the locusts, to assault you, and to grind you like grain, and to ride you like lions ;”—and again, vol. ii., p. 267 ; “ they call on *Antar*, and their spears are like a descent of locusts on a towering sand-hill.”

Every reader of ‘ *Antar*,’ that most vivid picture of the desert life of the Arabs, must have been struck by the constant reference

to their dwelling “in the presence of all their brethren,” as a motive of action.

NOTE 5, PAGE 265.

“Alvah—bois qui adoucit les eaux de Marah dans le desert. Moyse en avoit un morceau qui lui avoit venu par succession des patriarches depuis Noe, qui l’avoit conservé dans l’Arche.”—*D’Herbelot*.

NOTE 6, PAGE 266.

“The twelve fountains, and the seventy palm trees of Elim, are emblematical of the twelve apostles of our Saviour, and the seventy disciples, sent forth to scatter the sweet waters of the Gospel over the world.”—*Michael Syncellus, Chronographia. Script. Byz. v. 6, p. 102.*

NOTE 7, PAGE 269.—Sea of Edom.

“It is now an opinion generally received, that the Red Sea is the Idumean Sea, taking its name from Edom, or Esau, the Arabian patriarch; and Edom signifies red. The Arabians were, doubtless, the first navigators of the Indian Ocean, and, as they entered that sea by passing the straits of Babelmandel, they carried the name of the Red Sea, from whence they commenced their course, to the utmost extent of their discoveries. Hence the Indian Ocean received the title of red; and the Greeks, who translated every thing rather than introduce a foreign word, made it the Erythræan Sea.”—*Vincent’s Periplus*, vol. 1, p. 350.

NOTE 8, PAGE 273.

The early pilgrims, who travelled in immense caravans, were often in great distress from want of water; Baumgarten describes their sufferings most affectingly:—

“Travelling all that day and night, without eating, resting, or sleeping, we could not avoid falling off our camels, while we were half sleeping, half waking. A thousand strange dreams and fancies came into our heads, whilst hungry and weary, and we sat nodding on our camels. We thought we saw somebody reaching us victuals and drink, and putting out our hands to take it, and stretch-

ing ourselves to overtake it when it seemed to draw back, we tumbled off our camels, and by a severe fall found it a dream and illusion. We underwent the same hardship all the twenty-second and twenty-third days, mutually pitying one another's leanness and misery, and exhorting each other to patience and resignation."—*Travels*, lib. 1. c. 27.

Conf. Isaiah, c. 29. v. 8.

"As when a hungry man dreameth, and lo! he seemeth to eat,
But he awaketh, and his appetite is still unsatisfied;
And as the thirsty man dreameth, and lo! he seemeth to drink,
But he awaketh, and he is still faint, and his appetite still
craving;
So shall it be with the multitude of all the nations,
Who have set themselves in array against Mount Zion.

NOTE 9, PAGE 280.—Wady Feiran.

Baumgarten and his friends found a very different reception:—*

"That day, about noon, we came to a certain garden, where we were most barbarously used by the people who lived there. For, understanding that we were Christians, they came flocking out of their holes with a design to rob us; and, raising a hideous cry, threatened us with their dreadful bows and spears; some of them knocking us down off our camels, others taking us up, and protecting us from the fury of the rest. Our interpreter neglected us for some time, but did his part at last. However, we were five times knocked down, and had part of our provisions, that were not well enough hid, taken from us; and with great difficulty, after much

* "That morning," says Baumgarten, "a little before entering Wady Feiran, there was running by us a bitch with her puppies, that belonged to one of the Arabians, who happening to bring forth her litter there, and seeing us leave her, was horribly afraid to be left there alone with her whelps. For a long time she seemed to be deliberating, at last fell a howling most mournfully, and chose rather to save herself by following us, than stay behind and perish with her puppies."

George, the Carthusian Prior, the companion of Baumgarten, relates that, on their return from Sinai, the poor famished animal, after one bitter howl of recognition, made a meal on the remains of her offspring.—*Georgii Prioris Ephemeris*,—ap. *Pezii Thesaurus*, tom. 2, pt. 3, p. 493.

The "Ephemeris" seems to be the same work with Baumgarten's under a different name.

noise and severe drubbing, we were let go, upon payment of eight pieces of silver each man."—*Lib. i. c. 22.*

Belon, one of the best of the early travellers, gives a pleasing account of Wady Feiran in 1548. After entering the valley by a "grande ouverture entre moult hautes montagnes"—and praising the "beau ruisseau d'eau douce de claire fontaine," "la premiere eau droictement douce courante que nous eussions trouvé sur le chemin depuis le Caire," he proceeds as follows:—"Nous trouvâmes un grand village à l'entrée de ceste bouche, habité d'Arabes, nommé Pharagou, où il n'y avoit que trois ou quatre maisons basties; car les villages de ces pays-là ne consistent pas en maisons élevées, mais au nombre d'hommes qui habitent dessous les palmiers au descouvert ou dessous les rochers. . . . Le village de Pharagou nous sembla plaisant, au regard des pays que nous avions cheminé; car il y a bel ombrage de grenadiers, palmiers, oliviers, figuiers, poiriers, et autres arbres fruictiers. . . . Les hommes de ce pays sont contents d'habiter dessous les palmiers au descouvert, qui est la cause qu'ils sont de couleur d'olive. Et pour ce qu'il ne pleut guères sur eux, il leur suffit d'avoir leurs maisons faits de rameaux de palmiers, appuyées là en contre les troncs pour les defendre quelque peu de la vehemence du soleil."—*Observations, etc. c. 61, fol. 222 verso.*

NOTE 10, PAGE 287.

Poor Baumgarten found it otherwise. After delivering our letters from the Patriarch at Cairo, "and having a room assigned us, and eat something, when we would have gone to rest, we were surrounded by a crowd of Arabians, who put all sorts of sleep out of our mind. They broke into our room, seized our things as if they had been their own, and in a barbarous manner repeated a certain sort of word *tlus*, (*feloosh*?) which with them signifies money; with which having stopped their hellish mouths and greased their ugly fists, we shut our doors again, and composed ourselves to our much desired rest."—*Lib. i. c. 23.*

NOTE 11, PAGE 289.

"There is the Chirche of Seynte Kateryne, in the whiche ben manye lampes brennynge. For thei han of oyle of olyves ynow,

both for to brenne in here lampes and to ete also. And that plentee have thei be the myracle of God. For the ravenes, and the crows, and the choughes, and other fowles of the contree assemblen hem there every zeer ones, and fleen thider as in pilgrymage ; and everyche of hem bringethe a braunche of the bayes or of olyve, in here beekes, in stede of offryng, and leve hem there : of the whiche the monkes maken gret plentee of oyle : and this is a gret maravaylle. And sithe that foules that han no kyndely wytt ne resoun, gon thidre to seche that gloriouse Virgyne ; wel more oughten men than to seche hire and to worschipen hire. Also behynde the awtier of that Church is the place where Moyses saughe oure Lord God in a brennyng bussche. And whanne the monkes entren in to that place, thei don of both hosen and schoon or botes always ; because that oure Lord seyde to Moyses, Do of thin hosen and thi schon ; for the place that thou stondest on is lond holy and blessed. And the monkes clepen that place Bezeleel, that is to seyne, the Schadow of God. And besyde the highe awtiere three degrees of heighte is the fertre of alabastre, where the bones of Seynte Kateryne lyzn. And the prelate of the monkes schewethe the relykes to the pilgrymes. And with an instrument of sylver, he frotethe the bones ; and thanne ther gothe out a lytylle oyle, as thoughe it were a maner swetyng, that is noutheryche to oyle ne to baume ; but it is full swete of smelle : And of that thei zeven a little to the pilgrymes ; for there gothe out but lytille quantitee of the likour. And after that, thei schewen the head of Seynte Kateryne, and the clothe that sche was wrapped inne, that is zit alle blody. And in that same clothe so y-wrapped, the aungeles beren hire body to the Mount Synay, and there thei buried hire with it. And thanne thei schewen the bussche that brenned and wasted nought, in the whiche our Lord spak to Moyses, and othere relykes ynowe. Also whan the prelate of the Abbeye is ded, I have undirstonden be informacion that his lampe quenchethe. And when thei chesen another prelate, zif he be a gode man and worthi to be prelate, his lampe schal lighte, with the grace of God, withouten touching of any man. For everyche of hem hath a lampe be himself. And be here lampes thei knowen whan ony one of hem schalle dye. For whan ony schalle dye, the lyghte begynneth to chaunge and to wexe dym. And zif he be chosen to ben Prelate, and is not worthi, his lampe quenchethe anon."—*Mandeville*, p. 71, seq.

I transcribe a few lines from the Carmelite Le Huen's version of Breydenbach's pilgrimage, (in his 'Grant Voyage de Jherusalem,') as a curious specimen of the enthusiastic devotion of the chivalrous votaries of St. Catherine. "Quiconques est vray amateur, et devot orateur, culteur tres-reverend dicelle tressacre et bienheuree Vierge Katherine, estimera le labeur facile et plaisant pour l'amour d'elle, combien qu'il soit grief et terrible, laborieux et mal, facilement se passera et surmontera.—Helas ! et qui ne l'aymeroit, celle que Jhesus a tant aymee si chierement et enquise et poursuite des sa jeunesse pour en faire son espouse : une dame si belle, si noble, et si tres-fort prudente, la Vierge Katherine ! Noble de sang, plus noble de vertus—la fleur de noble sang dont elle proceda . . . Et combien que plusieurs soient trouves nobles et sages et plaines de vertus, Katherine emporte dignement le pris ; parquoy justement elle est à aimer et à venerer par toute excellence. Maintes dames saintes ont eu sapience, les autres eloquence, les autres constance ; cestecy a tout." . . . Tanaquil, (he proceeds,) Calphurnia, the Sibyls, Sappho, Centona, Angeriona, Isis, Ceres, Minerva—"toutes cellesicy ne vaillent pas ung clou ; car Katherine a la preeminence.—O vraye vierge et martyre venerande ! vierge des vierges ! gemme tres-luisante ! du Roy des Roys espouse glorieuse ! O une hostie à Jhesus precieuse, qui tes servans remeris noblement qui de bon cueur te servent devotement !"

NOTE 12, PAGE 291.—Monks of Sinai.

Frescobaldi, in 1384, found two hundred monks at Sinai ; one hundred and fifty resident in the monastery, each with a separate cell, the rest distributed between the chapel on the summit of the mountain, and the church of Santa Maria della Misericordia—as he names the convent of the forty martyrs.—*Viaggio in Egitto, &c. Roma*, 8vo. 1818, p. 20.

There were only one hundred, when Rudolph the knight of Framelynsperg was their guest, in 1846. All strangers, he tells us, were entertained three days, and on their departure each was presented with ten loaves, sufficient for ten days' subsistence.

They had then, as now, two small bells only,—hanging, at that time, in the principal church.

"Item, in prædicto monasterio, et capella Moysis, versus plagam Aquilonis, situm est templum Idolorum rotundum, ad quod nullus

Christianorum ingredi permittitur.”—*Itinerarium, &c. ap. Canisii Lectiones Antiquæ*, t. 4. p. 359.

NOTE 13. PAGE 292.

Mandeville, in 1325—Baldensel, in 1336—Frescobaldi, in 1384—Anshelmus, (author of a *Descriptio Terræ Sanctæ*), in 1509,—Furer, 1565—and all subsequent writers, identify Sinai with Gebel Mousa:—

Frameynsperg, 1346—Breudenbach, 1483—Baumgarten, 1507—and Belon, 1548 . . . with St. Catherine's.

Mandeville tries to solve the mystery: “Either mountain,” he says, “may be called Mount Sinai, since the whole surrounding country is called the Desert of Sin.”

The Arab geographers appear to comprehend the whole nucleus of the Sinaite mountains under the name of Tor Sina. The dual number, Sinein, is also used by them, “comme qui diroit les deux Sinai,” being “deux croupes séparées—Horeb et Sinai.”—*D'Herbelot*.

NOTE 14, PAGE 293.

Belon's good sense—a rare quality in the middle of the sixteenth century—refused credit to the legend. “Cestuy est le rocher dont sortit l'eau pour abbreuver les enfans d'Israel. Toute fois il est joignant un ruisseau courant qui vient de la sommité du Sinai. Cela nous fait penser ou que ce n'est pas celui que frappa Moïse, ou qu'il n'y eust encor point d'eau en ce ruisseau là: mais, sauf meilleur jugement, nous penserions que les Caloires devroyent monstrier le roc à la source de la fontaine, dont sort l'eau le haut de dessous la montagne.”—*Observations, &c.* p. 227.

Baldensel, in 1336, says that the water produced by the rod of Moses “is in the monastery.” Mandeville, a few years earlier, tells us, that “before the zett is the well where Moses smote the stone, of the which the water came out plenteously.” The legend, therefore, cannot have been attached to the stone in the El Ledja before the 14th century.

NOTE 15, PAGE 295.

The Cypress was regarded with peculiar veneration by the Greek

Christians in the middle ages, as the tree of which the shaft of our Saviour's cross was made :—

“ The Cristene men, that dwellen bezond the see, in Grece, seyn that the tree of the Cross, that we callen Cypresse, was of that tree that Adam ete the appulle of : and that fynde thei written. And thei seyn also, that here Scripture seyth, that Adam was seek, and seyde to his sone, Sethe, that he scholde go to the aungelle that kept Paradys, that he wolde senden hym oyle of Mercy, for to anoynte his membres with, that he myght have hele. And Sethe wente. But the aungelle wolde not late him come in ; but seyde to him, that he myghte not have of the oyle of Mercy. But he toke him three greynes of the same tree, that his fadre eet the apple offe ; and bad him, als sone as his fadre was ded, that he scholde putte theise three greynes undre his tonge, and grave him so : and he dide. And of theise three greynes sprong a tree, as the aungelle seyde that it scholde, and bere a fruyt, thorghe the whiche fruyt Adam scholde be saved. And whan Sethe came azen, he fond his fadre nere ded. And whan he was ded, he did with the greynes as the aungelle bad him ; of the whiche sprongen three trees, of the whiche the Cross was made, that bare gode fruyt and blessed, oure Lord Jesu Crist ; thorghe whom Adam and alle that comen of him scholde be saved and delyvered from drede of dethe withouten ende, but it be here own defaute.”—*Voiage and Travaile*, &c. p. 13, 14.

But the European superstition, by which the tremulous shiver of the aspen-leaf is accounted for, is still more beautiful :—

“ The blessed cross, whereon
The meek Redeemer bowed his head to death,
Was framed of aspen wood, and since that hour
Through all its race the pale tree hath sent down
A thrilling consciousness, a secret awe,
Making them tremulous, when not a breeze
Disturbs the airy thistle-down, or shakes
The light lines of the shining gossamer.

Child. (after a pause.) Dost thou believe it, father ?

Father. Nay, my child,
We walk in clearer light. But yet, even now,
With something of a lingering love, I read
The characters, by that mysterious hour

Stamp'd on the reverential soul of man
 In visionary days, and thence thrown back
 On the fair forms of nature. Many a sign
 Of the great sacrifice which won us heaven,
 The woodman and the mountaineer can trace
 On rock, on herb, and flower. And be it so!
They do not wisely that, with hurried hand,
 Would pluck these salutary fancies forth
 From their strong soil within the peasant's breast,
 And scatter them—far, far too fast! away
 As worthless weeds:—oh, little do we know
When they have soothed, when saved!”

FELICIA HEMANS.

NOTE 16, PAGE 299.

Justinian, says the historian Procopius, did not build the monastery on the summit of Mount Sinai—for no one can pass the night on it, on account of the continual clashing noises and other supernatural sounds heard there*—but far below it: and at the foot of the mountain he built a very strong fortress, and stationed in it a guard of soldiers to bridle the Saracens.—*De Aedificiis Dn. Justiniani*, lib. 5.

Would it not appear from this passage that the original monastery stood on the small plain, nearly on the site of the deserted Convent of St. Elias, and that, when the garrison was withdrawn, and the monks were left defenceless in the midst of enemies daily drawing the circle closer round them, they descended to, and occupied, the fortress? The existence of the church and the Mosaic portrait of Justinian certainly militate against this supposition; but what proof is there of their being contemporary with him?

* Marvellous sounds, of supernatural repute, still haunt the neighbourhood of Mount Sinai. One of the most romantic of these legends is that of the disappearance of a convent, situated to the west of the peninsula, between the Sinaite mountains and the Gulf of Suez, which no one in these modern times, says Breydenbach, has ever been able to discover, though the music of its bells may be heard daily on the breeze at the canonical hours. Some Arabs declared they had been within it, but that the moment they recrossed the threshold they lost sight of it.

This idea probably arose from the natural phenomenon of Gebel Narkous, or the Mountain of the Bell, on the coast north of Tor: a legend of “a bodiless hand ringing a bell” is attached to it by Sir Frederick Henniker. Burckhardt says that the Bedouins believe the sounds to proceed from a convent buried in the sand.

NOTE 17, PAGE 299.

“ On the eighteenth day, about sun-rising, we came down the west side of Mount Horeb by a very steep and dangerous way, and came into a valley betwixt Mount Horeb and Sinai, in which there was a monastery dedicated to forty saints,” and hence “ we began to ascend Mount Sinai.” “ At last our ascent grew so difficult, that all our former toil and labour seemed but sport to this. However, we did not give over, but, imploring the Divine assistance, we used our utmost endeavour. At last, through untrodden ways, through sharp and hanging rocks, through clefts and horrible deserts, pulling and drawing one another, sometimes with our staves, sometimes with our belts, and sometimes with our hands, by the assistance of Almighty God, we all arrived at the top of the mountain. The top of Mount Sinai is scarce thirty paces in compass ; there we took a large prospect of the countries round about us, and began to consider how much we had travelled by sea and land, and how much we had to travel, what hazards and dangers, and what various changes of fortune, might probably befall us. While we were thus divided between fear and hope, and possessed with a longing for our native country, it is hard to imagine how much we were troubled.”—*Baumgarten*.

NOTE 18, PAGE 302.

“ Le Mont Sinai est la plus petite des montagnes : mais elle est en tres-grande consideration aupres de Dieu par sa dignité, et par le rang qu'elle tient par dessus les autres montagnes.”—*Saadi, Gulistan, ap. D'Herbelot*.
